The Monetary Times P't'g Co., Ltd., Toronto

FOR SALE.

400 ACRES choice farm land for sale in the township of Romney, Co. of Kent, which is the Garden of Canada. These lots are situated on either side of the main road leading southwest from Tilbury Centre toward Lake Erie. A portion of the land is within two miles of the lake and a road mile north of a station on the new Detroit River and Lake Erie Railway. It is also about two miles south of Tilbury Centre on the Canada Southern and Canada Pacific Railways. The Grand Trunk is still one mile farther north. On either of these roads a person may reach Detroit in less than one hour. The soil, which is deep and rich, thoroughly drained, is covered with ash, elm, hickory, basswood, etc. Terms to suit purchasers. **EDWARD TROUT,** Cor. Church and Court Sts., Toronto.

DECISIONS IN COMMERCIAL LAW.

GOSNELL v. TORONTO RAILWAY.—The Toronto Railway Company have not under their charter and their agreement with the city of Toronto an exclusive right of way upon their tracks, or the right to run at any rate of speed they please to adopt or that the corporation please to allow. Whilst the cars of the company must not be wilfully impeded, the company are bound to recognize the rights and necessities of public travel, and so to regulate the speed of their cars that they may be quickly stopped should occasion require it. Where, therefore, there was some evidence that an accident was the result of a car running at an excessive rate of speed, the judgment of the Common Pleas Division upholding a verdict against the company was affirmed by the Court of Appeal.

MORTON v. COWAN.—A *bona fide* assignment or pledge for value of shares in the capital stock of a company incorporated under the Joint Stock Letters Patent Act, is valid between the assignor and the assignee, notwithstanding that no entry of the assignment or transfer is made in the books of the company: and, as only the debtor's interest in the property seized can be sold under their execution, the rights of a *bona fide* assignee cannot be cut out by the seizure and sale of the shares, under the execution against the assignor, after the assignment, according to the Court of Queen's Bench.

CARSON v. SIMPSON.—On 13th August, 1881, G., being the owner, mortgaged a biscuit factory, in which are certain fixtures (machinery), to the H. trustees. Two days afterwards, by a chattel mortgage, he mortgaged these fixtures and certain other machinery, not then on the premises, but which were subsequently placed upon the premises, as fixtures, to F. On the 3rd November he, by a chattel mortgage, mortgaged both sets of fixtures to the same trustees, and F.'s mortgage was paid off. On 24th June, 1884, he further mortgaged the premises on which the fixtures were, to H. M., became the assignee of a judgment against G. and of the mortgage to H., and commenced an action on both, making C., the present claimant, who had become a tenant of the premises previous to the making of the mortgage to H., a party, and in that action C., as such tenant, in November, 1887, redeemed M. and obtained an assignment of the H. mortgage. C. had also become the assignee of the mortgage to the H. trustees. On the 16th August, 1888, the sheriff seized the fixtures under an execution on the judgment against G. Held by the Court of Chancery, that, for the purpose of F. mortgage and the H. trustees' mortgage, there was a severance of the chattels from the realty, but at the date of the seizure the F. mortgage was at an end, and only the mortgage to the trustees existed; that the effect of the mortgage to H. was that the whole place, land and fixtures, was mortgaged to him in June, 1884, and thus an intention was indicated by the owner G. to reunite the property temporarily severed by the mortgage to the H. trustees, and the whole became land subject to that intermediate chattel mortgage, and when it expired, which it did in 1889, the temporary character of the personalty disappeared, and the increased value went to feed the landowner's title, and was not intercepted by the execution.

THE POSTAL TELEGRAPH CABLE CO. v. THE COUNCIL OF CHARLESTON.—An ordinance of a city imposing a license fee upon every telegraph company or agency doing business in the city, not including business done to and from points without the State or business done for the Government, its officers or agents, is not void as an interference with interstate commerce, according to the Supreme Court of the United States. Messages of a telegraph company sent and delivered entirely within the State are subject to its taxing power.

SARLLS v. UNITED STATES.—The plaintiff was indicted and convicted of introducing at the Choctaw Nation, in the Indian country ten gallons of lager beer, which the indictment averred were "spirituous liquors" and the introduction of which into the Indian country was made an offence punishable by fine and imprisonment by the Revised Statutes of the United States. The section in question is in the following terms: "No ardent spirits shall be introduced under any pretence into the Indian country. Every person (except an Indian in the Indian country) who sells, exchanges, gives, barters, or disposes of any spirituous liquors or wine to any Indian, &c., &c. It thus appears that the sole question presented for our consideration by this record is whether 'lager beer' is a 'spirituous liquor or wine?' and we (the Supreme Court of the United States) hold that lager beer is not a 'spirituous liquor or wine.'"

JUDGMENT FOR PLAINTIFFS

Some time ago, suit was brought in Nova Scotia courts by Hugh D. Cann and others, of Yarmouth, in that province, against Robert S. Eakins, E. Franklin Clements, Edgar W. Clements, Albert M. Perrin, Linus M. Childs, Boston and Newport capitalists, and it now appears that Mr. Cann and his friends have been successful in their contention. The action arose out of an amalgamation of the Yarmouth Gas Light Company and the Yarmouth Electric Light Company. The plaintiffs, who were shareholders, claimed that the defendants, who were the directors of the gas company, fraudulently procured a controlling interest in the stock of the gas company and then purchased the electric light plant, owned by themselves and their friends, at an exorbitant price, the result of which was that the interest of the plaintiffs in the stock and property of the gas company was wholly lost. A Halifax despatch states that judgment has been given in favor of plaintiffs for $48,600.

THE ACCUSED GETS OFF.

The general execration in which a "fire bug" is held will account for the interest taken in a case, now more than a year old, in which a farmer of the Eastern Townships of Quebec was arrested for arson. The adjourned trial was held at Sherbrooke on the 11th inst., before Judge Brooks. The accused was Hilaire Lamoureaux, a farmer of Coaticook, and the trial was at the Queen's Bench. The prosecution went to show that accused had on August 13th, 1893, set fire to a barn belonging to L. S. Durand, a trader of Coaticook, who had taken out an execution against Lamoureaux for an old debt. Lamoureaux having threatened that if Durand refused to settle he would lose a good deal more than the whole of the debt within twenty-four hours. The jury, after considering the whole of the evidence, which was chiefly circumstantial, gave the accused the benefit of the doubt, and accordingly brought in a verdict of not guilty. Mr. Lamoureaux may thank his stars that he got free, for appearances were decidedly against him. In Great Britain arson is punishable by whipping or a felon's death according to the circumstances of the case.

GEO. A. STIMSON

9 Toronto St. Toronto, Ont.

Mercantile Summary.

TWELVE years ago Thomas Roberts came from Omaha, Neb., and started a mattress factory in Toronto, having but little capital. His business grew, but he was always pressed for money, and lately became slow pay, although he claimed to have a surplus of $5,000. Now he assigns to W. A. Campbell.

ENGLISH papers tell of a new industry which has sprung up during the past year or two at Boxmoor, in Hertfordshire. It represents one more enterprise in which pulp made chiefly from waste paper figures as the raw material. The principal articles manufactured are barrels; drums to contain oils, paints and the like; pulleys for driving, and piping for a variety of purposes.

IN April, 1891, John Cameron succeeded A. McDonald & Co., at Edmonton, Alb. Two years later his statement showed a surplus in business of $16,500 and in real estate of $15,000. Since this he has not taken stock, but now finds that he cannot pay his creditors, consequently an assignee is in order.——An assignment is also made by James Jester, who is a lumber dealer at Icelandic River.——It is reported that R. E. Heamon, proprietor of the Electro-Plating Co., Winnipeg, has gone beyond our boundary.

Mercantile Summary.

AT Nanaimo, B.C., the premises of Joseph Guffalo, hotelkeeper, were burnt out last month. He claimed to have a loss of $3,000, and has assigned.——Barney Phillips, clothier, in Victoria, has been sold out by the sheriff, and it is reported that he has crossed the line. He opened his store in the early part of this year, and has had but a short career.

THE distressing news comes from Montreal that Mr. W. R. Elmenhorst, president of the St. Lawrence Sugar Refinery, killed himself last week. His body was found in his stable, a pistol clenched in the right hand. The deceased had suffered of late from sleeplessness, and was depressed over losses he had made in the States. He was a successful and able business man, and he was something more. In social, scientific and art circles he was welcomed for his acquirements and accomplishments.

AN offer of 50 per cent. is made to the creditors of Mondeau & Perras, hotelkeepers at Sudbury, whose failure we noticed a few weeks ago, and it will probably be accepted.——About two years ago Griffis & McDonald, dry goods dealers at St. Catharines, thought that they could improve their position by removing to the Royal City, Guelph, but shortly afterward they

Mercantile Summary.

dissolved partnership, Andrew McDonald continuing under the style of A. McDonald & Co. In March, 1893, Wm. McCardell invested $2,000 and became a partner in the firm. Sometime in the early part of the year they opened a branch store in Arthur under the management of McCardell, who had no experience in this line. This has evidently been a mistake, as they had not sufficient capital. They have assigned.

THE Orillia tailoring firm of M. J. O'Hearn & Co., who failed a fortnight ago, are offering creditors 50 per cent.——Just half this percentage is offered the creditors of A. Vandrick, grocer at Port Elgin. Certainly a very small dividend.——In July, 1882, McFarlane Wilson removed from St. Thomas to Peterboro', where he opened a crockery store, and succeeded in securing a good trade. But being ambitious to do still more, in the early part of the year he bought his brother's stock in Stratford, amounting to $6,000. In doing this he clearly overloaded himself, and is offering creditors 30 per cent. on liabilities of $18,000. Since this he has assigned.——About a year ago James Saunders rented an hotel at Windsor, but evidently did not prosper, as he was obliged to mortgage his furniture, etc., for $1,500. Now we hear that he has assigned.

Special Notice to you who Sell Oysters in Bulk

This season we are giving away to every purchaser of 1,000 oyster pails a very handsome window display card with the words "Bulk Oysters for sale here," printed in gold leaf on heavy morocco board, size 19x12, or a handsome chromo lithographed in fifteen colors. The retailer will find it greatly to his advantage to use these cards as a notice to the passing public that he is in the oyster business.

We are offering this special inducement to obtain your trade, as our facilities are 60,000 per day, and every pail guaranteed uniform, perfectly liquid tight and second to none on the market. Our prices are as low as any. Send in a trial order for your pails and get one of these cards.

Mercantile Summary.

D McLEOD, a hotel keeper at Kentville, N.S., who last year built a fine new hotel, has become embarrassed, and has made an assignment.

THE stock of the British American Starch Co. was sold at Brantford last week by S. G. Read, official assignee, for $5,000. The purchasers were D Lowrey and Geo Foster

A WELL-KNOWN general merchant in Sherbrooke, Wm J Millward, was found on Friday night last, lying on the bank of the Magog river in such a position that it is supposed he fell off the bridge. He died shortly after he was discovered.

IN one September week this year there were seventeen steamer loads of horned cattle, sheep and dead meat landed at Liverpool from Canada and the United States—five from the Dominion and twelve from the States. The number of cattle was 7,266; of sheep, 2,247; of beef, 20,567 quarters. And this in the face of glutted markets and unremunerative prices.

THE failed firm of Beland & Martineau, lumber merchants, Quebec, have made their creditors an offer of 10 cents on the dollar. Their liabilities direct are $76,000, privileged $2,000, secured $13,500, indirect $24,000, making a total of $115,000, while their apparent assets are some $60,000 or $70,000 less. Inasmuch as they claimed a large surplus only last December, explanations as to the very serious discrepancy would be in order.

Type Presses Printing Material
GWATKIN & SON . . . . .
57 Bay Street
Toronto

A WEEK or two ago we noted the failure of Lemay & Kyle, lumbermen, Vancouver, B.C. Since then they have assigned.

KAMLOOPS, B.C., has decided to hold an annual exhibition of its own, and a committee, consisting of Messrs. J. R. Hull, W. J. Roper and J. T. Edwards, has been appointed to take steps to incorporate an exhibition company.

APPLICATION has been made for an order to wind up the Standard Card and Paper Company of Montreal, whose factory is at St. Johns. The concern has been in deep water for a year or more, and the factory closed down for some months.

LETTERS patent are being applied for to incorporate the Bishop Engraving and Printing Company of Montreal. Capital stock is to be $50,000. The applicants are Messrs. John Murphy, Samuel Finley, E. F. Ames, H. Ames, G. F. Bishop, and Hugh Henry.

AARON SWEET & Co., general merchants at Winchester, Ont., whose failure has already been noted in these columns, have amended their offer of compromise to one of 50 cents on the dollar, half to be paid in cash and half on time, secured. This offer will likely carry.

JOSEPH PARISEAU, of Plantagenet, Ont., has assigned. Originally a veterinary surgeon at Montreal, he began storekeeping here about seven years ago. Last fall he built a saw mill at St. Jovite, Que., which probably has had a good deal to do with his failure. He owes $7,000, and claims a surplus of $2,000.

A MUCH criticized failure is that of T. Ross, of Amqui, Que., who last spring claimed a surplus of some $7,000, and at a meeting of creditors held a few days ago showed only an apparent surplus of $1,500. He was questioned with regard to the discrepancy, but could make no satisfactory explanation; an offer he submitted of 75 cents, in five payments, was laid over.

THE Berlin and Waterloo Hospital is now in process of erection, and will be nearing completion when winter sets in. It is situated on the Green Bush property, which is midway between Berlin and Waterloo, and with its fifteen acres of ground, was handsomely donated by James E. Seagram, of Waterloo. Of course it will have all the more recent improvements.

FROM Quebec city comes again quite a fair contribution to the weekly failure list. G. Roy, tanner, who has been quite heavily interested in recent shoe and leather failures, notably those of Bilodeau & Lamontagne, and Cimon & Vignola, has called creditors together, and made a proposition to pay 25 cents on the dollar.——J. Chavanel & Co., fruit jobbers, have made an offer of 5 cents on the dollar, liabilities being $3,500.——E. Picard, grocer, seeks a composition at the rate of 20 cents from his creditors, who are mainly local.——A demand of assignment has been made upon Noel & Co., hardware dealers. Mr. Noel is reported to have been twice unfortunate before.——Daly & Co., provision merchants, whose assignment we noted a fortnight ago, are now making an offer of 50 cents on the dollar.

WE regret to have to note the suspension of McIndoe & Aird, leather merchants, Montreal, which was announced on Saturday last. They were unfortunate in being interested pretty heavily as creditors in several shoe failures last year, but worked along courageously, and would probably have been able to pull through but for the continued depression in the leather market, and the further recent failures in the shoe and leather trade in Quebec and here. The direct liabilities will not much exceed $25,000.

IT is pretty evident, from the number of extensions or compromises asked and the number of downright disasters among retailers in Canada, that the past year has been a hard one for traders with slender capital. While one does not feel like sympathizing with the fools who leave farms or trades to join the overcrowded ranks of storekeepers, one cannot help feeling sorry for established merchants, who feel the pinch of competition and the increasingly difficult conditions of business. Mr. John R. Monro, of St. Catharines, who was at one time a prosperous merchant, has felt more than once "the stings and arrows of outrageous fortune," but by opposing has not yet ended them. In other words, he has again come to a stop. Whether he can continue further with a chance of success, is a matter for the judgment of his creditors, who appear not unkindly disposed.

IN September, 1891, Jos. Armstrong opened a dry goods store in Peterboro', with a cash capital of $3,000. Twelve months ago he claimed to have a stock of $8,000, half of which was paid for. No doubt he bought freely and from too many houses; hence he is already in trouble, and his solicitor is trying to arrange a settlement. — One of the largest cattle dealers in this province is James Eakins, of Port Hope. During the past three years his assets have been steadily depleted, the cattle export trade being a losing one, as we know, and now he is n financial trouble. A few years ago he was estimated to be worth over $100,000, but he finds to-day that his cheques at his own bank are not always honored. His principal liabilities are due to three different banks, one of which has issued writs for $1,700.

THE general stock of W. Nightingale, at Alliston, realized 50 per cent., and the dry goods stock of Tod & Co., of Bowmanville, 70 per cent.——Fifty cents in the dollar was realized on the clothing stock of A. Paul & Co., of Sudbury.

FOR many purposes for which an accurate time-keeper is required clocks regulated by electricity are coming into vogue. Such a system is of especial value on great railways, and several of the Western United States roads are using them, regulated from the master clock at the head office of the road. Mr. James E. Ellis, of this city, has made and erected on Toronto street in this city a standard clock, with an 8-foot pendulum, which is regulated from Toronto Observatory. He proposes, we understand, to set up smaller clocks in the premises of those who require them in city or country, and to charge an annual rental for them. Their mechanism will be electrically controlled from the central clock, and he purposes making arrangements with the Great North-Western Telegraph Company for that purpose. The system he uses is known as the Howard electric clock system, and is highly spoken of by electricians.

A NUMBER of mercantile blocks have been erected recently in Galt. Among the most prominent of these is the substantial building of the Gore District Fire Insurance Company on the corner of Ainslie and Main streets. It has three floors, and a handsome cupola rises in front of the main entrance beyond the third floor. The entrance is by a neatly designed archway with marble columns and other embellishments. The interior will be fitted up to contain a board room and other offices for the business of the company. When it is provided with all the modern improvements, it will be among the best appointed of the kind in Ontario. Adjoining it is the Struthers new block of buildings, having fine stores on the ground floor and offices on the second and third floors, and with plate glass front also. Then lower down is the Buchanan, another good block of buildings, nearly completed. Further up on Main street is the new Iroquois Hotel, which will be quite an ornament to that part of the town.

PROBABLY no class of manufacturers have felt the stringency of the money market and the severe competition in their line of trade more than those producing electrical machinery. Since the early part of the year T. W. Ness & Co., of Montreal, and the Reliance Electric Co., Waterford, have failed. They are now followed by the Kay Electric Works in Hamilton. This factory was started by Thomas Kay about five years ago, and two years later S. Douglas was admitted a partner and became largely responsible for the business management. They now claim to have assets of $14,000. and liabilities about $9,000. It is thought that one of the factors of their non-success is lack of system. They have found difficulty in obtaining final payment of their contracts, and have thus been chronically short of funds. Mr. Douglas attributes their trouble to the cutting of prices by rival firms making electric motors A meeting of their creditors will be held to-day in Hamilton.

BELOW is a group of Montreal failures of minor import: Godin & Co., a grocery concern in a small way, have assigned, owing $1,300. ——B. Lussier, dealing in hay and feed, has been served with a demand in insolvency.—— L. Vermette, contractor, has turned over his estate to the assignee. He has assets of about $3,000, and owes $5,300.——Prevost & Ouimet, dry goods, who failed a couple of weeks ago, have been able to arrange liabilities of $9,300 at 55c. on the dollar.——E. Roy, plumber, recently failed, makes an offer of 15 per cent., in three instalments of 4, 8 and 12 months, on liabilities of $8,145.——N. Turcot, also in the same line, has made an assignment, with liabilities of $5,570.——B. D. Johnson & Son, shoes, in which concern [Mrs. B. D. Johnson was the sole partner, have had to assign.——A. Descary, tobacco, lately reported failed, has obtained his creditors' signatures to a deed of composition at the rate of 25c. on the dollar, cash.——L. A. Picard, dry goods, in the western suburbs, is offering 70c. on liabilities of $4,389; apparent assets shown, $7,090.——C. Chouinard, a hardware dealer in the same district, offers 25c., but creditors think he should pay 50c.

QUEBEC province failures for the week, not elsewhere noted, are as follows: S. Magnant, a country printer at St. Jerome, is in difficulties. He owes $1,500, and has but small assets.—— J. Dufresne, general dealer at St. Emelie de l' Energie, has assigned after an uphill struggle of several years. He has been assisted by his brother, comptroller in the Montreal corporation, who is the principal creditor.——C. A. Hunt, grocer, &c., West Brome, is in difficulties. Assets are said to be only $800, while liabilities are about $1,100.——Soupras & Demers, of Chambly, dealing in shoes and clothing, owe about $2,400, which they cannot provide for, and have assigned.——L. A. H. Hogle & Son, a general store firm of some prominence in past years at Pike River and Philipsburg, have assigned, and a meeting is called for the 20th inst. The senior partner died a year or so ago, and the firm has been much in default since, and frequently sued. Liabilities are not yet ascertained.——S. E Adams, a country trader of some prominence at D'Israeli, has failed, owing $9,300. He shows nominal assets of $14,000, but proposes to pay only 50 cents on the dollar.——W. Langlois, doing a general store business at Barachois de Malbaie, on the Gaspe coast, has assigned on demand. He has been slow for some time past.——W. Talbot, formerly a dry goods clerk, and in the clothing and shoe line at Sherbrooke for about two and a-half years, has just assigned, with an indebtedness of $6,600.——C. Gelinas, general merchant at St. Paulin, whose failure has already been noted, makes an offer of 40 cents on the dollar.

SHIPPING OF DIFFERENT NATIONS.

It is a matter of interest to note the number of vessels and amount of tonnage owned by the leading maritime nations of the world. According to Lloyds' register book, the United Kingdom owns 9,333 steam and sailing vessels of 100 tons and upwards, the total tonnage of which is 11,563,997. The British colonies own 2,526 vessels, the tonnage of which is 1,224,285. The United States own 3,285 vessels with a total tonnage of 1,964,359. Austro-Hungary owns 347 vessels with a total tonnage of 298,674 Denmark owns 844 vessels with a total tonnage of 323,801 Holland, 514 vessels tonnage 442,071 France, 1,174 vessels tonnage 1,052,022 Germany, 1,819 vessels tonnage 1,735,683 Italy, 1,358 vessels tonnage 796,247 Norway, 3,804 vessels; tonnage, 1,710,313 Russia, 1,190 vessels tonnage 492,202 Spain, 877 vessels; tonnage, 564,404. Sweden, 1,479 vessels, tonnage, 505,711

THE SITUATION.

A few weeks ago Australians were promising themselves a future market for their mutton in Canada, and the price at which it was said this meat could be landed in British Columbia seemed to defy domestic competition. Some of the Australian delegates to the late Intercolonial Conference expressed surprise that Canada did not pay more attention to raising sheep. It now appears that our farmers had, for some time, been silently making the experiment suggested, and already eighteen hundred live sheep have been shipped to England. The animals sold for four shillings a stone of 14 lbs., and henceforth the live sheep will get a preference in the English market over Australian mutton. A year or more has passed since the Ontario Government gave practical proof that the shipment of sheep to England could be made at a profit, though the experiment was made under circumstances which involved unusual difficulties. The lambs were brought all the way from Prince Edward Island to Guelph, made ready for the market and sent out to England, and at a profit, if no mistake was made in the estimate of the cost of keep on the official farm. The trial probably stimulated sheep culture by farmers for exportation. Now that the way has been opened to an export trade of sheep to England, it is probably destined to reach considerable proportions.

Imperial Federation is to enter on a new phase of the speculative period. A scheme has been proposed by which public men will lecture in favor of the project both in Great Britain and the colonies. Even Mr. Gladstone gives Imperial Federation a passing notice; but the stumbling block in his way is that he has not been able to see how it is to be realized without carrying with it some form of covert protection. Perhaps some of the lecturers will attempt to enlighten his darkness. Unless the scheme can be divested of the notion of a minimum tariff for the empire, and a maximum tariff for foreign countries, Mr. Gladstone's objection will remain, and it will be shared by large numbers. If diversity of tariffs is to form part of the plan, what remains as the peculiar province of Imperial Federation? There is the question of the general defence of the empire, on which it would not be easy to form a policy that would meet the consent of all its parts in which self-government has been fully developed. The movement shows the unrest of individuals more or less in search of distinction, notice or notoriety. Whether they as lecturers can move the mass to think as they think, remains to be seen; until the masses do move Imperial Federation will remain in the distance.

Some contracts on the Toronto, Hamilton and Buffalo Railway are reported to have been let, on the section between Brantford and Hamilton. They cover grading, trestles, culverts and masonry. With what has been done before near Brantford, they would complete the distance between that city and the westernmost station at Hamilton. The contracts are to be completed early in December. A contract for ties and telegraph poles has been let, and many of them are now on the way, so that by the time the grading is done it may be possible to begin to set the ties. This section is to be a single track; between Hamilton and Welland it will be double. The work has received a new impetus from bonus of $250,000 granted by Hamilton. Toronto has not granted any bonus and is not likely to do so. Some countenance is being given, in and near Hamilton, to a projected radial electric railway from Hamilton to Guelph *via* Waterdown. A Boston syndicate of capitalists is relied on to do the work, not, however, without local assistance in the way of bonuses. The suburban electric railway, already utilized to a considerable extent in the United States, is destined to play a great part in the development of local traffic, and it is difficult to say whether it will be most useful in the carrying of freight or passengers.

Affairs in the East do not bear a smiling aspect. The time has not come when the powers will consent to intervene with a view to stopping the war between China and Japan. Great Britain is reported to have proposed this course to the European powers, not one of which gave a favorable response. The war must now go on. Russia may find reasons for interfering on her coterminous frontier with China. When the time for the intervention of the powers does come, it remains to be seen whether the great powers can agree to intervene. In Afghanistan troubles appear to be looming up. The life of the present Ameer hangs by a thread, and when it comes to a close rival claimants to the throne are pretty sure to stir up strife, and if that should happen there are British subjects at Cabul whose lives would not be safe. A previous British expedition to Cabul is surely the most doleful episode in the history of the Empire. Of 17,000 men sent out only one survived to tell the tale. Afghanistan is one of the points at which Russia and England come into contact; and the next occupant of the Afghan throne is morally certain to come under the influence of one or the other. When the Ameer takes a foreign pension, he nevertheless struggles hard to maintain his independence in connection with it, and his people have an angry jealousy of foreign interference. A report of the death of the Ameer has been published, and he is said to have admonished his son to continue the existing friendship with England.

Some time ago Canadian fishermen took alarm at the supposition that Norway had obtained an advantage over them in the free admission of fish to Cuba and Porto Rico. Great stress was laid on the value of the latter market, the presumed loss of which was deplored. The attention of our Government was called to the alleged grievance, with the result that the Colonial Department in Downing street sends to Ottawa a communication from the British Minister at Madrid, stating that our fish will enter the Spanish Antilles on precisely the same terms as that of Norway. This favorable state of the case is due, we take it, to the operation of the "most favored nation" clause in a treaty sub-

sisting between Spain and Great Britain. What is gained is that our codfish enters these Spanish colonies free, Norway having obtained free entrance for herself. Inquiry was made in Madrid whether haddock and hake would come under the general head of codfish, and the answer of the Spanish Customs department is that they do not. Free admis sion of our codfish ought to give astimulus to the trade which, with Porto Rico, is already considerable.

The recent tariff legislation at Washington had the effect of abrogating the commercial treaty between the United States and Brazil. But as there was an irregularity connected with the abrogation, the anomaly presents itself of the treaty being still in force in Brazil, though since the new tariff went into operation Brazilian produce imported into the United States has been paying duties outside of the treaty. And now, owing to the executive not giving to Brazil the required three months' notice of abrogation, New York merchants who have been paying duties on Brazilian goods which would have been free under the treaty, threaten to sue the Government for their recovery. It is easy to see how notice failed to be given. Nobody could tell three months in advance of the passage of the tariff bill that one effect of its operation would be to abrogate the treaty with Brazil, and the moment the bill became law, abrogation was effected. Want of notice has operated injuriously on Brazil, and it remains to be seen whether she can obtain any redress.

THE WHEAT MARKET.

In view of the conditions which have so long kept wheat and flour at a price lower than the world has known for centuries, and which seem likely to continue, it may be of interest to devote some attention to these staple articles of food consumption. The reason of the low price of these breadstuffs is broadly that the average wheat crop of the world in 1891, 1892 and 1893 was from eight to ten per cent. higher than in the preceding three years. That is to say, the average world's crop of the years 1888, 1889 and 1890 averaging, according to the most trustworthy estimates, 2,190,000,000 bushels, that of the succeeding three years was no less than 2,390,000,000 bushels, while the average estimated world's consumption was only 2,180,000,000 bushels. And therefore there was a great accumulation of stocks of wheat all over the world at the end of last year. Not only this, but the estimates of the world's crop of the present year range from 2,416 million to 2,440 million bushels, the lesser of which exceeds by 136 millions the probable consumption.

The London *Economist*, in an article of some length, discusses the anomalous situation of affairs. The increase, as that journal shows, was a great deal more than the highest guess at the increased quantity needed for consumption. Indeed, if it had not been for the deficiency of the rye crop in some of the great producing countries, the accumulation would have been enormous. The writer proceeds to say that the consumption of the current year cannot be expected to be more than average "unless a great allowance is made for the expected use of wheat for feeding live stock as a substitute for maize, of which there is this year a great deficiency." Touching this matter of a short crop of Indian corn, a gentleman who traversed, in August, the northern parts of Indiana and Illinois, and the eastern portion of Iowa, informs us that the common experience in scores of fields he examined or was told of was "a half crop." Beerbohm thinks the corn crop of 1894 must be 404,000,000 bushels short of the average of the three previous years. Another important circumstance bearing on the probable future price of wheat is the fact, as alleged by the *Economist* writer, that a considerable portion of the wheat grown in England, France and other parts of Western Europe, will be unfit for flour. But it is added, "the extent to which this will reduce the wheat surplus is so entirely conectural that the contingency has no appreciable effect upon the markets."

The price of wheat in Chicago to-day is, say, 51½ cents per bushel for No. 2 spring; it is 50 cents at points outside Toronto for No. 2 spring. The London quotation on September 29th, of English wheat, was 19s. 8d. per quarter, equal to, say, 59 cents. No such low price for this cereal has been recorded, it appears, since the sixteenth century, at which period money in relation to commodities was entirely out of parity with its present value. A hundred and fifty years ago, say, in 1743 and 1744, the yearly average price is stated to have been 22s. 1d. per quarter, which is nearly 66 cents per bushel. During the half century, from 1846 to the present time, the lowest weekly recorded average has been 24s. 8d., which was in March last year. Previous to that the record went below 28 shillings only once in the fifty years; it touched 27s. 11d. Continuing, with reference to damaged wheat in Britain and its price, our contemporary says that wheat is being sold as low as 14 shillings per quarter—about 42 cents per bushel—in country markets, and that large quantities have changed hands at from 16 to 18 shillings. Foreign dry wheat is low beyond precedent, Argentine cargoes being offered at 19 shillings, and American red winter may be bought at 21 shillings by the cargo. "Last week's average price was 4s. 11d. per quarter less than that of the corresponding week of 1893; it was 8s. 8d. less than in 1892, and 14s. 7d. less than in 1891." Moreover, as showing how remarkable is the decline in this cereal, the price last week (say on 22nd September) "was 3s. 9d. lower than the average price of barley, which weighs 80 pounds per quarter less, only 4s. 6d. above the extraordinary low average for oats, which weigh 168 pounds per quarter less, and about 1s. 4d. lower than that of maize, equal in weight." The present London market value of wheat is ·49 of a penny per pound, compared with ·70 for barley, .58 for oats, and ·53 for maize.

The overproduction of wheat in the United States of recent years is the more remarkable when the wheat area of that country has decreased from 39½ million acres in 1884 and 37½ million acres in 1891-3, to only 33 million acres this year, as estimated by the Bureau of Agriculture. It is proper to bear in mind, in passing, that the yield per bushel of 1891 and 1892 was very extraordinary. In the Argentine Republic we have a marked contributor of late to the world's wheat supply. That country exported some 16 million bushels in 1891 and 36 million in 1893, while this year, if estimates may be relied on, she is supposed to have 25 to 30 million to sell. Her wheat-growing area has been multiplied nearly tenfold in a dozen years, and the cheapness with which she can grow wheat is attributed to the unusual industry and economy of the more recent Italian immigrants, who work early and late for a bare subsistence.

The conclusion of the *Economist* is that English and Scotch farmers cannot grow wheat at a profit for any such price as 20 shillings per quarter, or say 60 cents the bushel. A thrifty Scotch farmer in Essex, Great Britain, a few years ago gave figures to show that he could not grow it at a profit for 30 shillings: "It is incredible that the world can long be supplied with wheat at present prices; and unless a series of 'lean years' occurs to cause a recovery in value, it will in all probability be brought about by a considerable reduction of the wheat area."

NEW INDUSTRIAL COLONY.

General Booth has come to Canada on a business mission. His intention to establish an industrial colony in some outlying part of the British Empire has long been known. He first turned his eyes to Cape Colony as the land of promise, and afterwards made enquiries in Western Australia, Queensland, and New Zealand. But the several governments, influenced by the labor vote, scowled upon his enterprise. He now comes to Canada to spy out the land and see what, if anything, can be done here. His emigrants will consist largely of paupers, though he is careful to say that they are not all of this class, but comprise no less than 8,000 serving maids in London alone. General Booth has a depot for the collection and humanization of paupers in Essex, on which nearly half a million ($425,000) has been spent. He must be extremely sanguine when he expresses the hope that an equilibrium between the receipts and the expenses will soon be reached. The poor law guardians pay him $1.25 a week for the keep of every poor person whom they place at the Essex Depot, and they are to pay $60 each for all who pass to some colonial settlement, out of England, under General Booth's direction. The emigrant is expected to repay this amount, and the money, when received, is to go to pay the passage of some other emigrant. In this way, the expectation is, the emigration will become self-propelling. This is the weakest point in the scheme. If General Booth can get the money back, he will do what nobody has ever done before under similar circumstances. The expectation is morally certain to be disappointed. Bear in mind, too, that the paupers are to be morally reformed and taught to labor in a regular way at the Essex Depot, on which 1,000 men are expected soon to be placed. If General Booth can succeed, even partially, he will achieve a great and valuable result. But he had better move cautiously, and make his experiment on a more modest scale than is implied by the survey which he has made in Western Australia of 8,000 square miles of land.

SELLING GOODS WITHOUT PROFIT.

Some of our subscribers tell us that they are troubled by their neighbors who persist in underselling them. That goods which ought to bear a profit of twenty per cent. at least, in order to enable a retail merchant to live, are regularly sold at ten per cent. advance. And they ask us how it is to be cured. Well, it seems that good advice will not cure it, ridicule does not cure it, threats have not cured it, for the habit is as rife as it was ten or twenty years ago. One man is selling cotton for a quarter cent a yard profit; another sugar nominally at an advance of ten cents the hundred pounds; a third sells nails at such a fractional advance over cost, that when he weighs out a keg full into ten or twenty different parcels, the extra weight overbalancing the scale destroys his profit.

These traders forget that while they are selling at such slight profits, store rent, interest, taxes, insurance, fuel, light and wages are running on *just as if they were making proper profits*. And it is further to be remembered that, after they get enough profit on their sales to pay all these outgoes, they themselves and their families have still to get food and clothing. The prudent storekeeper, and the one who is likely to succeed, is he who keeps in view the proportion of his necessary expenses, and who resolves to get a sound profit, if possible, on everything he sells. His customer, of course, wants merchandise as cheap as he can get it. His competitor, of course, will try to get some of his trade by under-cutting. But these facts do not justify a merchant in selling goods habitually under cost. And when we say "under cost" we do not imply that the man necessarily sells a print for 10 cents that cost him 10½. But if he sells print at 11 cents that cost him 10½ and other goods in proportion, he is losing money, because, out of that half cent a yard profit has to come the expenses of his business and the living of his family.

If the timid man, who sells goods for nothing because he is afraid of offending his customer on the one hand and of combatting his opposition shopkeeper on the other, wants to know our opinion of his duty, it is that he had better get out of business. Storekeeping needs, among other things, pluck. It is not without reason that an American writer has said: "The man who habitually undersells runs in a crooked groove at every turn of which bankruptcy is written." It ought to be tolerably plain that merchandise sold habitually below cost is not likely to be paid for in full.

FARM ASSETS IN ONTARIO.

The annual report for 1893 of the Bureau of Industries for the Province of Ontario, parts 1 to 5, has been published. Part 1 refers to the weather and the crops; part 2 to live stock, the dairy and the apiary; part 3 to values, rents and farm wages; parts 4 and 5 to loan and investment companies and chattel mortgages. We present forthwith some statistics from part 3, concerning values of farm lands, rents and farm wages.

The value of all classes of farm property is $970,361,070, which is a decline of $9,616,174, or in round figures ten per cent. compared with the preceding year. The loss has been chiefly in the value of farm land, which has decreased by $13,164,110, and there has also been a decline of $1,480,598 in the value of live stock. On the other hand there has been a rise in the value of farm buildings of $4,545,680, while implements are worth $482,899 more than in 1892. The Lake Erie counties and the Northern Districts are the only groups having an increase in total value. Every group, with the exception of the Northern Districts, shows a decline in the value of farm land, while every district experiences an improvement in the value of buildings. In implements the Lake Ontario and East Midland groups fail to equal their own records of the previous year, and in live stock the St. Lawrence and Ottawa counties and the Northern Districts are the only groups which show an increase.

Taking the figures of last year and comparing them with those of 1892, and the average of the last twelve years, the decline in the value of land has been from $615,828,000 in 1892 to $602,664,000 last year. But the values of 1892 were less by $14,000,000 than those of the average of twelve years, which was $629,947,000.

On the other hand, the aggregate value of farm buildings, farm implements and live stock has shown a marked increase, namely, from $864,148,000, which was the figure in 1892, to $867,696,000 last year, or the still more marked gain from the average of the twelve years of $33,182,000, which is between nine and ten per cent. A table will show this somewhat in detail:

	Buildings	Implements.	Live stock
Av. 1882 to 1893....	$181,783,963	$48,481,543	$104,248,851
Year 1892....	195,644,361	51,003,020	117,501,495
" 1893 ...	200,189,888	51,435,919	116,070,902

	Farm land	Total farm property
Av. 1882 to 1893.....	$629,947,011	$964,461,368
Year 1892.....	615,828,471	979,977,244
" 1893.....	602,664,361	970,361,070

The particulars of the wealth of Ontario farmers in horses, sheep, hogs, poultry and bees, is thus given in the return:

1893, value of	Horses	$50,527,472
" "	Cattle	47,718,025
" "	Sheep	9,016,118
" "	Hogs	6,622,129
" "	Poultry	2,187,158
	Total	$116,070,902

Bees and apiary outfits are further stated at a value of $1,162,945.

The rural area assessed in Ontario now amounts to 22,959,280 acres, an increase of 312,564 acres compared with the previous year. There are 12,111,564 acres cleared, or 123,138 more than in 1892. An increase is observable in the figures for woodland and for swamp and waste land, although the per cent. of cleared land reaches 52.8, or .4 higher than in the preceding year.

There is an increase in the acreage of pasture in every group of counties, but while the total area is 120,140 acres more than in 1892, it fails to reach the figures for 1891 by 39,101 acres. There is now 22.1 per cent. of the cleared land of the province in pasture, an increase of .7 over the preceding year. The highest percentage is found in the St. Lawrence and Ottawa dairy district, where the figures are 29.1, while in the Lake Ontario group the figures reach only 15.6.

The total acreage under field crops in 1893 amounted to 8,054,612, which is less by 25,594 acres than the figures for the previous year. The greatest falling off occurs in the case of spring wheat, but there also has been a decline in the figures for fall wheat, barley, rye, peas, potatoes, mangel-wurzels and carrots. The increased acreage given to fodder corn and hay and clover is suggestive of the influence the dairy movement is exercising on farm practice.

A BLAST AT CANADA.

We have seen the full text of the article in the *Investors' Review* commenting on the remarks of Sir Charles Tupper, when presiding at a lecture on Canada, delivered in London, England, by Rev. Manley Benson. What Sir Charles said was, that "notwithstanding the depression which had affected this country very seriously, and which had affected our great Australian colonies in a very marked degree, and which in the great Republic of the United States had produced something like a financial and commercial crisis, the trade of Canada last year had reached a higher point than ever before. Statistics placed it beyond question that there was no portion of the civilized world that had enjoyed up to the present moment greater prosperity than the Dominion of Canada."

The *Review* declares that there is not a word of truth in this statement. On the contrary, it says, "Canada is not flourishing. Canada has not escaped the general wave of depression which has been travelling round and round the world since 1890, in spite of the fact that its Government and people have done their best to keep the ball rolling by borrowing here all they could lay hands on."

Further utterances of this extraordinary tirade are that "while we should acquit men like Sir Charles Tupper of anything resembling deliberate dishonesty, none the less are utterances of his such as we have quoted profoundly, and even shockingly, misleading and guileful."

* * * * * *

"So far from being a flourishing country, Canada just now has all the appearance of being a country almost played out, a land honeycombed by loathsome jobbing in high places, a land sunk in official corruption, and debt-consumed to a degree hardly, if at all, excelled by the settlements of Australasia."

If Sir Charles Tupper ever reads the *Investors' Review*, one can imagine his saying with Falconbridge:

> Zounds! I was never so bethumped with words
> Since first I called my brother's father dad.

The very virulence of an attack in such wild terms is enough to make an unbiassed reader suspect its accuracy. But its writer is one of those men who knows no moderation in opinion or in speech. Nothing will change the prejudice of Mr. Wilson; the more evidence you offer intended to make him tolerate Canada or things Canadian, the more he abuses this "played out" country and its "unscrupulous" people. The present is by no means the first time he has shown his animus towards Canada. He objects to Canada's borrowings. Do we not pay the interest upon them? Is he one of those market Bourbons who think that borrowed money is necessarily an injury? If so, what is he doing in such a galley as the editorship of a financial journal?

Towards the close of his article Mr. Wilson grows more reasonable—though still sticking to his strong languageassuring us, for instance, that the condition of Canada is "deplorable," and that our politicians are playing "awful havoc with our future,"—while it is our railways that seem especially to set him wild, he objects, also, to our protective system. But he admits that if we would adopt free trade the country could support a population of 25,000,000, and population enough would flow in to make existing burdens endurable or even light. While we are glad to have free trade doctrine preached, we do not care for it with such accompaniments of rhetorical damnation to all protectionists. It is, however, not the opinions or the influence of such financial cranks as Mr. Wilson that will make the country great or otherwise. It is rather the honesty, self-reliance and thrift of her people.

SOME TRADE CONDITIONS.

The conditions of trade have undergone some very radical changes within the last twenty years. These transitions have been gradual, and at the time of their occurrence were scarcely noticed. Not a great many years ago it was the custom of retail merchants to give large orders twice a year; to-day, a store of any considerable dimensions transmits weekly a list of wants to the centres of supply. It is probable that wholesale and retail interests have alike benefited by the change. There is less speculation as to the future of the markets; stocks need no longer be stored on the shelves or in the warehouse, representing a lock-up of invested capital, while the goods fresh from the manufacturer's hands give better satisfaction to customers.

The fact that less capital is required than formerly to enter upon a mercantile career has led many men of small means to become storekeepers. And it may well be doubted whether the wholesale merchant disposes of his goods with any greater security under the new order of things. But in one way the change has certainly proved detrimental to the trade. Where, in times that are past, merchants usually made periodical visits to the wholesale houses to buy their season's supplies, or were waited upon by a house representative twice a year, they now receive a great many visits from a great many commercial men in the course of twelve months.

We are far from wishing to belittle the services performed by commercial travellers to the business community. But salesmen's trips have grown more frequent, travelling expenses have not become less, and this plays havoc with profits. An excessive number of travellers bidding for the same business has developed a number of abuses which it should be the object of every business man to rectify. It would be a further blessing if the rank and file of travellers could be got to pay more attention to the safety of the sales they make and their profitable character. A committee of

the National Wholesale Druggists of the United States, in recent convention at New York, summed up the matter well when in a report they said: "Your committee are led to believe that the curtailment of the number of travellers and of their powers to upset the established rules of business, would largely diminish the unsatisfactory condition which at present exists in many sections of the country. If we could have representatives who understood the business in hand and realized that the profits are the desirable features of the sales, instead of believing that large sales at any price constitute a good business, we would find less vexation and more on the right side of profit and loss account."

COLORED PEOPLE AS INSURANCE RISKS

The vice-president of the Prudential Insurance Company, Mr. Leslie D. Ward, has written a letter to *The Indicator* in answer to its inquiries as to the character of the negro as a risk. The average amount of claims per each $1,000 of insurance for the ten years ending 1893, according to the experience of that company, was on white policyholders $16.96, and on colored $21.63. The loss rate appears to be more favorable in the northern than in the southern cities. Mr. Ward enters into an elaborate discussion of the causes which have created this disparity, and sums up his views in the following language:

Our objections to giving colored persons the same benefits that are accorded to white persons may be briefly summed up as follows:

1. *High Mortality*—Resulting from
   - *a* Lack of physical vigor.
   - *b* Inherited tendencies to disease.
   - *c* Neglect in sickness.
   - *d* Improper food.
   - *e* Manner in which they live.
   - *f* Localities in which they live
2. *Heavy Lapse Rate.*
3. *Low Moral Sense.*
4. *Ignorance and all its attendant evils*

Mr. Ward suggests that "these objections are not directed against that class of colored persons who are possessed of intelligence and thrift and whose social and moral lives are such that they are a credit to the community in which they reside."

The Board of Health Reports of New York, Providence, St. Louis, Washington, Boston, Cincinnati, Baltimore and Richmond, for the last four years, all agree in giving a great disparity of deaths between the two races. The census reports of 1880 and 1890 further confirm these figures. Relative to the causes of this difference, Dr. Ward says:—

"Our mortality records show that adult colored persons are peculiarly liable to constitutional and respiratory diseases. Deaths from consumption, pneumonia and bronchitis occur amongst this class in far greater ratio than amongst adult whites. This fact leads to the inference that colored persons do not inherit vigorous and well established constitutions, and that the taint of various diseases is transmitted by heredity.

"The colored people usually make their homes either in small, ill-ventilated houses or in overcrowded tenements in the most undesirable neighborhoods. Typhoid and other fevers are, therefore, very prevalent amongst them.

"Besides the constitutional tendency to disease referred to, the colored race further weaken their constitutions by excesses of various kinds. They are ignorant of and indifferent to the simplest laws of health, do not eat nourishing food, or know how to prepare and cook the food they do eat. That a low state of morals exists among them is evidenced by the great number of deaths from violence, statistics of crime and statistics of illegitimate births.

"Not only, it seems, is the negro a poor risk on account of his smaller vitality, but on account of his high lapse rate, which itself makes the business unprofitable."

VALUE OF FIRE INSURANCE STATISTICS

In a recent article on this subject, the *Weekly Underwriter* premises that it does not place any great confidence in the value to underwriters of fire insurance statistics, except in a general way. That is to say, the fact that so many dwelling houses have burned in a given year does not furnish a sufficient basis for rates on dwelling houses. "One has to know all the collateral circumstances which such statistics do not show. Underwriters want these statistics, as intelligent men engaged in any business welcome even the least information in regard to their business and its hazards, and we and others do our best to supply the want. We write this, not in defence of our own publications, but because of an attack upon the accuracy and value of the "Chronicle Fire Tables," the new volume of which is announced as nearly ready for delivery. We have, in former years, tested the general accuracy of these tables by all the means known to us and have been surprised at their completeness, and our curiosity led us to examine the methods employed by the *Chronicle* in their compilation. In prosecuting work in what at first sight seems a hopeless field of research, to think of nothing in insurance journalism which compares with them. Besides that these publications have stood the test of years and it is hardly probable that underwriters do not know whether they are or are not valuable to them. To say, therefore, that these statistics are "absolutely worthless," is to betray a lack of knowledge of the labor put upon them or a lack of capacity to understand the true use of statistics. We know of no infallible guide to successful fire underwriting, but the man who persists in plunging along in the darkness because the sun does not illumine his pathway, refusing any light because he cannot have all that he wants, is pretty certain not to find the way to that success. Criticism of this kind comes with a particularly bad grace from the *Journal of Commerce*, whose fire-loss statistics are mere telegraphic guesses tinged with the extravagance of daily journalism.

Commenting on this, Mr. C. C. Hine, of the New York *Monitor*, says: "While every insurance man knows such statistics are of no value as a basis for rating, until they meet the other factor of exposures with which they must be compared to obtain a ratio, yet they have a practical value in calling attention to the enormous, and much of it unnecessary fire loss, and in aiding in a general way the judgment of practical underwriters who are more or less familiar with the relative frequency of exposures among the various classes of risks, and for these purposes they have a value not appreciated by an amateur journalist ignorant of insurance."

AN EIGHT-HOUR A DAY MOVEMENT

One would naturally think that a labor agitation for a working day of eight hours' duration would take place only in times of industrial activity. But we find the workingmen of Moncton, N.B., clamoring for shorter hours, and our information leads us to believe that the workshops of Moncton are no busier than those of the average Canadian city. An organization has been completed and correspondence opened up with the labor unions of Ontario. A reduction in the number of working hours in the day is to be welcomed, because of the opportunity for mental culture and physical relaxation by the artisan. But the regulation, to be successful, must be uniform and apply to all factories and shops competing in the same market. During the last two years there have been few manufacturers who were not willing to reduce the working day from ten to eight hours duration, if at the same time a proportionate cut was made in wages. The grievance of laborers has not been so much that of long hours, but rather that of short time and short pay, or in many cases no work and no wages. To us the time does not appear opportune for a successful eight-hour movement, and an immediate agitation to secure it can but be detrimental to the interests of labor.

THE "HUNTING" OF STEAM-ENGINES

The peculiar form of vibration known as "hunting," and common to many stationary engines, especially when running with light loads, is discussed and explained by Mr. James Swinburne in *Engineering*, London, August 17. The phenomenon is due to the fact that an engine does not respond to its governor instantly. One that did so with ideal perfection would of course run with perfect smoothness. As a matter of fact, there is always more or less delay. The friction of the various parts and their tendency to remain in one position till the altering force reaches a certain value, and then to move suddenly, increases the action. The result is that, instead of running at the required speed, the engine varies rapidly to and fro between a greater speed and a less speed than the one that is wanted. The author discusses various plans for remedying the difficulty. The main points are to avoid friction and to make the action of the governor on the steam valves as nearly instantaneous as possible. Unfortunately the ordinary governors seem to be unable to effect both these desiderata at once. When friction is avoided by means of acting indirectly on the valve-gear, the delay is increased, and when the action is direct the friction and weight are most potent. Recently, however, governors have been devised that combine the advantages of both systems and avoid the drawbacks, as in one French device, where the governor not only works the steam-control directly, but also puts in motion a screw gear that slowly alters the intermediate gear so that the engine finally runs at the normal speed, whatever the load may be. The average man is apt to think of the steam engine as a device that has about reached perfection, or at least is as complete as its limitations allow, but nothing can be further from the truth, as this discussion shows. Scarcely a week passes with

out some important modification in this oldest of all the practicable heat-motors.

SENSATIONAL JOURNALISM.

Although the abuse is one of long standing, it would seem to a reader of certain Toronto evening papers that they are daily growing more sensational. Severe competition has led some publishers into great straits in order to get out a paper that "will sell." Citizens in their private and public capacity are attacked, and since these publications have little, if any, financial backing, no remedy can be obtained. During the present week the Provincial University has in some way aroused the venom of one of these purveyors of sensationalism. The worthy Chancellor, the examiners, professors and social clubs of the university have all been scurrilously defamed.

Nor do these papers confine themselves to the spheres of education and politics, but must needs serve up sensational business items. When the revised United States tariff came into force an evening paper made the statement that a well-known Toronto wool merchant had cleared $50,000 by the transactions made within a very few days. This report found its way into other journals and was scattered broadcast over the Dominion. As a consequence we find country merchants holding exaggerated views as to the value of their stocks of wool, and refusing to sell at market prices. If the statement had been true no one could raise any objection to the remark; it would have been a legitimate item of news; but we happen to know that the merchant in question had not sold $50,000 worth of wool since the McKinley Act had been superseded, much less had he made $50,000 profits.

ELECTRIC RAILWAY SHARES.

With the advent of electric railways a new and profitable field for the investor has been opened up. Improved facilities for handling traffic have greatly increased the gross earnings of the roads. These, even under the old horse-car system, were capable of large annual increments, as the following figures taken from the returns of the Toronto Street Railway will show: In 1880 this company earned $148,300; in 1885 the gross earnings had become $363,100, and five years later, viz., in 1890, they were $734,547. These figures show an increase of a hundred per cent. in the gross earnings during five-year periods. In 1893, under electricity, the gross earnings of the Toronto Street Railway were $895,420. That the present year will not be an exception to this record of progress statistics to date go to prove. The receipts of last month were $11,000 in excess of those of September last year.

But gross earnings do not necessarily mean profits and dividends. However, we have every cause to believe that the operating expenses of electric railways are growing less year by year. A few years ago $2,200 was paid for a motor which may now be purchased for $800, and similar reductions have been made all along the line. That the Toronto railway may, in many ways, have been especially fortunate we can well believe; certainly its operating expenses are considerably less than those of the Montreal railway. This difference is considered sufficiently large to offset the lack of Sunday traffic on the former road. Since the present company secured their franchise to run electric cars on the streets of Toronto, we are informed that they have laid aside in the neighborhood of $500,000, notwithstanding the fact that during this period heavy outlays have been made upon improvements. Toronto Street Railway stock is not listed, but we understand that a regular market may soon be established for these shares.

A great element in the future traffic of electric roads is likely to be freight-carriage. There is much reason to think that light package freight, express parcels, and probably mails, will before long be carried by electric cars in suburbs of cities, and also from cities to adjoining towns. The success of the trolley has been already so great, that either this or some other application of electricity to freight carrying may be expected to reach all well populated parts of the country before many years.

DRY GOODS JOTTINGS.

Serges for spring.

In spring dress goods small effects promise to lead.

Wages have been reduced 10 per cent. in the Kingston mill of the Dominion Cotton Mills Company.

Henrietta cloths promise well for the spring. English manufacturers report plaids good for spring trade.

Manufacturers of ready-made clothing are very busy, while some jobbing houses are working night time in order to make their shipments.

Two trains of flax from the North-west have been received this week at the mill of J. & J. Livingstone, Baden, and there is more on the way.

A Manchester correspondent writes that there is a fair amount of activity in the Canadian trade, a number of buyers being at present in that market.

The Montmorenci Cotton Company, at Montmorenci Falls, Que., has commenced the construction of a four storey building in stone and brick, 95 by 51 feet, for the reception of its raw material.

Silk departments are quiet, and goods are moving out rather slowly. About Christmas time trade may reasonably be expected to pick up, and especially the silks used for blouses and evening wear.

In Nottingham lace circles, Guipure d'Irlande, point de Paris, gros point Venise, with Valenciennes, are the leading lines. In the silk department falls and veilings and tulles are pretty active; laces very quiet.

Mr. J. E. Molleur's new straw hat factory is a large and substantial building, and is a fair indication of the unceasing activity and enterprise of the proprietor. The present hat factory is to be utilized as a woolen mill.—*St. John's, Que., News.*

"The last week in October should witness an active demand upon the stocks of retailers," soliloquized a trade veteran the other day. "There was a time when the housewife had the money received from the sale of dairy products allotted to her. But that day is passed, for butter and cheese now make up one of the staple resources of the farmer. In many cases the farmer's wife now gets the apple money. Apples have been a good crop in Ontario this year; the money will be distributed in a week or so, and then trade should improve, for the women cannot keep their pocket money."

The growth of the imports of Egyptian cotton to this country, says the *Textile Record*, is one of the most remarkable of the incidents connected with our textile industry. The business began so recently as 1884, so that it has attained its present considerable proportions within a period of ten years. In 1889 the imports of the staple to the United States amounted to a little less than 3,000,000 pounds. In 1893 they had reached the quantity of 28,000,000 pounds. The Egyptian staple is valued here because its unusual length permits it to be spun into soft yarns. For that purpose it is mixed with domestic cotton and the yarns are used for hosiery and other knit fabrics.

WHY SHOULD COTTONS ADVANCE?

Cotton goods are at a low basis of values, at least in comparison with the prices of previous years. Selling agents tell us that we may at any time look for an advance, as existing prices are the result of severe competition, which will pass away so soon as the industrial horizon clears up. But an even deeper seated root of low values is to be found in an over-production of raw material. The crop of the United States this year is estimated at 10,000,000 bales, while the average for ten years is about 7,000,000 bales. In the presence of such a statistical position it is difficult to see why cotton goods should become dearer.

THE CARE OF VELVET.

English and American authorities promise that velvet will be much worn this season. The principal charm of velvet lies in its freshness of appearance, and when this is gone the chances of selling the piece are gone. In a small store where sales of this article can only be expected to be moderately large, unless extreme care be taken, the velvet is very apt to become shop-worn and lose its attractiveness. The chief clerk of one of the most successful velvet departments in a New York house relates her experience in this regard to the *Dry Goods Economist*. She had all velvet unrolled as soon as it came in, and took care to paper every yard of it before loosely folding it for the boxes. Large sheets of white tissue paper are used, laying them over the right side of the velvet and folding them from each or one end. The paper keeps the gloss and prevents the pile from crushing, as well as keeping the dust from it. In cleaning up the stock it is only necessary to dust the boxes, inside and out, thus saving the surface from the effects of the deadly whisk broom. If a brush had to be used at any time, it was a soft bonnet whisk, which, when brushed against the pile, did not injure it. With this care velvet has remained in stock six months, and looked to be, says the writer, in perfect condition. All of these velvets are kept with a bias and a straight end, as bias trimmings form the larger part of the sales.

FOR GROCERS AND PROVISION DEALERS.

Canned salmon is active.

New Eleme figs are arriving.

Sugars, yellow and granulated, are inclined to be easy.

A new grocery and also a new bakery are talked of for Tilsonburg.

W. G. McHardy, of Guelph, will open a pork store in Woodstock.

The first oyster boats of the season arrived in Montreal on the 11th inst.

F. M. Griffin's pork-packing establishment opened on Tuesday of his week for the season.

The lobster business in many parts of New Brunswick has been poor so far this season.

"I tried the coffee and it proved an *alibi*," was the judicial remark of a man as he left a cheap restaurant on Filbert street.

A number of Ontario brewers were in Montreal last week, and the outcome of their visit may be a Quebec Brewers' Association.

The Kingsville Canning Co. have contracted with several vineyards in Pelee Island for 15 tons of grapes, which they will can this fall.

Ottawa butchers are testing the legality of a by-law restraining butchers from selling meat on the market except when occupying stalls.

Sunday School Teacher—"What is faith?" Bright Boy—"Takin' an umbrella to church w'en th' preacher is goin' to pray for rain."—*Good News*.

The partnership of Messrs, Gonne & Stark, grocers, South Chatham, has been dissolved. The business will henceforth be conducted by Mr. H. Gonne.

The Summerside, P.E.I., *Farmer* says: A sample shipment of butter from the creameries of Tryon and Crapaud has been sent off to a large dealer in butter and cheese in London.

At New Orleans there is a fairly good demand for clean rice and the market is steady. Rough is firm and a good demand prevails, but receipts and offerings are very light.—*Planter*.

The first shipment of Canadian prairie sheep, numbering some 1,800, from the North-west Territories, has been sold at Deptford. The price realized was four shillings per stone dressed.

Cable advices from Amsterdam report the Duch sale of Government Java coffee as going on at 2½c. below brokers' valuations, and quote at 50c. for good ordinary Java; market barely steady.

The delayed Mediterranean fruit steamer, the "Dracona," arrived in port at Montreal on Tuesday of this week. She has on board some 50,000 boxes of raisins, 5,000 packages of currants, besides some miscellaneous cargo.

By a curious mistake the advertisement of Perkins, Ince & Co., on our front page last week, read "New Jamaica Peels." The fault was ours, for what the firm wrote is now explained to us to be New Candied Peels. It seems that orange and lemon peel, candied, are not yet among the delicacies we get from Jamaica.

The following despatch appeared in last week's Chicago *Produce*, dated Columbus, Ohio: "Patent eggs have been driven out of Ohio markets by the State Food Commissioner, who last week seized a shipment of desiccated eggs *en route* from the manufacturer in New York to a Cincinnati dealer. The desiccated eggs have sold at 45c. per pound, and one pound is equivalent to six dozen eggs. The commissioner's chemist says the albumen in the desiccated egg is obtained from the eggs of fish-eating sea birds, which can be secured by the million on the low uninhabitable islands along the Atlantic coast. They are not fit for food, and the albumen alone is taken from them in making desiccated eggs. The patent egg is largely used by hotels and bakeries."

PRESCRIPTIONS FOR DRUGGISTS.

Arabic gums are cabled as advancing in London, Eng.

T. C. Donald has opened a drug store in St. John, N.B.

Vanilla beans, Mex., are very scarce and the market is firm.

The bark sales in London on the 17th inst. were cabled "flat."

Anise oil is firm and advancing, as a result of Eastern complications.

Cables from London advise shellac strong at the advance previously reported.

Cables from Trieste advise a decline of 5 per cent. in the value of open insect flowers.

Cables have been received from Trieste advising that market as practically bare of sorts of Arabic gum.

Advices from primary sources concerning sponges indicate light crops, with every prospect of higher prices.

Sundries for the Christmas trade are commencing to move, and before long this trade should attain considerable dimensions.

The fall is fast becoming winter, and navigation on the upper lakes will soon be closed. As a consequence heavy goods are moving briskly, while prices are firm

J. A. Rickey, of Manotick, Ont., is establishing two drug stores in Ottawa, one at the corner of Stanley avenue in New Edinburgh, and one at the corner of Bank and Ann streets.

Crimsonbeak—"Can you let me have $5 until I see you again?" Yeast—"No, I can't; but this is the first intimation I have had that you were going on an extended journey."—*Yonkers Statesman*

"Trade is probably as brisk now as it will be this year," remarked a wholsale merchant one day this week. "While no rush of business is taking place, none is looked for, and we will be thankful if the present volume of movement be a long continued one."

The linseed crop of the whole of European Russia, in 1893, yielded, after deducting requirements for seed purposes, 367,850 tons, considerably exceeding the average yield of the last five years, and especially the yields of 1888 and 1889, which were particularly prolific

A London letter, dated Oct. 3rd, says: Caffeine is still advancing here, owing to scarcity of the raw material. Sweepings from tea warehouses sold to-day at 9s. 6d., and it is predicted that the price will soon be 12s. to 15s. Stocks are very light, and there is little or none offering

There are in India 2,762 indigo factories and 6,082 vats, giving employment to 356,675 persons during the working season—a calculation that does not include the agricultural labor necessary to produce the plant. Last year's exports of indigo were 126,706 cwt., valued at 41,412,000r.

The public sale of nitrate beds took place on Monday at Valparaiso, and though they were not all sold, the result was a brilliant success. The thirteen beds not sold are valued at £847,000. Those sold brought £1,137,000, and had been valued at £949,800, a handsome difference in favor of the Government. Those beds not sold will probably be put up again in a few days at auction.—*N. Y. Shipping and Commercial List*.

Under date of 1st instant, Mr. Charles Malenchini, Leghorn, writes: 'Argols command more attention, and several parcels have changed hands at full figures; borax remains completely neglected. Orris root has been and still continues in brisk request, but business is curtailed in consequence of increased pretensions of growers. Juniper berries have exhibited considerable activity at the parity of 6s. per cwt. f.o.b."—*N. Y. Journal and Bulletin of Commerce*.

Hong Kong, Sept. 11th.—"Camphor—Demand has not kept pace with arrivals, and prices have further gone against importers. Small sales are reported at prices declining from our last quotations to $44 per pecul for Formosa, at which figure the market closes dull and lifeless. Star aniseed—About 100 peculs are pretty firmly held for $30 per pecul, but no buyer is to be found at the figure. Star aniseed oil—About 10 peculs have arrived, for which holders ask $370 per pecul, without finding buyers. Cassia oil is firm at $170, at which about 10 peculs can be had. Galangal—No sales are reported, but the market is firm at $3.70 per pecul, with stock of about 100 peculs."—*N. Y. Journal and Bulletin of Commerce*.

PAPER TRADE NOTES.

We are informed that the envelope manufacturing plant of the Barber & Ellis Company, of this city, has been sold, and is to be transported to Denver, Colorado. It would appear from this, as from other circumstances, that there is no money in that business.

Surely the millennium of the literary man is at hand. We are told that one of the big Canadian shops is selling five quires of ruled note paper for five cents. A cent per quire for paper ought to encourage any number of what the late delightful *Autocrat* used to call Gifted Hopkinses to write poems and tales

Telegraph poles are now made of paper pulp, in which borax, tallow, etc., are mixed in small quantities. The pulp is cast in a mold, with a core in the centre. The paper poles are lighter and stronger than those of wood, and are said to resist the action of sun, rain, and other destructive agents much better.

The Raynor Envelope Company, New York, has been experiencing the effects of the revival of business, which for the last few weeks has been constantly increasing. Inquiries for the "Irish Linen Paper" and envelopes have been numerous from the West of late, and some unexpected export orders have been received for them

Imports of books and stationery into Canada for some time past have been limited in comparison with former days. As we last week showed, the imports of such goods at Toronto last month were only $44,000 in value, as compared with $62,300 in the same month of 1893. And for a number of months they have been thousands of dollars less.

Last year Norway and Sweden sold in Great Britain 173,938 tons of wood pulp, the value of which was over $4,000,000. Canada shipped 7,870 tons to Great Britain last year. It might be trebled in 1894, if the Government would meet tax with tax, and place Canadian pulp manufacturers in as favorable a position as their competitors in the Republic to the South

An improvment in folding and wrapping machines has been patented, whereby the same machine can be adjusted to fold newspapers, journals, prospectuses, circulars, etc., of different sizes and thicknesses, giving them one or two folds as required, turn down the gummed flap of the wrapper, seal the same and hold it until the gum is set, thereby avoiding the possibility of its springing apart.

The Canadian *Printer and Publisher* tells this story of Geo. Warwick, of Warwick Bros. & Rutter, in this city. When Mr. Warwick was doing the World's Fair at Chicago, he had a party of friends to dinner one evening at a down-town restaurant. He was anxious to have them treated well, and was afraid to trust the waiter. His fertile brain suddenly gave him an idea. Drawing from his pocket a two-dollar bill, he tore it in two, and, giving one-half to the man, said to him: "Now, you wait on us properly, and you will get the other half when we are through." The scheme worked like a charm, and, it is said, has since been copyrighted by W. R. Callaway, he of the C.P.R., who has been known to do the same trick.

INSURANCE MATTERS.

The agency in Toronto of the Insurance Company of North America has been placed in the hands of Medland & Jones, *Mail* Buildings.

A. M. K. Doull, of Halifax, inspector of the Eastern Assurance Company, has resigned his position. Mr. Doull is a son of the president of the company.

The Reliance Marine Insurance Company (Limited) has received a license, No. 140, for the transaction in Canada of the business of Inland Marine Insurance.

The annual meeting of the Intercolonial Railway Relief and Insurance Association was held in Moncton, on Oct. 10, and attended by a large number of delegates from all over the line.

The Agricultural Insurance Company, Watertown, N.Y., has received a license to carry on in Canada in connection with the business of insurance the business of Cyclone and Tornado Insurance.

The Winnipeg *Free Press* states that Mr. P. D. McKinnon, late general agent for the Confederation Life Association in that province, has just accepted the position of manager of the Ontario Mutual Life Company for Manitoba, with headquarters in that city.

The Canada Life Assurance Company notifies its policy-holders that the next division of profits takes place as at 31st December, 1894, and that all persons joining now will obtain one full year's profits. There is over two millions of surplus, and from the earning power o the company its clients may expect a liberal division.

Hon. William Henry Harrison Bingham, one of the best known and most respected public men in the State of Vermont, died last week at Stowe, in his 82nd year. The deceased gentleman was familiarly known as "Governor" Bingham, from having been three times the unsuccessful Democratic candidate for the Governorship, and was twice Democratic candidate for his district. Mr. Bingham was for many years president of the Vermont Mutual Fire Insurance Co. and a director of the National Life Co.

A SUGGESTIVE CIRCULAR.

The following circular, addressed to the wholesale merchants doing business in Manitoba, has been issued, and a copy of it sent to THE MONETARY TIMES:—

"GENTLEMEN,—Believing it to be a fact acknowledged by all first-class dealers, whether by wholesale or retail, and also by trade journals in general, that consumers' stores, whether carried on under the name of a 'Grange Store,' 'Patrons' Store,' 'Consumers' Store,' or 'Farmers' Store,' are detrimental to the best interests of not only the manufacturer and producer, but also to those of the wholesale and retail dealers, who must have a legitimate profit in order to succeed; and being satisfied that certain wholesale firms are in the habit of selling goods to such institutions, to the detriment of legitimate retail dealers, we, the undersigned merchants and business men of the town of Manitou, respectfully ask if it is your intention to supply such parties with goods, either directly or indirectly, in the future?

"This is not a question of mere local importance, but one affecting the whole Province of Manitoba, and if the practice is continued it will be necessary that the names of firms doing that kind of business shall be reported to the Secretary of the Provincial Organization of Retail Dealers, in course of construction, in order to protect their interests by patronizing only such houses as will answer the above question in the negative.

"Kindly reply to any of the undersigned: C. R. Gordon, James Huston, Ruttan & Co., E. DePencier (for H. B. Co.), John Wootton.

Manitou, October 15th, 1894."

CLEARING-HOUSE RETURNS.

The following are the figures of the Canadian clearing-houses for the week ended with Thursday, Oct. 18th, compared with those of the previous week:

CLEARINGS.	Oct. 18.	Oct. 11.
Montreal	$12,269,585	$11,958,157
Toronto	5,650,008	6,343,364
Halifax	1,201,500	1,253,087
Winnipeg	1,421,324	1,558,452
Hamilton	729,368	744,726
Total	$21,271,785	$21,857,786

Aggregate balances this week, $3,005,157; last week, $2,938,128.

—The city council of Toronto is to consider, on Monday next, the offers that have been received for its bonds, and to determine whether they will accept the offer of Mr. R. Wilson Smith of Montreal of 90.13 for 3½ per cents, or to take 100⅜ net, which is the price, we understand, is obtainable in London for 4 per cents. The latter will yield $10,000 more cash to the city, which is a point that a good many seem disposed to look at. But there is something else to be said in favor of the 4s. It appears that for a colonial municipal security 3½s are not in especial favor, except with large dealers and in blocks. The smaller investor is apt to prefer a bond which stands at par or thereabout and yields the higher rate. Of course the city will have to obtain legislation to convert the 3½s into 4s, but meanwhile a definite offer has been secured at the rate of 2 per cent. per annum for money to be used for current municipal requirements.

—A good many Canadians who do not boast themselves connoisseurs of foreign wines, nevertheless confess to a liking for Canadian wine when it is well made, the liking being based on the experience of their palates. They are often told that Canadian wine cannot compare with European, and some will be glad to have a scientific opinion which should be reassuring to the Canadian. The Dominion Analyst, Mr. Thomas Macfarlane, has been visiting the wine-growing parts of Ontario and testing the musts. These tests gave from 13 to 25 per cent. of saccharine matter, which indicates that some kinds of our grapes yield as rich musts as either French or Rhine grapes. His conclusion is that Canada can produce as good wine as any country. But, he adds, the people who wish to drink wine must show their faith by their works, and pay the price necessary to enable it to be sold in bottle.

—It may be remembered that an arbitration arose between the municipality of Moncton, N.B., and the Moncton Gaslight and Water Company. as to the value of the company's property, which was to be taken over by the town. We now learn that the arbitrators have rendered their decision. Messrs. Surtees and F. W. Holt have decided on $343,000 for the company, while the chairman, Mr. Sharley, for the company, holds that the amount should be $417,000. Official notice of the award is not yet received beyond the fact that it has been made and will be delivered this week on the payment of charges. The offer of the city to the company was less than $250,000, while the company placed the value of their works at $700,000, and justified it by citing their earning power.

—A committee of investigation into the condition of the Centra Pacific Railway has been appointed by the English shareholders of that company, who are in a state of alarm as to its finances and prospects. It is said they will send Sir Charles Wilson to America to spy out the troubles of the road and report. Sir Charles is an authority in financial matters and is in great repute in England. It may be doubted, however, whether, clever as he may be, he has the peculiar sort of tact that will prevent his being misinformed and influenced by designing speculators such as he will come in contact with on his errand.

—Quotations of Halifax stocks reach us only this morning, too late to be classified in the Stock and Bond Report page. Last quotations of October 16th were: Bank of Nova Scotia, 182; Bank B.N.A., 144; Merchants Bank of Halifax, 152; Union Bank of Halifax, 125; People's, 125; Halifax Banking Co., 128; Bank of Yarmouth, 124 Commercial Bank of Windsor, 110; Exchange Bank of Yarmouth, 103½; Nova Scotia Steel and Forge Company, 105; Halifax Gaslight Company, 97.

—The shipment of Australian cattle to the London market, about which so much has been heard, does not appear to be a paying business. It is stated that the total cost of landing each beast (exclusive of insurance) amounted to £16, and the price realized about £16 14s.

Correspondence.

TRANSPORTATION.

Editor MONETARY TIMES:

SIR,—In your review of the Collingwood Board of Trade report, you make rather an unwarrantable use of my name in connection with a 20 ft. canal to Georgian Bay. Personally I am of the opinion that 20 ft waterways west of Lake Ontario would do irretrievable damage to both Toronto and Collingwood. I am further of the opinion that 14 ft. of water through the St. Lawrence canals, which will accommodate vessels carrying 100,000 bushels, will be sufficient for our need, but that no time should be lost in obtaining that depth. If you had read the report carefully, you would have seen that the president of the Board of Trade said I was engaged in advocating a railway from Collingwood to Toronto, and if the project were carried out it would confer a boon not only on the town, but the country at large, and there are few men in Canada better informed on matters of trade and transport than Mr. Long.

Now, sir, a word as to the Toronto and Collingwood Air Line Railway. There is a trade of some 400,000,000 of bushels of grain and its products moving from west to east each season, not one pound of which pays tribute to Toronto to-day, although Toronto is geographically in the best position to handle a large proportion of that trade.

The larger portion of that grain and its products is consumed in the country south of Lake Ontario, and can reach its destination quicker and cheaper through Toronto, Rochester and Oswego, via the Air Line Railway, than by any other route, and that is the trade we want to turn our attention to. I find Toronto to-day advocating and bidding for railways and other works in different parts of the country, every one of which will work an injury to Toronto's trade; and further, every one of those projects have made a descent on the Dominion, provincial or municipal treasuries of the country. I have presented to you a sound commercial enterprise, having for its objects the quickening and cheapening of the transport of the western products to market, in the carrying out of which Toronto would incidentally receive immense benefit. There are no ulterior motives in connection with the matter whatever, except that an endorsation by the people who are most affected will always benefit any scheme. But I am coldly received in Toronto; your Board of Trade, after putting me to considerable trouble and expense, handed over the consideration of the Air Line to a hostile committee, with no instructions to report. My reception elsewhere is different. The Rochester Chamber of Commerce writes: "We have an immediate and material interest in the construction of your railway." The Boston Chamber of Commerce [orders]: "The subject referred to the transportation committee for consideration and report." Oswego the same. Chicago says: "You build the canal and we will use it." West Superior says: "We can build you a boat fitted to navigate Lake Ontario and the Oswego canal." St. Paul says: "You organize, and we will interest capital."

Is it possible that these people are only visionaries?

I am, yours,
FRANK MOBERLY.

Collingwood, Oct. 12th, 1894.

THE "SINGLE TAX"—A CORRECTION.

Editor MONETARY TIMES:

SIR,—The article in last issue of THE MONETARY TIMES bearing on the "Single Tax," unfortunately contains a number of errors. A correction is due your readers of several points therein.

In the statement made referring to the action of the Trades and Labor Council in their refusal to receive Single Taxers and other bodies, it was inferred from this that the Council as a body was opposed to their aims and purposes, whereas the real question hinged upon the eligibility of delegates from this association.

Although a majority, 15 to 10, favored their admission, it failed to pass, because it requires a two-thirds majority to carry. The Council is not in any way antagonistic to Single Taxers, many of its members being strong adherents of Henry George's principles, and time and again the Council has affirmed his principles as just and expedient

Another statement is made that "of all forms of socialism, Single Tax is the most repellant to justice and fair dealing." There is a distinct difference between the application of a Single Tax and socialistic principles. I cannot here discuss the latter issue, but the former may be defined thus:

By the abolition of every tax now levied on industry, in its various forms, there is left a Single Tax, and that only on the value of land

The Single Tax will provide for raising all public revenues, taking for public purposes the value of land created by the growth of society.

That definition of the Single Tax can hardly be termed repellant to justice and fair dealing. Lord Rosebery, speaking in St. James' Hall, London, March last, said: "You may be quite certain that as long as Her Majesty's present advisers are in power you will meet with very unflinching support in any honest and honorable proposal you have to make with reference to betterment or the taxation of ground rents." Mr. Asquith, Home Secretary, followed the previous speaker in a similar vein.

The Hon. A. S. Hardy, before the Local House, speaking of the Waters' Assessment Bill, April 15th last, said: "In his opinion there was no scientific law of taxation in the world, unless it was the Single Tax on land values or a tax on incomes."

Other testimony could be added to show that the Single Tax is regarded as a just and equitable form of taxation. G. J. B.

Toronto, 15th October, 1894

THE INDEPENDENT ORDER OF FORESTERS.

The affairs of this Order appear to be progressing rapidly towards a crisis. In our issues of the 13th and the 20th of June last, we dealt very exhaustively with the prospectuses and statements of the Independent Order of Foresters, through the mouth of their representative in England, Lieut.-Col. Paterson (of the Canadian Bar). We convicted the Order of gross misrepresentations in its published prospectuses. The corrected proofs in Colonel Paterson's bag, naturally did not come under our purview, and we could only deal with the publications issued. Our contemporary, the *Insurance and Financial Gazette*, of Belfast, has recently disposed of the tomfoolery which attends the initiation of members into this so-called secret society of benevolently minded simpletons. These are seduced by the similarity of the title of this society to that of the Ancient Order of Foresters of England, a highly respected institution, and so are induced to invest their cash with the agents of this extraordinary association.

In the meantime, we here would like to call special attention to pages 17 and 18 of the report of the Chief Registrar of Friendly Societies of Great Britain, ordered by the House of Commons to be printed, 20th March, 1894, and which was issued over Mr. Brabrook's signature on the 19th March, 1894. Mr. Brabrook calls attention to the fact that the society has been threatened with severe penalties by him, and in fact that the cancellation of the registry of the Independent Order of Foresters is imminent. The registrar points out that the courts of the Independent Order of Foresters cannot act until they are registered, and that no court has been as yet registered. Col. F. N. Paterson, who described himself as the General Superintendent of the Independent Order of Foresters for the United Kingdom, stated that this society has not attempted to do business as a registered friendly society. The Registrar then expressed his desire to receive a request from the trustees to cancel the registry No request was made to this effect, and no courts were registered. So on the 31st of October, last year, the Registrar gave notice that he would cancel the registry of the society at the close of the year. Mr. Brabrook's action in this matter was endorsed and approved of by the Treasury.

Two members who signed the original rules of the society then appeared to show cause against the cancellation of the registry, when they disavowed Col. Paterson's authority to speak in the name of the society, and announced their intention of amending the rules, so as to repeal what they called the perplexing provision by which they were connected with the corporation called the Independent Order of Foresters, established in Canada. Now here we are brought face to face with a remarkable state of things. That celebrated Mohawk chief, Dr. Oronhyatekha, has just arrived in this country on business intent, whilst Lieut.-Col. Paterson, of the Canadian Bar, whose actions have been disowned by the society, is leaving these shores for good and returning to his native Canada. Now if the statements made in the Registrar of Friendly Societies report are correct all the assertions made at the recent dinner given for the Supreme Chief Ranger, are simply so much unmitigated humbug. If the English branch of the Independent Order of Foresters is to be entirely separated from the Canadian, where does all this nonsense come in about community of interest and all the rest of it? As a matter of fact, the Independent Order of Foresters represents one of the worst forms of the "get-rich-quick" or promoting societies. It is in nature unsound. It has in its efforts to spread its influence throughout Great Britain been guilty of follies and misleading statements in its printed and official documents. It has been threatened with the cancellation of its registry by the Government official charged with such matters, and now, according to Mr. Brabrook, appears to be meditating running its business as a purely English society with no connection with Canada at all. Coupling this with the withdrawal of its late representative in this country, and his departure for Canada, it appears to us as if the promises of the Independent Order of Foresters in Great Britain should be viewed with the utmost misgivings.

It is much to be regretted that the newspapers which have been good enough to give the Mohawk prince such an excellent and gratuitous advertisement for his so-called life assurance enterprise did not take a little more pains to acquaint themselves with the nature of the business in hand. In the first place, this so-called Canadian Order is not to be found amongst the list of insurance companies licensed to do business in Canada, as set out on page cxiv. of the report of the Superintendent of Insurance for the year 1893. Neither is it to be found in the list of insurance companies registered under the Insurance Act, and permitted to transact the business of life assurance in Canada on the assessment plan. The Order in the meantime is practically under notice of cancellation of registry in this country. In the middle of all this arrives (according to the *Daily News*) a man who is one of the heads of the Mohawk tribes of Canadian Indians, who has been Chief Templar of the world, whatever that is, supreme Chief Ranger of the Independent Order of Foresters, and who has come to England to attend the high courts of that body. So much stupendous ignorance of the points at issue was probably never compressed together in the same number of lines. Dr. Oronhyateka, as quoted by the *Evening Standard*, states that he represents a nation loyal to the British Crown, and proceeds to remark that it was owing to the assistance and influence of the Six Nations of Indians that the British Crown at present held Canada. Now we would respectfully ask Dr. O. has he ever read the works of one Francis Parkman? That Francis Parkman is the leading American historian, with the rest practically nowhere, is admitted by all who know anything of the subject. Well, we would refer this Mohawk prince to Francis Parkman, for evidence that the Six Nations were a murderous, treacherous and barbarian body, who, hounded on by French and English alternately, simply succeeded in massacring each other and the surrounding tribes of Indians. The Chief Ranger's statements with regard to the assistance rendered by the Six Nations to the English Crown are as equally void of respect as are his tables of mortality, his rates of premiums, and his claims for the Order he represents to be a safe, solvent and enduring institution worthy the attention of the British public, and more especially of the working classes.

The *People*, perhaps, has made the most egregious mistakes of all, for it speaks of this ridiculous Order as having recently extended its operations so as to include the United Kingdom in the scheme, with a view of anticipating Parliamentary action on the question of old age pensions! It is delicate to read the observations of the *People*, with a great sense of amusement mingled with regret that influential English newspapers should lend themselves towards helping the progress of such a deceptive institution as the Independent Order of Foresters of which this Mohawk chief is at the head. Meanwhile it is instructive to note (1) that the official who has hitherto represented the Order in this country has departed for Canada as he states never to return; (2) that this distinguished Dr. Oronhyatekha is now hard at

work trying to run the show himself; (3) according to the Registrar of Friendly Societies, the English branch of the Order is contemplating severing itself from the Canadian branch; and (4) that the Order in England runs the risk of having its registry cancelled at the office of the Registrar of Friendly Societies. This latter, if carried into effect, will stop the proceedings of the society altogether. Taking all these things into consideration, the situation is more suggestive of the plot of a comic opera than that of defining the operations of a serious and well considered insurance scheme to be submitted to the people of this country, as worthy of their confidence, and as deserving the trusteeship of their hard-earned cash.—*London Review, Sept. 19.*

FROM A BUILDER OF VERY FAST VESSELS.

M. J. A. Normand, of Havre, is one of the most successful torpedo boat builders in the world. At the meeting of the Institute of Naval Architects of Great Britain he contributed a paper that has attracted special attention, as the subject was the "Importance of Economy of Fuel in Very Fast Vessels, and the Advantages to be Derived from Heating the Feed Water." One of the London journals devoted to ship building says of Monsieur Normand:

"He has for many years devoted his skill and energy to perfecting torpedo boats, and the wonderful results he has obtained in speed, but more especially in the economical consumption of coal, has been a matter of surprise to the builders of such vessels, Mr. Thornycroft, who was present at the meeting, did not fail to show his appreciation. The secret of his success is in heating the feed water, and to do this he has contrived a special valve by which steam is taken in compound engines at mid stroke from the low pressure cylinder, and in triple and quadruple engines direct from the low pressure casings, all the work previously given up in the engine being a direct gain. Monsieur Normand, by his method of heating the feed, has obtained great economy in fuel, so much so that at 25 knots the consumption is not more than two pounds per indicated horse power per hour, which is about two-thirds that of similar craft built in this country. M. Normand has also reduced the total weight of boilers and machinery to about 48 pounds per maximum indicated power, and in a vessel now building this will be still further reduced. The gist of the paper is that whereas some engineers dispense with steam jackets, feed heaters, etc., in order to lessen the weight of machinery, Monsieur Normand utilizes these contrivances to increase the temperature of the feed. He thus saves in fuel much more than the extra weight due to steam jackets, etc., can do with fewer boilers, has an all-round saving, and utilizes to the fullest extent the advantages which can be obtained by such contrivances."

FOREST FIRES.

Some suggestions for the prevention of forest fires are made by Professor Fernow, chief of the division of forestry of the Department of Agriculture in the United States:

(1) Appoint one State fire commissioner, who is to be the responsible agent of the State for carrying the law into effect and organizing the service, and who is paid for his work in proportion to the value of his services. (2) Make all sheriffs responsible for the putting out of fires in their county and for apprehending any incendiaries; give the sheriffs power to swear in special fire wardens to act as their deputies, with power to employ a posse when necessary to fight fires (3) Erect watch towers in suitable locations for the use of fire wardens, and, if possible, establish telegraphic connection between them. Employ additional special fire patrols in the dangerous districts during the dangerous months, July and August. (4) Require all lumber operators to burn their debris early in the spring (May)—it can be done, because it is being done successfully, cheaply and willingly by some—and, if they do not comply, have the fire warden do it for them, charging the lumberman with the expense. (5) Require railroad companies, who are responsible for a large share of the fires, to use spark arresters and to clean their ash pits with care, and make them responsible under the law for careless incendiarism and for damages. With a properly instituted officer to look after them, they will readily avoid most of the fires. They should also be required to keep their right of way on both sides cleared of inflammable material. (6) Require settlers and farmers to give notice of their intention to burn brush to the fire warden, and to obey his instructions as to the time and manner of doing it.

A LIBERAL-UNIONIST POLICY.

While it may well be doubted if Mr. Chamberlain's views on state aid to artisans and the pensioning of old ones are workable, he is to be credited with foresight when he remarks that a party with no definite policy is unlikely to succeed. The Liberal-Unionist leader addressed the Unionist conference in Durham on Tuesday last. He held that the Unionist party was growing in strength at the expense of the Gladstonians, and he insisted upon the importance of having a definite policy of social reform. He defended in detail the bill which he has prepared for introduction at the next session of Parliament providing for the furnishing of State aid to artisans in the purchase of homes of their own, for the granting of old age pensions, for the limitation of the hours of labor in shops and factories, for the restriction of pauper alien immigration, and for a new employers' liability act, embodying a contracting out clause. Referring to the adverse opinions of certain Unionist papers on the bill, Mr. Chamberlain said that if he thought the criticisms were approved by any considerable section of the Unionist party, he would resign the responsible position which he now holds in the party's councils. The party would never succeed, he declared, with a barren policy of negative criticism or cynical indifference.

A STEAMER ON MULE BACK.

A triumph in engineering is reported from the mountains of Peru, where a twin-screw steamer of 540 tons, 170 feet long and thirty feet wide has been successfully launched on Lake Titacaca, the highest navigable waters in the world, more than 13,000 feet above the sea. This steamer, which belongs to the Peruvian government, and is to be used for freight and passenger traffic, was built on the Clyde, then taken apart in more than a thousand pieces and shipped to Mollendo by sea. It was then carried to Puno by railway and transported over the mountains on the backs of llamas and mules and put together by a Scotch engineer.

—The following named gentlemen, Hon. P. Pelletier, Hon. P. Landry, and Messrs. J. J. T. Fremont, P. B. Dumoulin, B. Leonard, J. U. Gregory, and E. Pacadd, give notice of application for an Act to incorporate "Quebec City and District Railway Co.," with power to construct and run railways and electric tramways in the city of Quebec, and also in the counties of Quebec, Portneuf, Montmorency, Levis, Bellechasse, Dorchester, Beauce and Lotbiniere, and to make and furnish electric light, except in the city of Quebec.

—Paris has decided to grant no more tax exemptions to manufacturers.

Commercial.

MONTREAL MARKETS.

MONTREAL, Oct. 17th, 1894.

ASHES.—The market for first quality pots is steady at $4.35; seconds, $4, and wanted. Pearls are decidedly lower, but as the few late transactions have been p.t., it is hard to fix a figure. We quote them nominal at $6.50 to $7. Receipts are light, and apart from some moderate lots at Perth and Wallaceburg, there are not many in the country. There has been some American enquiry, but not at such figures as resulted in any business. There are in store about 100 pots and 13 pearls.

BOOTS AND SHOES.—Manufacturers are mostly finishing up fall orders and sorting business in foot wear has been on the small side. Some houses are already preparing spring samples of boots and shoes, and in the course of a fortnight a good many houses will begin stock-taking. Some Quebec firms are reported to have received very good orders from jobbers during the past week.

CEMENTS AND FIREBRICKS.—With the advancing season business in cements is becoming slacker. Prices are without change, English brands being quoted at $2 to $2.10, Belgian $1.90 to $2. Firebricks are firmer, and cannot now be bought under $17.50, with a range up to about $20.

DAIRY PRODUCTS.—In cheese there is a decided weakening of the market, and business is of a dull dragging character. We quote nominally, fine Western, late makes, 10½c. to 10¾c.; Townships, 10½c.; Eastern, 10c. to 10½c. In butter also there is only a local jobbing demand, and shippers do not seem disposed to buy even at material concessions. We quote, creamery, 18c. to 20c.; Townships, 16 to 17c.; Western, 15c. to 16c. per lb. Eggs are in good demand at 16c. to 17c. for boiling stock; packed, 13c. to 14c. per dozen.

DRUGS AND CHEMICALS.—Business in these lines is not up to what is usually looked for at this season. The tendency of the market of late has been towards easier values in a good many staple lines, including sal soda, borax, tartaric acid, epsom salts, saltpetre, etc. Cream tartar, which was lower, has recovered its position. Quinine is firmer than it has been, the production having been curtailed. Opium is in rather peculiar shape, American dealers being anxious to unload the heavy stocks they laid in in anticipation of increased duties, and prices in New York are relatively lower than in London and Smyrna. Oil peppermint is cheaper owing to large crop in the United States. We quote:—Sal soda, 75 to 85c.; bicarb soda, $2.40 to 2.60; soda ash, per 100 lbs., $2; bichromate of potash, per 100 lbs., $11.00 to 13.00; borax, refined, 6 to 8c.; cream tartar crystals, 18 to 19c.; do. ground, 20 to 22c.; tartaric acid, crystal, 28 to 30c.; do. powder, 30 to 32c.; citric acid, 45 to 50c.; caustic soda, white, $2.50 to 2.75; sugar of lead, 10 to 11c.; bleaching powder, $2.75 to 3.25; alum, $1.70 to 1.90; copperas, per 100 lbs., 90c. to $1.00; flowers sulphur, per 100 lbs., $1.60 to 1.90; roll sulphur, $1.60 to 1.90; sulphate of copper, $4.25 to 4.75; epsom salts, $1.30 to 1.50; saltpetre, $7.00 to 8.00; American quinine, 35 to 40c.; German quinine, 35 to 40c.; Howard's quinine, 42 to 45c.; opium, $4.25 to 4.60; morphia, $1.80 to 1.90; gum arabic, sorts, 18 to 30c.; white, 40 to 60c.; carbolic acid crystals, 30 to 35c. per lb.; crude, 75 to 90c. per gallon; iodide potassium, $3.90 to 4.25 per lb.; iodine, resublimed, $4.75 to 5.00; commercial do., $4.25 to 4.75. Prices for essential oils are:—Oil lemon, $1.75 to 2.00; oil bergamot, $3.50 to 3.75; orange, $2.50 to 2.75; oil peppermint, $3.50 to 4.50; glycerine, 18 to 20c.; senna, 12 to 25c. for ordinary. English camphor, 60 to 65c.; American do., 55 to 60c.; insect powder, 25 to 35c.

Total grain		828,943	838,994

GROCERIES.—The late heavy and continued rains have interfered somewhat with country

roads, and business is hardly so active as it was, but a moderate movement is still reported. Further enquiry for Japan teas is being made from Chicago, and there are also a good many local enquiries, with fair resulting business at firm prices. With the advancing season there has been an improved demand for molasses and syrups. Barbadoes molasses is quoted at 27½c. to 28c. in round lots, and from 29c. to 30c. in smaller quantities. Syrups range from 1½c. to 2¼c. per lb.; one leading handler of this class of goods reports sales of about 400 brls within the last week or so. Sugars still continue to be sold at old prices, granulated being 4¼c. per lb. at the factory, yellows, 3¼c to 3⅝c, with some scarcity of darkest grades.

Collingwood Debentures.

Tenders are invited for the purchase of $7,000 Debentures of the Town of Collingwood, issued as follows:

Firstly—$2,000 under authority of 47 Vic., Cap. 49, Ontario Statutes, repayable December 1, 1913.

Secondly—$5,000 under 54 Vic., Cap. 65, Ontario Statutes, repayable December 1, 1916.

All to bear date December 1, 1894; interest at 5 per cent., payable half-yearly on 1st June and December, at Bank of Toronto, Collingwood. Successful tenderer to pay at par here, and cost of forwarding debentures.

Tenders will be received up to November 14, 1894. Whole to be issued in seven Debentures of $1,000 each. Tenders to be sent to

A. D. KNIGHT,
Town Treasurer.

Collingwood, Oct. 13, 1894.

CONSUMERS' GAS CO.

The Annual General Meeting of the Stockholders of the Consumers' Gas Company of Toronto, to receive the report of the directors and for the election of directors for the ensuing year, will be held at the Company's Office, No. 19 Toronto street, on

Monday, the 29th Day of October Next,

At Twelve O'clock Noon.

W. H. PEARSON,
Gen. Manager and Secretary.

THE OTTAWA ELECTRIC CO.

Issue of $320,000. First Mortgage Bonds. Five Per Cent.

Authorized under Company's Act of Incorporation, 57 and 58 Victoria, Chap. III., Statutes of Canada.

Principal to be payable First October, 1904. Interest, First April and First October in each year. Paid-up capital of the company $645,000, and bonding power limited to amount equal to one-half the paid-up capital stock.

The above company now owns and operates all the property (including water powers) and the businesses lately owned and carried on by the Ottawa Electric Light Company, the Chaudiere Electric Light and Power Company (Limited), and the Standard Electric Company of Ottawa (Limited). The company's contract for the lighting of the streets, etc., of the city of Ottawa, extends until 1st May, 1905.

It is proposed to issue 320 first mortgage bonds of the company of $1,000 each, principal and interest payable at the Bank of Ottawa, city of Ottawa.

The bonds will be secured by a first mortgage to the Trusts Corporation of Ontario as trustees upon the property of the company as mentioned in the mortgage.

Sealed tenders for the whole or any smaller number of said bonds (to be specified in the tender) will be received up to 6 o'clock in the evening of the 26th instant, at the head office of the company, Russell House Block, Sparks Street, Ottawa, addressed to the undersigned and marked "Tender for Mortgage Bonds."

The directors may sell the whole or only a portion of the proposed issue, and may in their discretion decline all or any of the tenders.

The bonds will, it is expected, be ready to be delivered early in November, and the purchase price will be payable at Ottawa within five days after notification to a tenderer of the acceptance of his offer, and if not then paid the directors may sell the bonds in any manner they see fit.

In consequence of the first coupons including interest from 1st October, 1894, it will be necessary for the purchasers to allow for the accrued interest in respect of first coupons from 1st October to date of payment of purchase price.

Any further information required may be obtained from the undersigned.

G. S. MACFARLANE,
Secretary-Treasurer.

Dated 4th October, 1894.

Tender for Debentures

Sealed Tenders, endorsed "Tenders for Debentures," will be received at the office of the undersigned up to 4 p.m. on the 1st Day of November, 1894 for the purchase of debentures of the corporation of the City of Victoria, B.C., amounting to $150,000, or its sterling equivalent at the rate of $4.864 to the one pound sterling, in sums of $1,000 each or its sterling equivalent as aforesaid, payable in fifty years from the 1st October 1894, and bearing interest from that date at the rate of 4½ per cent. per annum, payable half-yearly, with principal and interest payable as aforesaid, at the office of the Bank of British North America, either in London, England, New York, U.S.A., Montreal, Canada, or Victoria, Canada.

The corporation reserves to itself the right to redeem and purchase these debentures on paying the amount thereof and the interest due thereon at the date of such purchase to the holder or holders thereof at any time after twenty-five years from the date of issuance of such debentures. The tenderer must state the price net at Victoria which he will pay.

In addition to the net price the purchaser will have to pay the corporation the interest at 4½ per cent. from the 1st October, 1894, to whatever date the money is received by the City Treasurer.

The above debentures are issued under authority of "The Water Works Loan By-Law, 1894," with principal and interest secured by a rate on all ratable land or land and improvements in the corporation of the City of Victoria.

The corporation does not bind itself to accept any tender.

LEATHER.—There have been further failures in the Montreal and Quebec shoe and leather trade, particulars of which will be found in our summary columns. Business rules quiet with our leather merchants, as shoe manufacturers are about through with fall orders, and no great activity can be looked for during the next couple of months. Letters from England recently to hand ask for consignments of splits, but of these the market here is comparatively bare, and stocks of leather of all kinds are on the moderate side. We quote:—Spanish sole, B. A. No. 1, 18 to 20c.; do No. 2 to B. A., 17 to 18c.; No. 1 ordinary Spanish, 17 to 18c.; No. 2, 16 to 17c.; No. 1 slaughter, 18 to 20c.; No. 2 do., 17 to 18c.; American oak sole, 39 to 43c.; waxed upper, light and medium, 24 to 26c.; do. heavy, 20 to 24c.; grained, 24 to 26c.; Scotch grained, 25 to 27c.; splits, large, 13 to 16c.; do. small, 11 to 12½c.; calf-splits, 27 to 30c.; calf-skins (35 to 40 lbs.), 50 to 60c.; imitation French calfskins, 60 to 70c.; colored calf, American, 23 to 27c.; Canadian, 19 to 21c.; colored pebble cow, 12½ to 13½c.; russet sheepskin linings, 30 to 40c.; harness, 18 to 23c.; buffed cow, 9 to 11c.; extra heavy buff, 12½c.; pebbled cow, 8 to 12c.; polished buff, 9 to 11c.; glove grain, 9 to 10c.; rough, 16 to 17c.; russet and bridle, 40 to 50c.

METALS AND HARDWARE.—There has been little to note in the way of news since last report. Warrants are cabled easier at 42s. 7d. Locally business in iron has been quiet; a fair lot of Carnbroe pig has been sold, ex ship, at $18.50, and some small lots of Siemens at $17.25; it is said domestic bars can be bought in lots at $1.60. In plates of all kinds there is no change here or abroad. Copper is cabled a trifle easier, and lead a little higher, but $2.75 to 2.85 continues about the range in which business can be done on spot. We quote:—Coltness pig iron, none here; Calder, No. 1, none here; Calder No. 3, none here; Summerlee, $20.50 to $21; Eglinton, $18.50; Gartsherrie; none here; Langloan, none here; Carnbroe, $18.50 to 19.00; Shotts, none here; Middlesboro, No. 3, $17; Niagara No. 2, $18.50 to 19.00; Siemens, pig, No. 1, $16.50 to $17.25; Ferrona, No. 1, $16.50 to 17.00; machinery scrap, $15.00; common do., $12.00; bar iron, Canadian, $1.65; British, $5.25; best refined, $2.40; Low Moor, $5.10; Canada plates—Blaina, or Garth, $2.05 to 2.10; all polished Canadas, $2.75; Terne roofing plate, 20 x 28, $5.75 to $6.00. Black sheet iron, No. 28, $2.30; No. 26, $2.20; No. 24, $2.10; tin plates—Bradley charcoal, $5.25 to $5.50; charcoal I.C., $3.50; P.D. Crown, $3.75 to 4.00; do. I.X., $4.75 to 5.00; Coke I.C., $2.75 to 2.90; coke wasters, $2.75; galvanized sheets, No. 28, ordinary brands, 4½ to 4¾c.; No. 26, 4c.; No. 24, 3¾c., in case lots; Morewood, 5¾ to 6c.; tinned sheets, coke, No. 24, 6 to 6¼c.; No. 26, 6½ to 6¾c.; the usual extra for large sizes. Hoops and bands, per 100 lbs., $2.25 to 2.30. Steel boiler plate, ¼ inch and upwards, $2.00 to 2.10 for Dalzell, and equal; American steel plates, $1.90 to $2; ditto, three-sixteenths inch, $2.60; common tank iron, $1.65 to 1.75; tank steel, $1.80; heads, $2.85; Russian sheet iron, 10 to 10½c.; lead, per 100lbs., pig, $2.75 to 2.90; sheet, $4.00 to $4.25; shot, $6.00 to 6.50; best cast steel, 10½ to 12c.; spring, $2.50; tire, $2.50 to 2.75; sleigh shoe, $2.40; round machinery steel, $3; ingot tin, 18 to 18½c.; bar tin, 25c.; ingot copper, 9¾ to 10½c.; sheet zinc, $4.75 to 5.00; spelter, $4.50 to 4.75; American do., $4.50 to 4.75. Antimony, 10 to 12c.; bright iron wires, Nos. 0 to 8, $2.65 per 100 lbs.; annealed do, $2.70; galvanized, $3.85; the trade discount on wire is 20 per cent. Barb and twisted wire and staples, 3½c. Coil chain, ¼ inch, 5c.; ⅜ inch, 4½c.; 7-16 in.. 4¼c.; ½ in., 3¾ to 4c.; ⅝ in., ¼c.; ¾ in., 3¼c., ⅞ in., and upwards.

OILS, PAINTS AND GLASS.—We have again to note a further advance in linseed oil, which is very firm in England, and 60c. per gal. is now asked in single brls. There has been considerable disturbance in turpentine; one concern has begun bringing in turpentine in tanks,

barreling it here, and has been offering it at 39 to 40c per gal., net prices, but they have been selling it by weight, and there have been a good many complaints about the gauging. The regular price is 44c in single brls. Dry white lead is reported firmer in England, with best brands well sold up. We quote:—Turpentine, 44c per gallon for single barrels; two to four barrels, 43c. Linseed oil, raw, 57c. per gallon; boiled, 60c.; 5-barrel lots, 1c. less; olive oil, machinery, 90c.; castor, in lots, 6¼c.; single cases, 6½ to 6¾c.; tins, 7c.; Nfld cod, 38 to 40c per gal. Gaspe oil, 38c. per gal.; steam refined seal, 38 to 40c., in small lots. Leads (chemically pure and first-class brands only), $4.50 to 5.00. No 1, $4.50. No 2, $4 25., No. 3, $4.00. dry white lead, 5c., genuine red do. 4½c. No 1 red lead 4c. putty, 2c. in bladders per brl. London washed whiting, 40 to 45c.; Paris white, 90c.; Venetian red, $1 50 to 1.75; yellow ochre, $1 50 to 1.75; spruce ochre, $2 25 to 2.50; window glass, $1 20 per 50 feet for first break; $1.80 for second break, third break, $2 80.

WOOL.—The long expected cargo of Cape wool for this market, arrived in Boston on Monday. In other directions there is nothing new. We quote Cape 14 to 16½c.; B.A. scoured, 28 to 33c.; domestic fleece, 17 to 20c.; pulled supers, 20 to 20½c. per pound.

TORONTO MARKETS

TORONTO, Oct. 18th, 1894

DRUGS.—A moderate volume of trade is doing; while things are not active merchants believe that at the present time business is as good as it will be at any time during the year. Holiday sundries are beginning to move, and in a few weeks this trade will be active. Orders for heavy goods are coming in freely in face of the approaching close of navigation on the upper lakes. Values remain very steady. Opium and morphias are firm. Oil anise seed is advancing abroad and the local market is firm. Glycerine is strong. Vanilla beans, Mex., are scarce, and the prices of local jobbers are advancing.

DRY GOODS.—Although wholesale merchants are not at the present moment very actively engaged, they speak hopefully of the conditions of trade. They base their views upon the fact that retail merchants are experiencing a revival of trade. A number of country merchants report that last Saturday was the best day they have had in several years, while from conversation with city retail merchants we learn that the present week is opening up well. But some little time must elapse before stocks are broken into, and until then sorting up trade done by jobbers cannot reach any considerable volume.

GRAIN.—Wheat has been dull all the week, while quotations have moved neither up nor down. Estimates placing the total yield of winter and spring wheat in the United States in 1894 at over 500,000,000 bush., together with another increase of more than 2,000,000 bush in the visible, twice the increase expected, have exerted a bearish influence on United States markets, and lower values on this side have caused an easier feeling in England. Oats are quiet and easy. Barley is higher, an advance of 2c. the bushel having been made. The principal demand is from local brewers, though we hear of some small lots moving to the United States. Rye is higher, at 50 to 51c., with a good movement to local distillers. There is some export enquiry for peas, but at lower prices. Buckwheat remains dull, and deliveries are not of good quality.

The stocks of grain in store at Port Arthur on Sept 28th were 963,541 bushels. During the week there were received 1,300,171 bushels, and shipped 946,400 bushels, leaving in store on Oct. 13th, 1,317,312

TORONTO STOCKS IN STORE

	Oct. 15, 1894	Oct. 16, 1893	Oct. 16, 1892
Hard wheat	42,400	40,000	14,100
Fall wheat	18,393	45,969	72,159
Spring wheat	500	16,237	29,121
Goose wheat	....	5,000	5,000
Barley	48,565	29,699	51,918
Peas	400	2,445	1,135
Oats	15,922	....	3,200
Total	126,680	139,200	176,633

GROCERIES.—Wholesale merchants are not complaining of the situation. Trade in Valencia raisins, currants and prunes is fairly active. Shipments of new Eleme figs are coming to

hand. Advices from primary points indicate a strong rice market. Competition among jobbers has caused an easy feeling to prevail in sugars. Values in teas are steady, but continue firm. Canned tomatoes are in active demand, while business in canned salmon is reported exceedingly active.

HARDWARE.—We venture to think that on the whole the volume of business done by wholesale jobbing houses this week will not reach the total of the previous seven days. But merchants are fairly busy sending out fall specialties, such as axes, axe handles, saws, stove pipes, elbows, stove boards, cow ties, etc. Orders for winter supplies of sleigh bells, snow shovels and skates are being freely booked. In plumbers' supplies the movement is steady, and nothing in the trade has occurred worthy of note. Values remain very firm, and but few alterations are made in our table of quotations. Manufacturers of harvest tools have reduced prices on list, and a discount of 52½ per cent. is now allowed instead of 45 per cent., the previous discount off list. The metal trade generally is considered satisfactory, especially in galvanized iron, tin plate, Canada plate and sheet zinc. London cables pig tin 7s. 6d. decline and light business. James Lewis & Sons, in their circular of Liverpool, October 2nd, remark of copper that "negotiations for limitation of production continue, with fair prospect of success."

HIDES AND SKINS.—The recent advance in hides proves to have been of but a temporary nature, and prices are again declining. Sales of cured have been made at 4¼c., while green are quoted at 3½c. The easier feeling is due, undoubtedly, to the failure of tanners to get a higher price for leather, and until there be a marked improvement in the industrial situation it will be impossible to sustain an advance in values. Sheepskins are unchanged at 50c., or in other words, they are weak, having failed to make the usual bi-monthly advance. Calfskins are quiet and prices nominal. Tallow is not in exccessive supply, while the demand is good, and, in consequence, the market is firm.

LEATHER.—A fair amount of trade is doing in general lines. Prices are firm, but we do not learn of any advances. No exports of sole have been made this week, as there is no accumulation of stock. English enquiries are such as would indicate a good export movement during November and December. The following from the Chicago *Review* may prove of interest: "Many tanners are realizing that the oversupply of cattle in 1890 and 1892 is really responsible for much of the depression that has since characterized the leather industry. A surplus of hides means a surplus of leather, and a surplus of leather means a shrinkage of prices beyond the hope of profit. Now that cattle receipts are normal again, and there is no possibility of the stock yards being inundated by a flood of low-priced stock, all branches of the business should be more stable."

PROVISIONS.—A quiet week. Last week there was a scarcity of good dairy butter on the market; receipts are now larger, however, while the demand is rather slack; 18c. is paid for choice quality; in medium and low grades there is but little activity. The feeling in cheese is somewhat weaker at 10¾c. to 11c. In hog products there is an easier feeling as a result of an accumulation of new pork. Packing operations have not, of course, reached their full activity yet; a larger number of hogs are being brought into the city by farmers, and on Tuesday receipts were estimated to total 1,000 hogs. Some quotations are lower; we note market prices: Long clear bacon, 8½c to 8¾c.; breakfast smoked, 11½c. to 12c.; hams, 11½c to 12c.; rolls, 9c. to 9½c.; lard, 9c. to 9¾c. per. lb. Receipts and shipments, hog products, Chicago, past week: Pork, none and 3,305 bbls.; lard, 466,000 and 5,852,000; meats, 3,026,000 and 9,807,000 lbs. Receipts of hogs' Chicago, last week, 107,667, and shipments, 49,268, or less than estimated by about 20,000. Receipts to-day, 33,000, against 31,000 estimated, but only 2,500 and 2,000 respectively at Kansas City and Omaha. For dried apples 4¾c. is bid, but there is little movement. Evaporated apples are offering at 7c. to 7½c., but the views of buyers and sellers are apart and trade is meantime in abeyance.

WOOL.—There is but little doing on the local wool market, and little consumptive demand for woolen goods throughout the country as communications between domestic manufacturers and wool merchants lead to few transactions, and none of any considerable amount. There is practically no enquiry for Canadian fleece. The close of the London sales found American and German buyers competing for fine merino in the grease up to the very last, and paying full prices for them, but the series as a whole was a disappointment, and it is known that many lots sold under the hammer for less than they could have been obtained before and during the early portion of the sale.

BRITISH MARKETS.

The Manchester report of S. W. Royse & Co., dated September 29, says:

CHEMICALS.—During the last month there has been some improvement in the general chemical trade, but mainly on export account, and more particularly for the United States; in the home trade there is little if any actual improvement, though there is a more hopeful feeling. Bleaching powder is moving fairly well, and there is little if any change in quotations; contracts are now being placed for 1895 at 10s. per ton below spot prices. Caustic soda is in good demand for both early and forward delivery. Ammonia alkali is unchanged in value; there has been competition for next year's contracts, which are now being freely placed, as present figures are tempting. Chlorates of potash and soda are on the easy side. The Board of Trade returns for the eight months ending August 31st last, as compared with the corresponding period of 1893, show in the export of alkali a decrease in weight of 32,068 tons, and in value £348,024, and in the exports of bleaching materials a decrease in weight of 11,657 tons, and in value £112,463. In the tar products branch pitch has advanced rapidly, and is very firm; creosote, in view of the continuance of the Scotch coal strike, might have been expected to be dearer, but this is not the case, and little business is doing in it at present; solvent naphtha is easy, and contracts have been made for forward delivery at below spot prices; benzoles, however, are firmer; carbolic acids also are steady, but crude appears higher than is justified by the present position of crystals. Sulphate of ammonia is drooping, but other ammonia salts are moving well at full figures. Acetates of lime have advanced strongly, and it is expected that with a continuance of the new law in America regarding "free alcohol," the production of lime salt there will decrease considerably. Acetate of soda is quite steady, though quiet. Acetates of lead are firm; nitrate of lead has improved in value, and is in good demand. More business is passing in sulphate of copper, but mainly for forward delivery, and at a good advance in price. Green copperas is still difficult to sell, and stocks are heavy. Carbonate and caustic potash are quiet, but firm, and an advance of 5s. to 10s. per ton is asked for next year's contracts. Yellow prussiate of potash is steady. Oxalic acid is selling better at convention prices. Borax is steady at present.

MINERALS.—Matters are proceeding quietly in this department, and there is really little of importance to report. In iron ore there is rather less business doing, and during August there was some falling away in the imports; the imports for the eight months ended August 31st, still, however, show an increase in weight of 179,886 tons, and in value of £131,363 on those for the corresponding period of 1893. Chrome ore continues to sell freely at improved figures, and in Manganese ore there is no change. Foreign brimstone is steady in price, and much larger quantities have latterly been imported; the impetus for the eight months ended August 31st last are heavier by 672 tons, but lower in value by £5,685 than those during the corresponding period of last year. Phosphates of lime are quiet, but prices steady. China clay is dull in the home trade, but is in better demand for export, American orders which had been kept back being now sent forward.

METALS.—The improvement in the pig-iron markets, which we pointed out in our August report, was continued during the first half of the current month with a further advance in values, but prices have since gradually receded, and are now about the same as at the beginning of the month. They are, however, steady, makers being well provided with orders for the present, and the market has a good tone, although business is just now somewhat quieter. The manufactured iron trade in the Midlands is fairly good, and prices are steady. Copper has advanced steadily during the month, and is about 30s. per ton dearer. Tin, which is reported to be largely under the control of a syndicate, has fluctuated, and closes steady at an advance of about 10s. per ton. Spelter is slightly lower, and the same may be said about lead, both being easy.

Subscribed Capital... $400,000 00 Government Deposit... $56,000 00
Paid-up Capital . 100,000 00 Reserve 54,720 00

Business in force over $4,000,000 00

The attention of the insuring public and live progressive agents is called to the following reasons for selecting this company:

First It is the only Canadian company giving its policyholders the security of a four per cent. reserve; all others without exception reserving on a lower standard.

Second The policy contract is as liberal as any issued. No restriction as to residence, travel or occupation, and incontestable after one year.

Third The premium rates are low and the cost to the policyholder is certain to be less than in any other company because a better rate of interest can be earned in the west than at the home of any other company.

Fourth Every desirable plan of insurance is issued from the low priced "PAY AS YOU GO" plan to the shortest single premium endowment.

TIMBER IN BRITAIN.

The Liverpool circular of Farnworth & Jardine, dated 1st October, states that the arrivals from Canada during September were 27 vessels of 25,528 tons, against 39 vessels of 36,275 tons during the corresponding month last year, and the aggregate tonnage to this date from all places during the years 1892, 1893, and 1894 has been 337,874, 299,004 and 314,458 tons respectively. Imports of both timber and deals into the United Kingdom have been moderate. Business there, however, has continued quiet, and considering the low prices of most articles the deliveries have been disappointing. Stocks are quite ample, and there is no improvement in values to report, though the market is slightly firmer. The circular gives the following particulars:

Canadian Woods.—Waney and square pine have been imported moderately: the deliveries have been on a corresponding scale, and there is no change in value to report. *Red Pine*—The import has consisted of one small parcel, but there is little enquiry. *Oak*—There has been a little more enquiry during the month, but the deliveries have been unsatisfactory, and there is little change in value to report; the present stock is still too heavy. Ash has come forward too freely; prices are lower, and the stock is too heavy. Elm continues in fair request; value is unchanged and the stock is moderate. *Pine Deals*—The import has been in excess of the same month during the past two years; the demand has been fair and the prices steady, with a slight upward tendency; the stock, however, is heavy.

New Brunswick and Nova Scotia Spruce and Pine Deals.—Of spruce deals the import has been moderate, viz., 5,267 standards, against 8,401 standards, and 9,185 standards corresponding months in 1893 and 1892. The deliveries have been small, consequently the stock has not been lessened and is quite sufficient; prices have continued steady throughout the month, the latest sales being at a slight advance, not sufficient, however, to cover the higher rates of insurance. *Pine Deals*—No change to report.

Birch.—Both logs and planks have been imported more moderately; there has been a fair enquiry, but there is no change in value for logs; planks have a slightly upward tendency, the last sales being at from £5 15s. to £6 ex quay; stocks of both are still too large.

United States Oak.—For logs there is no change in the market to report, and prices continue very low; the stock remains excessive. Of oak planks the import has been moderate, but the demand has not been large; the stock is still too heavy. Prices are slightly firmer for contract shipping.

Pitch Pine.—The arrivals during the past month have been 4 vessels, 5,403 tons, against 7 vessels, 10,067 tons, during the like time last year. *Hewn.*—There has been no import, but the stock is more than ample for the small consumption. Of sawn several cargoes have arrived on consignment, which have still further depressed the market, and prices are about the lowest ever known; stocks are very excessive. Planks are dull of sale, and boards have arrived too freely, with a consequent fall in value, and stocks are heavy.

Sequoia (Californian Redwood).—Stocks are heavy and are entirely in merchants' hands; transactions are restricted to sales by retail at low prices; prospects are not encouraging.

British Columbian and Oregon Pine.—There has been no import. Stocks are firmly held, and are fully ample for the limited demand.

United States Staves.—The better grades are in fair request, but common qualities are neglected, and for these prices rule low. Stocks are heavy.

Baltic and European Woods.—The arrivals during the past month have been 20 vessels, 10,811 tons, against 21 vessels, 13,470 tons, during the like time last year. Of fir timber there has been no import; deliveries almost nominal, and stocks very moderate. *Red and White Deals.*—The import has been very small, and, while the consumption has been fair, stocks in merchants' hands are heavy. Of flooring boards there has been a moderate supply, and the deliveries have been fairly satisfactory. There has been rather more doing on contract, and stocks are not excessive, though quite sufficient. Masts and spars are in limited request; imports have consisted chiefly of mining timber and pit props, of which there is a large consumption, but at low prices.

East India Teak and Greenheart.—Teak has been quiet, values are without change, and stocks are moderate. *Greenheart.*—There has been no import, deliveries have been on a moderate scale, prices are steady, and stocks moderate.

Furniture Woods.—The arrivals during the past month have been as follows: Of mahogany, 645 logs and curls from Tabasco; 1,743 logs and curls from Cuba; 1,373 logs from Africa; 356 from Panama. Of cedar, 230 logs from Cuba. Several auction sales have taken place, a large quantity of wood has changed hands, and the market is now moderately stocked. *Honduras Mahogany.*—Sound sizable wood meets with ready sale at good prices, but small wood, of which the stock chiefly consists, rules very low in value. *Mexican Mahogany.*—Tabasco of good size and quality is saleable at fair prices, but faulty wood is lower in value; the stock is limited to one cargo of Santa Anna. In Minatitlan, &c., nothing has been doing for a long time past, and there is none in stock. Panama mahogany is only saleable at extremely low prices, and the stock is sufficient. African mahogany continues to arrive on a large scale, much in excess of the demand, consequently sales have been of a forced character, and prices continue depressed except for fine-sized figury wood. *St. Domingo Mahogany.*—There is a fair opening for fresh arrivals, as the stock of logs is practically exhausted; curls, however, are heavy in stock, but being of small size and common quality, they are quite neglected. Cuba mahogany of good size and quality meets with ready sale at fair prices, but small wood is much neglected; the stock is ample. *Cedar*—Mexican, Cuba, &c.—There is a fair demand for sizable wood, and prices continue fairly steady; stocks are practically exhausted. For West Coast and South American there is no demand, and there is none in stock. Pencil wood is dull of sale, and stocks are all in dealers' hands. *Walnut.*—American of the best quality and good size still commands full value, but ordinary quality and small wood rules low in price.

MONETARY AFFAIRS IN BRITAIN.

Having just returned from a two or three months' visit to the Old Conntry, Mr. George Hague, general manager of the Merchants Bank of Canada, was interviewed on Tuesday last by a representative of the *Empire*. We quote below a portion of his remarks:

"Canadian 3 per cents have touched par in the London money market; a thing quite unprecedented," said Mr. Hague.

"When I was in London I found all securities fairly strong, Canadian securities being the strongest of all the British colonies."

"Our provincial bonds," he said, meaning of course Quebec bonds, "which were floated in London about two years ago, have appreciated considerably, but, of course, Quebec bonds are subject to influences that do not apply to some other securities. However, when they are quoted and readily saleable, it indicates that a much better feeling exists regarding the financial condition of the province."

Mr. Hague also referred to the general conditions of the market while he was in London, and declared that money was exceedingly plentiful, all the banks having a great accumulation. Many private individuals in the old country, he was told, are suffering on account of the collapse of bubble companies that were started some years ago, and of which the greater number never even came into operation.

Mr. Hague related an interesting case which came under his observation while in England, and one that had been brought into court. A certain newspaper had been bold enough to criticize one of the companies, and an action for libel followed. During the trial evidence was adduced to show that a member of Parliament, who occupied a high position socially, had floated between 50 and 60 of these concerns, very few of which were started, and with the result that individuals who had subscribed their money were consequently that much out of pocket.

When the question was asked by the interviewer, "What is the trade outlook?" Mr. Hague replied, that from what he could gather some branches of trade are as good as ever, and there is generally a more hopeful feeling. "The only drawback is the frequent strikes and bitter contests between large bodies of workmen and the owners of iudustrial enterprises. It appears to me that the labor leaders in the old country are entering upon a dangerous course and going far beyond the old lines laid down by former leaders of trades unions. In fact, socialistic and communistic ideas appear to dominate their deliberations, as a resolution which was carried recently at Norwich by a good majority means, if we get to the bottom of it, that everybody must be the owner of everything."

"It should be borne in mind, however, that as regards trade in England, which is really the centre of the whole world's trade, be the times good or bad, there are thousands of firms where business is prosperous and little affected by local circumstances."

Touching upon the question of immigration, Mr. Hague said that it occurred to him that labor agitations at home tended to keep the people over there. The promises of the agitators, visionary though they be, tended to a land proprietorship, and, harboring this belief, the people would remain at home and trust in realization of their dreams.

MAKE HAY WHILE THE SUN SHINES.

"I am making hay while the sun shines," was the remark of a young man whose daily employment gives him a good income, "and I find that it is better when the cold winter months come to have a snug little nest egg to draw from, rather than the charitable organizations which are so ready to investigate, and help if they can. In years past I used to 'blow in' what I earned, and seldom if ever had a dollar when the bills of the week were paid and the next pay day came around. I used to earn from $15 to $23 per week, and it would seem as if I might save some of it. Now all is different. I learned a good experience from the hard times of winter, and I will not go broke again, if I have my health. To be sure, there are a few of the luxuries I used to enjoy, which I now have to get along without, but one will soon learn to economise, and in talking with some of the young fellows in my room, I find that they too are placing a little amount each week in the bank, and they will be able to go through the winter months with a degree of ease which their limited means denied them last year." This case is simply an example, and the lesson of last season was too well learned to need any comment. Then there are cases of where young married couples find employment in the factories, and in some instances they would be unable to save any money over what was paid for their living and clothes. Now all is different, and there is a spirit of economy which augurs disaster to the local dealers in the luxuries of life, for the wage earners are fast becoming little capitalists, unless the figures at the different banks tell an untruth.—*Banker's Magazine*

—"This," said the bachelor, as he paid for sewing on a button, "is what is meant by a single tax."—*Cleveland Plaindealer.*

—In the window of a New York shoe store is a card bearing the pasteboard imitation of a human hand. The thumb is pressed over three crisp $1 bills, which are spread out much the same as a card-player holds his hand. Beneath are the words: "Three of a kind take a pair."

—Reporter.—"Did you say your daughter's wedding dress was trimmed with duchess lace?" Mrs. McFudd.—"Not by a long shot! It was thrimmed wid the foinest quality of Irish point. There wasn't wan Dutch article in her whole thruesaw!"—*Chicago Tribune.*

—An experiment, which, should it find many imitators, may have very serious results for British merchant shipping, and for the Royal Naval Reserve, has just been made by Mr. Walter Runciman, head of the large shipping firm of Newcastle-on-Tyne. Mr. Runciman, finding himself materially hampered by the demands of the seamen's and firemen's unions, determined to put two of his vessels under a foreign flag. He made choice of that of Norway. His object is solely one of business. He estimates that by this measure he will save his firm more than three hundred dollars a month for wages on a ship of 2,000 tons, and that if he puts his entire fleet under the same flag, he would effect a total saving of 100,000 dollars. It is not uncommon for foreign ships to choose the British flag, but rarely has the converse selection been made, and it is to be hoped that Mr. Runciman will not find imitators—*Canadian Gazette.*

THE prosperous condition of the Sun Life of Canada is doubtless due to its fair treatment of policyholders, its unconditional policy and prompt payment of death claims.

NOTWITHSTANDING the financial depression of the year 1893 it was the most successful in the history of this progressive company. The New Business completed is greater than that secured by any other Canadian Company in one year, and must be gratifying to policyholders and directors alike.

Substantial increases have been made in **New Business, Total Business in Force, Income and Assets.**

FOR SALE.

400 ACRES choice farm land for sale in the township of Romney, Co. of Kent, which is the Garden of Canada. These lots are situated on either side of the main road leading southward from Tilbury Centre toward Lake Erie. A portion of the land is within two miles of the Lake and a half mile north of a station on the new Detroit River and Lake Erie Railway. It is also about five miles south of Tilbury Centre on the Canada Southern and Canada Pacific Railways. The Grand Trunk is still one mile farther north. On either of these roads a person may reach Detroit in less than one hour. The soil, which is deep and rich, thoroughly drained, is covered with ash, elm, hickory, basswood, etc. Terms to suit purchasers. **EDWARD TROUT,** Cor. Church and Court Sts., Toronto.

DECISIONS IN COMMERCIAL LAW

SIMS V. LANDRAY.—Two questions were raised: first, whether the filling in of a purchaser's name in a memorandum of purchase of land was a good signature, and, secondly, whether such signature by the auctioneer's clerk was good, under the following circumstances: The defendant was declared the highest bidder and the purchaser of a parcel of land sold by auction. The auctioneer's clerk went to the defendant, who was unknown to the auctioneer, to obtain his name and address. The defendant went to the table and stood beside it while the clerk filled in his name and address in the memorandum as follows: "I, Joseph Gilbert Landray, of etc., etc." The defendant refused to sign, as he had not his cheque-book with him, but said he would call again and sign the contract and pay the deposit. He subsequently declined to complete. Romer, J., held that there was authority given by the purchaser to the clerk to sign for him, as his standing by in order to watch the clerk's entry, after giving his name and address for the express purpose of being written in the memorandum, was a sufficient authority; and also that the insertion of the name in the body of the memorandum was a sufficient signature. The auctioneer, until the hammer falls, is the agent of the vendor alone. Upon the fall of the hammer, which indicates the acceptance of the purchaser's offer or bid, the auctioneer is, from the nature of the case and the usual practice in such matters, the assumed agent of the purchaser to sign the contract. That his agency is not a general one, is clear from the fact that where the auctioneer is selling his own property he is not entitled to sign for the purchaser.

Re CAMPBELL ESTATE.—This was an application under the Succession Duty Act of Manitoba. The deceased, who lived in Manitoba, died there; with the exception of cattle on a farm in the province, valued at $4,500, the whole of the estate, valued at over $70,000, consisted of bank stocks in several Canadian banks, the head offices of which were in Quebec or Ontario, shares in the Hudson's Bay Company, and moneys in the hands of that company in London. A question arose under the Succession Duty Act as to the duty payable on the estate, if any. Held by the Surrogate judge at Winnipeg that the matter might be decided on the simple ground that the statute, when it expressly limited its operation to "property situate within this province," should be taken to mean property actually situated, not merely deemed to be situated, within Manitoba. It seemed unlikely that the word "situate" would have been inserted if it had been intended that the provisions of the Act should extend to the personalty which, though actually situated abroad, was by fiction of law considered as having for certain purposes a *situs* where the deceased person had his domicil. While it is true that personal property for some purposes is said to follow the domicil of the deceased owner, and to be dealt with as if it had been situated in the country where that domicil is situated, it could not be properly said that the property was situated there. There were other provisions in the statute which were consistent only with the idea that the property intended to be taxed was property actually situated within the province. Even if the word "situate" had not been used in the statute, taking it as a whole the proper construction to place upon it would be one which would exclude personalty outside the province. There was no sufficient reason to draw a distinction between property such as bank stock and personalty of a more tangible character, so as to hold the statute applicable in the case of the former, though not of the latter. It appearing that the sons and daughters of the deceased were the only beneficiaries, there was no reason why the matter should not be considered, for the purposes of the Act, as if the $4,500 were the only property passing under the will and, if so, no duty would be payable.

ROYAL INSURANCE COMPANY OF ENGLAND VS THE INSURANCE COMPANY OF NORTH AMERICA.—The Supreme Court of the United States holds that there is nothing in the interstate commerce law which vitiates bills of lading, or which, by reason of an allowance of a rebate to the agents of the owners or consignees of goods, if actually made would invalidate the contract of affreightment or exempt a railroad company from liability on its bills of lading.

A FRIENDLY SOCIETY TEST CASE.

At St. Helen's, England, police court, on the 5th inst., a case was heard in which Thomas Manchester sought to recover £18 from the Royal Liver Friendly Society, alleged to be due on a policy of insurance effected upon the life of his father. Mr. Mearns appeared for the plaintiff, and Mr. Barber, of Ashton-under-Lyne, for the company.

Plaintiff stated that in June, 1879, he insured his father in the society, and paid a premium of 2d. a week, the amount payable at death to be £6. In a month or two afterwards he increased it to 6d. a week, the amount at death to be £18. When his father died the company refused payment, although in premiums he had paid over £20. In reply to Mr. Barber, plaintiff admitted that he fell into arrear, and received a notice from the company, but it was not a lapse notice. He was re-admitted into the society in August, 1893, but the arrears remained. Mrs. Manchester testified that after her father-in-law's death, Mr. John May, the local superintendent, said he would try and get them the money, but he did not know whether he should succeed.

Mr. Barber said he would not rely upon technicalities, or he could urge that Thomas Manchester had no insurable interest in the life of his father. He was going to ask the Bench to decide upon the documents, and also upon the rules of the society. Mr. Barber then proceeded to show that there was 10s. 8d arrears of the premiums, and adduced a letter sent by Mr. May asking the Manchesters if in the event of a grant being made by his company he should deduct the arrears.

Mr. Mearns pointed out that at the time of the death the arrears had not been called for.

Mr. John May said he sent a notice of forfeiture to Mrs. Manchester, because she paid the premiums. He called regularly for the premiums.

By Mr. Mearns—He called fortnightly.

Mr. Mearns—The rules say you shall call weekly. If you had called weekly they might have been clear.

Mr. May replied they called as often as there was money to call for.

The magistrates elicited that by the rules when people who had lapsed through arrear were granted re-admission, three months were allowed in which to pay such arrears. It transpired that in this case death took place within the three months. Plaintiff would have judgment for the full £18.

Mr. Mearns said this was an important case affecting the public, and he asked for special costs, and the magistrates allowed £2 2s special costs.—*Insurance Record, London.*

9 Toronto St. Toronto, Ont.

Mercantile Summary.

ON Saturday, 13th inst., Mr. John P. Kerr, senior partner of the Kerr Thread Co., died at his residence in Paisley, Scotland, after a few days' illness. He is described by those who knew him as a man of strict integrity and agreeable disposition. His son, Mr. James Kerr, will, we understand, assume his father's place in the business.

A MEETING was held last week of those interested in the reorganization of the old Board of Trade of St. Johns, Que. Mr. Macpherson was called to the chair, and Mr. Perchard was requested to act as secretary. It was decided to apply to the department of the Secretary of State, Ottawa, for registration, after which a meeting will be called for the election of officers.

A PRESENTATION of a gold-headed ebony walking stick was made last week to Mr. Geo. E. Faulkner, of Halifax, by the staff of R. G. Dun & Co.'s mercantile agency in that city, of which Mr. Faulkner has had charge ever since the death, in 1885, of the late Wm. Hedley. The presentation was accompanied by an address in which the donors of the cane recorded their esteem for Mr. Faulkner and their best wishes for his success in a new field of labor which, as our readers know, is that of fire insurance.

Special Notice to you who Sell Oysters in Bulk

This season we are giving away to every purchaser of 1,000 oyster pails a very handsome window display card with the words "Bulk Oysters for sale here," printed in gold leaf on heavy morocco board, size 19x12, or a handsome chromo lithographed in fifteen colors. The retailer will find it greatly to his advantage to use these cards as a notice to the passing public that he is in the oyster business.

We are offering this special inducement to obtain your trade, as our facilities are 60,000 per day, and every pail guaranteed uniform, perfectly liquid tight and second to none on the market. Our prices are as low as any. Send in a trial order for your pails and get one of these cards.

Mercantile Summary.

FROM Gaspe, Que., we hear of two failures this week. J. & R. Lowndes, general dealers, have assigned to a Montreal accountant. The firm only dates back to about 1890, though the senior had been in business alone years ago unsuccessfully. The liabilities are about $7,000. ——H. S. Lowndes, saw miller, a son of the senior partner in the above firm, who put up a mill a few years ago with the proceeds of an inheritance from his mother, is also reported in difficulties, and a demand of assignment has been made upon him. The two concerns have been intimately connected in business.

ANNOUNCEMENT is made by the Chicago Steel Shipbuilding Company of the completion, at its yard on the Calumet river, in South Chicago, of a dry dock, which is the largest on the lakes. It is 425 feet in length, 100 feet wide at top and 80 feet on floor; depth, 17 feet over sill and keel blocks, and total depth 23½ feet. The Calumet river, between the lake and the dock, has been dredged by the United States Government to a uniform depth of 18 feet. The floor of the dock contains over 2,000 piles, driven 5 feet between centres each way. Such figures as these are significant of the great proportions of modern lake traffic, and of the enlargements everywhere needed to keep pace with the new order of things.

Mercantile Summary.

THE following failures of minor import are to be noted in Montreal since last issue:—E. J. F. Markgraf, who started a West End tea store about eighteen months ago, has already assigned, owing about $3,300.——O. Germain, with a year's experience in the furniture line, is offering 25 cents on the dollar; liabilities are small. ——L. Ponton, a painter by trade, who attempted a small hardware trade, is in difficulties, and trying to compromise liabilities of $1,700.——R. S. Kelly, celebrated as a lacrosse player, and who runs a cigar store, wants his creditors to let him off at the rate of 10 cents on the dollar. ——J. B. Prudhomme & Co., hotelkeepers, have called a meeting of their creditors.——A demand of assignment has been made upon Alphonse Lacoste, dealer in shoes. He failed in 1890, when he compromised at 50 cents in the dollar.——W. E. Seed, a tailor, who began business last spring, has already assigned to the court, owing $4,392.——Mrs. J. Wright, doing a small business in groceries and dry goods in the east end of the city, has been asked to assign.——J. P. Theriault, a small grocer, is in the hands of the assignee; liabilities about $700. What a record! Inexperience, foolish buying, lack of capital, ignorance of business, previous compromising, cheek, slowness of payments, all illustrated in the list—but credit is still cheap.

THIS Company will sell its instruments at prices ranging from $7 to $25 per set. Its "Standard Bell Telephone Set," (protected by registered Trade Mark) designed especially for maintaining a perfect service and used by the Company in connection with its Exchanges, is superior in design and workmanship to any telephone set yet offered for sale.

This Company will arrange to connect places not having telegraphic facilities with the nearest telegraph office, or it will build private lines for firms or individuals, connecting their places of business or residences. It is also prepared to manufacture all kinds of Electrical apparatus.

For particulars apply at the Company's Offices as above.

S. Greenshields, Son & Co. Montreal and Vancouver, B. C.

We offer to the Trade . . .

Priestley's

Black and Colored Serges, Soleils, Silk Warp, Henriettas, Black Union Cashmeres, Cravenettes.

Also the New **Eudora Cloth.**

Special lines in **Cotton Goods, Tweeds and Flannels** at mill prices for immediate delivery.

Bargains in Canadian and Import Prints for the Spring Trade.

Mercantile Summary.

THE merchants of the town of Lancaster, Ont., will close their shops at 8 o'clock on every night but Saturday from Nov. 1st to May 1st.

WE hear from Ingersoll of the death of Mr Thomas D Millar, who was well known in Oxford county and throughout Canada generally as one of the early pioneers in the cheese trade

A DEMAND in insolvency has been served upon Rolland & Bro., wholesale dealers in furniture and cabinet makers' supplies, Montreal. The firm has been somewhat unfortunate in the way of fires in recent years, and has shown signs of great strain in finances for months past, so that the failure is not surprising.

ABOUT five years ago Henry Gabel started blacksmithing at Bancroft Later he opened a general store. Having no previous experience in this line, his assignment now will be no surprise.——Robert Taggart, a tinsmith and tailor at Fenelon Falls, insured the life of his father for $1,000, payable to himself. After the father's death, six months ago, he received the amount of the insurance. With this money he opened a tailoring shop, but already assigns, with $2,000 liabilities. We are not told which branch of his business, the tinsmithing or the tailoring, has brought this about. Still we may surmise that it was an over-purchase of cloth, which is a rather more puzzling commodity to an artisan than tinplate or sheet iron

GWATKIN & SON . . . .
57 Bay Street
Toronto

THE town of Collingwood invites tenders for $7,000 worth of debentures at 5 per cent.

THE Toronto office of Geo. D. Ross & Co. has been changed from 19 Front street west to the Osgoodby Building, 29-33 Melinda street.

THE Montreal Exposition Company is resolved, according to Mr. S. C. Stevenson, to hold an exhibition in that city next year. And it will be a good one, adds the secretary.

A SALE of considerable importance and worthy of the attention of manufacturers will be that of the Ontario Forge and Bolt Company's assets. The day fixed upon for receiving the last tender is Tuesday, November 27th next.

THE Guelph *Mercury* states that Mr. Dodds, accountant of the Traders' Bank in Guelph, has been promoted to be manager at the Drayton branch, the previous manager of which, Mr. H. Mallory, has been appointed manager of the same bank at the Norwich branch.

A LEADING Quebec retailer in the dry goods line, T. Beland, has arranged a compromise at 75 cents on the dollar. He is heavily involved in the failure of Beland & Martineau, lumber dealers, being on accommodation paper to that firm to the extent of some $40,000. His own direct liabilities are about $30,000.——L. N. Allaire, of the same city, piano and sewing machine, whose failure we have already noted, is offering 20 cents on the dollar.

MR. GEO. A. STIMSON, of this city, has purchased $5,000 debentures of the town of Prince Albert, N.W.T. These are repayable at the end of 20 years. As the town has very little debt they brought a good premium. The same broker is the buyer of $7,000 village of Woodbridge bonds, bearing 5 per cent. interest and repayable in thirty annual instalments. These bonds yield the investor about 4½ per cent.

H. T. HATCH, general storekeeper at Pipestone, Man., has got into difficulty and assigned after trying for two years to make money in trade. Formerly a well-to-do farmer, owing to lack of experience he found it difficult to make progress.——Only last March, Fox & Hubbs bought the general stock of C. R. Banting, at Methven, for $1,400, paying $1,000 on account of the same. Shortly after this they claimed a surplus of $3,600. Now we hear of their assignment.——N. & D. Livingstone, general storekeepers at Yorkton, Man., are in trouble from writs and two judgments having been obtained against them. Now they assign. Last year this time they claimed a surplus of $6,000.

ON Wednesday next the dry goods stock of Thorne & Co., Hamilton, will be sold by auction.——To-day the stock of Thos. Roberts, mattress manufacturer here, will be sold.——The grocery stock of A. A. Cutting, Guelph, was sold at a discount of 30 per cent.——The harness stock of J. R. Dickert, Sebringville, realized 44 per cent.——J. Ogden's drug stock here was bought by Charles Lugsdin at 40 per cent. discount.

WE hear of the formation of a company in Montreal whose object is to prevent the breaking of the markets by the slaughter of bankrupt stocks. Its name is The Assets Company; nominal capital $200,000. It proposes to acquire bankrupt estates, either by purchase or otherwise, and to realize the same in the best manner possible, say by weekly sales by auction.

W. J. SPEAR, dealer in musical instruments at Nanaimo, B.C., has assigned and wants to compromise at 50 per cent. —— About four years ago Brown Bros. went from Halifax to Vancouver and started a grocery, but their trade has been very unsatisfactory, and they find that they are not in a position to meet their bills as they mature.——The sheriff has advertised for sale the assets of Joseph Dixon, hotel keeper in the same place.

HAVING carried on the dry goods business about a quarter of a century in Kincardine, D. McInnes, jr., has made his first failure. Having never tasted the bliss of married life, he has been able to manage his affairs economically, but he now surprises his friends by making an assignment, with liabilities of about $5,000.——A. E. Haydut, oil driller, Petrolia, also assigns. ——In 1891, Mrs. Rhode came from Berlin, Germany, to Canada, and opened a fancy goods store in Berlin, Ont. She had about $800 capital, but was not successful. In June, 1893, the sheriff seized her stock. She then borrowed money and discharged him, but the lender was not so fortunate. She is now missing and the bailiff has taken possession of her premises.

A HALIFAX telegram of Tuesday last tells of the receipt from England of news of the suspension of James Smith & Co., Liverpool, timber brokers. Mr. Gilbert Harrison, a member of the firm with large interests, has lately withdrawn. Smith & Co. have handled a large quantity of New Brunswick and Nova Scotia lumber, probably 40,000,000 or 50,000,000 feet a year. Mr. George McLean is their agent in St. John, Mr. J. H. Mathers in Halifax, and King & Co. in Quebec. The firm has a small interest in the St. Lawrence Lumber Co. (Bathurst & Bersimis), and did some business on the North Shore. Mr. Mathers, it is said, shipped them from 20,000,000 to 30,000,000 feet of lumber per year from Halifax, and he has at present at this port loading or to load for them some ten ships. Nobody here will financially suffer by the suspension.

SOME notoriety was caused a few weeks ago by the sudden dismissal of the sheriff's officer from the men's furnishing store of William J. Death in Toronto. He will shortly be tried for interfering with an officer of the law. In March last he mortgaged his chattels and now assigns.——Theo. R. Earl came from Collingwood here about ten years ago and built some nice houses in this city, but it is evident that the money he had then made disappeared at the time of the "boom," and now he is compelled to assign.

MUCH sympathy was felt for Wm. Brown, who, after more than twenty-five years in the carriage goods business in Toronto, found it necessary to suspend payment in December last with $42,000 liabilities. This sum was compromised at 50 per cent., and payments extended nine months. Not being able to meet these payments he now assigns to E. R. C. Clarkson. His present liabilities will now be about $30,000 and nominal assets in excess of this amount. Difficulty in making collections added to ill-health have been the causes which prevented him from carrying out his settlement.

AT St. Anne de Chicoutimi, Que., Cleophas Brassard, a blacksmith and grocer, is in difficulties; he offers to compromise his liabilities with a lump sum of $1,800.——O. Chaput, who is in the lumber business at L'Assomption, has made an assignment. He failed before, as recently as May, 1893, and then settled at 50 cents in the dollar.——H. O. Fortier & Co., doing a small grocery and liquor business at Sherbrooke, have made a voluntary assignment. They only owe about $600, but have less assets, and creditors will get little or nothing.——Lemire & Frere, general merchants, Drummondville, have been asked to assign. The concern has been in trouble before quite recently. They failed in the spring of 1893, with quite heavy liabilities of some $30,000, which were compromised at 40 cents in the dollar. ——A. Larouche, in the general store line at Murray Bay, has arranged a settlement at 30 cents in the dollar.

SEVERAL changes have taken place in the tailoring business of W. W. Larmour, of this city. The firm originally was Walker & Larmour, then Johnston & Larmour. Last February the former died, and the latter assumed the liabilities and undertook to pay the heirs their share in the estate. This has evidently crippled him, and now he assigns.——In February, 1891, A. E. Vennor bought the Toronto tobacco business of W. A. Thorpe, paying him $500 and assuming his trade liabilities. Lately he has found it difficult to make his expenses, and now assigns.

FIVE years ago Thomas Price succeeded F. W. Beck in the furniture business at Delhi, but it is evident that he did not possess the elements of success; and those who best know him will not be surprised to hear that he wants to compromise his debts.——M. Gates migrated from Philadelphia to Woodstock in the fall of 1889 with about $3,000 worth of machinery, and began the manufacture of carpets. For some time he made fair progress, but in April last moved to St. Catharines and joined one Syer under the style of Gates & Syer. The latter was not able to carry out his agreement, and so one Gardner took his place. Then the style was changed to Gates & Gardner. The firm now assigns.

FOURTEEN years ago the Hamilton Bridge Co., of Hamilton, was formed with a capital stock of $100,000, of which $60,000 was paid, and it purchased the assets of the Hamilton Tool Co., which had failed. They did a good business for some years, but met with some losses, and the concern was not always worked amicably. Finally a writ for $10,000 was issued by Mr. A. T. Wood, one of the directors, who had endorsed the company's paper to that amount. This resulted in an open disagreement among the shareholders; consequently the assignment, which was made a few days ago, will not be a surprise. It now looks, we regret to say, as if the company would be wound up.

JEAN PLAMONDON, a shoe manufacturer of Quebec, involved through the recent failure of Noel & Co., hardware dealers, has assigned to the court, and a meeting of creditors is called for the 30th inst. His direct liabilities are $10,840, mortgages $7,500, indirect $4,700.——Upon the demand of a Montreal house, an assignment has been made by J. A. Hamel, Quebec, physician and dealer in drugs. The liabilities are $2,100, of which $825 are privileged.——A. A. Cantin, an extensive grocer in St. Roch's suburb, Quebec, is in embarrassed circumstances, owing to heavy recent losses, and will ask an extension. He claims he can show a surplus of some $20,000. Mr. Cantin has always been an ambitious trader, and got into trouble seven years ago, when he compromised at 60 cents.

A MOST unexpected suspension in the Montreal dry goods trade is that of Jeremie Perrault & Co., now about the oldest retail concern in the city and without a previous unfavorable break in its record. Mr. Perrault has always stood very highly personally, has occupied a seat on the city finance committee, and has always been considered to be in easy shape, though trade has been largely diverted from his locality, and it was not believed that he had been making money of late years. It would now appear, however, that a sort of dry rot has been present in his affairs for some time past; his real estate is found to be heavily mortgaged, and among his assets is a large item of book account carried along for the past twenty years, many of them. His liabilities will approximate at $60,000, some $20,000 to $25,000 being due it is said, to a bank, which discounted his own notes.

CELIA HOBART, grocer, etc., at Walkerburg finds after a year and a half's experience that she has not improved her financial position, and now assigns.——C. F. Weir and W. F. Fair, both grocers at Port Stanley, have also assigned. The former was burnt out in January, 1892. In May last year he bought the stock of Wm. Berry and was supposed to be making progress, but we fear that granting credit too freely has brought about his trouble. The latter succeeded McQueen Bros. in May last, but had no experience, and in a short time was obliged to mortgage his chattels for $900, hence the difficulty.——Nearly one year ago James Hyde failed in Barrie as a dry goods dealer, with liabilities of $21,500. He went afterward with the assistance of a wholesale firm, bought the stock, giving security of $4,000 in the shape of a chattel mortgage, which is now being foreclosed.

TORONTO, FRIDAY, OCTOBER 26, 1894.

THE SITUATION.

General Booth is finding that the labor organizations, in Canada, not less than in Australia and the Cape of Good Hope, are opposing his projected immigrant colony. It is difficult to see how such a colony would interfere with the men who belong to the labor unions. General Booth's plan, as we understand it, does not propose to throw the emigrants into the general labor market, but to form of them a separate industrial colony, where they would be expected to earn their own living by cultivating the ground. Instead of competitors they would be allies and customers of other owners of labor, whom they would help and not injure. An industrial colony of men whose labor is now counted surplus, or at least not utilized, would be a positive addition to the productive forces of the country. There may be grounds of objection to the scheme in the fact that the material for the colonists would consist largely of paupers. For this reason, the experiment had better be made on a comparatively modest scale, and if serious objections to it were developed by experience, the Government ought to retain the power of preventing its further aggregation. Paupers, we all know, are not the most desirable immigrants; with them would pretty sure to be more than the ordinary proportion of the vicious and the idle. Objections are constantly made to Mr. Barnardo's youthful immigrants; but Mr. Barnardo, who keeps a better trace of them than anybody else does, denies their alleged objectionable character. The same is true of Miss Rye's girl immigrants. The whole subject is in a state of doubt and obscurity, and it would not be unreasonable for the Dominion Government to appoint a commission to clear up the facts.

For the first time Canadian three per cent. securities have reached par in the London market. Gradually the interest has been lowered from six to three per cent., so that an equal amount of debt imposes only half as much burthen as it once did. While this process has been going on, the debt has been increasing, but the increase has not been equal to that of the resources of the country. This is one of the secrets of the decline of interest; another cause is to be found in the general fall in the rate of interest. But we ought not to regard a future increase of the debt, either absolutely or relatively, as a desirable thing, but rather as a danger to be avoided. No absolute limitation can be laid down, but every increase in debt should be accompanied with the means of paying the interest, and a policy of reducing the principal is not one that can be wholly excluded from consideration. It is encouraging to contrast the financial condition of Canada with that of our great neighbor in the earlier days of the republic. When the United States had a population three times as great as that of Canada today, the market value of her three per cents was only 62. At this time the debt of the republic was not over $100,000,000. But it was at a time of depression much more severe than has been experienced in recent years; when bank suspension was the rule both in Great Britain and the United States. At no period in the first half century of the republic could she borrow on nearly so good terms as Canada can to-day, even when she was without debt.

Now that the power acqueduct scheme for bringing water from Lake Simcoe to Toronto has been referred to the city engineer and the city solicitor to report upon, we shall probably be able to get some definite idea of what is intended. When the city council was approached by the company, its proper course would have been to ask to have laid before it the plans and specifications of the intended work as a necessary basis of comprehending the scope and magnitude of the undertaking, and the way in which it was proposed to be carried out. Till these were forthcoming, no action of any kind should have been taken. These preliminaries were necessary as a mere guarantee of good faith on the part of the company, which, on business principles, ought to have volunteered this information without being asked for it. In England the charter would not have been granted until the plans and specifications had been produced. Either an open water course or a tunnel must be intended; the former is not probable, even if practicable, and the amount of power which could be brought by a pipe of say ten feet in diameter would be limited, no more, it is said on good authority, than the total power now used in the city. The report of the city engineer ought to show what prospect there is of water power being brought to the city in this way at a less cost than it can now be produced for.

Mr. St. Louis, contractor for the Curran bridge, is called upon by the Dominion Government to answer for alleged malpractices, by which a large sum of public money was improperly made way with, both in a civil action and criminal proceedings. The usual course is to proceed in one of these ways, either civilly or criminally, though both remedies are open to the complainant. Mr. St. Louis was a strong supporter of the Government, and it may be, a contributor to the election funds. All the more, the Goverment may feel the necessity of being unusually strict in the prosecution. Mr. St. Louis' friends complain that he should be pursued, in this way, by a Government to which he was friendly; but the plea cannot be accepted as valid. The case is one in which the Government itself might come under suspicion, and it is bound to show that its hands are clean. The suit and the prosecution are in some sort a provocation to Mr. St. Louis to retort upon his pursuers, if he can. The fact that they are both brought seems to show that nothing is feared by the Government. The case ought not to be prejudiced against either party to it. That gross wrong was committed has already been made plain, and for redress of these wrongs clamorous demands have been made. The progress of the cases will be watched with great interest. This is the third case of the kind which the Government has brought. It was bound to call Mr. St. Louis to account; whether it might not have been

content to proceed by one form of remedy at a time is the only question.

The Canadian loan now being subscribed in England is £2,250,000—nearly $11,000,000. The interest is three per cent.; but as it is payable from the 1st October, and the whole of the subscription is not required to be paid before the 20th November, the lender has a slight advantage in these respects at the start. One per cent. is payable on application, 29 per cent. on allotment, and the balance of 70 per cent. on the 26th November. Though the reason for paying off the old loan is that it had reached maturity, the operation is little more than refunding, the new loan being made on better terms than the one to be paid off. Though the outstanding three per cents have recently been selling at par, the new loan, in order to insure takers, was offered at a minimum of 95, and, according to the reports, is likely to bring about 97. The condition of the market made the time for obtaining the loan opportune, as good terms would not have been obtained a year ago, when the whole financial world was in a state of semi-panic. And the condition of the market is such that Government securities generally find preference, though much depends upon the country asking the loan and the state of its finances.

A Socialistic Congress sitting at Frankfort-on-the-Main has passed resolutions in favor of national insurance, factory inspection, arbitration of labor disputes, an eight-hour working day and a minimum rate of wages. One of these, factory inspection, is not Socialistic, and is not new; it is simply the performance of a duty by the government towards workmen and women in factories. Provision for it is already made in Canada. The other items are all Socialistic and contentious. State insurance is not impossible, though in most countries it is a long way off. So far as we know, it actually exists only in one of the cantons of Switzerland. The Austrian Government is said to be considering the transfer of the entire business from companies to the State; but if ever the decision be in favor of taking this course, we shall probably have to wait a long time before it will be possible to quote the result of Austria's experience. France, England, Germany, Russia and the United States have each and all at one time or another rejected proposals for State insurance. Arbitration of labor disputes, within certain limits, Ontario has provided for. An eight-hours' day and a minimum wage are of course intended to mean less work and more pay; two movements which, going in opposite directions, tend to antagonize one another. These labor questions are common currency the world over, and no matter where they are started the interest in them is universal.

THE BANK STATEMENT.

We give below a condensation of the figures of the statement of Canadian banks for the month of September, which bears date Ottawa, 19th October. It is compared with the bank statement for the previous month, and shows capital, reserve, assets and liabilities, average holdings of specie, and Dominion notes, &c.

Canadian Bank Statement.

LIABILITIES.

	September, 1894.	August, 1894.
Capital authorized	$ 75,458,685	$ 75,458,685
Capital paid up	62,198,670	62,189,585
Reserve Funds	27,260,835	27,166,850
Notes in circulation	33,355,156	30,270,366
Dominion and Provincial Government deposits	5,615,836	5,928,143
Public deposits on demand	66,584,661	66,389,701
Public deposits after notice	111,084,063	109,998,432
Bank loans or deposits from other banks secured	69,603	64,283
Bank loans or deposits from other banks unsecured	2,654,975	2,587,234
Due other banks in Canada in daily balances	136,400	184,251
Due other banks in foreign countries	116,267	96,806
Due other banks in Great Britain	4,268,502	5,163,386
Other liabilities	176,700	259,792
Total liabilities	$224,062,249	$220,942,480

ASSETS.

Specie	$ 7,884,650	$ 7,968,955
Dominion notes	15,682,340	15,836,019
Deposits to secure note circulation	1,823,151	1,823,153
Notes and cheques of other banks	6,469,658	6,053,369
Loans to other banks secured	215,072	53,664
Deposits made with other banks	3,807,355	3,310,476
Due from other banks in foreign countries	21,440,033	19,904,605
Due from other banks in Great Britain	3,909,120	3,539,880
Dominion Government debentures or stock	3,110,349	3,133,480
Other securities	18,794,991	18,919,547
Call loans on bonds and stock	16,207,333	15,282,727
	$ 99,344,052	$ 95,825,874
Loans to Dominion and Provincial Governments	439,357	402,969
Current loans and discounts	199,773,925	199,908,340
Due from other banks in Canada in daily exchanges	139,416	185,299
Overdue debts	3,325,559	3,121,927
Real estate	944,935	934,671
Mortgages on real estate sold	615,258	618,759
Bank premises	5,471,667	5,444,965
Other assets	1,636,627	1,642,628
Total assets	$311,691,002	$308,085,634
Average amount of specie held during the month	7,878,818	7,832,980
Average Dominion notes held during the month	15,648,386	15,500,434
Greatest amount notes in circulation during month	33,798,375	31,088,197
Loans to directors or their firms	8,065,752	7,973,633

The Banking Return for September reflects the quiet and steady growth of business in the country. Of such a quiet and steady growth there can be no question, so far as regards the condition of business as a whole. But this by no means shows that every firm and every branch of business is in a good healthy position, so far as making profit is concerned, for there can be no doubt that there is often a large extension of business which brings no profit at all, owing to the increase of competition. Many a firm knows this to its cost, and is probably experiencing it at present.

But looking at things broadly and generally, it is a satisfaction to see the large increase that took place in the circulation of the banks during September, for it was an undoubted proof of activity in the movement of various descriptions of agricultural products to market. In fact, considering the depressingly low price of wheat, the increase must be considered to be very remarkable. For if wheat had been worth the old normal price of a dollar per bushel in Ontario—with a corresponding price in the North-West—it is certain that the increase in circulation would have been so much larger as to give evidence of an activity altogether exceptional and remarkable. But as it is, it demonstrates what has been affirmed over and over again in these columns, that our agricultural interest has attained a development in which the price of wheat is only *one* of many factors contributing to the total result.

For this increase of circulation almost wholly represents money paid to the farmers. Of that other large factor in any increase of circulation, viz., the payment of men engaged in making logs in the forests, there is scarcely any movement at all at this time of the year, while the payment of bank notes in other lines of business does not vary materially between one season of the year and another. It is therefore to the farmer that this money has gone. This is a very pertinent fact in view of much of what is said as to the depressed condition of the farming interest in certain quarters.

Not that all individual farmers are prosperous, or that

the farmers of all the provinces are prosperous ; for there can be no doubt that in Manitoba the low price of wheat is telling severely upon the agricultural class. Fortunately, the crop is both large in quantity and good in quality, the latter a most gratifying feature in view of past seasons, and one that it may be hoped will in time become the ordinary state of things.

The deposits of the banks, as a whole, are steadily increasing, and show a growth of thirteen millions during the past year.

The deposits of the chartered banks alone amount now to one hundred and eighty-six millions ($186,000,000), a figure that is in itself an absolute refutation of attacks that are sometimes made on Canada by writers whose ignorance is even more conspicuous than their malice.

A recent instance of this kind has just occurred in which the editor of a financial periodical in London, England, has intimated that Canada has been retrograding steadily ever since the adoption of the National Policy, and is going down hill very rapidly at present.

Now, considering that the deposits in the banks amounted in all at the time when that policy was adopted to sixty-five millions, and that they are now nearly three times as much, one might fairly say that if this is a progress down hill he would be glad to have the pace considerably accelerated. For these deposits, it must be borne in mind, belong to the people of Canada, and represent their accumulations.

Our banks have never made the mistake that had so much to do with the frightful crisis in Australia last year, viz., of seeking deposits from the people of England and Scotland. The money deposited in our banks belongs to the people of Canada. But even this is not all. In addition to the sum of $186,000,000 in the chartered banks, the people of Canada have over $75,000,000 deposited in other places, viz., in Government Savings Banks, Post-office Savings Banks, and other local Savings Banks, as well as in the numerous Loan Companies.

It is well known that there has been a very large increase in these deposits also during the same period.

And it cannot be truly alleged, as some writers insinuate, that these deposits are only an evidence of sluggish trade and the want of energy and enterprise by our people. For such an assertion would be negatived by the fact that the discounts and loans of the banks have increased to an enormous extent also.

The current discounts at the end of 1878 amounted to $106,000,000 (one hundred and six millions). The amount now is $208,000,000 (two hundred and eight millions), an increase demonstrating a very large augmentation of the business interests of the country.

The available resources of the banks—that is the resources available either immediately or within a few days for meeting the calls made upon them—are now at a very high figure, viz., $72,800,000, which is fully thirty-three per cent. of their total liabilities. But with regard to this there are two misconceptions, which should be guarded against.

Although our banks as a whole have this amount of reserve, it is not to be supposed that each individual bank is in that position. This is certainly not the case. Some of the banks are much stronger in these respects than others; and it is undoubtedly desirable that certain of the banks whose resources are generally, or even habitually, below a reasonable standard, shall take measures to bring themselves up to a proper position.

Another misconception is to imagine that a bank has no resources which can be relied on for meeting liabilities, except the cash actually locked up in its vaults. It is well known that banks in all places keep a portion of their available funds either in the hands of other banks at home or abroad, or in the shape of loans repayable on demand on stock exchange securities; or in the shape of securities which can be readily placed upon the market either at home or abroad and turned into cash.

Every banker who has carried on business for some time and has passed through various changes incident to a demand for money, either of ordinary requirements, or of pressure severe enough to be called either a run or a drain, knows perfectly well that he is practically in as safe a position with part of his funds in other banks—or in realizable securities—as if all his reserve were locked up in his safe. There is some reason to emphasize this point, inasmuch as respectable English journals, ordinarily well acquainted with Canada, have said that, beyond the actual cash locked up in their vaults, the Canadian banks have little or no resources at command. This is a grave mistake.

In speaking of resources, we deliberately exclude any immediately maturing mercantile discounts or loans; for these cannot be arbitrarily or suddenly called in without greatly embarrassing the customers of a bank and even endangering their position, and no banker in Canada who values his own credit and standing will trust to his bill-case as a means of raising money in case of heavy calls.

Good stocks and bonds are at abnormally high figures at present, and good investments of a permanent and safe character are not easy to be found.

The Government of the Dominion, we notice, is about to place a new loan upon the English market. The total indebtedness of the Dominion will not be increased by the full amount of this loan, inasmuch as a portion will be applied to extinguish debt already contracted.

But it goes without saying that all such operations should be very jealously watched by the taxpayers of the country.

We call attention to the following comparative statement of the position of the banks by provinces :

ABSTRACT OF BANK RETURNS

30th September, 1893. In thousands

Description.	Banks in Quebec	Banks in Ontario	Banks in other Provs	Total
Capital paid up	34,721	17,643	9,710	62,074

		75,484,000
Bank Deposits		185,005,000
Total Deposits of all kinds		$261,489,000

WOOLEN GOODS.

Canadian woolen mills are not as active in their operations as they should be at this season of the year. Some of the small mills which do a custom trade are very busy, their activity depending upon the prosperity of the region in the immediate vicinity where they are located. But many of the mills with a more extended market report trade very dull. One of the largest mills in Canada, which has been running on short time for the past few months, is reported to have closed down "for a few weeks owing to the depressed condition of the woolen trade." Another large mill has made a considerable reduction in wages and offers the same excuse.

Mills engaged in making tweeds and blankets appear to suffer most. In the case of tweed goods excessive competition from English houses is partially responsible for a decreased demand for domestic goods. Certain English manufacturers had expected to do an immense trade with the United States when once the silver question and the tariff bill were settled. The demand failed to materialize, and, to save themselves, they unloaded a large quantity of their stock on the Canadian market. Manufacturers of blankets here, from all appearances, are injured more by their own foolish cutting of prices than anything else. The wool market and the industrial condition of the country do not warrant high prices, but the existence of petty jealousies have led some manufacturers to sell their goods far below a normal value. The knitting goods trade presents, however, a fairly satisfactory condition, and most of the mills are actively engaged.

DOMINION LEGISLATION, 1894.

Why this year's Dominion Statutes should only make their appearance now is incomprehensible. No satisfactory reason has ever been given for the delay in publication which always follows the closing of the parliamentary session. Persons have been heard to attribute the delay to the desire of the publishers to dispose of as many copies of the *Gazette* containing the statutes as possible, before the purchaser is asked to buy them over again in book form.

By this year's legislation permission is given to authorize the payment of a bounty of $2 a ton on all pig-iron made in Canada from Canadian ore, a bounty of $2 a ton on all iron puddled bars made in Canada from Canadian pig-iron manufactured from Canadian ore, and a bounty of $2 a ton on all steel billets made in Canada from pig-iron made in Canada from Canadian ore. Where furnaces are now in operation the bounty is only to be paid for five years from the 24th of March, 1894, while to all products of any furnace commencing operations after the passing of the Act the bounties shall be applicable for five years only after date of commencement.

The Insurance Act is amended so as to prohibit the granting of a license to a company to carry on the business of life insurance in combination with any other branch of insurance, but fire, inland marine insurance, and cyclone or tornado insurance may be carried on together by license, and so may guarantee insurance, accident insurance, plate glass insurance and steam boiler insurance be licensed to be carried on together. No security required to be deposited by an insurance company before being granted a license shall be valued higher than its par value, whatever its market value may be. Contracts of life insurance are not to be avoided by a misstatement of age if that statement is made in good faith ; the premiums are, however, to be readjusted.

The Homestead Exemptions Act is repealed. It does not follow that in the Territories owners of land upon which they have built can no longer exempt their dwellings from seizure under execution, for ordinances of the Legislative Assembly of North-West Territories purporting to exempt real property from seizure by virtue of writs of execution are rendered valid and in full force. The change is rather one of legislative jurisdiction. Buffalo and bison are not to be molested for five years, and changes in the game law generally are made. Indians may now devise or bequeath, by will, property of any kind in the same manner as other persons, provided land in a reserve goes to a close relative or to some one entitled to reside on the reserve.

The duties of Customs Acts are consolidated. It is noticeable that steel rails for street railways are expressly excepted from the free list, a point in doubt, as to importations previously made, till the decision of the Exchequer Court in the Toronto Street Railway case, now awaited, shall have been decided. The treaty with France is sanctioned by an Act to come into force on a date to be named by the Governor-General. Ratifications are to be exchanged at Paris as soon as possible, and the treaty shall come into force immediately after this formality has been accomplished, and continue in force until the expiration of twelve months after either of the contracting parties shall have given notice of their intention terminating the same. But if non-sparkling wines gauging 15 per cent., or sparkling wines, become subject later on to an increase of duty in Canada, the French Government may at once terminate the operation of the treaty.

The Department of Inland Revenue may allow on the exportation of goods which have been manufactured from articles subject to a duty of excise, and on which such duty of excise has been paid, a drawback equal to the duty so paid, with proper deductions for expenses. The excise duty on malt is lowered from 2 to 1½ cents a pound, and malt used in any licensed bonded manufactory in the manufacture of malt extract or other similar medicinal preparation, approved by the Department of Inland Revenue, may have duty thereon remitted under such regulations as the department establishes. The excise duty on vinegar containing six per cent. of acetic acid is raised from four to six cents a gallon.

The amount to which the Dominion may issue notes is increased from twenty to twenty-five millions of dollars, and no change is made in the gold basis. Owing to some inexplicable blunder, the intention to require dollar for dollar of gold was omitted from the Act, but this was remedied by Order in Council.

QUACK METHODS.

Sensible people as a rule dislike quack methods and distrust them. Foolish people, on the other hand, are apt to be carried away by glitter and noise or boasting. Some of our readers will remember that years ago in several Ontario towns certain merchants boasted that they would revolutionize retail methods—would sell goods at cost—would give premiums to the customer buying the largest bill—that they were determined to do the whole business of the county—were bound to give bargains to the dear people "regardless of cost," and so on. At the same time they used curious, quack-like methods of attracting customers, such as dressing up men in outlandish garb ; hiring something like a brass band to play ; putting spread-eagle advertisements in newspapers ; promising untold bargains. For a time people flocked to see the show, but the excitement fell off. Sensible people did not like the methods, and did not find satisfaction in their purchases. What is more, some of the importers who sold goods to these merchants

became distrustful of such "Cheap John" concerns and withdrew their credits. Finally, the concerns burst up; the end of all the boasting was ignominious failure.

The rule holds good in other directions than storekeeping. A quack physician riding about in a gilded chariot may impose for a time upon the ignorant, a quack lawyer may at first make money out of the litigiousness and credulity of clients, but neither of them can gain the confidence of the wise, or even prosper long among the foolish without being found out. We are reminded by an article in the Belfast (Ireland) *Insurance Gazette* of the apparent ease with which people are got to patronize life assurance schemes of an unsound character, when such schemes are adroitly presented with the accompaniments of rhetoric and specious appearance. The journal in question puts the case in this way. Scores of sound life assurance companies have been doing business in Belfast for years, and their payment of claims has been a regular occurrence. Their affairs are transacted without fuss or an effort at publicity. When their head officers visit Belfast they are not announced in the paper, halls are not engaged for tea-drinking and public speaking. Nor do they advertise the death of a policy-holder and print letters of thanks when they pay a claim. "Their business is confined to plain work of the twice-two-make-four order; they do not profess to pay claims for sovereigns with half sovereigns; they do not profess to be philanthropists, but hardworking business men.

"Quite differently are affairs directed by the Independent Order of Foresters. The sandwich men of the city are employed to parade with posters announcing that a meeting will be addressed by Oronhyatekha, Esq., M.D. Upon his arrival fulsome compliments fly like hail. A magnificent address is presented to the Supreme Chief Ranger, and a costly jewel [who pays for it?] to the High Chief Ranger. Then they congratulate one another upon what they have done for the cause of life assurance, talk about 'this beautiful country of yours,' and then boast of the fact that three widows of deceased (Irish) brethren receive £1,000 because their husbands have been members of 'our noble order.' If the Foresters, amidst the din of tea-cups, the rattle of knives and forks, and the intermittent testimonial applause, forget all about the prosaic details of actual business, we will not so forget, nor will the public. That £1,000, the portion of the inheritance of the three widows of deceased brethren, is the one solitary substantive reference to finance.

"The I.O.F. proves what can be accomplished by the exercise of tact, a little knowledge of human nature and the judicious application of soft-sawder. The trick is to get a few men together, deck them out with sashes, ribbons and jewels, call them the Noble Order of Liberty, Benevolence and Concord, and then—demand contributions. . . . Oronhyatekha plays well up to the full bent of the folly of his disciples, and with gush, gammon and spinach holds them up for universal—admiration."

BRITISH COLUMBIA BOARD OF TRADE.

A quarterly meeting of the British Columbia Board of Trade was held on October 12th, Mr. Flumerfelt, the president, in the chair, and about thirty members present. The sanction of the board was sought for a petition to the Minister of Commerce, signed by several business firms. This complained that the manufacturers of opium were being made to pay duty upon a lot of dross made up of leaves and other matter; that owing to changes in trade laws they had suffered, and asking that a duty of one dollar per pound be charged only on the actual quantity of opium received. The matter was ruled out of order. The president stated that Mr. Van Horne, of the Canadian Pacific, had promised to make it a full port of call for all of the company's boats. He regarded the C.P.R. as committed to that promise, and he believed it would be kept.

Next the board considered a matter which appears hitherto to have been neglected, namely, the desirability of taking measures to make the city of Victoria and the Province of British Columbia better known abroad. Mr Brownlee, for example, reported that residents of the city who had been abroad reported that in China and Japan, and othere places, Victoria was virtually unknown, and Captain Cox stated th same thing, whereas other cities had been made known by pamphlets etc. Mr. Nicholls produced the pamphlet issued by Peterboro', Ont entitled "Fifty Facts about Peterboro'," and a similar publication respecting St. Paul, and recommended something of the sort for Victoria. Messrs. Ellis and Morris favored an illustrated pamphlet descriptive of the climate, trade and resources of the province. Finally, on motion of W. H. Ellis, seconded by Mr. C. E. Renouf, the matter was referred to a committee to be named by the chairman Several gentlemen were then elected members of the board.

THE TANNERS' DIFFICULTY.

Once more we hear what appears to have become a chronic complaint with respect to the business of tanning in Canada, namely, that tanners are working at no profit, or at inadequate profit. The margin between the price they pay for cured hides and the price they get for leather is not enough, and this simple fact will account for many embarrassments. Our tanners appear to lack "back-bone." If, when a man is offered a price for leather which he knows to be insufficient to yield him a living profit, he would refuse it instead of accepting a "bluff" offer based upon the threat that the buyer can buy cheaper elsewhere, this evil in the trade would cure itself. Hide importers as well as banks soon tire of assisting men who persistently make goods without profit.

FLAX MILL EMPLOYEES' STRIKE.

Messrs. Weir & Weir employ about thirty men in their flax mill at St. Mary's. In the spring when plenty of work is to be had on the farm, a number of the hands generally leave the mill and seek other employment. When harvest is over and the winter is beginning to set in, however, there are always many applicants for a situation in the mill. Proceeding upon the idea that if men were more anxious to secure work in the winter than during the spring and summer months it would be but just to pay lower wages in the winter than during the rest of the year, Messrs. Weir & Weir submitted a lower bill of wages to their men. This was refused and a strike ensued. The men probably would not object to a difference in wages during different seasons if only the employers would wait until next spring, and then, by way of a change, raise the bill of wages

A HINT ABOUT TARES.

We may mention a "pointer" that will perhaps serve a good purpose with retail dealers. It concerns such goods as figs and currants in packages. Some grocery importers and some fruit dealers sell figs at so much per box and without taking the tare off the package, in which case they make from 10 to 13 cents per pound out of the wood. Others who sell at so much per pound, and take off a fair tare for the package, are of course handicapped in the race. Again, with respect to Patras currants, we have seen invoices of a certain number of packages with half barrels tared at a uniform figure of 20 lbs., when the actual weight of the packages was 21, 21½, and 22 lbs. Thus on ten barrels a difference of 1½ lbs. each, at 5 cents per lb., comes to 75 cents. A buyer who thinks he is saving money by obtaining a "cut" of one-eighth cent the pound may find, in such a case as the above, that he pays for it in the weight of wood by this guess method of taring.

GRAIN AT AMERICAN LAKE PORTS.

A compilation of the Chicago Board of Trade shows that the stock of wheat and Indian corn at the lake ports of Chicago, Milwaukee, Duluth, Detroit, Toledo and Buffalo was 36,414,000 bushels wheat on October 6th, which was increased by October 13th to 36,694,000 bushels, and on the first-mentioned date 2,083,000 bushels maize, which had been reduced a week afterwards to 1,980,000 bushels. The share of the respective ports is shown in the following table:

	Wheat, bu	Corn, bu
Chicago, October 13th	25,349,000	1,674,000
Duluth, "	3,315,000	.....
Milwaukee "	708,000	.....
Detroit, "	1,603,000	16,000
Toledo, "	3,436,000	24,000
Buffalo, "	2,283,000	270,000
Total	36,694,000	1,984,000

LONDON FUR AND SKIN SALE.

The results of the October London fur and skin sale have come to hand during the week. As compared with last June sales, red fox, Russian sable, Japanese fox and Thibets show an advance of 10 per cent.; bear skins advanced 15 per cent., and marten brought a 30 per cent. advance. Skunk is lower by 7½ per cent. American otter and musquash declined 10 per cent., prices of beaver were lower by 15 per cent., while wolf skins were 30 per cent. lower than in June last. African monkey, raccoon, lynx, wombat, American opossum, mink and Bast. chinchilla remained unaltered in price. The next sale will take place on November 29th.

THE SITUATION IN THE STATES.

A correspondent writes to the N. Y. *Shipping and Commercial List*, expressing a very sensible view of the tendency of the times. He says: "While we do not look for so long a period of depression to follow the panic of 1893 as the country experienced after 1873, it is useless to shut our eyes to the fact that railroads throughout the country have been overbuilt and overbonded; that manufacturing plants and facilities have been enlarged far beyond the consumptive demand, and that even the grain fields of the West and South have been developed with the aid of modern machinery far beyond available market demands, and unprecedentedly low prices are the inevitable result. The labor market has also become greatly overstocked, and wages, the price of labor, must continue to go down with the prices of commodities. Neither the labor unions nor the general Government, nor both combined, can sustain the former scale of prices and wages any more successfully than the Government could maintain the price of silver. The capitalist also must recognize the downward tendency and must accept a lower interest return upon his investments. Willingly or unwillingly, we must all take a long step nearer to the condition of the older civilizations of Europe. In doing this all are in the same boat, manufacturer, farmer, banker, laborer; and remembering how rapidly our country up to this time has grown in population, wealth and resources generally, we all should be prepared to accept the natural results, namely: Much greater competition and smaller returns. As a people we must take a few primary lessons in economy."

AN "UP-TO-DATE" STEAMER.

At the big Leven shipyard of Wm. Denny & Bros., at Dumbarton, on the River Clyde, has been built for the Canadian Pacific Railway Company, under the supervision of Mr. Henry Beatty, a steamer for the route between Victoria and Vancouver, British Columbia. Her trial trip took place some weeks ago from "The Tail of the Bank" to the stretch of water between the Cloch and Cumbrae lighthouses, 13½ miles, and she made 18¾ knots, equal to something over 21 miles an hour. A lithograph of the steamer appears in a recent number of the Victoria *Times*, and she is a very handsome and yacht-like piece of marine architecture.

The dimensions of the "Prince Rupert" are 270 feet over all; breadth, moulded, 32 feet, and over sponsons 64 feet; depth of hold, 12 feet; tonnage, gross, 1,158, net 620; indicated horse power of engines, 3,000; draught, about 8½ feet. The engines are direct acting, triple expansion, surface-condensing, with cylinders 31, 47 and 68 inches of six feet stroke. The paddle wheels are 18 feet in diameter, with feathering floats of steel, and the boilers are of the Serve pattern. In the matter of state rooms the new vessel is admirably appointed, everything being of the newest and best. She is ventilated by steam fans and lighted throughout by electricity. The "Prince Rupert" sailed from Greenock in September to make the journey via Montevideo, round Cape Horn to Valparaiso, San Francisco, and Victoria, and may be expected at the last-named port the first week in November.

DRY GOODS JOTTINGS.

Smart woolen fabric mixtures are gaining favor in dress goods lines.

A silk crepon for dress trimming, in jacquinot and bluet, is a novelty.

"Your sealskin sack is the finest I have ever seen."

"Well, it ought to be; it was made from one of the educated seals."—*Judge*.

Manchester velvet manufacturers are selling but little velvet on American account.

A laces effect braid, something similar to an insertion, is a taking novelty in ladies' wear.

The Paton Manufacturing Co., Sherbrooke, have found it necessary to make a 10 per cent. cut in the wages of their employees.

A black lace brocade, spoken of among English silks, looks at a short distance like black Chantilly lace, made up over a light-colored satin.

Mistress.—"Do you want to wear my patience out, Bridget?"

Servant.—"I should much prefer your silk waist, mum, if it's the same to you."

In Nottingham, laces in heavy styles and in two tones, and Valenciennes in ivory tints are reported as selling well. There is some indication that deep printed lace may come in again.

Jacquards, says the *Drapers' Record*, are again wanted in broader widths and more expensive fabrics than ever, but all the objects are of a small geometrical character, and must be formed of a bright, lustrous yarn of either silk or mohair.

The Bradford correspondent of the *Drapers' Record* writes: The buyers for the wholesale houses in Canada, who up to now have favored Bradford with their presence, not only seem very little interested in regular goods, but are also extremely cautious in placing even small orders for novelties, and do not report very favorably of the past season in the Dominion.

From all appearances, it would seem that the demand for velveteens is in the ascendant. Not only is there large display of material, but costumes are being shown in great variety. The finish obtained by many manufacturers is extraordinary, some makes even rivalling the effects of silk velvets. Dealers in this article may expect good business this season.—*Drapers' Record*.

FOR GROCERS AND PROVISION DEALERS.

The "Corryvrechan" is loading salmon at Victoria, B.C., for London, Eng.

More than 150,000 bushels of wheat have been delivered in Virden thus far this season.

In Quebec city the price of the six-pound loaf has been reduced from 14 cents to 12 cents.

W. Priestly has purchased the bakery and confectionery business of B. Fowler, of Minnedosa, Man.

It is said that the season's catch of oysters in the Maritime Provinces will not be so large as that of a year ago.

Stocks of canned salmon in St. John, N.B., according to the *Sun*, are only about half as large as at this time last year.

The beet root sugar factory at Berthier, Que., which has again begun operations, is now consuming from 150 to 200 tons of beets daily.

The bark "Northernhay" will carry from Victoria, B.C., to England a cargo of salmon, valued at $245,066.40, and 1,840 tons in weight.

During September nearly three million bushels were carried east by the C.P.R. from Manitoba and the North-West, compared with 1,100,000 during the same month in 1893. This represents over 5,000 loaded cars.

In peaches, apricots, etc., there is only a moderate business. It is difficult to get fancy stock at all, and what there is is held at very high prices. For prime to choice the market is pretty easy.—*California Grocer*.

In raisins, says the *California Grocer*, the market is a good deal demoralized. In spite of the denials of the managers of the combine, prices have been cut and the trade knows it. The "big uns" will sell their goods and the "little uns" will "get left" as well as their fruit.

Montreal cheese men complain that the law put in force by the Market Committee recently, which prevents them from selling their product on the wharves, is an unjust one, as it compels them to transfer as many as 50,000 boxes of cheese from the steamer to market, which not only incurs additional expense, but causes a delay.

Mr. L. L. Gallagher, secretary of the Frontenac cheese board, estimates that the factories represented by the forty-two members made 4,500,000 lbs. of cheese during the season. This, at 10c. per lb., an average price, would mean $450,000, or after deducting the cost of making at 1¾c. per lb., left $365,000 to go into the farmers' pockets.

Samples of coffee and rice grown on the Sandwich Islands have been sent to Toronto, where Messrs. George Musson & Co. have been displaying them to importers. The sample of coffee from Honolulu resembles Maracaibo in appearance, and can be laid down here, we are told, at a price equivalent to that variety. The rice is a good sample, but the price is at present too high to leave room for much business with Canadians.

Hon. Mr. Bowell has heard from the British Minister at Madrid on the subject of the duties levied on Canadian fish entering Cuba and Porto Rico. Canada is precisely on the same terms in the Spanish Antilles as Norway; that is, our codfish enters free. But being asked whether haddock and hake are included in the word "codfish," the decision of the Spanish Colonial Customs department is that they are not.

Herrings are classed as "dry or smoked fish," and will be dutiable as laid down in the tariff.

A British Columbia letter dated the 16th inst says "The run of cohoes continues so light that several of the canneries have decided to close down. Little hope is now entertained that a heavy run of cohoes will enter the river, while in handling the present catch there is little or no profit. Not more than 25,000 cases of cohoes in all have been put up since the pack began. The demand for canned salmon continues brisk, and prices being satisfactory, there is great inducement to keep the establishments running as long as possible."

METALS TRADES.

The first car load of machinery for the Hamilton smelting works arrived this week.

The Dominion Coal Company has shipped almost three-quarters of a million tons of coal so far this year.

An attempt is being made in Truro, N.S., to form a joint stock company, with a view of testing the lead deposits in Colchester county, Nova Scotia.

Efforts are being made to retain the axe factory of Messrs. E. Broad & Son, in St. Stephen, N.B. It is proposed to operate the factory under a joint stock company.

The work of substituting steel ties for wooden ones on the Mexican (Vera Cruz Railroad) is going on actively, and the entire line and branches will be laid with metal ties. Some 50,000 steel ties are being received yearly from England.

Probably the greatest quantity of coal ever raised in one day from a mine in Cape Breton, says a Maritime Province exchange, was taken from the Reserve colliery, when within two cars of 1,400 tons was raised from the mine, and the average quantity of coal raised for the same week was 1,280 per day.

The following items respecting iron and steel industries in the United States are mainly derived from the *Iron Age* of New York, and the *Marine Review* and the *Trades Review* of Cleveland: –

Bridge orders have been the most encouraging feature of late from the standpoint of Western mills. Chicago reports that the local steel works is well sold up on billets for the balance of the year.

The situation as to foundry iron is as noted last week. Here and there $11 at furnace for No. 1 is being shaded. On No. 2 one producer in particular has made a low price in the week, $9.75 at valley furnace being shaded in this instance; $10 is the general quotation.

F. B. Stevens makes this comment on the market in Detroit for Lake Superior charcoal and Southern coke irons: "In these latter days of depression it does one good to chronicle the sale recently made here, of a round lot of Lake Superior charcoal pig iron. The quantity was 1,000 tons, and the price was $13.

The tables of the *Iron Age* show in blast October 1 in the United States, 22 charcoal furnaces, with 4,889 tons weekly capacity; 50 anthracite, with 16,265 tons weekly capacity, and 118 coke, with 138,575 tons weekly capacity. Total, 172 active furnaces, with a total capacity of 159,729 tons.

ANSWERS TO ENQUIRERS

J. L., George st., City, asks to be informed about Single Tax. "What is Single Tax, any how?" he says, and "can you refer me to any book that will inform me directly on the subject?". In reply we would say that a good book to give information on the subject is "Who Pays Your Taxes," edited by Bolton Hall, published by G. P. Putnam's Sons, 1892, and to be had at the Toronto Public Library. Also, Wallace on Land Nationalization.

S. J., Montreal, writes on the subject of trade discounts on dry goods, and wants to know what discounts for cash are given by United States jobbers in that line. In reply we would say that a gradual increase of cash discount had come into practice among American jobbers for some years previous to 1892, until it had reached 8% ten days on net goods, 7% ten days, or 6% thirty days on regular goods. But these were found excessive, and in July, 1892, New York and Philadelphia leading importers to the number of twenty or thirty signed an agreement that they would not allow any customer greater discount than 2% ten days or 1% thirty days on net goods (no discount at sixty days), while on regular goods the discount would be 6% ten days; 5% thirty days; 4% sixty days. Off carpets and oil cloths 4% ten days, 3% thirty days.

—We are informed that a branch of the Union Bank of Canada will be opened on or about November 1st next at Virden, Manitoba. Mr. H. J. Pugh has been appointed manager of the new agency.

BOOK AND STATIONERY NOTES

We regret that we were wrongly informed in stating last week in this column that the envelope plant of Barber & Ellis Co was sold to go to Denver, Colorado. The facts were that a gentleman from Colorado asked if the plant would be sold, and was told that it would at a certain price. He declined to pay any such price, and the negotiation ended. What the Barber & Ellis people did sell him was one envelope machine. With respect to the business doing, the factory never made so many envelopes, we are told, as it is making now.

The Canadian curator of the Imperial Institute, London, England, intends to publish a monthly journal, one of whose principal features will be, it is said, an accurate and up to date report of the markets of the various portions of Her Majesty's dominions. The curator thought it best to apply for commercial information to the leading boards of trade of the Dominion. But the council of the Montreal Board of Trade considered that the desired information respecting the markets and conditions of trade could be obtained from the various newspapers and journals published in Canada.

CLEARING-HOUSE RETURNS

The following are the figures of the Canadian clearing-houses for the week ended with Thursday, Oct 25th, compared with those of the previous week:

Clearings.	Oct. 25	Oct. 18
Montreal	$12,966,646	$12,269,585
Toronto	5,498,647	5,650,018
Halifax	1,206,572	1,201,500
Winnipeg	1,477,891	1,421,724
Hamilton	688,575	729,368
Total	$21,838,331	$21,271,785

Aggregate clearings this week, $3,209,473; last week, $3,005,157.

When the Deep Waterways convention met in Toronto the Board of Trade refused to join in asking for the enlargement of the canals to 21 feet, contenting itself by asking the completion of 14 feet enlargement, which has been going on for some years. With this the Deep Waterways men were not satisfied, and a few days ago they made a special effort to obtain from the Toronto Board of Trade endorsement of their scheme. The event showed that it was easier to get members to sign a call for a special meeting to reconsider the matter, than to get them to attend and back up the views of the promoters. Their good natured complaisance did not go beyond aiding the promoters to get the special meeting they desired. The object of the latter failed entirely, and a resolution was passed affirming the resolution previously passed in favor of completing the enlargement now in progress. The new loan now being negotiated in London will provide means of continuing the work.

—A gentleman who has spent some months in British textile markets tells us that manufacturers over there have long complained of a want of orders. They have seriously felt the want of the usual quota of orders from the United States, which were hindered by the delay in adopting the Wilson tariff. Now that this has been adopted more movement has already begun, although there are certain lines of goods on which heavy imposts will not be relaxed until 1st January next. The Scotch linen factories, for example, many of which had been running at half time, were all on full time within a few weeks after the settlement of the American tariff question. The feeling is general in the Old Country that better times are at hand in the textiles trades.

—Not alone the St. Stephen's Bank, but many interests in St. Stephen have suffered a loss in the death of Dr. W. H. Todd, the president of that bank, which took place some ten days ago. A resolution passed by the board of the bank speaks in strong and feeling terms of his services to the bank during a period of fifteen years as director and nine years as president. At a late meeting of the directors Mr. Frank Todd was elected president and E. H. Balkham was chosen a director of the institution in the place of the late Dr. W. H. Todd. Mr. John D. Chipman was appointed vice-president of the bank.

—This is the time for declaration of bank dividends. The following banks have declared the usual half-yearly dividend shall be paid on the dates set opposite their names:

Montreal	5	per cent	1st Dec., 1894
Merchants	4	"	1st Dec., 1894
Ontario	3½	"	1st Dec., 1894
Traders	3	"	1st Dec. 1894
Hamilton	4	"	1st Dec. 1894
Union	3	"	1st Dec., 1894

STATEMENT OF BANKS acting under Dominion Gov't charter, for the month ending 30th September, 1894.

J. M. COURTNEY, *Deputy Minister of Finance.*

Correspondence.

NOT SOLD.

Editor MONETARY TIMES:

SIR,—In reading your last week's edition I was surprised to see, under the heading of "Paper Trade Notes," that the Barber & Ellis Co had disposed of their envelope business to a gentleman in Denver, Colorado. The facts are, that a gentleman residing there, knowing that we were the makers of the fastest and best envelope machines in use, came to Toronto to see them in operation and wished to buy. In conversation he proposed to purchase our whole factory and remove it to that city. As he was not prepared to pay anything approaching our price nothing came of it.

From this arose the rumor which your paper has taken as a fact. Instead of going out of the envelope business, we have gone out of the bookbinding in order to give it and the paper business our exclusive attention, the result being that, in spite of the dull times, we are making more envelopes, and of greater variety, than ever before.

I regret that you did not enquire of the president of the company, John R. Barber, or the writer, before giving such a rumor credence, and hope that you will publish this letter of denial.

Yours very respectfully,

JOHN F. ELLIS,
Managing Director.

Toronto, Oct 22, 1894.

CAN AN ASSIGNEE PROPERLY PURCHASE AN ESTATE?

This question has been answered in the affirmative by a judgment in the case of Rush *versus* Rush, tried before Mr. Justice Ferguson at the Peterboro assizes last month. Mr. Harry Rush was appointed by creditors (of whom he himself was one) assignee to the insolvent estate of his brother, Thomas Rush, who had been a merchant in Peterboro county several years ago. For some reason Mr. Thomas Rush was dissatisfied with his brother's administration of the estate, and entered suit for a purpose explained as under by an account of the case in the Peterboro *Examiner*. The result is a justification of the assignee:

"The action was brought to establish the plaintiff's right to an account from the defendant, to whom plaintiff, on the 8th of July, 1890, made an assignment of his estate for the benefit of his creditors, of whom the defendant was the largest. At the request of the creditors the defendant purchased the insolvent's estate at the rate of 50 cents on the dollar of ordinary creditors' claims and the privileged claims in full. In his statement of claim the plaintiff charged that the defendant formed the design and scheme of acquiring for himself any surplus that might remain of the assets after payment of the creditors' claims. But the evidence taken at the trial established the fact that the plaintiff himself ratified and confirmed the sale of the estate by the inspectors and creditors to the defendant.

"The following is a synopsis of the judgment delivered by Mr. Justice Ferguson:

"1. The assignment made under the provisions of the statute has not been attacked.

"2. It seems to have been recognized by the courts as not an improper thing that a sale may be made of the estate (in some circumstances) by the inspectors duly appointed and authorized so to do by the creditors to the assignee himself. But for the decisions and what has been said by the judges I should have been at least doubtful.

"3. In the present case the inspectors were duly authorized and did make the sale to the defendant. This sale seems to have been fairly, honestly and prudently made, without any concealment whatever, and manifestly was for the best interests of the creditors and all concerned. There does not seem to have been even a shadow of dishonesty of any kind or character, and the creditors are all satisfied.

"4. The plaintiff afterwards—that is after and long after this sale—expressed his satisfaction with it also, and did many things indicating that he was not dissatisfied with it.

"5. The estate was not nearly sufficient to satisfy the debts, and being wound up in the ordinary way would (on the evidence) not have realized so much as 50 cents in the dollar for the creditors, and what the plaintiff seeks is an account with the view of recovering a surplus which I think could not for a moment be

supposed to have an existence. What the defendant realized over 50 cents in the dollar it was intended by the other creditors and the inspectors he should have, if he could make it out of the estate that he bought.

"6. At the time of the sale the attitudes of the defendant and the inspectors were those of purchaser and vendor of the property, and after this sale the defendant had not the character of and was not a trustee for the plaintiff as to his dealings with the estate that he had purchased.

"7. The scheme or design alleged in the third paragraph of the Statement of Claim has been not only not proved, but has been clearly disproved.

"8. Assuming that a sale of an estate can be made by the inspectors and creditors to the assignee, I am of the opinion that this sale was a good one, and it follows that the plaintiff is not entitled to an account from the defendant, and I do not see any other relief to which the plaintiff is entitled."

This action was dismissed with costs, which will not be pressed unless the plaintiff continues the litigation.

INSURANCE MATTERS.

No more important advice can be given to a young merchant than that without delay he shall get adequate fire insurance in respectable companies. And there are few things that even an experienced country merchant is so negligent about as guarding against fire. We see every day of our lives inflammable rubbish allowed to gather about our shops or factories. We see soap boxes, or packing cases or barrels half full of saw-dust, shavings, paper, piled up against a store or fence, or in a shed, often in a cellar. A careless smoker—there are plenty of them—comes along, strikes a match to light his pipe, or may be throws away his cigar stump. What so probable as that it may set fire to these handy materials?

Winnipeg proposes to spend two hundred thousand dollars for water works for fire protection.

An agent of the Canadian Underwriters' Association visited Ottawa last week and made examination of the Chaudiere lumber yards and the piling grounds in other parts of the city, to ascertain if these yards are kept in proper condition to prevent the starting or spread of fire among them.

A meeting of the Marine Underwriters' Association was held in Montreal on Monday last to discuss the grounding of the SS. "Hamilton." It was decided to ask the council of the Board of Trade to petition the Government with a view to having the channel to Quebec surveyed at least three times a year, and also to have frequent soundings of the harbor taken.

The local board of fire underwriters held in Victoria, on the 11th instant, their annual meeting, Mr. J. C. Maclure (Robert Ward & Co., Limited) in the chair. The losses for the year ending October 1st, 1894, were shown to have amounted to $58,586.61, or 58 per cent. of the premium income, which with the city tax of $800, equalling ten per cent. for maintaining the fire department, and the expenses, 32 per cent., made the year, according to insurance men, an unprofitable one. This leaves out the 40 per cent. for reserve or reinsurance. It was decided to raise the rates of premium outside of the old city limits and within the new limits, 12½ per cent. on frame buildings and 25 per cent. on frame stores. Some of the members wanted to raise the insurance inside the old limits on account of the $300 tax levied by the city as the companies' share for maintaining the fire department. A committee was appointed to act on Mr. McMicking's specifications for wiring buildings for electric light. The executive committee for the year was elected as follows: H. F. Heisterman, J. C. Maclure, Richard Hall, J. St. Clair Blackett, and R. S. Day. J. G. Elliott was re-appointed secretary-treasurer and inspector.

QUEBEC PROVINCIAL LOAN.

Some correspondence has been going on in the Quebec *Telegraph* on the subject of the loan of that province. Mr. Felix Carbray, M.P.P., writes to that journal commenting thus on the previous letter of another gentleman:

I have gone over your correspondent's calculations and have found them in the main correct. His result, however, having been reached from a wrong start, is incorrect. He claims a loss on the loan to the province of $530,502 at the end of the 60 years. To arrive at this he makes a comparison between 3 per cent. bonds sold at 77 and 4 per cent. bonds sold at par—100. This comparison is unjust, because 4 per cent provincial bonds could not have been sold at par at any time during this year, nor could they be sold now in either London or Paris, or, in fact, anywhere else.

The nearest approach to this has only ever been equalled by the actual loan now under discussion, for, as a matter of fact, the new 3 per cent. loan with bonds sold at 77 is identical with a 4 per cent. loan, bonds sold at 98.31.

These figures are the most favorable of any loan that has been effected by the province, and instead of being condemned and criticized, Hon. Mr. Taillon deserves the greatest praise and congratulations. That my assertion is not a haphazard one, I give below the calculations to prove it. My figures are easily tested.

CALCULATIONS RE NEW LOAN.

1st—Showing the position at the beginning and at the end of sixty years.

To pay $4,106,492, with bonds at 77, will require an issue of $5,333,106.50 bonds. The yearly interest on this amount at 3 per cent. is $159,993.19.

In sixty years, compounding interest at 3 per cent., this will amount to	$26,087,298
Capital to pay	5,333,106
In all capital and interest on 3 per cent. loan at 77	$31,420,404

Three per cent. bonds at 77 are equal to 4 per cent. bonds at 98.31.

2nd—To pay $4,106,492 with bonds at 98.31 will require an issue of bonds to the amount of $4,177,074.

The yearly interest on this amount at 4 per cent. is $167,082. 97.5.

In sixty years compounding interest at 3 per cent., this will amount to	$27,243,330
Capital to pay	4,177,074
In all capital and interest on a 4 per cent. loan at 98.31	$31,420,404

From the above it will be seen at a glance that a 3 per cent. loan at 77 is equal to a 4 per cent. loan at 98.31, as, at the end of 60 years, both give the same results. In the first case less interest by $7,089. per year is paid, but more capital at the end, say, by $1,156,032; and in the second case these figures are reversed, that is, more interest, but less capital, with the result that at the end of 60 years the capital and interest paid out in each case give exactly the same amounts.

This, therefore, proves that a loan at 3 per cent. 77 is the same as one at 4 per cent. 98.31.

PETROLIA OIL MARKET.

The producers of crude, says the *Petrolia Advertiser* of 19th inst., are now getting something nearer the legitimate value for their product. Crude jumped to $1.10 on Wednesday and 1,000 barrels were sold at that figure, the buyer offering the same price for 5,000 more. Yesterday 700 barrels of Petrolia crude changed hands at $1.11½, with Oil Springs about two cents better. The market is firmer than ever, and we shall be greatly surprised if it does not touch $1.15 before our next issue. The *Advertiser* looks for a prosperous future, and says: "The drill will soon be in full swing again, and the prosperity we have enjoyed in the past will once more be ours. We look forward with every confidence to a prosperous fall and winter trade, and as we see the upward tendency of the crude market firm and on a sound footing, we say *auspicium melioris ævi*."

STREET RAILWAY CONVENTION.

The American Street Railway Association will meet in Montreal October 15, next year. Mr. Lusher is to be complimented, for it is principally through his efforts that the claims of Montreal have been from time to time brought forward. The Association was to have met here in 1885, but that being smallpox year, another city was decided upon. The Association is the largest in America. The convention will last three days and over 300 delegates will attend. One of the features of the convention will be in the exhibition of street railway apparatus. Of course there will be a grand banquet and the usual drives, etc.—*Star*.

A FOREIGN VIEW OF ADVERTISING.

This leads me to put in a word for the trade advertisement. Manufacturers are sometimes able to trace the source of their orders, and sometimes they are not, but it would be a serious mistake to assume that because they cannot trace any orders to particular papers that the advertisements in such papers should be discontinued. It is inevitable that when people want to do business in a particular trade, they will look for the journal that represents that trade, but they are not, on that account, bound to disclose the fact. It should never be overlooked that at one time or another the most successful business firms have been the most extensive and persistent advertisers. *London Iron and Coal Trades Review.*

—Another very large cargo has been carried from Lake Superior by the steel steamer "I. W. Nicholas," recently built by the Cleveland Ship Building Company. Her last cargo from Duluth to Buffalo consisted of 2,880 net tons of flour.

Merchants, Bank Chambers, Toronto.

In the Matter of

The Ontario Forge and Bolt Co. of Swansea, Ltd.

(Near Toronto)

In Liquidation

Tenders will be received by the undersigned at the office, No. 26 Wellington Street East, Toronto, up to twelve o'clock noon of

Tuesday, November 27th, 1894,

for the purchase, in one parcel, as a going concern—or for any of the undermentioned divisions of the assets of the above-named company.

Lot 1—The company's extensive iron works, with new foundry, cupola, travelling gear, boilers and engines just erected; twenty acres of land situated at Swansea, on the Lake Shore Road, between Parkdale and the Humber River, and 12 rough cast cottages, 2 rough-cast boarding houses, 1 brick store erected thereon, valued by the company at	$104,100
Manufacturing plant, machinery plant, tools, belting, fire service, stable stock, patterns and flasks, factory and office furniture, valued by the company at	125,290
	$229,390
Lot 2—The stock of manufactured goods, comprising bolts, nuts, rivets, carriage hardware, castings, etc., amounting as per inventory to	41,731
Lot 3—Iron, steel and wire, per inventory	11,633
Lot 4—Scrap iron, brass and copper, per inventory	3,874
Lot 5—11½ acres of land lying north of the company's works and north of the prolongation west of College street, near Toronto Junction, and close to High Park.	
Lot 6—80 acres of land south of above.	
Lot 7—66 mortgages received in part payment for lots adjoining the above lands, sold by the company, aggregating	38,658

Terms of Sale—If credit is desired, those tendering must state the time required and the nature of the security they propose to give. The credit portion shall bear interest at five per cent. per annum. One-fourth of the purchase money, less the deposit, must be paid in cash within thirty days from acceptance of tender. A marked cheque for five per cent. of the purchase money, payable to the order of the liquidator, must accompany each tender. These cheques will be returned at once to those whose tenders are not accepted. Conditions of sale and forms of tender may be had on application to the undersigned. Plans of the properties and inventories of the other assets, with list of mortgages and full particulars in regard to same, with permits to inspect the works and other assets, on application to the undersigned.

E. R. C. CLARKSON, Liquidator.

SMITH, RAE & GREER, Solicitors for Liquidator.
Toronto, 17th October, 1894.

During a breach of promise case heard in Indiana recently the counsel on both sides chattered considerably about the "fire of love," "Cupid's flames," "the burning passion," etc. The jury brought in a verdict that both plaintiff and defendant were guilty of arson, and recommended them both to the mercy of the court.—*Green Bag.*

Collingwood Debentures.

Tenders are invited for the purchase of $7,000 Debentures of the Town of Collingwood, issued as follows.

Firstly—$2,000 under authority of 47 Vic., Cap. 49, Ontario Statutes, repayable December 1, 1913.

Secondly—$5,000 under 54 Vic., Cap. 65, Ontario Statutes, repayable December 1, 1916.

All to bear date December 1, 1894; interest at 5 per cent., payable half-yearly on 1st June and December, at Bank of Toronto, Collingwood. Successful tenderer to pay at par here, and cost of forwarding debentures.

Tenders will be received up to November 14, 1894. Whole to be issued in seven Debentures of $1,000 each. Tenders to be sent to

A. D. KNIGHT,
Town Treasurer.

Collingwood, Oct. 13, 1894.

CONSUMERS' GAS CO.

The Annual General Meeting of the Stockholders of the Consumers' Gas Company of Toronto, to receive the report of the directors and for the election of directors for the ensuing year, will be held at the Company's Office, No. 19 Toronto street, on

Monday, the 29th Day of October Next,

At Twelve O'clock Noon.

W. H. PEARSON,
Gen. Manager and Secretary.

—The steel steamer "Selwyn Eddy" is another boat chartered by the Northern Steamship Company to carry flour from the head of Lake Superior to Buffalo for the balance of the season

THE OTTAWA ELECTRIC CO.

Issue of $320,000. First Mortgage Bonds. Five Per Cent.

Authorized under Company's Act of Incorporation, 57 and 58 Victoria, Chap III., Statutes of Canada

Principal to be payable First October, 1904. Interest, First April and First October in each year. Paid-up capital of the company $645,000, and bonding power limited to amount equal to one-half the paid up capital stock.

The above company now owns and operates all the property (including water powers) and the businesses lately owned and carried on by the Ottawa Electric Light Company, the Chaudiere Electric Light and Power Company (Limited), and the Standard Electric Company of Ottawa (Limited). The company's contract for the lighting of the streets, etc., of the city of Ottawa, extends until 1st May, 1905.

It is proposed to issue 320 first mortgage bonds of the company of $1,000 each, principal and interest payable at the Bank of Ottawa, city of Ottawa.

The bonds will be secured by a first mortgage to the Trusts Corporation of Ontario as trustees upon the property of the company as mentioned in the mortgage.

Sealed tenders for the whole or any smaller number of said bonds (to be specified in the tender) will be received up to 6 o'clock in the evening of the 26th instant, at the head office of the company, Russell House Block, Sparks Street, Ottawa, addressed to the undersigned and marked "Tender for Mortgage Bonds."

The directors may sell the whole or only a portion of the proposed issue, and may in their discretion decline all or any of the tenders.

The bonds will, it is expected, be ready to be delivered early in November, and the purchase price will be payable at Ottawa within five days after notification to a tenderer of the acceptance of his offer and if not then paid the directors may sell the bonds in any manner they see fit.

In consequence of the first coupons including interest from 1st October, 1894, it will be necessary for the purchasers to allow for the accrued interest in respect of first coupons from 1st October to date of payment of purchase price.

Any further information required may be obtained from the undersigned.

G. S. MACFARLANE,
Secretary-Treasurer.

Dated 4th October, 1894.

Over 13,000,000 Feet of Land for Sale

HENRY HOGAN, Proprietor
St. Lawrence Hall, Montreal

City of Victoria

BRITISH COLUMBIA

Tender for Debentures

Sealed Tenders, endorsed "Tenders for Debentures," will be received at the office of the undersigned up to 4 p.m. on the 1st Day of November 1894 for the purchase of debentures of the corporation of the City of Victoria, B.C., amounting to $17,000, or its sterling equivalent at the rate of $4.86⅔ to the one pound sterling, in sums of $1,000 each or its sterling equivalent as aforesaid payable in fifty years from the 1st October, 1894, and bearing interest from that date at the rate of 4½ per cent. per annum payable half-yearly with principal and interest payable as aforesaid, at the office of the Bank of British North America, either in London, Eng. and New York, U.S.A., Montreal, Canada or Victoria, Canada.

The corporation reserves to itself the right to redeem and purchase these debentures on paying the amount thereof and the interest due thereon at the date of such purchase to the holder or holders thereof at any time after twenty-five years from the date of issuance of such debentures. The tenderer must state the price net at Victoria which he will pay.

In addition to the net price the purchaser will have to pay the corporation the interest at 4½ per cent. from the 1st October, 1894, to whatever date the money is received by the City Treasurer.

The above debentures are issued under authority of "The Water Works Loan By-Law, 1894," with principal and interest secured by a rate on all ratable land or land and improvements in the corporation of the City of Victoria.

The corporation does not bind itself to accept any tender.

MONTREAL MARKETS.

MONTREAL, Oct. 24th, 1894.

ASHES.—The value of No. 1 potash is steady at $4.35, and of seconds at $4, though a sale of a lot of 33 brls. of the latter was made at figures a shade higher a few days ago. A fair sale of pearls, the first for some time, was made recently on p.t., but the figure was somewhere about $6.25. Receipts are a trifle larger than at date last year.

CEMENTS AND FIREBRICKS.—The demand for cements is slack, and no large sales are now reported. Stocks, however, are in moderate compass, and values fairly steady at $2.00 to 2.10 for English, and $1.90 to 2.00 for Belgian. Firebricks are firm with a scarcity of Scotch brands; we quote $17.50 to 20.00 per M.

DAIRY PRODUCTS.—The weakening in the cheese market, noted last week, has not been remedied, but is rather more pronounced, and the state of the English markets does not warrant the hope for a speedy recovery. Fine Ontario late makes are now quoted at 10¼ to 10⅜c., Townships 10 to 10⅛c., Quebec 9¾ to 10c. per lb. Butter is dull, with no demand beyond a local jobbing one. We quote creamery 19 to 21c., Townships 16½ to 18c., western 14½ to 16c. per lb. For eggs there is a steady demand for ordinary stock at 13 to 14c.; special stock brings 1 to 2c. better per dozen.

DRUGS AND CHEMICALS.—Glycerine is firmer abroad, but with large stocks here local prices are not advanced. Gatherers of Canada balsam have been keeping back supplies for some time, evidently with ideas of getting big prices, but supplies have been coming in freely of late, and there is a regular slump in prices, $2 a gallon being about as much as is now being paid. Cod liver oil is booming, especially Norwegian, and from $1.50 to $1.75 is now being asked for oil that recently sold at $1.20; Nfld. oil, $1 to 1.10. Insect powder is expected to rule high next year, stocks of flowers being held high in Trieste. We quote:—Sal soda, 75 to 85c.; bicarb soda, $2.40 to 2.60; soda ash, per 100 lbs., $2; bichromate of potash, per 100 lbs., $11.00 to 13.00; borax, refined, 6 to 8c.; cream tartar crystals, 18 to 19c.; do. ground, 20 to 22c.; tartaric acid, crystal, 28 to 30c.; do. powder, 30 to 32c.; citric acid, 45 to 50c.; caustic soda, white, $2.50 to 2.75; sugar of lead, 10 to 11c.; bleaching powder, $2.75 to 3.25; alum, $1.70 to 1.90; copperas, per 100 lbs., 90c. to $1.00; flowers sulphur, per 100 lbs., $1.60 to 1.90; roll sulphur, $1.60 to 1.90; sulphate of copper, $4.25 to 4.75; epsom salts, $1.30 to 1.50; saltpetre, $7.00 to 8.00; American quinine, 35 to 40c.; German quinine, 35 to 40c.; Howard's quinine, 42 to 45c.; opium, $4.25 to 4.60; morphia, $1.80 to 1.90; gum arabic, sorts, 18 to 30c.; white, 40 to 60c.; carbolic acid crystals, 30 to 35c. per lb.; crude, 75 to 90c. per gallon; iodide potassium, $3.90 to 4.25 per lb.; iodine, resublimed, $4.75 to 5.00; commercial do., $4.25 to 4.75. Prices for essential oils are:—Oil lemon, $1.75 to 2.00; oil bergamot, $3.50 to 3.75; orange, $2.50 to 2.75; oil peppermint, $3.50 to 4.50; glycerine, 18 to 20c.; senna, 12 to 25c. for ordinary. English camphor, 60 to 65c.; American do., 55 to 60c.; insect powder, 25 to 35c.

GROCERIES.—It is generally acknowledged that there has been some falling off in the trade movement in this line, and the demand is not so brisk as it was two or three weeks ago. Teas are not so actively called for in a general way, but first hands still report a fair amount of enquiry, and there is no weakening of values

There is apparently a very active market for blacks and greens in London, and several cable offers from here have been met with the reply that the goods had been already sold. Coffees rule very firm, and some lines

WATEROUS, Brantford, Canada.

have developed quite an advance during the last few days We quote Rio 19 to 21c.; Java, 26 to 30c.; Mocha, 28 to 31c.; Maracaibo 20 to 22c. per lb. Sugars are quieter, with an easier undertone. The factory figure for granulated is still nominally 4¼c., but it is understood fair lots are shaded a sixteenth. There is still some scarcity of the cheaper grades of yellows. In dried fruits no great interest has seemingly developed yet. New Valencia raisins are selling in moderate lots at from 4½ to 6c., according to quality. New currants are yet in limited supply, and are quoted at 3½ to 5¼c., as to brand and package. The lower grade Valencias thus far received are said to be in rather poor shape. Advices from Denia report a stronger market, with a scarcity of the best grades. The Mediterranean steamer "Escalona" is in the river, but her cargo consists mainly of wines and brandies. The "Avlona," with further fruit supplies, is due about the beginning of November. Canned goods move slowly only. We quote corn and tomatoes 90 to 97½c.; salmon, $1 30 to 1.40 for standard brands; lobsters, $1.60 to 1.75.

HIDES.—A pretty steady demand is reported from tanners, and stocks are not allowed to accumulate at the moment. No. 1 light hides are bought by dealers at 4c per lb mostly, though 4½c is paid in some cases, and sales to tanners are made at 5c. Heavy steers are being bought pretty readily by tanners at from 6 to 6½c. per lb., dealers paying 5 to 5½c. for the same. Lambskins are quoted at 55c to 60c. each; calfskins 5 to 6c, but few coming in

LEATHER.—Matters remain quiet in this line, and until after stock-taking is over among the shoe trade no activity is looked for. From several coast points fair orders for spring footwear are reported, but there are still some manufacturers to get their samples on the road. Leather prices are fairly steady; tanners here and there are trying to get a little better prices, but find a difficulty in doing so, especially in the face of a rather easier hide market. We quote:—Spanish sole, B. A. No. 1, 18 to 20c.; do No. 2 to B. A., 17 to 18c.; No. 1 ordinary Spanish, 17 to 18c.; No. 2, 16 to 17c.; No. 1 slaughter, 18 to 20c.; No. 2 do., 17 to 18c.; American oak sole, 39 to 43c.; waxed upper, light and medium, 24 to 26c.; do. heavy, 20 to 24c.; grained, 24 to 26c.; Scotch grained, 25 to 27c.; splits, large, 13 to 16c.; do. small, 11 to 12½c.; calf-splits, 27 to 30c.; calfskins (35 to 40 lbs.), 50 to 60c.; imitation French calfskins, 60 to 70c.; colored calf, American, 23 to 27c.; Canadian, 19 to 21c.; colored pebble cow, 12½ to 14½c russet sheepskin linings, 30 to 40c; harness, 18 to 23c; buffed cow, 9 to 11c; extra heavy buff, 12½c; pebbled cow, 8 to 12c; polished buff, 9 to 11c glove grain, 9 to 10c; rough, 16 to 17c; russet and bridle, 40 to 50c

METALS AND HARDWARE.—Business has been quiet in these lines since last writing. In pig iron we hear of only a few car lots and in other lines trading has been light. Prices of iron have not undergone any change and may be called fairly firm at quotations. From Scotland it is reported that some of the furnaces recently shut down, owing to the coal strike are again being put into blast. Stock in yard at Glasgow on Oct 12th was 294,974 tons, against 331,040 tons in 1893. Shipments to Oct. 6th this year were 187,031 tons, as compared with 237,004 tons to similar date in 1893. Pig lead is rather stronger, and the quotation is now $2.85 to 2.95 copper too is a shade firmer at 10 to 11c tin is cabled easier, and is offered here at 17½c. in lots. Barb and twist wire is a quarter cent easier since October 1st, but freight is not paid on lots under five hundred pounds. We quote—Coltness pig iron, none here; Calder, No. 1, none here; Calder No 3, none here; Summerlee, $20.50 to $21; Eglinton, $18 50; Gartsherrie, none here; Langloan, none here; Carnbroe, $18.50 to 19.00. Shotts none here. Middlesboro, No. 3, $17; Niagara No. 2, $18.50 to 19.00; Siemens, pig, No. 1, $16 50 to $17.25; Ferrona, No. 1, $16 50 to 17 00; machinery scrap, $15.00; common do., $12 00; bar iron, Canadian, $1 65; British, $5 25. best refined, $2 40; Low Moor, $5 10; Canada plates—Blaina, or Garth, $2 05 to 2 10. all polished Canadas, $2 75 Terne roofing plate, 20 x 28, $5 75 to $6 00. Black sheet iron, No 28, $2 30 No 26 $2 20 No 24, $2.10; tin plates—Bradley charcoal, $5 25 to $5.50; charcoal I.C., $3 50; P.D. Crown, $3 75 to 4.00; do. I.X., $4 75 to 5.00; Coke I.C., $2 75 to 2.90; coke wasters, $2 75; galvanized sheets, No. 28, ordinary brands, 4½ to 4¾c.; No. 26, 4c; No. 24, 3¾c., in case lots; Morewood, 5¾ to 6c.; tinned sheets, coke, No. 24, 6 to 6¼c.; No. 26, 6¼ to 6¾c.; the usual extra for large sizes Hoops and bands, per 100 lbs., $2 25 to 2 30 Steel boiler plate, ¼ inch and upwards, $2 00 to 2.10 for Dalzell, and equal; American steel plates, $1 90 to $2; ditto, three-sixteenths inch, $2 60; common tank iron, $1 65 to 1 75; tank steel, $1.80; heads, $2.85; Russian sheet iron, 10 to 10½c.; lead, per 100lbs., pig, $2.75 to 2.90; sheet, $4 00 to $4 25, shot, $6.00 to 6.50 best cast steel 10½ to 12c, spring, $2 50 tire, $2 50 to 2.75 sleigh shoe, $2.40; round machinery steel, $3; ingot tin, 17½ to 18¼c.; bar tin, 25c.; ingot copper, 10 to 11c, sheet zinc, $4 75 to 5 00 spelter $4 50 to 4.75; American do., $4 50 to 4.75. Antimony, 10 to 12c.; bright iron wires, Nos. 0 to 8, $2 65 per 100 lbs; annealed do. $2 70 galvanized, $3.35; the trade discount on wire is 20 per cent. Barb and twisted wire and staples, 3½c. Coil chain, ¼ inch, 5c.; ⅜ inch, 4¼c.; 7-16 in., 4¼c.; ½ in., 3¾ to 4c.; ⅝ in., ½c.; ¾ in., 3½c., ⅞ in., and upwards.

OILS, PAINTS, ETC.—A fair trade movement is still reported. Linseed oil is still very firm

THE WORLD,

NEW YORK CITY, N.Y.

at 57 and 60c. per gal. for raw and boiled respectively, and there are no signs of a weakening market. The cutting in turpentine continues, but prices among the regular trade are fairly held at 42 to 43c. per gal. Castor and fish oils are without change, likewise glass. An advance is reported in dry white lead in Britain, equal to 10s. a ton; local prices for ground lead in oil are however as before. We quote:—Turpentine, 43c. per gallon for single barrels; two to four barrels, 42c. Linseed oil, raw, 57c. per gallon; boiled, 60c.; 5-barrel lots, 1c. less; olive oil, machinery, 90c.; castor, in lots, 6½c.; single cases, 6¾ to 6¾c.; tins, 7c.; Nfld. cod, 38 to 40c. per gal.; Gaspe oil, 38c. per gal.; steam refined seal, 38 to 40c., in small lots. Leads (chemically pure and first-class brands only), $4.50 to 5.00; No. 1, $4.50; No. 2, $4.25; No. 3, $4.00; dry white lead, 5c; genuine red do., 4½c.; No. 1 red lead, 4c.; putty, 2c. in bladders per brl.; London washed whiting, 40 to 45c.; Paris white, 90c.; Venetian red, $1.50 to 1.75; yellow ochre, $1.50 to 1.75; spruce ochre, $2.25 to 2.50; window glass, $1.20 per 50 feet for first break; $1.30 for second break; third break, $2.80.

Wool.—The cargo of Cape wool which arrived in Boston last week, had been largely sold from sample before arrival, and the balance has since been placed at from 14 to 16½c. per lb., and nothing will come forward into store beyond a few bales of damaged. Some three or four cars of British Columbia wool have just arrived, for which, however, no quotation has yet been made.

TORONTO MARKETS.

Toronto, Oct. 25th, 1894.

Dry Goods.—Trade has "eased off," said a wholesale man. "It had begun to liven up, but these ten days of sunny weather, delightful as they have been, are too fine for brisk business." This means, of course, that we need a cold snap to set people buying warm goods. Farmers' wives do not yet feel the need of mantle cloths or blankets or winter underclothes; while, as for the farmer, he's busy in the fields. Country retailers in Ontario are described as being, as a rule, cheerful, and finding trade for October thus far fairly good. They are, however, buying very cautiously. Prices of textiles both here and in Great Britain are firm. They may go up at any moment, but cannot reasonably go lower. As soon as trade revives in Britain a better demand will likely bring better prices.

Flour and Meal.—Transactions are few and of a retail character for the most part. Manitoba patent flour is quoted at $3.30 to 3.40; Manitoba strong bakers, $3.15 to 3.25; winter patent, $2.60 to 2.75; do. straight roller, $2.40; bran, $12 to 12.50; oatmeal, $3.80 to 3.90.

Grain.—There is a rather steadier feeling in wheat, a slight improvement in which is reported from American markets; prices are not quotably altered. Peas are in good demand for export, and are being bought at prices outside the city equivalent to our quotations; oats are firm and in good demand for local use, as well as for shipment to Quebec and Nova Scotia; there is a moderate movement in barley, which is being taken by brewers here as well as in small shipments in United States; receipts, which have been light, are growing a little; rye is dull and tending lower; corn nominal.

Groceries.—Trade has been quiet till within a few days, since which it has briskened in certain lines, such as dried fruits, canned vegetables, fish. There is good demand for new fruits. Valencia raisins are going off quickly and a large quantity is sold to arrive. Figs are

These prices are wholesale by the car load.

much in request; we find extra fine Turkey layers in 14 lb. boxes at 11 to 11½c., and superior 3-crown, 4 layers, at 12 to 12½c. Dates will not be in for some weeks yet. Choice Lepanto currants are offered at 4c., choicest Morea at 5c., fancy Vonitsa at 6c. per lb.; the last named handsome clean fruit. There is but little request for canned raspberries or strawberries; the call is rather for peas, corn and tomatoes or salmon. There are a number of enquiries, too, for codfish, Labrador herrings, and also for No. 1 fresh water lake herrings, which are sold in kegs of 100 lbs. at $3.50 per keg. Mahogany tobacco is being pushed in the market, 7s and 12s; it is a light colored tobacco and sells for 48c.; Tuckett's black chewing is also listed at 48c. The sugar market is quite featureless; there is but little demand and no change in price. Teas exhibit a very good movement. Young Hysons have advanced and are anywhere from 3c. to 8c. per lb. higher according to grade than this time last year.

HARDWARE.—A fair movement is reported; country dealers find that goods are needed for fall and winter. The goods principally moving from warehouse are axes, saws, sleigh-bells, rope halters, and cow-ties, grain and vegetable scoops. Orders are also freely booked for skates to be shipped in November. The "Athletic" skate is taking well. Among tinners and stove dealers, supplies moving are stove-boards, elbows, sheet-iron, coal hods, varnish and black lead. Not much doing in cut nails, which by the way are 5c. lower; wire nails are superseding the cut in a large degree. There is no material change in quotations.

HIDES AND SKINS.—Trade is quiet and presents few interesting features. Hides are selling at 4½c.; there exists a fair local demand for stock, and receipts do not accumulate. If the present condition continues all is well, but reports from Chicago are not encouraging, and some merchants are dubious as to the future of this market. Sheepskins remain at 50 cents, the price made at the beginning of the month; trade is quiet, and low values in the wool market are having a depressing effect upon skins. At present tallow is in scarce supply; the needs of the market are not very considerable, however, and any large receipts would lower prices.

LEATHER.—A moderate movement is going on, in volume equal probably to an average at this season; there is no great accumulation of stock and collections are fair. The prime difficulty in connection with the trade is that tanners do not get an adequate profit upon their manufacture. Spanish and slaughter sole maintain their price and meet with fair enquiry; there is no overstock of upper and prices are steady, in fact there is some fine light upper in market for which 35c. per lb. is asked; harness is in moderate demand at from 17 to 20c. for light and 21 to 26c. for heavy.

PROVISIONS.—There is no particular activity in any direction. In dairy products butter shows an easier feeling at 18c. for selections, 16 to 17c. for rolls, 12 to 14c. for medium, which is pretty much neglected; the supply all round is equal to the demand; cheese is weak and prices rather easier at 10⅞ to 10⅜c. In hog products the feeling is also easier; long clear bacon we quote 8¼ to 8½c.; breakfast smoked, hams and rolls as before. Receipts of dressed hogs have been liberal, and the market is weaker at $5.50 to 5.75 per 100 lbs. The demand for eggs is rather slow, but the prices steady at 15c. per dozen; dried apples are quiet and easy at 5¼c., with no transactions heard of in either them or evaporated, which latter are offered by factory men at 6⅝ to 7½c. per lb. The low price of United States product hinders business here; sales are made over there for export, we are told, at 6c.

WOOL.—There is but little that is new to relate of the wool market. The necessities of local manufacturers are by no means considerable, and their purchases are limited to occasional small lots. Foreign demand is entirely wanting, and the waiting policy of buyers appears to have become chronic. Values remain on an exceedingly low basis, and the few transactions made in fine wools are at very low prices.

The attention of the insuring public and live progressive agents is called to the following reasons for selecting this company:

First—It is the only Canadian company giving its policyholders the security of a four per cent. reserve; all others without exception reserving on a lower standard.

Second—The policy contract is as liberal as any issued. No restriction as to residence, travel or occupation, and incontestable after one year.

Third—The premium rates are low and the cost to the policyholder is certain to be less than in any other company because a better rate of interest can be earned in the west than at the home of any other company.

Fourth—Every desirable plan of insurance is issued from the low priced "PAY AS YOU GO" plan to the shortest single premium endowment.

NEW YORK CLEARING-HOUSE.

The corner stone of the building to be erected for the New York Clearing-House Association, in Cedar street, near Broadway, was laid on October 2nd,

The association is nearly forty-one years old. The time came several years ago when its quarters at Nassau and Pine streets were inadequate for its requirements. Last spring a site was secured, and by May next the building will be ready for use; and for the first time in at least ten years all the business of the associated banks, including the storage of gold and securities, can be done under one roof,

George G. Williams, president of the Chemical National Bank, and also of the Clearing-House Association, occupied the centre of the platform, with Bishop Henry C. Potter, who was to open the ceremonies with prayer, and Francis A. Palmer, president of the National Broadway Bank, and one of the original Clearing-House members. The building and other committees of the association were gathered near by.

After prayer, President Williams made an address, in which he said:

"It is appropriate to this occasion that brief reference be made to the homes of the New York Clearing-House Association during the period of its existence, and that some incidents in its history be recalled.

"Like other useful institutions, a long-felt want called it into being. The old method of making the exchanges at the counters of the different banks was laborious and inconvenient, and the settling of balances at irregular and uncertain intervals was favorable to loose and dangerous practices in banking. With no model at hand to follow, the preliminaries of its formation were difficult and protracted; a constitution, however, finally adoped and desk room provided in the basement of an old building, 14 Wall street (long since destroyed), there was witnessed on the morning of October 11, 1853, the first meeting, for its proper business purposes, of the first and only clearing-house then in the United States.

"The ceiling of the room was low; it was lighted by gas and heated by a stove; for a working place for some scores of men it could not be excelled for discomfort, and the contrast with the beautiful room we are soon to occupy could not be greater. Necessity soon required a removal to more comfortable quarters, and at 82 Broadway (in a building which no longer exists), for four years, from May, 1854, until the year 1858, the clearing-house had its habitation. The building, however, was not constructed for clearing-house purposes; it was incommodious in arrangement, and it was found desirable to find a place better adapted to our use. In May, 1858, the clearing-house was removed to the upper floor of the Bank of New York building, where quarters convenient for its occupation were fitted up, and there it remained until 1875. These premises were in advance of those hitherto occupied, but, having no elevator, the disadvantages of climbing so many stairs by so many persons were so great that the present location, corner of Pine and Nassau streets, was selected, and the property bought which is now owned and occupied by the association.

"That building has well served our purposes for nineteen years; but it is not fire-proof; it is without suitable vaults, and, in consequence of the great number of persons who are required daily to visit it, and the large amount of money and valuables connected with its business, and having in mind our future wants, it was deemed imperative that the clearing-house association should have a home commensurate with those requirements. Lots were therefore bought and a building projected, and we have assembled to lay, with proper ceremonies, its foundation stone.

"At our origin, in 1853, the number of banks in the association was fifty-one, with a capital and surplus of $36,164,900, and deposits of $39,000,000. It is now composed of sixty-five banks, with a capital and surplus of $132,664,000, and deposits of $58,000,000. The average daily exchanges for the year ending Sept. 30th, 1854, were $19,100,000; the average daily balances were $980,000. The average daily exchanges for the year 1893 were $110,900,000; the average daily balances were $5,600,000.

"It has been especially in seasons of panic that the interests centred in this clearing-house have been united to serve the public good. These times of trial to all bank officers, though they may arise from different causes, are all very much alike in effects. These are diminished ability on the part of banks to furnish needed facilities for business, resulting in the cessation of industries, the discharge of laborers, and general suffering in the community. To erect a barrier against these evils, clearing-house certificates have at various times been issued, resulting in each instance in diminished distrust, restoring confidence, and relieving commercial distress. The circumstances attending these issues furnish some of the most interesting chapters in our history. Brief reference only can be made to them here. The first of them was made in 1857. They took the form then of certificates of the Metropolitan Bank, were received in settlement of balances, and were based on the security of the circulating notes of the banks of this State. They proved of great relief to those banks which were in danger of failing from inability to respond to demands for the redemption of their notes. The total issue was $7,984,000. The next and all subsequent issues of loan certificates were made by loan committees of the clearing-house, and were in amounts as follows: In 1860, $7,375,000; 1861, $22,585,000; 1863-4, $17,728,000; 1873, $26,565,000; 1884, $24,915,000; 1890, $16,845,000, and in 1893, $41,490,000.

"Never resorted to except in cases of imperious necessity, the certificates have in each instance well fulfilled the purposes of their issue, notably during the civil war in enabling the banks to carry the great war loans—and again during the protracted panic of 1893, when the whole country from ocean to ocean was almost overwhelmed with financial disaster. During these trying times the one conspicuous object looked to for relief, aside from Congress, was the New York Clearing-House. It boldly and successfully fulfilled its mission. The history of finance records no action of greater consequence in averting calamities arising from panics than that of this clearing-house during the past year. Let us hope that such occasions may not soon arise again; but, should they do so, we are sure in any event of wise and resolute action by this body."

The new building will be four stories high, ninety-six feet long, and of substantial and attractive architecture. It will have a marble front and a sweeping dome. Strongly built vaults will occupy the basement. It is intended to let the street floor to a bank. Manager Sherer's office and the board room will fill the second floor. The main meeting room will occupy the floor above, and the fourth floor will be used by the janitor and for storage.

After the ceremonies of laying the corner stone, the annual meeting of the association was held, resulting as follows:

President, Wm. A. Nash, president Corn Exchange Bank; secretary, Wm. H. Porter, vice-president Chase National Bank; clearing-house committee: George F. Baker, president First National Bank; Wm. W. Sherman, president National Bank of Commerce; Richard Hamilton, vice-president Bowery Bank; Edward H. Perkins, jr., president Importers and Traders' National Bank; George G. Williams, president Chemical National Bank.

Extracts from the manager's annual report for the year ending October 1st, 1894, show that the clearing-house transactions for the year have been as follows:

Exchanges	$24,280,145,367
Balances	1,585,241,633
Total transactions	$25,815,387,001

The average daily transactions:

Exchanges	$79,704,425
Balances	5,214,610
Total	$84,919,036

Total transactions since organization of clearing-house (41 years):

Exchanges	$1,045,248,738,822
Balances	47,567,079,233
Total	$1,092,815,818,055
Largest exchanges on any one day during the year (Jan. 3, 1894)	$142,188,724
Largest balances on any one day during the year (July 3, 1894)	15,705,833
Largest transactions on any one day during the year (Jan. 3, 1894)	154,273,598
Smallest exchanges on any one day during the year (March 24, 1894)	42,485,678
Smallest balances on any one day during the year (Sept. 24, 1894)	2,712,773
Smallest transactions on any one day during the year (March 24, 1894)	45,965,163

The debit balances were paid in as follows:

U.S. gold coin	$233,016,000
U.S. bearer gold certificates	895,000
U.S. order gold certificates	520,000
Clearing-house gold certificates	9,830,000
U.S. Treasury notes	362,301,000
U.S. legal-tender certificates	426,320,000
U.S. legal-tenders and change	552,359,633
Total	$1,585,241,633

Transactions of the U.S. Assistant Treasurer at New York:

Debit exchanges	$275,844,995
Credit exchanges	93,023,683
Debit balances	186,736,437
Credit balances	3,915,125
Excess of debit balances	182,821,312

The association is now composed of forty-eight National banks and seventeen State banks. The Assistant Treasurer at New York also makes his exchanges at the clearing-house.

There are eighty-two banks, trust companies, etc., in the city and vicinity, not members of the association, which make their exchanges through banks that are members, in accordance with the resolution adopted October 14, 1890.—*Rhodes' Journal of Banking.*

COVER THE MEAT.

Every morning there goes through the streets of Toronto and of other cities of any considerable dimensions a stream of wagons loaded with meat. Many of these wagons proceed directly to the central market, others deliver their loads to the butcher shops in various parts of the city. Sometimes the meat is carefully covered in order to keep it free from the dust of the street, but more often it is left uncovered and exposed to dirt. This is entirely opposed to all ideas of cleanliness; but even worse, it offers an excellent opportunity to spread sickness. The germs of disease are blown around the street, and may be easily carried into many homes by coming in contact with the sticky surface of the meat. The same applies in equal degree to meat hung in front of the shop. This practice appears to be losing favor with the best butchers, and deservedly so. While it is often but a poor attraction to the shop, it is at one time uncleanly and dangerous to the public health.

—Scientist (at railroad restaurant)—"Do you know, sir, that rapid eating is slow suicide?" Drummer—"It may be; but on this road slow eating is starvation."—*New York Weekly.*

—The annual meeting of the Lake of the Woods Milling Co. (Ltd.) was held in Montreal on Wednesday last. The report for the year ended with August was adopted, and a dividend of 6 per cent. was declared. The following directors were elected: Robert Meighen, W. A. Hastings, John Mather, R. B. Angus and John Turnbull. Later, Mr. Meighen was elected president and managing director.

—A correspondent sends "Hamlet's Soliloquy Modernized," which he clips from *The National Traveller*:—

"To sell or not to sell?
That is the question.
Whether it is better to send the goods
And take the risk of doubtful payment,
Or to make sure of what is in possession,
And by declining hold them?
To sell, to ship, perchance to lose—
Aye, there's the rub!
For when the goods are gone,
What charm can win them back
From slippery debtors?
Will the bills be paid when due?
Or will the time stretch out till the crack of doom?
What of assignments? What of relatives?
What of uncles, aunts, and mothers-in-law,
With claims for borrowed money?
What of exemptions, bills of sales, and the compromise
That coolly offers a shilling a pound?
And of lawyers' fees
That eat up even this small pittance?
Yet sell we must,
And some we'll trust;
We seek the just,
For wealth we lust!
By some we're cussed,
And stocks will rust,
But we skip the wust,
Or we'd surely bust."

Head Office—MONTREAL.

THE prosperous condition of the Sun Life of Canada is doubtless due to its fair treatment of policyholders, its unconditional policy and prompt payment of death claims.

NOTWITHSTANDING the financial depression of the year 1893 it was the most successful in the history of this progressive company. The New Business completed is greater than that secured by any other Canadian Company in one year, and must be gratifying to policyholders and directors alike.

Substantial increases have been made in **New Business, Total Business in Force, Income and Assets.**

The Investment Annuity Policy
—OF THE—
North American Life Assurance Company

Provides that at death, or if on the Endowment Plan, at the maturity of the endowment period, the Company will pay the amount of insurance in 20 or 25 equal annual instalments, the first of such to be paid on the occurrence of the event or at the expiration of the endowment period. This plan at once secures to the beneficiary an absolute guaranteed income for the period selected.

The particular features of this plan are not embodied in any other policy of insurance offered to the insuring public of Canada. It contains elements which no company has yet offered to the insured.

A much lower rate of premium is chargeable on than on the other plans of insurance, on account of the payment of the face of the policy being extended over a period of twenty or twenty-five years.

The favorite method of accumulating the profits is equally applicable to this plan of insurance as to the other investment plans of the Company.

For further particulars apply to any of the Company's Agents, or to

DECISIONS IN COMMERCIAL LAW.

BARNARD V. TOMSON.—Losses having been incurred by a building society, a resolution was passed to reduce the amount of the shares from £12 to £10. The rules empowered any unadvanced member to withdraw on giving one month's notice. An instrument of dissolution was afterwards executed and registered. Held by North, J., that the unadvanced members were bound by the reduction, but those who had given notice to withdraw and whose notices had matured before the date of the instrument of dissolution, were entitled to be paid in priority, according to the dates of their respective notices.

IN RE GASQUIONE.—The Court of Appeal in England holds that two executors and trustees who *bona fide*, and without reason for suspicion, act according to the usual course of business and put it into the power of a third party (whom they properly employ as a stock broker in trust) to unregister certain bonds which he then misappropriates, are not liable for his defalcations.

CLEMENTS V. LONDON AND NORTH-WESTERN RAILWAY.—An infant railway servant as a condition of his service, entered an insurance society, established and contributed to by the railway company, and agreed to accept the benefits of the society in lieu of any claims under the Employers' Liability Act. The rules of the society provided for compensation on a certain scale in all cases of accidents not caused wilfully or by gross negligence on the part of the insured, and for the infliction of fines and forfeitures in case of neglect to give prompt notice of accidents, in case of misconduct while in receipt of accident allowance or in case of criminal misconduct at any time. The Court of Appeal in England held that the contract was for the infant's benefit and binding on him, and that the rule that an infant's contract is binding on him if for his benefit is not confined to contracts of apprenticeship or service.

SEABURY VS. ENDE.—A specification in letters patent is sufficiently clear and descriptive when expressed in terms intelligible to a person skilled in the art to which it relates.

BURCH V. TAYLOR.—When rights arising out of contracts are coupled with obligations to be performed by the contractor, and involve a relation of personal confidence, the contract cannot be assigned by him without the consent of the other party, according to the Supreme Court of the United States.

RURAL AND URBAN PATRONS.

The outcome of an attempt to unite the artisans of the city and the toilers on the farm into one independent political body is the subject of great curiosity to all onlookers in the Canadian arena of politics. That the Patrons and trade unions will ever be harmoniously fused together none except the most sanguine promoters of fusion can believe. Yet we find the Patrons of Industry organizing lodges in several towns and cities throughout Ontario. We are not told whether the urban Patrons will attempt to live up to the economic ideals of the brotherhood, but we are inclined to think that they will content themselves with politics alone. Should they, however, enter into competition with the merchants of a really live Canadian town, it will be a sorry day for the Order.

Some degree of political prosperity may at first attend the Patron urban lodges, but it is not possible that this success should be long continued. A tariff arrangement that will suit the farming classes is more than likely to be detrimental to the interests of artisans. City Patrons are wage-earners, rural Patrons for the most part, in a sense capitalists, or at least employers. We shall have one section seeking to shorten the labor day, the other striving to lengthen it; one branch of the society's lodges, if live practical questions are to be discussed, will be continually agitating for higher wages, while members of other lodges so far as they are employers, will find their interests lie in the direction of cheap labor. On the question of taxation it will be interesting to see how the views of labor agitators and of farmers can be brought into any degree of harmony. Some trade unions, we believe, have declared themselves in favor of single tax. This can never become a plank in the platform of a political body composed principally of land owners. In a number of different ways do the interests of artisans and farmers lie apart, and a union must ultimately give way before these opposing forces.

THORNS FOR THE MERCHANT'S SIDE

We have repeatedly called attention to the serious inroads which city departmental stores are making upon the trade of country merchants But we scarcely realized how universal the practice had become until we read in the Glenboro, Man., *Gazette*, that from the little village of Holland, in the Province of Manitoba, from two to three thousand dollars are sent yearly to a Toronto retail house for merchandise. If the merchants of the towns and villages of Manitoba are complaining of excessive competition, what is to become of the poor storekeepers in Ontario? Ability to buy in large quantities for cash is undoubtedly the secret of an Eaton's, or a Watkin's, or a Morgan's success.

It is within the range of possibility for every merchant to conduct his business upon a cash basis. But it is difficult to see how one who sells only a limited quantity of goods is to buy them at prices which manufacturers or jobbers are willing to accord only to the purchasers of large stocks. It was doubtless with the idea of surmounting this obstacle to prosperity that a number of Ontario retail merchants have formed a purchasing syndicate This syndicate for the most part confines its buying operations to foreign markets, but when it can buy to advantage from local jobbers it does so. As we noted a few weeks ago, representatives of the syndicate recently made considerable purchases in Toronto

Wholesale jobbers are naturally much annoyed at the existence of the syndicate, and as is the case when discussing the advisability of direct importations by the retailer, submit elaborate statistics to prove its inexpediency and ultimate collapse. But worried with the competition of a multiplicity of storekeepers, tortured on one hand by the departmental stores and threatened on the other by the Patrons, the pathway of a retail merchant is not strewn with roses, and it should excite but little surprise to find him turning any way and every way to better his condition.

LIABILITY OF BANK DIRECTORS

It is stated in the Nebraska *Journal* that Judge Caldwell affirmed the ruling of Judge Dundy in the cases brought by Lincoln depositors and claimants of the Capital National Bank against the directors of the bank. This decision is in the cases Bailey v. Mosher, et al and Hallett v. Mosher, et al. Judge Dundy sustained the demurrer of defendants on the grounds that a private creditor of the bank could not sue directors individually; that suit should be brought by the Receiver, and if recovery is had the money should be distributed between all the depositors. This is now affirmed by Judge Caldwell in the United States Court of Appeals

9 Toronto St. Toronto, Ont.

Mercantile Summary.

AT a meeting of the directors of The George Matthews' Co., Ltd., held at their head office, Peterboro', on 20th ult., Mr. Geo. Matthews, of Lindsay, was elected president; Mr. W. E. Matthews, of Ottawa, vice-president, and Mr. R. C. Matthews, of Peterboro', secretary-treasurer.

A COUPLE of hay dealers are on the list of insolvents in the Province of Quebec this week. E. Vaillancourt, of Yamachiche, has assigned on demand, and is said to owe $13,375, while his assets are valued at only $5,000. He has also recently been keeping hotel.——A voluntary assignment has been made by P. Rainville, of Marieville. The liabilities in this case are put at about $20,000, with assets of $15,000.

IN Montreal we note the following failures: N. Gauthier & Co., builders, have assigned on demand. The liabilities are $18,487.——L. J. Lafond, an east end dry goods retailer, has made a voluntary assignment. He was unsuccessful once before, and has been recently doing business under cover.——Lanthier & Labelle, dry goods, whose failure was lately noted, are offering 60 cents on the dollar in 4, 8 and 12 months, or 50 cents in 3, 6 and 9 months.——E. J. F. Markgraf, tea retailer, reported assigned last week, is offering 15 cents on the dollar.

Special Notice to you who Sell Oysters in Bulk

This season we are giving away to every purchaser of 1,000 oyster pails a very handsome window display card with the words "Bulk Oysters for sale here," printed in gold leaf on heavy morocco board, size 19x12, or a handsome chromo lithographed in fifteen colors. The retailer will find it greatly to his advantage to use these cards as a notice to the passing public that he is in the oyster business.

We are offering this special inducement to obtain your trade, as our facilities are 60,000 per day, and every pail guaranteed uniform, perfectly liquid tight and second to none on the market. Our prices are as low as any. Send in a trial order for your pails and get one of these cards.

Mercantile Summary.

A MONTREAL jobber in plumbers' supplies, W. Glassford, is financially embarrassed, owing to recent material losses. He owes about $5,000, with assets somewhat less, and he makes an offer of 33⅓ cents, spread over six months.

THE liabilities in the insolvency case of Roland & Bro., furniture supplies, etc., Montreal, run up to the very respectable figures of $106,000 direct, and $34,602 indirect. The failure had apparently been pretty well discounted locally, as outside a mortgage liability of about $30,000, the bulk of the direct indebtedness is due to foreign creditors.

WITH a recent number of the *Moniteur de Commerce* was issued an excellent group of portraits representing the council of La Chambre de Commerce for the district of Montreal. There are twenty-six portraits in all. In the centre those of Mm. H. Laporte, the president, and J. D. Rolland, vice-president; L. E. Morin president in 1892-3, and D. Parizeau, president in 1891-2; Mm. C. Desmarteau, treasurer, and S. Coté, secretary, are also prominent. The likenesses of the dozen members in the group whom we personally know are capital.

SEVERAL members of an English proprietary, the Canadian Mica Mining Company, are now in Canada examining their properties. These are Messrs. Henry Baumgarten, president;

Mercantile Summary.

William Spencer, London, Eng., and A. D. Marsh, Dudley, Eng. They are said to have two mines of amber mica up the Gatineau; two in the county of Frontenac, near Kingston; one 16 miles from Murray Bay; one at Tadousac, and an asbestos mine at East Broughton, Que. It appears that the shipments to Europe this year have met with a good market (the quality being good and the size large, which are requirements in London) and the production of the company is to be doubled. About a hundred men are now employed in the mines and the number is to be increased.

SUMMERSIDE, Prince Edward Island, is to have the electric light. A company has been formed nominally to supply both light and power, but as its capital is only $10,000, it can hardly intend to supply much power. The provisional directors of the company are Messrs. T. B. Grady, president; Leonard Morris, secretary; R. T. Holman, Neil McQuarrie, Neil Mackelvie, Neil Macleod and H. W. B. Stavert. It is hoped the company will be ready to turn on the light by December 15th. The plant will be furnished by the Canadian General Electric Company (Ltd.), whose manufactory is at Peterborough, Ont., and head office at Toronto. Mr. Freeman, who made the bargain with Summerside, is the company's agent at Halifax.

Mercantile Summary.

NATURAL gas from the county of Essex, Ontario, will soon be used in Detroit for illuminating and for heating. This week a Chicago contractor puts 100 men to work laying submarine pipe in the bed of Detroit River. It is to reach from Orleans street, Detroit, to Gladstone avenue, Windsor, and from the latter a main will be laid to the Ontario Basket Factory to connect with the main at that point. Mr. Walker's present line to the field is only eight inches diameter, but he is prepared to lay a 12-inch line alongside of it.

TWENTY-EIGHT car loads, aggregating nearly half a million pounds. Such are the dimensions of a consignment of broom corn lately received by Charles Boeckh & Sons, broom and brush manufacturers, of this city. It is said to be one of the largest consignments of broom corn from the Illinois district that has come to Toronto for some time. We should consider it a matter of interest to consumers of brooms to know that the price of broom corn has advanced fully 60 per cent. in the last three months, owing to the almost total failure of the crop in the States of Kansas and Nebraska. It is in the State of Illinois that the best grade of carpet corn is grown, and fortunately that State had a very heavy crop this season. But it has been almost entirely bought up by the larger manufacturers and the Chicago dealers, so that much higher prices are expected to rule before the next crop is harvested.

GWATKIN & SON . . . . .
57 Bay Street
Toronto

R. WARNER, a confectioner at Cornwall, Ont., is reported assigned, with small liabilities.——J. B. Ireland, a nurseryman at Athens, Ont., has done likewise

MR. JOHN G. KEMP, of Amherstburg, has bought the Great Western livery stable in Windsor, and sold his Amherstburg livery business to Thomas Boyce.

PREMIER DAVIE, of British Columbia, tells the Winnipeg *Free Press* that the Pacific province is beginning to recover from the commercial depression, aud that there is a prospect of considerable railway building in the near future.

L. PERUSSE, of St. Alban, Que., formerly a stonecutter, but who left that laborious branch of art and for some few years has tried the more dainty-fingered occupation of keeping a general store, is endeavoring to effect a settlement at 20 cents on the dollar. He has been sued quite frequently during the past year.

THE branch of the Bank of Hamilton at Port Elgin, of which Mr. A. A. Ridout is manager, has been removed to the new offices, on the corner of Goderich and Green streets, in that town. It is a neat brick building of two storeys, with plate glass front, and the interior fitted up with all the modern improvements.

WE learn that Mr. J. W. Kilgour, who for many years was with E. Morphy, miller and produce dealer at Mount Forest, has commenced business on his own account in that town. He has opened an office and warehouse for the purchase of grain, hogs and other farm products in that town.

LINDSAY is presently to have a well-equipped electric light plant. The Victoria Electric Light Company will occupy the old gas company's premises, which they have been overhauling to suit their business. They are putting in a new Goldie-McCulloch condensing engine, a large steam boiler, and added several new dynamos and a powerful generator.

THE village of London West has sold to Mr. George A. Stimson $10,500 of its consolidated debt debentures. They bear 5 per cent., and are repayable in 30 annual instalments. We understand the purchase price was over 6 per cent. premium, which is very large for a 5 per cent. village bond. The same dealer has purchased $30,000 Central Judicial District 5 per cent. bonds of Manitoba, They were issued by the municipal commissioner, and may be termed really Government securities. We are told that the premium paid was a large one.

A CHARTER has issued incorporating the St. Maurice Tool and Axe Works, of Three Rivers. The capital is fixed at $40,000, and the principal promoters are Messrs. N. L. Denoncourt, E. L. Denoncourt, P. E. Panneton and R. W. Williams

A LEADING merchant in Danville, Que., L. N. Bourgeois, is reported in difficulty, a demand of assignment having been made upon him. His present troubles are largely due to the depression in the local mining interests. Five years ago he became embarrassed, and then settled at 65 cents on the dollar, but has never been able to work into wholly easy shape since.

THE incorporation of the Dominion Glass Company, of Montreal, is now gazetted, the authorized capital being $100,000, and first directors, Messrs. Joseph Barslow, J. G. Laviolette, J. Sterling, Henry Hogan, of Montreal, and H. P. Schnelbach, late of Steubenville, Ohio, a practical glass maker of large experience. The company is already turning out goods of superior quality.

A YOUNG Quebecker, named J. B. Lemieux, who began in the hardware line only last May, has already been asked to assign. His success had been discounted from the first, but it was never imagined he would make such poor running as he has done.——W. V. Gordon & Co., grocers, Montreal, have had to assign, owing about $4,000. Mr. Gordon had latterly been doing business under his wife's name, having previously failed in 1891, when his liabilities were $31,000, or thereabout.

A KINGSTON telegram of Saturday last says that in the proceedings lately taken by the bondholders of the Kingston and Pembroke Railway Company to enforce payment of interest due on their bonds, judgment has been pronounced and the appointment confirmed of Joseph Bawden, of that city, as receiver of the road, with power to pay all working expenses, the balance of the earnings to be subject to the order and direction of the courts.

A YEAR or two ago some business men or capitalists in Ottawa and Brockville got together to consider the erection of an electric railway system between the two places, and thus secure a large amount of frontier trade which now passes over the Canadian Pacific railway solely and without railway competition. A month ago it was resolved to call in subscribed stock and apply for a charter. According to Saturday's *Free Press*, a meeting of interested monied men was held that afternoon and several resolutions passed towards prompt practical work Water power is to be used throughout, "beginning with the falls at the Chaudiere, then drawing upon the falls of the Rideau River at Manotick, and thence at different points of the river route up to a point nearly twenty-five miles from Brockville, where steam will be used"

HALIFAX merchants, especially those interested in the West India trade, and they are neither few nor unimportant, are strongly in favor of more direct telegraph communication with the West Indies. Some of them urge that the Government ought to subsidize a company that will afford the needed connection

A REPRESENTATIVE of Mr. E. C. Whitney, lumberman, Minneapolis, who is erecting a large sawmill at Long Lake, on the Parry Sound road, reports the mill going up rapidly, the frame work completed, and they are waiting the completion of the road to get up the heavy machinery. The road is now laid to within about ten miles of the new mill.

NELSON LLOYD, grocer, etc., at Schomberg, has come to an assignment, after being in business six years. In order to start a shop he sold his farm for $2,500, which he invested in groceries and other goods, but owing to entire lack of knowledge he made no progress. A few weeks ago he gave a chattel mortgage for $1,049.

RESPECTING the business difficulties of R. D. Richardson, the Winnipeg stationer, the *Commercial* of last Monday says the position of the estate is rather better than was shown in the previous issue. The claims wiped out by the closing out of the business amount altogether to only the $5,350 due wholesale houses in small amounts, and $1,800 to the Banque Nationale, this bank being secured for the balance of its claim, by Mr. Richardson, senior. Mr. R. D. Richardson will, in conjunction with Mr. W. A. Bishop, long his chief salesman, establish a new stationery business.

WORD comes from Calgary that, according to Mr. Gordon, of Messrs. Gordon & Ironsides, cattle exporters, the total number of cattle exported this season by this firm will reach 12,200 head, 10,500 of this number coming from the ranges west of Maple Creek, mostly bought from Alberta stockmen. The balance of the number come from Yorkton, Prince Albert and Battleford districts. The firm have shipped 4,000 sheep up to the present time, and expect before the close of the season to purchase at least 3,000 more

THE publication office of *The Advocate* has been removed to 9½ Adelaide street east, close to Yonge street, Toronto.

LA BANQUE Jacques Cartier and la Banque d' Hochelaga have each declared dividend of 3½ per cent. for the current six months

THE lumber cut of Mr. C. L. White, of Apple River, N.S., this winter will be about as the last season, viz., 6,000,000 feet.

A DIVIDEND of 3½ per cent. upon the paid-up capital stock of the Quebec Bank has been declared for the current half-year

THE Customs duties collected at Toronto dur. ing the month of October amounted to $271,645, which is nearly $5,000 more than in the corresponding month of 1893.

THE contract for 4,300 tons of steel rails for the Intercolonial has been awarded to a Belgian firm, the price being about $20 per ton. The rails are to be delivered at Halifax by June next.

FOR about two years H. S. Anderson has been dealing in stoves and tinware at Carberry, Man. In October of last year he lost a few hundred dollars by fire, and we now hear that he has assigned

THE affairs of A. M. Wright, druggist in Toronto, are placed in the hands of Henry Barber & Co., and a meeting of creditors will be held to-morrow. This is owing to the issue of a writ for $1,000 by the principal creditor.

GILMAN & BARNES, keepers of the Descreeshoska Hotel, on Fighting Island, Detroit River, near Windsor, are in trouble. They have been slow pay for a long time, and after being frequently sued they now assign to Robert A. Reynolds, Windsor.——In January, 1891, Robt. Smith, who kept store at Port Colborne, got an extension from creditors, and managed to meet the payments, but business gradually fell away and now he assigns —— Another assignment is that of C. A. H. Ashdown, grocer at Burke's Falls. He has had a short career, only about four months in business, with the above result. ——John Bidwood, tobacco dealer, etc., at Sudbury, and George Rancier, builder at Burford, have assigned.

IT is significant of the overdone condition of the steam transport business on the Atlantic when we find steamers of the Allan, the Dominion and the Beaver lines being laid up in Liverpool. Not only this, but it has been resolved to wind up the Canada Shipping Company [Beaver Line], which has not paid a dividend since 1890. At a meeting of the company, held within a few days, it was decided to take advantage of the Winding-Up Act Mr H E. Murray and Mr J. Hyde, of Montreal, and Mr R W Roberts, of Liverpool, Eng., were appointed liquidators, while Mr. Robert Mackay, Mr James Crathern and Mr Hugh McLennan form an advisory committee. It is a most regrettable thing to see the steamers of the Beaver Line pass away from their regular beat, perhaps to become "tramps" in some more distant waters

AN assignment has been made to E. R. C Clarkson by Hugh Mitchell, who is one of the oldest merchants in Fergus. Within a few years he was believed to be worth over $20,000, but of late has made no progress, and perhaps has not given his business the attention it deserved.——Last February D. S. Clemens had his mill burnt at Winterbourne, and lost about $10,000. Then he removed to Guelph, where he built a more modern mill, etc., and thus locked up his capital. Not having sufficient means to work with, he makes an assignment ——Mrs. Sarah Hodge, grocer at Hamilton, has assigned.——In the same place the creditors of Kent Whipple, brass founder, held a meeting last Saturday. He has assets and liabilities of $1,600, and offers 25 per cent., which creditors declined, but gave him one week to reconsider and amend his offer.

A CIGAR manufacturer of London, Louis Risk, has found trade declining. He became in arrears for rent, etc., and was obliged to assign, with liabilities of $1,100. He has assets of a similar amount.——McDonald & Hall, general storekeepers at Massey, have evidently misunderstood their position. A month ago they claimed to have stock, book debts and other assets amounting to $38,000, against which they only owed $8,000. Of late they have been slow pay were sued [illegible] Henry Barber & Co.——The [illegible] sion of Alfred Daniel's [illegible] George Mills, contractor [illegible] signed. So has H B Patrick [illegible] at Parsley Twelve years ago he began with $1,500 For some time he prospered but being ambitious to do more than his means would allow he has become [illegible] assigns, with liabilities of $16,000

A FIRM of general merchants named Pichaume & Co., at St. Jerome, Que., have been unfortunate in being recently burned out to a serious loss over and above an insurance of $5,000 Liabilities are about $9,000 and apart from insurance assets are only $1,500 in book accounts, and a possible margin in real estate of about $5,000 A settlement is [illegible] sary —— U Martel jr a grocer at Three Rivers, is offering his creditors 25 cents on the dollar.——J. E. Lanouette, general store, has made an assignment and owes about $7,000 Mr Lanouette has been in trade for more than a quarter of a century but has been able to command but a limited measure of success. He has failed twice before, it is reported, first in 1874 and more recently in 1889.—— From Chicoutimi is reported the [illegible] at Beily & Chaveau, general dealers who began business in 1891 They have [illegible] and having been slow in payments for some time past, their assignment is not unexpected.——O Chaput, lumber, L'Assomption, whose failure we reported last week, is before his creditors with an offer of 25 cents, cash. The money to be furnished by his mother

TORONTO, FRIDAY, NOVEMBER 2, 1894.

THE SITUATION.

At the close of the sealing season, the Victoria fleet is found to have met with greater success than in any previous year. No less than 87,572 seals have been taken, against 70,000 last year. They were not all caught in Behring Sea, but the venture there is described as having been "exceedingly satisfactory." Such results are in striking contrast to the doleful forebodings of what would be the outcome of the regulations of the Paris tribunal, and even the Victoria sealers may now congratulate themselves on their good fortune under the new conditions, which so greatly excited their fears at the outset. In the end, there is little doubt that the international agreement for the conservation of seal life will be greatly to the advantage of the sealers. Indiscriminate destruction could not have gone on long without reducing the herds to a minimum and exposing the whole race to ultimate annihilation. The sealers themselves have the greatest interest in preserving a sufficient number of brood seals to keep up the stock at a right standard; a fact which it is not improbable they themselves already begin to realize. At any rate, they have made handsome profits, with the hope of being able to increase the catch to 100,000 next year. At the new methods of capturing the seal they are not yet thoroughly expert. More seals were lost by the old wasteful method than would suffice, if left alone, to keep the broods at a high level.

Everything was favorable to the Canadian loan which has just been launched on the English market. Governments have a preference over everything else at present. The debt of Canada has been incurred for permanent improvements, which are directly or indirectly productive, and a large part of it is covered by a sinking fund. Debt incurred for such purposes, when kept within reasonable limits, means national progress. This is well understood among lenders, and all things considered, it is not surprising that the new loan has been made on better terms for the borrower than any one that preceded it. The aggregate bids ran up to $11,294,000. The most favorable will, of course, be accepted. The offers vary all the way from the minimum price, 95, to £99 12s. 6d., though it would seem there were not many at this last figure. But at £97 8s. 6d. forty-five per cent. of the whole amount required was offered. The average price brought is £97 1s. 2d. This is better than any previous loan, and will be satisfactory to the country. Among the tenderers small investors who have come to distrust so many things offered to them, made quite a figure. So far as this loan is a process of refunding, it will afford some relief to the annual burthen on the public treasury, in the shape of interest.

Once more the promoters of the Hudson Bay Railway have been besieging the Dominion Government for aid. The story published about their success is very indefinite, but it has one incredible feature. In some way unexplained, the interview with Ministers is said to have ensured the $20,000,000 of which the company is in search. It is not even insinuated that the Government is to advance this amount. An advance on the lands voted in aid of the work is said to have been sought, but that such advance could come wholly from the Dominion Government passes belief. This is not the first time that the success of the financial schemes of the promoters have been heralded without any marked advance having in reality been made. A mysterious secrecy hangs over the negotiations with the Government. Nobody outside knows what has been promised, if anything, or even what has been asked. When the veil is lifted, we shall be better able to judge what has been done, and whether it is likely to give success to the enterprise.

Sir Henry Tyler is still able to control a majority for all purposes among the shareholders of the Grand Trunk Railway. At the meeting of stockholders which took place this week, he was unable to prevent a vote in favor of an investigation of the books, though it was carried by only a majority of one; but when the proxies were counted, there was an overwhelming majority for accepting the Directors' report. The object of the amendment was to prevent the acceptance of the report till experts had made an examination of the accounts. What an investigation of the books is expected to disclose we do not know. There are no scandals in the air here about the accounts. And if, as a London paper suggests, the company was being locally robbed, the recent arrests and trials of certain of its conductors may throw light upon the facts. It is complained by the critics that too much is expended on the branches, and it is not impossible that this impression may be confirmed. But what is to follow? The branches adhere to the trunk, and it will hardly be proposed that they should be cut off. The arrangements by which some of them were acquired may, perhaps, be proved by the light of experience to have been not altogether provident. The main difficulty of the Grand Trunk is the great load of capital which it has to carry. That part of the stock on which no dividend has ever been paid, is a burthen rather to the credit than to the revenue. If there is no hope of retrieving what has been lost, would it not be better to admit the fact and act accordingly? This question must some day be answered, and perhaps that day draws nigh. No mere investigation into the accounts will be of value unless it opens up the way to some scheme of permanent relief.

Sir Henry Tyler was not opposed to an investigation of the accounts of the Grand Trunk, but only to the proposal that the report of the directors should not be accepted until the result of the enquiry was reported. The amendment was put in a way to make it a vote of want of confidence, whether this was intended or not. The figures quoted show that the road is being worked at a relatively low cost, compared with the average of American railways. Extravagance cannot, on this showing, be the sin of the management. There is no doubt that the fact of the man-

agement centering in London, far distant from the scene of the operations, is a disadvantage to the road. True, the proprietors and bondholders generally live there; but this is true of other roads on this continent successfully managed on this side of the water. Pratically the C.P.R. is managed in Montreal. Whether the proposed enquiry will now go on is doubtful; in any case, a mere enquiry into the accounts is not likely to be rewarded with important discoveries. It is true, conductors have robbed the Grand Trunk, as they rob other railways, but the general financial management is under no suspicion. Defective the management may be, and capable of improvement, but the defects, if any exist, will scarcely be found out by an enquiry which embraced merely the accounts.

Toronto has not been happy in her method of negotiating for a loan. She began by sending the city treasurer and one of the aldermen to Great Britain to negotiate for a loan. Her agents got an offer, aud made a provisional arrangement, subject to the ratification of the council and the action of the legislature to authorize a 4 per cent. loan, instead of one for a lower rate of interest. An arrangement which had to run the gauntlet of the legislature was by no means certain to be carried out. When the agents returned the anxiety to know what they had done was not gratified, and if new offers made in Canada were to be considered, this could not be told, for, if the facts were known, the subsequent tenderers would have been in the position of men who had access to the tenders made before, and could overbid just enough to make theirs the better offer. As a matter of fact another offer was made, in Montreal, subsequent to that which was made in Scotland. The mistake was in not requiring all tenders to be made at the same time; and, as a result, the different tenderers are trying to force their offers on the city. But it is quite clear that no binding bargain has been made, and that the letter of the treasurer, so much talked of, is not of a nature to bind anybody.

UNIVERSAL, NOT SINGLE TAX.

In a formal resolution, the Grand Board of Patrons, on Wednesday, declared in favor of a new plan of taxation, "providing for the assessment of all wealth at its real value, whether such wealth consists of property, real or personal, all incomes above $500 a year," unless it be otherwise taxed, "money in any way invested," except in churches and graveyards, and even them if they be "held by corporations or individuals for purposes of revenue." This may be called universal tax, and is the complete opposite of single tax. The resolution is not very clear in some respects. We are given to understand that the Toronto Ratepayers' Association joined with the Patrons in constructing and passing the resolution. For what purpose the proposed assessment is to be made, municipal, provincial or federal, there is nothing to show. But if we may surmise anything from the presence of the Ratepayers' Association, the object is municipal taxation. The nomenclature of the resolvers is peculiar. If they had simply said that their desire was to see all "wealth" taxed, the natural conclusion would have been that land was to be excepted; for in the estimation of economists land is not wealth. The assumption that some churches are run for revenue is certainly conveyed by the language used, but the resolvers, if they had expressed their intention, possibly meant that only graveyards are sometimes run for profit. But as they include churches, we must assume that they want to tax churches that are run for revenue. There may be a sense in which some of them are. Perhaps the Patron-Property-holders' Association coalition will explain.

MERCHANTS' COLLECTIONS.

A manufacturing firm in the county of Oxford, replying to our enquiry as to the character of collections thus far this year, say this: "Collections might be better, and doubtless would be if farmers would sell at present prices. But unless country merchants insist upon settlement of their accounts, we fear that slow payments to wholesale houses will continue during the balance of the year." The reason for thinking that payments will be slow doubtless is that they know the farmer's habits, one of which is to hold on to his farm produce until the market price reaches the high figure *he thinks it ought to reach*. Now the farmer must be educated to see that a lower level of prices has been reached in most staple commodities: beef, rice, sugar, coffee, jute, hemp, silk, coal, steel, copper, tin; and that while the present price of wheat and other breadstuffs is abnormally low, it is impossible, owing to the extending area of wheat cultivation the world over, that former high prices for wheat should return. One need only look at the visible supply in our grain market report—78 million bushels in sight—to be convinced that no rise in price is likely this year.

Who is to educate the farmer in this respect? We know of no one to whom the duty falls more naturally than the storekeeper who is his creditor. Country merchants should keep dunning their customers; showing them, at the same time, how foolish it is to hold on to assets in the hope of a rise in price, which the prevailing conditions show can not in reason be expected. Furthermore, as another correspondent justly observes in to-day's issue, "we have heard enough of hard times—what we want is economy and readjustment to suit the times."

DOMINION LEGISLATION, 1894.

SECOND ARTICLE.

The recent tendency of legislation to protect the public from adulterations and inferior qualities of goods sold, is carried further by the extension of the restraints on fraudulent marking to dry white lead, white lead in oil, Paris green and vinegar. Heavy penalties are attached to marking, branding or labelling, selling or offering for sale, as such, any of the foregoing articles, unless they are of the standard of purity laid down in the Act.

Electricity is now to be measured according to standard units, which are very fully defined as to resistance, current, electromotive force, quantity, capacity, work, power and induction. Standard apparatus necessary to produce these units are to be deposited in the Department of Inland Revenue and form part of the standards of measure and weight. The inspection of electric light is provided for, and meters bearing government stamps, as duly verified, are to be supplied to consumers.

Petroleum is further subjected to inspection, and may be imported in tank cars, at places designated, under regulations established jointly by the Departments of Customs and of Inland Revenue; but all petroleum so imported shall before being removed for consumption be put into packages, inspected and marked in accordance with the requirements of the Inspection Act. Permission is given to import naphtha and gasoline in iron drums of a capacity not exceeding 120 gallons.

It would be well for ship-owners to consider carefully the amendments to the Act respecting certificates to masters and mates of ships, which are numerous. After defining

"sea-going ships" and "coasting voyages," the Act makes special provisions as to the examinations of masters and mates. No ship of over 100 tons, registered in Canada, is to go to sea without a certificated master and mate, and no ship is to go on an inland or coasting voyage without a certificated master; and if allowed by law to carry more than 40 passengers, it must also carry a certificated mate. These certificates must be produced on applying for a clearance. Masters of ships, registered in any of the provinces are given the same rights of lien and remedies for the recovery of wages and disbursements properly made, and liabilities properly incurred by them on account of the ship, as seamen, not being masters, have.

The deck loads of ships are regulated. It is now illegal for the master of any ship, sailing after the first day of October or before the sixteenth day of March in any year, from any port or place in Canada to any port or place out of Canada (except Newfoundland, the West Indies, the United States, and South America), to carry upon or above any part of the upper deck—not included within the limits of any break or poop or any other permanently closed space on deck available for cargo—the tonnage of which forms part of the registered tonnage of the ship, any square, round, or other timber, or any more than five spare spars or store spars dressed or not dressed for use. Nor shall any such ship carry in this space cargo of any other description, except live stock, to any height exceeding three feet above the deck. None of the provisions of the Act are to apply to any vessels sailing from British Columbia. Single decked ships sailing to the West Indies between the first day of November and the sixteenth of March, are not to carry any cargo above the deck at a height of more than six feet above the deck. Customs officers are charged with the duty of seeing that ships are not loaded contrary to the Act when asking clearance, and masters sailing with intent to evade the provisions of the Act are liable to a fine not exceeding $800, or imprisonment, or both.

Stringent regulations are made respecting the lobster fisheries. No one is henceforth to can, preserve or cure lobsters except under license. After the first of next January the slats of every lobster trap must be at least one-and-a-half inches apart, and all boats used in the lobster fishery, and all "cars" used for holding lobsters, shall bear the name or brand of the owner, and such name or mark is to be registered with the local fishery officer. All cases of lobsters canned in Canada are to be marked, and cases of imported lobsters are to be marked, otherwise they are liable to seizure. Drifting for salmon, except under license, is prohibited, and killing seals, porpoises, whales or fish of any kind by means of rockets or explosive materials, is made a serious offence.

The first Monday in November is declared a public holiday, to be designated "Labor Day," and is to be observed by the banks as a non-juridical day.

SPRING DRESS GOODS.

Before the first fall of snow, and almost before the approach of cold weather, merchants are busily enquiring what of the spring? Samples of dress goods for the spring trade are not yet complete, but with the lapse of another week some of the houses will have their representatives on the road soliciting spring orders. Serges and cheviots from present appearance promise to be good for another season. Tailor-made checks are in good favor with import buyers. The outlook for covert coatings is generally considered excellent. Whipcords sold well last spring and will probably be all right for another season. American authorities predict a great run on crepons, which are shown in a variety of shades and designs, consisting of tan, light green, silver grey, and bleuet grounds, on which are woven small and large spot effects, and floral figures in contrasting colors. By the way, bleuet, the newest shade, promises to be all-prevailing next spring; light shades of brown, fawns, and light greys may also be considered leaders. The subject of values is too important a one to pass without some mention. Although it is impossible as yet to speak with any degree of definiteness, it may be safe to say that prices will be somewhat higher than they were last spring, when they reached a basis below which it was impossible to go.

ECONOMY AND READJUSTMENT.

"I know from past experience," writes Mr. D. Thom, of the Watford implement works, "that it is profitable to have our temperature taken occasionally. Others are benefited by the registry, and it is possible that we may discover that personal exertion is required to dispel the feelings of despondency. We have heard enough about hard times—what we want is economy and readjustment to suit the times. Canada's future is all right." Sensible words. If every one would act upon the resolve to be up and doing, we should have no despondent class, and therefore no croakers. We must face a changing condition of affairs, a lower range of values in almost every direction in which a merchant can look. Our products bring less money than they used to do, therefore we should spend less money than we used to spend. Lowered prices means a lessened scale of profits generally, lessened incomes, which to the wise implies reduced expenditure. Plenty of us have in our minds all the while the laughing wish of *The Autocrat*:

> I only ask that Fortune send
> A little more than I shall spend.

But it is not easy to learn the lesson of proportioning our spending to our income. This, however, is the lesson we clearly need to learn. As to leaning on Fortune, she is a poor dependence.

UNITED STATES BANKING REFORM.

The necessity for some change in the currency system of the United States has long been manifest to its best informed financial men. And much discussion has been going on. At the convention of the National Bankers' Association, held in Baltimore last month, amendments to the Banking Act were suggested, with the view of establishing an elastic currency. A synopsis of these we give below. They are collectively referred to as The Baltimore Plan, and contemplate the issuing of notes without any bonds behind them, as at present.

This series of recommendations is of special interest to Canadians, because it proposes to copy from our banking system in virtually the only two points in which it can copy from us. The bank notes are made a first lien upon their assets, and an insurance fund is created. If the assembled bankers could have agreed that no bank should go into operation in the States with less than a million dollars capital, it would have been a salutary thing to recommend.

The comments made at the convention by Mr. Hepburn, the former Comptroller of the Currency, show that he is well informed as to the Canadian system and is satisfied with its working. The plan recommended, said Mr. Cornwell, of the City Bank, of Buffalo, as reported in the Baltimore *Sun*, "is a step in the right direction. We will need to go further later. The essential principle of daily redemption of notes, that great anchor that holds the redundant currency down and makes elasticity a scientific

mechanical result, must be added as soon as possible." The wonder is that some change was not proposed in the mode of redemption. It is not easy to see how the desired elasticity can be secured without it. It remains to be seen whether the associated bankers can induce the Government to give force to their views.

The following is a condensed outline of the proposed amendments to the National Banking Act of the United States, for the purpose of establishing a safe and elastic national currency in that country :

Sec. 1. The provision requiring the deposit of bonds to secure circulating notes hereafter issued shall be repealed.

Sec. 2. Allow the banks to issue circulating notes up to 50 per cent. of their paid capital, subject to a tax of one-half per cent. a year on the average circulation outstanding. Provision is made, too, for "emergency circulation" to the extent of one-quarter the paid capital, subject to an additional heavy tax.

Sec. 3. This tax of ½ per cent. to be paid to the U. S. Treasurer, out of which he shall defray expenses of Comptroller of Currency and the expense of printing notes, etc.

Sec. 4. The banks to maintain with the Treasury a Redemption Fund equal to 5 per cent. of their average circulation.

Sec. 5. The system of redeeming notes to remain unchanged.

Sec. 6. Create a guarantee fund by each bank depositing 2 per cent. on the first year's circulation, and ½ per cent. per year thereafter, until it reaches 5 per cent. of the total. The notes of insolvent banks to be redeemed out of this guarantee fund.

Sec. 7. The Government to have a prior lien upon the assets of each failed bank and upon the liability of shareholders to restore the amount withdrawn from the guarantee fund to redeem its circulation.

Sec. 8. Circulation can be retired by a bank at any time by depositing lawful money equal to the sum to be withdrawn.

Sec. 9. The business of a bank being wound up, the U.S. Treasurer and Comptroller may pay over to the directors of a liquidator the sum at the credit of the bank in the Redemption Fund, if satisfied that provision is made for paying notes and tax.

TRADE WITH GERMANY.

A correspondent asks for some particulars about the trade of Canada with Germany, whether it is growing of late, and what is its nature. We reply that it is growing, and submit the following list of principal exports to Germany and imports from her during the fiscal year 1893 :

Exports: cattle, value, $152,080; peas, $115,852; dried apples, $110,410; agricultural implements, $31,115; buckwheat, $97,304; wheat, $17,000; hay, $17,000; rye and other grain, $24,600; organs, $16,000; bones, furs, nickel, phosphate of lime, seeds. The total of exports last year was $667,451 of our own products, besides about $100,000 worth of United States products.

Our imports from Germany last year were in value beyond those of the average of the last ten years, amounting to $3,825,763, which, however, was less than those of 1892. The value of principal items of import will be found below in round thousands : Iron and steel goods, $311,000; furs and fur manufactures, dutiable, $242,000; free furs, $139,000; gloves, $137,000: felt goods, $197,000; cloaks and clothing, $222,000; yarn, $155,000; fancy goods, $122,000; toys, $90,000; silk goods, $90,000; glass and glassware, $132,000; cloths, $70,000; paper and stationery, $104,000; paints, $80,000; degras, $92,000; hops, $37,000; gold leaf, $34,000; cotton stockings, $51,000; cotton goods, other, $58,000; chinaware, $76,000; drugs, leather, musical instruments, wood goods, twine, spirits and wines.

THEY HAD ENOUGH OF IT.

Not a particularly profitable business of late years that of fire underwriting, judging by the number of associations which have made haste to get out of the field after trying it. In the thirty-three years from 1860 to the close of last year, 759 companies have retired. Their combined capital was $112,757,633; their combined assets, $183,279,261. Such was the statement of the chairman at the recent meeting of the National Association of Fire Underwriters in the United States. In one year alone, 1893, the number of companies retiring was 38, with an aggregate capital of $4,657,000. Those who think the average fire insurance rates in Canada are too high, and that there is a lot of profit in the business, might with propriety ask themselves why, if either is the case, these thirty-eight companies left the field and wound up their affairs.

A FASCINATING PASTIME.

In a short article published in our issue of 31st August, entitled "Life Assurance and Athletics," it was pointed out that the Life Underwriters' Association of Boston had been discussing the attitude which underwriters should assume towards the game of football. And some of the grounds were cited upon which at least one medical man argued against the acceptance of any football players as a life assurance risk, because of the violence which is its marked feature. "As the game is played to-day," said a New York doctor, "the attendance of a surgeon is as much a necessity as in a duel." Instances were given of the nature of the injuries and their frequency. The London *Lancet* has cited more than a hundred cases of accidents from football last year in England and Scotland which necessitated hospital treatment, and of these patients eleven died. We now find the *Westminster Gazette* publishing even more elaborate statistics on the subject. The list compiled for that journal in the season 1892-3 (the season in England lasts from September 1st to April 1st) shows a total of thirty-one deaths in consequence of injuries received at football. It is to be remembered, of course, that during the season of seven months there is an almost countless number of games played all over Great Britain and Ireland, for no village is too small to have its "eleven."

The figures for the season 1893-4 show twenty-one deaths, a smaller number than in the previous year; but, on the other hand, the serious accidents are far more numerous this year than in previous seasons, probably because the compiler of "The Butcher's Bill," as he calls it, has exercised greater care in noting such accidents than he formerly did. Broken ribs, legs, arms and collar bones are among the most numerous accidents. Thus the list indicates :—

Season 1893-4, cases of broken legs	79
" " " arms	24
" " " collar bones	72

These major injuries are perhaps not often heard of in Canada as results of the game, but we have all known cases of sprains, ruptures, contusions, breaking of fingers, dislocations, "knock-outs," and such disablements as the accident insurance companies, who have to pay for them, could tell about if they chose. The English list of miscellaneous hurts reads like a hospital record. Here is part of the ghastly schedule: A harrowing succession of smashed ribs, wrists, noses, thighs, cheek-bones, frontal bones, knee-caps, fingers, toes and tendons, and an equally cheerless array of ruptured interior arrangements, brain concussions, and disagreeable displacements of the victim's anatomy in general.

For instance, a Mr. Randle "had his leg broken in two places," and, in another case, "Alfred was kicked on the knee with such force that two bones were broken." Then there is the experience of a Mr. Jackson who was "kicked on the head so severely that his own teeth almost cut his tongue off," and it is merely added that the act was considered "most uncreditable" on the part of the player who kicked him. There is also the case of L. F. Eliot, who, in the Croydon *v.* Kensington match, "broke his leg in three places;" and finally (for it must be by this time pretty well proven in England, at any rate, that football is dangerous), there was the match between the eleven representing

Barnsley and Nortonthorpe, which was "played for a local charity," and resulted in "fourteen players being injured."

Referring now to the deaths in the last season, we learn that two of them were those of spectators who died from over-excitement and exertion in cheering their favorite teams during the progress of a match. It is scarcely fair, it seems to us, to blame the violence of a game for such an effect as this upon spectators. We have seen games of lacrosse in Montreal or Toronto that caused excitement and cheering enough to kill a man with weak heart or tender blood vessels in the lungs. But we have never seen, as a result of lacrosse, such a murderous-looking list as is here set down of fatal accidents at football in England:

"September 2nd, Fletcher, playing in the Jubilee Park, Dingwall, was charged by an opponent with such force that three of his ribs were torn from his spine." "September 11th, Isaac Thompson, played at Stokesley, was tackled in the throat, and expired shortly afterwards from asphyxia." "October 10th, William Harris, playing at Llansamlet, was struck on the head by a football, which broke a blood vessel, and he died in a few days." "November 4th, Robert Horner, playing at Hartlepool, was tackled in the stomach, and died six days afterwards."

Furthermore, we hear of such gentle accompaniments of the game as kicks in the stomach, broken limbs, resulting in lockjaw (there are at least half-a-dozen such horrid deaths); fatal concussions of the brain, deaths from blood poisoning, the result of arms and legs and ribs snapped off short, from "internal injuries" and from other causes, the unpleasant details of which are given in appalling profusion. The recommendation is made by the *Medical Examiner* that the commitee appointed to revise the playing rules of the game should paste this list of deaths and wounds in its collective hat, and see what can be done to prevent the continuance of such violence. To this we would add the suggestion that what happened in England early in the sixteenth century may easily happen again if the brutalities of the game are not curbed. It is related that so rough had the game become that King James I. forbade the heir apparent to the crown to play it, and described it as "meeter for laming than making able the users thereof." It will not take very much more of violence and maiming to change the present furore in favor of foot-ball to something very like dread to witness, let alone play, this most exciting game.

THE STATE OF TRADE.

We have made no apology for sending out a few thousand postal card reminders to our subscribers, asking, among other things, what their experience of trade has been of late, and how they have found collections. Up to the present time we have found but one man who objects to being so troubled. Hundreds of others have expressed themselves briefly or freely on the points. One wholesale subscriber in Ottawa is of the opinion that our card "is decidedly to the point. Would suggest that the trade adopt a similar heading for their statements." The replies sent by subscribers are often interesting. For example, Frost & Wood, makers of agricultural implements at Smith's Falls, say: "Collections are better than last year up to date, and fully up to our expectations, with the exception of Manitoba, although that province is doing better this year than last. Business, however, is quiet, but this is our quiet season in manufacturing, when we do not expect to be busy. We have had a good season on the whole, and look with hope to the future." Another firm in the same line of business say: "Your reminder is a good one, and we have pleasure in replying." This firm is B. Bell & Son, of St George. They go on to say: "We are neither in the dumps nor delighted with the present outlook. Our trade being specially in stock raisers' implements, such as ensilage and straw cutters, root cutters, tread power, etc., has been steadily increasing. Two years ago we began selling out and out to dealers on as short dates as possible. We accept no farmers' notes at all, and find it much more satisfactory. The minute our goods are shipped they belong to the buyer. All this, however, is to-day being pushed at smaller profits and with mutterings against our Government. We are not hogs, but we want as much protection as any one else. Since our late revision of the tariff we are placed under a disadvantage that we all feel very keenly."

A merchant in Beaverton, writing about collections, says they are better than they were last autumn. "We are busy, and hopeful of the winter trade," he says, "and feel certain that farmers as a rule could pay better than they do. Some of them, to excite sympathy, want to pay their debts or get more time by finding fault with the crops, the prices and the Government."

"Trade is good," say J. H. Chapman & Co., dry goods merchants, London. "The best season we have had in years." "Hopeful and busy both," is the reply of Bell & Co., tanners and fur dressers at Tilsonburg. A St. Catharines subscriber offers the opinion that "Canada is all right, present and future. We are not in the dumps, but watchful and hopeful. The passing cloud has a silver lining, and ere long the sun of prosperity will shine on us again." Messrs. H. Shorey & Co., wholesale clothiers in Montreal, give it as their experience that "collections are fair except from Manitoba. Business nothing to brag about, but some signs of improvement."

The following is from The Sadler, Dundas and Flavelle Milling Co. (Ltd.), proprietors of the Lindsay flour and saw mills. "Referring to business, the flour milling industry has suffered as severely as any other manufacturing industry in Canada, largely owing to the continued drop in the price of wheat. The milling business, therefore, is not responsible for a large portion of the loss sustained in that business. Expressing an opinion as to the future is always uncertain, but our own feeling is that we have seen the worst period in our business, and look for a gradual improving tone. Referring to collections, we have had no difficulty in this respect. We have practically had no loss arising from failures, at least the amount has been so trifling that it does not count as a factor to any extent."

A general dealer in Paisley, Mr. W. H. McFarland, says some sensible things. We quote: "The enclosed $2 is the best reply I can make in answer to your card. And if the retail trade would only take your example as well as the wholesale trade in collecting their accounts, 't would be much better for them.

"I consider the two great evils that we have in trade to-day are giving too much credit and too long time, and buying goods long before needed; but, notwithstanding those two monster evils, I have found trade very good—much better than expected, considering the weather, which has been very fine and dry—but we have to work and worry, devise and plan, and be ever at it to make it go. Still I am looking to the near future, when long credit and buying ahead will be things of the past, and then we can enjoy work better and life will be easier.

"The country is all right, in spite of McKinley, and will be if we are right."

The Montreal firm of J. Widmer Nelles & Bro., agents for jute and hemp goods, &c., say: "Referring to your remarks with reference to collections, we have pleasure in reporting to you that our collections have been very good. We do not know, though, that the fact of collections being satisfactory, indicates that everything is as one would desire. Canada has been moving so much more quietly than the United States, that we hardly look for losses; but on the other hand, the outlook for a large business in the near future is very poor. We by no means consider we are stifled by the McKinley bill, or by the present bill, and we certainly believe in Canada's future, although from observation we are satisfied that the United States cannot go through what it has gone through without the effect reaching beyond the theoretical line, and extending into our country."

"I could not get along without THE MONETARY TIMES," begins Mr. N. C. Ford, insurance agent at St. Thomas; and he ends, "Yours, not in the dumps." R. McGregor & Sons, wholesale grocers and commission merchants at New Glasgow, Nova Scotia, write on October 22nd, that "collections are very good." From Port Hope, Messrs. Fulford Brothers, dealers in dry goods, send us word as under: "Your query, 'How are fall collections?' has a significance in our business only as it relates to an immediate exchange of cash for goods, for it is only on this basis that we dispose of our merchandise, believing it to be about the safest method of merchandising. Business is fair, with room for improvement. However, we are not yet 'in the dumps,' and believe that the season will pull out about as good as last." This from a firm of hollow-ware makers: "Business so far this autumn has been fair, but owing to the mild weather there is at present a lull. This, however, we hope is only temporary, and we expect that sales will this fall be at least equal to those of last year."

At the closing session of the Carriage Builders' National Convention, on this day week, the Committee on Statistics made a report in which it was stated that the products of the interests represented for the past year had reached the enormous figure of $102,000,000.

DON'T ENDORSE.

A manufacturing house sends us a specimen of a placard which one of their travellers found in a city in the Maritime Provinces. It is a good-sized poster, about 16 inches by 24, headed with the word NOTICE in big letters, and contains the following warning:

> The undersigned has, this 3rd day of November, 1892, POSITIVELY TAKEN OATH not to endorse any new paper for any one. To avoid refusal, please don't ask.
>
> FRANK POWERS.

There is a text for quite a homily in this story. It is tolerably clear to any one who has had experience of the evils of endorsing, or even to any one who has observed what cruel results follow from persistence in such folly, that Mr. Powers, unable to say NO to people who asked for his name, has been driven in desperation to *write* NO in the manner indicated by the placard. Chauncey Depew puts the case well when he says in a recent utterance on this subject: "When you are asked to endorse for any one," he says in effect, "make up your mind how much you can afford to lose by that person, and give him your cheque. But don't become responsible for any one." That eminent financial magnate, judging from his tone, has been through the mill. Any one who does this will not be forced to the pitiful expedient of saying, in print, "Please don't ask me to endorse," and posting up handbills all over the county to that effect. A good New Year resolution for many a man would be one to endorse no more for anybody. But it is one which, like others, has been many times made and as often broken.

INSPECTION OF GRAIN

There have been for a long time mutterings of complaint among grain dealers and flour millers that the inspection of Manitoba wheat coming east from Lake Superior ports was unsatisfactory. At last a case of mixing has been, it is alleged, so definitely traced as to be the subject of a suit for damages. The Montreal Board of Trade has made representations to Government that something should be done to prevent further grievances of the kind complained of. And the grain section, as well as the council of the Toronto Board of Trade, condemning "the practice of the inspector of grain at Fort William or Port Arthur to grant certificates of inspection on shipments of Manitoba wheat containing a mixture of damaged or scoured wheat, and of wheat made up by mixture of different grades," ask the Government to direct its discontinuance. It was also resolved that wheat should be inspected out the same grade as inspected in.

LUMBER FREIGHT RATES.

There is such a thing as tact in the management of business. Indeed this element enters very largely into business success. An instance of the lack of this quality occurs to us in connection with one of the grievances which the lumber dealing customers of the Grand Trunk railway have against the management of that road. It was a natural thing enough when the duty on lumber imports into that country was removed by the United States Government, that the Grand Trunk should propose to obtain some advantage in the shape of increased freight rates, and no sooner had the bill become law than, on October 1st, the new G.T.R. schedule was issued, advancing rates from fifteen to twenty per cent., which means something like twenty-five or thirty cents per thousand feet. This rise of rates is launched at the very time when business of all kinds shows signs of emerging from a long depression. People were just beginning to order, timidly and without much heart, when down came an edict that lumber freights are advanced. The railway management would have shown more discretion had it chosen some other period for the change.

It is to be borne in mind that American companies have not increased their freight tariffs, nor has the Canadian Pacific railway, and Canadian dealers when just on the point of entering into a spirited competition for the lumber trade of the Eastern States, feel it a hardship to be handicapped at the outset in the matter of freight rates. Further than this Ontario is no longer the market of Canadian merchants exclusively. With present rates carriage is cheaper from Michigan mills to many parts of Western Ontario than from the mills situated on the Northern and Midland divisions of the Grand Trunk railway. Suppose a Canadian dealer has a customer in London, the advance in rail rates is extremely apt to impel him either to buy Michigan pine and send it by water to Windsor, and thence, having railway competition, to London. Either this, or he will ship from Georgian Bay points by water, avoiding the all-rail Grand Trunk route which raises rates on him. So strong has been the opposition to this new tariff that the company has, we understand, consented to reconsider the matter.

—An average of 166 car loads of wheat per day during September is announced as being the largest in the history of the Province of Manitoba. The receipts at Fort William last week were 1,018,702 bushels. The prices paid ranged from 36 to 42 cents a bushel.

PEDDLERS AGAIN

Again the festive shoddy peddler has been making himself conspicuous. Three strangers, representing themselves as of Leeds, Eng., have been offering "unheard of bargains" to the good people of Halifax. Their firm had made a big display of fine cloths at the World's Fair, and the goods had to be sold. If the fact was mentioned that there was such a thing as a Canadian duty on textiles, the peddler "winked the other eye," and thus oftentimes completed the bargain. Most people dearly love to fool the Government if they can do so without fear of injury to themselves. But this time the tables were turned, and those who proved susceptible to the wiles of the trio find themselves in possession of a lot of shoddy cloth from Montreal not worth half the money they gave for it. The merchant may sometimes impose upon one's lack of judgment, but he stays right in the town, and has to bear the burden of his own knavery. The peddlers have departed for pastures new, and will doubtless find them green enough

ILLICIT LOBSTER PACKING.

Illegal packing and fishing has wrought considerable damage with the industry of Nova Scotia lobster packers. In certain parts of the counties of Westmoreland and Cumberland shanties and camps exist in abundance in the woods. Here the poachers carry on their operations, and should they receive information of an inspector's approach—they keep carefully informed of his whereabouts—the camp is easily broken up, and the fruits of their illicit operations removed. The Dominion Parliament during the last session dealt with this matter, and the Department now gives notice that all packages containing canned lobsters which have been legally caught will be officially stamped or marked, and that all such packages not so marked will be seized, and, unless satisfactory proof is given that they have been legally packed, will be confiscated. Customs officers and Government railway officials are requested to see that all packages of lobsters are officially marked before passing the same. This regulation should do much to sustain the good name of our lobster packers abroad.

THE FRUIT TRADE.

No industry has made such gigantic strides in Toronto during the last few years as that of the fruiter. Both in domestic and imported green fruits the volume of movement has annually been attaining greater dimensions. Canadian fruit growers, in consequence, have been making money, but many of them, dissatisfied with their profits, have sought to increase these by illegitimate methods. Shameless deceits have been practiced, the public have been victimized, and honest merchants brought into bad repute with their customers. When an association of wholesale fruit men was formed it was proposed to insist upon the growers furnishing a uniform quality of fruit from the top to the bottom of the box, basket or barrel in which it was packed. Their good intentions were unfortunately not realized, and now the retail fruit dealers and grocers are petitioning for legislation upon the matter. It is sought to have the packages graded into first, second and third classes, and to regulate the size of the baskets used. Inspectors should be appointed, whose duty it would be to confiscate all fruit dishonestly packed, and then the stamp "Canadian" may become a guarantee of quality

THE BEET SUGAR INDUSTRY IN QUEBEC.

The beet root industry in the Eastern Townships of Quebec appears to have taken a new lease of life, thanks to Government aid. At a gathering on its premises in Berthierville last Saturday, Mr. Musy, the manager, traced the many disasters this factory had undergone. He reminded his hearers that the present factory was erected in 1880, and opened in 1881, but did not pay, and was closed until 1883, when it was reopened. Again, not paying, it was closed. The industry was restored in 1888, but once more failure attended it, and only last year when Lefebvre & Co. took hold of it, was it reopened and made successful. The premises, he said, occupy seventeen acres of ground, the factory itself covering four acres. The employees received about $120 a day in wages, and $1,000 per day was paid for beets. The coal bill amounted to $100 a day, and another $100 a day was expended in oil, grease, lighting, etc. The sugar manufactured was sold at from 3¾c. to 4c. a pound at the factory, but he thought that next year they would be able to sell it at from 2½c. to 3c. a pound, as they now had considerably improved the machinery. The annual expenditure in connection with the factory was about $180,000. Until this year the industry had never realized a profit, but it was expected that this season's working would result in a favorable balance of between $30,000 and $40,000. After so many vicissitudes, it is to be hoped that this industry may have reached something like firm ground.

PRICES OF COMMODITIES

The decline in price of many staple commodities is marked in the small table which is appended, and which is compiled from a larger table in a recent issue of the London *Economist*. The first column represents the highest price in 1892, the second an average, about the middle of 1893, and the third the price in London on 1st Oct., 1894:

	1892	1893.	Oct 1st, 1894
MINERALS

NEW ORLEANS COTTON STATEMENT.

We find the following statement of the New Orleans cotton crop in the New York daily *Journal and Bulletin* of Monday last. For greater convenience of our readers, we have rearranged it in tabular form. The statement is for September 1st to October 28th, inclusive.

	1894.	1893.	1892	1891
Port receipts	1,787,491	1,402,035	1,308,705	1,893,294
Overland to mills and Canada	193,297	87,859	126,736	253,285
Interior stocks in excess of September 1st	210,034	197,560	163,241	270,289
Southern mill takings	127,824	129,709	126,808	118,230
Amount of crop brought into sight during 56 days to date	2,318,646	1,817,163	1,725,488	2,535,099

Comparisons in these reports are made up to corresponding date last year, year before last and in 1891, and not to close of corresponding week.

NOTES ABOUT TEXTILES.

German manufacturers of hosiery are advancing prices.

Manchester manufacturers are making blankets for the Japanese army.

The Knoxville (Tenn.) Woolen Mills, said to be the largest jeans plant in the South, is running on full time, giving employment to 800 hands.

The annual meeting of the stockholders of the Metacomet Manufacturing Company of Fall River was held on October 26th. The report showed no profits

A large double display window of a King street merchant filled with dress goods attracted a great deal of attention this week. The goods were marked: Sales Price, 25c., Regular Prices 75c. to $1.25.

A despatch of Friday last from Pawtucket, Rhode Island, says that the strike of the worsted weavers at the Lorraine Mills appears further from settlement than ever, A. C. McColl stating that he cannot see his way clear to restore the old price list.

The Hargraves Mills Corporation held its annual meeting last Thursday. The report of the directors showed the earnings for the year to have been $85,996.91. Of this amount $44,000 was paid in dividends, 5½ per cent., and $32,000 for depreciation. The net indebtedness of the concern is $229,356.91.

The Canadian dry goods trade is not dead yet, as the following from the Bradford correspondent of the *Drapers' Record* would indicate: "The numerous representatives of the wholesale dry goods houses in Canada who are looking round in Bradford now seem likely to leave more satisfactory reminiscences of their presence in the way of orders than was at first expected would be the case."

According to the Boston *Herald* there is a decided improvement in the industrial situation in Maine. Mills are starting up which have been idle for months. For example, a woolen mill will be started up in Limerick; the Cowan mill at Lewiston is running nights to keep up with orders; half the woolen mills in South Windham are running nights; the three Pittsfield woolen mills are running full time, and two of them extra time. The Gardiner woolen mill will start up about one-half capacity in November

FOR GROCERS AND PROVISION DEALERS

Wiser & Sons' distillery, Brockville, is again running

Seventy Paris ratepayers want a meat market established at the station.

An Australian firm has made a shipment of canned meats to a Canadian firm

The Moncton sugar refinery is closed, and extensive repairs are being made to the plant.

St. John pork packers, says the *Sun*, find a ready demand for more hams and bacon than they can put up

Duke de Cay: "Do you love an old rum?" Miss Catchum: "Oh, your grace, this is so—er—I think I could learn."—*Detroit Tribune*

A local fruit retailer believes that the Toronto wholesale fruit association is an unlawful combination, and proposes to test the matter in the courts

The "Letimbro" will be the first boat this season to arrive in New York with new crop Messina lemons. She is expected to arrive about the 15th inst

A correspondent informs the St John *Globe* that a starch factory is being erected by Mr. Dumas at Lower Grand Anse, Gloucester, N.B., near the Bay of Chaleur.

Ottawa grocers were asked to sign a petition seeking legislation to close shops at 7.30 p.m. All but four expressed themselves in favor of the movement, and it will probably be successful

"You may state," say Messrs Murdoch, Barber & Co., "that we have sold a couple of cargoes of Fiji cocoa, as a result of the experimental shipments of Fijian products forwarded to us."

Wild berries are a large item of export from New Brunswick. In 1891 their value exported was $27,500, but in two years thereafter it was $43,000. It is expected to reach $60,000 this year. A great share of this total consists of blueberries

Last week's *New England Grocer* took the form of a special number devoted to the World's Food Fair recently held in Boston. The issue is a good one, and well represents what an able editor can do when occasion demands a special effort.

The shipments of cheese from Canada to Britain are much slackened of late, and the large excess of total shipments this season as compared with last which existed some weeks ago exists no longer. The total shipped to date is 1,439,536 packages, against 1,430,842 packages to like date last year

SHOE AND LEATHER NOTES.

A lady's Dongola kid shoe with patent leather tips and broad toe, Goodyear welt, is selling well. Prices of Toronto retailers range from $3 to $4.

Designers say that next year's spring footwear will be profusely ornamented.

Try a window display of shoes at one price, say, $2.50. It should attract attention, and, possibly, sell goods

At the 27th annual auction sale of Messrs Benning & Barsalow, Montreal, over 5,000 cases of rubbers were offered

A morning fire recently did about $1,000 worth of damage to Falardeau's shoe factory, St. Roch's, Que., before it was extinguished

What is the matter with a Saturday bargain day for children's shoes? One Saturday might be appropriately styled "Boys' Day," and the next "Girls' Day"

For women's wear tan lace boots, with a toe which is called narrow, although not extremely narrow, is finding steady sale. Retail prices range from $1.75 to $2.25 per pair

For ladies' evening wear a line of strap sandals with white linings, narrow toe and medium high cut vamp is meeting with good favor. This shoe may be had in patent leather

An attractive show of overgaiters can be made by stretching a fine wire across from wall to wall about nine feet from the floor, and hanging the gaiters by means of small hooks or pins very closely together

A lady's bright Dongola kid shoe with pointed toe and pointed tip, Goodyear welt, is finding good sale in Toronto retail stores.

"Everything comes to him who waits," is certainly not applicable to the shoe trade. That is, if he waits and does nothing. Advertise yourself and let people know you are in the business to sell footwear, and *then* wait—for your return.

One of the largest shoe manufacturing firms in England is that of Stead & Simpson, Limited, Leicester. They employ 3,000 work-people and own more than 150 retail stores, located all over Great Britain; all of them are called the "National" stores.

For twelve years Mr. Philip C. Folwell represented the J. D. King Co. in different parts of Canada. He has now assumed the management of their retail store on King street in Toronto, and is proving himself to be a skilful and up-to-date merchant.

Reports of the leather and boot and shoe industries, says the Quebec *Chronicle*, have much improved during the last few days. Several houses have been in difficulties, but confidence is again restored and now several factories, notably that of Mr. Wm. Marsh, have as many orders as they can well attend to.

A new process of coloring leather by electrical action is described by the *Popular Science Monthly*. The hide is stretched upon a metallic table and covered, except at the edges, with the coloring liquid. A difference of potential is established between the liqnid and the metallic table. The effect of the electric current is to cause the pores of the skin to open, whereby the coloring is enabled to penetrate deeply into its tissue.

The shoe and leather *Reporter* says of the rubber goods industry in the United States: "Though contracts were closed for great quantities during the summer, taxing the capacity of the factories to their utmost, the demand is not yet supplied and the companies are all running their factories and producing full lines. The demand for some kinds is so great that orders are being filled from the various warehouses of the companies, as the buyers cannot wait to have the goods made up. All the companies are behind in the delivery of specialties and are unable to meet the pressing demand."

BOOK AND STATIONERY NOTES.

It is agreeable news to book men to learn that Sir John Thompson, the Canadian Premier, who has gone to England, is to give especial attention to the copyright question while in the Old Country.

Apropos of the recent novel entitled "Ships that Pass in the Night," an enterprising Windsor druggist, as an advertisement, puts a stack of poker chips in his window and labels them, "Chips that Pass in the Night."

Bayard Taylor received $25 for the first two poems he ever wrote. "That," said he, "was the first money I ever earned." Longfellow sold his "Village Blacksmith" for $50, which was the highest price paid to him, except in one instance—"The Spanish Student" brought $150 from the publisher.

J. M. Barrie, who has a pulmonary disease, has been too ill for literary work during the summer, which has deferred the completion of his new novel, "Sentimental Tommy," until next spring. Paul Blouet, better known as "Max O'Rell," has written a new volume on his impressions of the British colonies in Canada, Australia, New Zealand and South Africa, entitled "John Bull & Co."

The wood-pulp industry is an important and growing one. Especially since the effects of last year's crisis have begun to wane do we find it "booming" in the States. The Richards pulp mill at Skowhegan in Maine, shut down for ten months or more, is now again running full time. The work of building the big pulp mill at Rumford Falls, upon which work has been suspended for months, has been resumed. The plant, when completed, will employ from 100 to 150 men, and will turn out about forty tons of sulphite daily.

The thing to consider in dressing up a show window is, "How will it strike the public." The problem has been very creditably solved by a Broadway firm which has filled its windows with $3 goods, and instead of using price tickets or placards, attaches to the articles three $1 bills spread out fan-like. A goodly company may ever be found gazing into the window and mentally wrestling with the meaning of the new style of price ticket. "Say, Billy, wot's de money stickin' up all round fer?" said one interested gamin to another. "Ye're a smart un wot can't see dat dems de libels of de price," answered his companion scornfully. "Libels, quite likely," I thought.—*American Stationer*.

—As a proof of reviving industry in the United States, Chauncey M. Depew, president of the New York Central Railroad Company, said at the recent druggists' banquet, in New York, that for the month of September the freights going west exceeded the freights going east—a thing never witnessed before in the railroad history of the country.

INSURANCE MATTERS.

The Canadian Fire Extinguisher Co. is being organized at Montreal, to make a patent chemical extinguisher. Capital proposed $50,000. The applicants for charter are Messrs. J. S. Bousquet, O. Morin, N. J. Cote. G. H. L. Rolland, and Moses Davis.

The city council of Halifax on Monday night last voted 10 to 7 to summarily dismiss the entire fire department of Halifax. It was on account of the refusal of the Union Engine Company to obey an order of the council. New firemen have been provided to man the apparatus in case of emergency and until permanent arrangements have been made.

According to a statement just issued the Union Mutual Life Company of Maine has paid this year to policy-holders in Canada $36,170.69, the deaths being seventeen in number. There were six in Ontario, to whose heirs were paid $9,959.60; five in Quebec, whose estates received $8,207.49; five in New Brunswick, representing $12,698.33; and one in Prince Edward Island, that of the late Jed. Carvell, Esq., whose representatives received $5,305.27.

Receiver Failey, of Indianapolis, has in hand the affairs of the defunct Iron Hall, that glittering "get rich quick" swindle. He has handled something more than $1,600,000 since he began operations, has paid himself, helpers, and lawyers $34,000, and has on hand for distribution $742,000. This he will pay out rapidly, as receiverships go, when he can find who to pay it to. There were assets of $408,000 in the hands of branch organizations, which the receiver never obtained, and he tells the court that he believes nothing can be realized from them. Money is easily got and easily parted with in the United States—and Canada.

The average man needs the protection which life insurance affords for a period which terminates on the borders of old age. In most cases when that point is reached children are able to take care of themselves, and can take care of their mother if need be. Hence it is that either a term life policy or an endowment is the best form of insurance to select. If the means of the applicant are limited and it is desired to secure the largest amount of protection for each dollar paid, the former is the plan to select. If it is possible to lay up something from year to year there is no better form of investment than the endowment insurance policy.—*United States Review*.

CASH DRY GOODS' STORES.

Among the commercial features of Paris in late years are the great cash dry goods' stores, an account of which is given in a recent issue of the *Revue des Deux Mondes*. These stores, it appears, were for the most part founded by shop assistants or cashiers, and they are conducted on much the same lines, namely, strict cash, prices marked on all goods in plain figures, enterprise and novel ideas in the way of advertising. The employees of such shops are paid by commission on sales, and have a share in the profits. The Bon Marche, which was started in 1852 by a store clerk, had a turn-over last year of $26,000,000, and made a profit of 5 per cent. The Magazin du Louvre was also begun in a small way by a penniless clerk, now one of the richest men in Paris. The first year's profits only amounted to $300, to be divided among three partners. Now the profits are over $1,600,000 on a yearly turnover amounting to $24,000,000. Stores of a very similar kind have been founded in England and meet with great success. It remains to be seen whether like ventures launched on a great scale on this side the Atlantic will have a like result.

WHAT TO DO IN CASE OF ELECTRIC ACCIDENTS.

The extension of the trolley is now so great and the uses of electricity developing to such a degree, that it is desirable that people should be informed what is the first and wisest thing to be done when a man has been stunned by contact with a strong electric current. We therefore reprint some rules as to the first aid to be rendered in cases of electrical accidents. They are supplied by Dr. W. S. Hedley in a letter to the London *Lancet*:

(1) Break the circuit at once if there be an interrupter close at hand and you know how to use it; if not, lose no time, but proceed to Rule 2.

(2) Do not touch the man's body with your bare hands, but if india rubber gloves are not at hand, pull him off the cable by his coat tail, or fold your coat or some such dry article into two or three thicknesses, and, using this as a pad to take hold of the body, pull it away from the circuit and resort to Rule 5.

(3) If unable to get him off, raise with covered hands that part of the body which is touching the earth, or one of the poles of the circuit. This will break the circuit, and it will usually be thus possible to get him easily away, and, if so, proceed to Rule 5.

(4) If still unsuccessful, make another pad, and, placing it between the ground and that part of the body in contact with the ground, continue your efforts to detach him.

(5) Having pulled him away from the cable, free his neck from clothing, and treat the case as one of drowning, one method being as follows :

(6) Open his mouth, and, taking hold of the front part of the tongue with your fingers—covered with a handkerchief if you have one—draw the tongue forward, and gradually let it go back 16 times a minute. Be sure that the root of the tongue is acted upon and drawn forward. If the teeth are clinched and you cannot get them apart with your fingers, gently separate them with the handle of a pocket-knife or by a small piece of wood, cork, etc.

(7) Resist the efforts of the bystanders to pour stimulants down his throat until a medical man arrives and "takes over" the case.

AN ALUMINUM BOAT.

A boat weighing only ten tons with steam up and coal in the bunkers, but capable of developing 20½ knots speed under 300 horse power, is a remarkable example of progress in naval architecture. Such a boat is the aluminum torpedo vessel, just completed by Messrs. Yarrow & Co., the famous British builders of torpedo vessels on the Tyne, for the French Government. The boat is 60 feet long and 9 feet 8 inches wide, and is the largest aluminum boat of any kind afloat. Her machinery consists of a set of triple expansion engines, driving an aluminum bronze propeller at 580 to 600 revolutions per minute. The boiler is of the ordinary Yarrow water-tube type.

The object of such a torpedo boat is to be carried on the deck of large men-of-war, to be lowered in the water and to act as a scout to watch the movements of the enemy's torpedo boats, or for the use of the ship for landing and embarking officers. Lightness is, therefore, much to be desired, while light draft favors increased speed. The French Government asked for tenders from both French and English builders, and Messrs. Yarrow & Hedley were the successful tenderers in this case, partly because they used aluminum, with which they had been experimenting. It was found necessary to alloy the metal, by which the tensile strength was raised from 9 tons per square inch to about 18 tons. The alloy is mainly six per cent. of copper. As regards stiffness, etc., a general result was arrived at. All scantlings were increased 25 per cent. over that allowed for steel, and as aluminum weighs about one-third of steel, it follows that a reduction of about one-half was effected in the weight of the hull, which was reduced from about four tons for steel to about two tons for aluminum.

The great foes of aluminum are alkalies, which attack it powerfully, and heat. It fuses at a moderate heat, and loses much of its strength at comparatively low temperatures. In the case of a torpedo boat there is no trouble incurred in avoiding both sources of risk. No plates or angles were touched by the fire; everything was bent cold. The frames are a little closer together than they would be if of steel. The stem and stern frames are of galvanized steel, though the outer casing to it is of aluminum. The extra cost of material in the use of this particular boat was $5,000 as compared with that of steel. In return there is a saving of about two tons in weight and a gain of about 3½ knots in speed over vessels of the same class and dimensions in the British navy which steam under the like conditions at 17 knots.

A WESTERN MUSEUM.

A new Government museum is to be started at Banff, N.W.T. For some time past the Dominion Government have been contemplating this move, with the object of illustrating the mineralogy and natural history of the Rocky Mountains. The director of the geological survey has been instructed to prepare a complete exhibit for the museum Professor Macoun has prepared an exhibit of all the birds and plants of the mountains and prairies. The Winnipeg *Free Press* says two hundred specimens of birds, and one thousand of plants will be shipped in a few days, also a large collection of minerals and specimens of forest trees. The cases for the minerals and birds have been made there, and the specimens will all be assorted before shipment. It is understood that the museum will be under the control of the superintendent of the Government park at Banff.

OTTAWA TO THE FRONT.

The report of the assessors in Ottawa has just been completed, and the result of their labors for the year shows a satisfactory addition to the value of property in the city during the year and a very considerable increase in the population. The total assessment for next year is $19,775,145, while the total assessment for 1894 was $19,400,735, showing an increase of $374,410 in the total value of assessable property. This was entirely in real estate. Or rather, the increase in real estate was greater than this, being $393,685 but there was a decrease in personal property assessment of $19,275

It does not appear that this growth in the value of the property was occasioned by a boom or by a general increase of the value of the real estate It mostly arises from the new buildings that have gone up during the year The greatest increases were in Central Wellington and St George's wards, where a great many buildings were erected Victoria ward showed a decrease The population of the city in 1893 was 45,135, this year it is 47,775, showing a growth of not far from six per cent.

CLEARING-HOUSE RETURNS

The following are the figures of the Canadian clearing-houses for the week ended with Thursday, Nov 1st, compared with those of the previous week:

Clearings.	Nov 1.	Oct. 25
Montreal	$10,180,286	$12,966,646
Toronto	5,117,886	5,405,047
Halifax	1,043,426	1,206,572
Winnipeg	1,483,150	1,477,891
Hamilton*	.....	686,575
Total	$17,824,748	$21,838,831

Aggregate balances this week, $2,270,149, last week, $4,209,473

* Hamilton returns not received.

—Respecting the story about amalgamation of the Canada North-West Land Company with the Canada Pacific Railway Company, which has been harped upon in different versions by several journals, we are told upon enquiry in Toronto that the only foundation for the story is the fact that it has been proposed, as a means of reducing expenses, to have the land business of the N. W. Land Company in Winnipeg done at the C.P.R. offices in that city. This is a very different story from the amalgamation of the two concerns. The land company is interested in a great area of farm lands and in many town sites between Brandon and the Rocky Mountains. It will be a great service to it to have the extensive advertising the C.P.R. can give these lands.

—Issues of capital in the shape of new loans and new companies in England, while larger this year than last, are still limited in comparison with years preceding 1893. For instance, according to the compilation of the London *Economist*, the new issues of the current year have amounted to £51,872,808, against £39,791,000 up to 20th October last year. A list will show the issues of former years

Total subscribed to date in—		Total subscribed for whole year—	
1894	£ 51,372,808	1893	£ 49 141 188
1893	39,791,501	1892	81,137,100
1892	72,216,638	1891	104 594 977
1891	96,844,841	1890	142,565,010
1890	135 905,583	1889	189 430 000

—On Friday last the anthracite coal producers of the United States met in New York. Their chief trouble has been that the domestic and industrial demand has suffered from the depression of business that some of the companies have exceeded their alloted output; and that the consequent excess of supply has driven some members of the combination to make cuts in prices ranging up to 70 cents per ton discount from the official schedule. After much serious deliberation, the meeting concluded that the proper remedy was to abolish all limitations upon production, and to advance prices 15 to 20 cents per ton over the existing quotations. This, says the New York *Journal and Bulletin*, of course, means cheaper coal.

—A meeting of the Truro Board of Trade was held last week. An important feature of the meeting was an agreement to have a committee of the board confer with the town council respecting the amending of the assessment system. It was resolved to secure the repeal of the legislation of 1892, which fixes the Provincial Exhibition in Halifax permanently, and a committee will endeavor to secure co-operation of other towns and counties to that end. This committee will also report with reference to holding a Provincial Exhibition, or at least a Centre Fair in Truro next year.

The general tenor of advices from iron and steel selling centres up to last week is that October business is not up to the pace set by August and September President Roberts' statement that the material account of the Pennsylvania railroad is less to-day by 50 per cent. than it was one year ago illustrates the extreme feebleness of the railroad buying movement, in spite of the signs here and there that it is better than that of three or four months ago.

HAMILTON DEBENTURES.

THE BEST SALE YET.

The finance committee met last evening to open tenders for the sale of $210,000 of instalment debentures, payable in twenty years at 4 per cent. Seven tenders were received, and one, from O'Hara & Co., of Toronto, arrived too late, and was returned unopened. Tenders were accepted for $110,000 of the amount, in addition to the $10,000 previously disposed of. The remaining $90,000 will also be sold if one of the tendering firms who quoted figures for the whole is satisfied to take that portion of the issue.

The accepted tenders were: Alexander, Ferguson & Blaikie, Toronto, $10,000, at 99½.

Geo. H. Gillespie, $50,000, at 99¼.

R. S. Morris, Hamilton, $50,000, at 99.19.

The other tenders are: Hanson Bros. for the whole issue, a fraction over 99; Bank of British North America, for a customer, for $45,000, at 99; Wood & Son, Toronto, for the whole issue, at 98.75⅛; A. E. Jarvis, Toronto, for whole issue, at 98.26. Hanson Bros. will be allowed the option of taking the balance, $90,000, at the price quoted for the whole.

The sale is looked upon as the best ever made by the city. It will make from $300 to $400 by the sale. Chairman Colquhoun thinks no more instalment debentures should be sold, as the purchasers prefer the sinking fund debentures and will pay more for them.

The members of the committee present were: Aldermen Colquhoun, Milne, Witton, Reid and Morris.

Alexander, Ferguson & Blaikie is the firm who got the previous $10,000. —*Hamilton Spectator.*

THE GRAND TRUNK RAILWAY.

The paralysis of business that ensued from the silver policy in the United States, the tariff wrangle that delayed recovery from this paralysis, the coal strike, the Pullman troubles, and the Debs railway strike—all these are cited by the Grand Trunk Railway directors to account for the discouraging traffic showing that company makes in the June half year. And truly these were hard conditions for any railway in America to make head against during that disastrous period. But while the through freight (from Chicago to the seaboard and *vice versa*) was lessened by 23,000,000 ton-miles, the local freight in Canada, which pays better, was lessened by three times as much, viz., 73,000,000 ton-miles. There was business depression in Canada too, without doubt. Here are the receipts, compared with the same half of the previous year:

	Half Year, June, '94.	Half Year, June, '93.
Gross receipts	£1,695,874	£1,890,119
Working expenses.....	1,226,374	1,370,687
Net receipts	£ 469,500	£ 519,432

The following particulars are given by the board as to the business of the six months: Adding income from the International Bridge Company, and deducting pre-preference charges, the net revenue balance on the working of the half-year was £54. There was a decrease of 330,013, or 11·28 per cent., in the number of passengers carried in the half-year, compared with the half year of 1893, with a decrease of receipts from passengers of £66,421, or 11·77 per cent. Mail carriage and express parcels also brought in less money. The curious fact comes out that as regards through American freight there was an actual increase east bound to the extent of 3,000,000 ton-miles, while there was a decrease west bound of no less than 26,000,000 ton-miles. Naturally enough, such a result, entailing so much hauling of empty through cars westward, had a material adverse effect on working expenses.

A decrease is shown in the freight and live stock traffic of the six months compared with the previous June half year of 483,503 tons, or 11.03 per cent., while the decrease in the money received was 10.10 per cent. The reduction in working expenses more than kept pace with the decline in gross receipts, so that the management has nothing to reproach itself with in this respect, while the average rate of freight per ton per mile, in both periods, was .66 of a cent, the lowest the Grand Trunk has ever experienced, though not as low as on some American railways. In 1888 the road earned .78 of a cent on freight; in 1890, .75 and 1891 only .71; the difference of rate between 1894 and the previous five years' average represents a loss of £172,000 on the tonnage of 1894.

Seeing that the annual consumption by the Grand Trunk of bituminous coal imported from the United States amounts to 605,000 tons, the removal of duty on soft coal coming into Canada, 60 cents per ton, would improve the annual balance sheet of the railway to the extent of $363,000. There is no wonder therefore that we find the report dwelling upon "the urgent necessity for relief" from this impost when Parliament next meets.

The total amount charged to capital during the half-year was £37,661, of which £16,888 was on account of the Union Station at Toronto, and the balance chiefly for new sidings, works, buildings and land required for the accommodation of traffic.

A further reason for decreased receipts is found in the reduced volume of immigration, which is stated to be 70 per cent. less than in 1893. And low rates for grain aggravated the situation. In consequence of all the troubles a reduction of expenses was begun. Shops were temporarily closed, the train service was curtailed and expenses cut down everywhere possible, "to carry us over to the better times so long in coming."

ASSESSMENT INSURANCE.

Of decided interest to members of fraternal societies everywhere was a case which came up yesterday before the Master in Ordinary at Osgoode Hall. The case has been enlarged until October 29th, and on that day will be decided the important point as to whether members of fraternal societies, who have been suspended otherwise than by paying up their dues and assessments, and receiving a withdrawal from the association, are liable to be put on the list of conributors to pay liabilities that were incurred from the time of their suspension, according to the constitution, by non-conformance thereto in the way of payment of assessments, until the time of liquidation. Should the decision be that these suspended members are liable, a revolution of the most pronounced character will have been effected in the conditions under which fraternal societies exist and work

The Canadian Relief Society, a defunct sick benefit branch of the A.O.U.W., is the society in relation to whose affairs the claim is made that members who have dropped out without regularly withdrawing are liable to become contributors. On June 19 last the society went into liquidation, Mr. C. E. Bonnick, of Toronto, being appointed liquidator. Mr. J. J. Patterson was a member of the society, and continued a paid-up member until October, 1893, when he dropped out Mr. Bonnick has entered suit against him for $12.50, the amount which he would have paid in dues had he continued a member. The preliminary steps in the case were taken, Mr. E. J. B. Duncan appearing for the plaintiff, Captain D. M. Robertson, who is solicitor for the Canadian Fraternal Association, for J. J. Patterson, and Mr. W. H. Irving for certain other suspended members who would also be rendered liable if judgment were entered for the plaintiff. The case was not ready, it being necessary for the plaintiff to prove the status of the company, to show that it had power to make assessments and hold its members liable. One point on which the defence relies is that were a suspended member to die his heirs would not receive any insurance, while if this case goes for the plaintiff a suspended member would be liable for his contribution while unable to benefit by it. The result of the case will be awaited with much interest by persons interested in these societies. —*Globe.*

EARLY STRUGGLES OF A POPULAR AUTHOR.

Robert Buchanan's account in *The Idler* of his early struggles with poverty when he began to woo the muses is of pathetic interest. He arrived in London from Scotland with only a half-crown in his pocket and lived in a garret while engaged in a disheartening struggle to make both ends meet. Sometimes for a fortnight together he had no dinner, and his most relished meals were composed solely of coffee and muffins saturated with butter—diet "worthy of the gods," as he thought then. This feast over, and feeling "full-fed, glowing, oleaginous," he wandered about the streets smoking a pipe of cheap tobacco for dessert.

Our New Address

We have removed our Wholesale and Retail Showrooms from 6 King Street West to

950 Yonge Street

adjoining our Factory premises, where we will carry as complete a stock as heretofore—15 minutes by cars from King street.

M. Staunton & Co., Manufacturers of

Wall Paper

944 and 950 Yonge St.

Banking Office in Newmarket.

Banking office in Newmarket -the late stand, with vault and fittings complete, of the **Federal Bank**; previously occupied by Consolidated Bank, and formerly by the Royal Canadian Bank. Apply to

MR. ROCHE, Barrister,
Merchants, Bank Chambers, Toronto.

In the Matter of

The Ontario Forge and Bolt Co. of Swansea, Ltd.

(Near Toronto)

In Liquidation

Tenders will be received by the undersigned at the office, No. 26 Wellington Street East, Toronto, up to twelve o'clock noon of

Tuesday, November 27th, 1894,

for the purchase, in one parcel, as a going concern—or for any of the undermentioned divisions of the assets of the above-named company.

Lot 1—The company's extensive iron works, with new foundry, cupola, travelling gear, boilers and engines just erected; twenty acres of land situated at Swansea, on the Lake Shore Road, between Parkdale and the Humber River, and 12 rough cast cottages, 2 rough-cast boarding houses, 1 brick store erected thereon, valued by the company at $104,100

Manufacturing plant, machinery plant, tools, belting, fire service, stable stock, patterns and flasks, factory and office furniture, valued by the company at 125,290

$229,390

Lot 2—The stock of manufactured goods, comprising bolts, nuts, rivets, carriage hardware, castings, etc., amounting as per inventory to 41,731

Lot 3—Iron, steel and wire, per inventory ... 11,633

Lot 4—Scrap iron, brass and copper, per inventory ... 3,874

Lot 5—41¼ acres of land lying north of the company's works and north of the prolongation west of College street, near Toronto Junction, and close to High Park.

Lot 6—80 acres of land south of above.

Lot 7—66 mortgages received in part payment for lots adjoining the above lands, sold by the company, aggregating ... 38,658

Terms of Sale—If credit is desired, those tendering must state the time required and the nature of the security they propose to give. The credit portion shall bear interest at five per cent. per annum. One-fourth of the purchase money, less the deposit, must be paid in cash within thirty days from acceptance of tender. A marked cheque for five per cent. of the purchase money, payable to the order of the liquidator, must accompany each tender. These cheques will be returned at once to those whose tenders are not accepted. Conditions of sale and forms of tender may be had on application to the undersigned. Plans of the properties and inventories of the other assets, with list of mortgages and full particulars in regard to same, with permits to inspect the works and other assets, on application to the undersigned.

E. R. C. CLARKSON, Liquidator.

SMITH, RAE & GREER, Solicitors for Liquidator.

Toronto, 17th October, 1894.

WHAT BRITONS PAY FOR SPORT

The announcement that the Duke of Sutherland hopes to let Dunrobin and the shooting that appertains to the castle at a rent of £7,000 for the season—reminds the London correspondent of *The Manchester Guardian* of other cases where large sums have been paid for a season's shooting. Sir A. Borthwick has paid £4,500 at Invercauld, Lord Wimborne £4,500 at Achnaschellach, Lord Burton £3,000 at Glenquoich, the Bradley-Martins £2,700 at Balmacaan, and Sir Charles Mordaunt £2,500 at Glenfeshie. The rent of Blackmount is £4,000, of Glenmuck and Bachnagairn £3,000. It was considered a tolerably high price when Baron Hirsch paid Lord Washington £4,000 for five weeks' tenancy of Merton hall, with its shootings.—*Westminster Gazette.*

—Mons. Girardot, Mayor of Sandwich, in the county of Essex, has manufactured so far this season 50,000 gallons of wine, and is by no means through, as he received from Pelee Island last Friday 30 tons of grapes to make into wine.

Collingwood Debentures.

Tenders are invited for the purchase of $7,000 Debentures of the Town of Collingwood, issued as follows:

Firstly $2,000 under authority of 47 Vic., Cap. 49, Ontario Statutes, repayable December 1, 1913.

Secondly—$5,000 under 54 Vic., Cap. 65, Ontario Statutes, repayable December 1, 1916.

All to bear date December 1, 1894; interest at 5 per cent., payable half-yearly on 1st June and December, at Bank of Toronto, Collingwood. Successful tenderer to pay at par here, and cost of forwarding debentures.

Tenders will be received up to November 14, 1894. Whole to be issued in seven Debentures of $1,000 each. Tenders to be sent to

A. D. KNIGHT,
Town Treasurer.

Collingwood, Oct. 13, 1894.

—It was characteristic of the late Lord Coleridge that he always had the right word for everything. There was a story current at Oxford illustrating this readiness. At college it was his duty as a Fellow to read the Lessons in chapel, and one day he read by mistake the second Lesson where he should have read the first. To conclude it in the orthodox way was hardly correct, as it was not the second Lesson, but the first. Nor could it well be described as the first Lesson, as properly it was the second. A moment's hesitation supplied him with the appropriate word: "Here endeth the wrong Lesson."

The Engineering Magazine has added an editorial department that ought to bring increased favor. For a long time it has given an index to leading articles published in technical and trade journals. Much more valuable, however, is the review of leading articles in the industrial and technical press which began with the October issue. With the success achieved by the *Review of Reviews* in the field of current events and general literature to encourage them, the publishers have undertaken to perform a like function in industrial and technical journalism.

—An exchange says: "If one man starts to pay his debts it puts a row of men a half mile long in motion, each one starting to pay his. It may be that you are the man in the row that has stopped the motion. If you owe one, pay him."

Over 13,000,000 Feet of Land for Sale

Situated in Hochelaga Ward, Beginning at Frontenac Street

This property is well located for factories, the Canadian Pacific runs through its centre and sidings may be built to any part of it. Easy of access by electric cars.

I have received this week a somewhat amusing letter from a correspondent who wishes to apply an electric current to the purification of well water from iron contamination. His chief objection to the use of this water is that it turns whiskey black. It seems to me that he has by no means proved that the water is at fault, and, although I am not a chemist, I would suggest to him to look to his whiskey as well as his water. Blackening by iron salts is usually due to sulphuretted hydrogen or tannin, and it must be a poor sort of whiskey that contains either of these ingredients.—*London Lightning.*

MONTREAL MARKETS.

MONTREAL, Oct. 31st, 1894.

ASHES.—There have been some very fair lots—considering the present state of the trade—to hand within the last few days, including 64 brls. from the Perth district in Ontario. The "Laurentian" steamship took out about 50 brls. at the end of last week, but stocks in store are a little increased. First quality pots are quoted at $4.35, seconds $3.90 to $4, according to tare. Pearls nominal at about $6.20 per cental.

CEMENTS AND FIREBRICKS.—Trading in cements is of quite a moderate character, and sales from wharf are made at a range of $1.95 to 2.05 for English, and $1.90 to 1.95 for Belgian. There are still some 15,000 brls. to come forward before the close of navigation, but a good portion of this is to order for works on the Soulanges canal. Scotch bricks are still very scarce, and English brands range from $17.50 to $20.00.

DAIRY PRODUCTS.—Trading in cheese has not been active since last writing, and shipments have eased off under the influence of a weaker market in England. The shipments to the end of last week were 1,439,556, as against 1,430,842 for the same period last year, showing that the large excess of earlier in the season has been mostly lost. Local prices are again easier. We quote: Finest Ontario, 10½c.; Townships, 10⅛c.; Eastern, 9⅞c. per lb. In butter there is no export trade at all, and spot business is moderate. We quote: Creamery, 18 to 20½c.; Townships dairy, 18 to 19c.; western, 16 to 17½c per lb. For eggs there is good demand at 13 to 14c. for packed; boiling stock, 15 to 17c. per dozen.

MONTREAL GRAIN STOCKS IN STORE.

	Oct. 27, '94.	Oct. 28, '93
Wheat, bushels	695,036	647,391
Barley, "	2,443	47,786
Corn, "	....	1,582
Peas, "	70,899	247,207

Rye, "	2,936	43,288
Buckwheat, "	18,180	200
Total bushels	876,447	1,095,020

There is no flour in store at present in Montreal; the stock at like date last year was 39,391 barrels. The quantity of oatmeal held here at present is only 297 barrels, whereas last year at this time there was 1,270 barrels.

DRY GOODS.—Under the influence of the fine bright summer-like weather sorting business is found somewhat on the slow side. City retail trade is not in satisfactory shape as a whole; collections thus far this fall have been poor, and failures have been much more numerous than usual at the season. The North-West has braced up a little, and some very fair remittances have been received from that quarter during the last few weeks. In values we hear of nothing fresh.

GROCERIES.—The distribution of goods in this line has become again somewhat restricted, and there is not the activity present that marked September. Sugars are not so active, and more competition between refiners is evident. It is said that lower province refiners have been shipping west at cut prices, and, locally, values are easier, granulated being sold at factory at 4⅛c. per lb. in fair lots; yellows 3⅞ to 3¾c., with some difficulty in getting supplies of lower grades. Mr. Alex. Wills, the broker representing some German refiners, reports sales to date of 2,250 bags of granulated, some of which will be forward about the end of this week, at a cost laid down of about 3¾c. Molasses and syrups are unchanged. Coffees are moving off in moderate lots; Maracaibo is notably firmer, and Rios were reported advanced 25 points the end of last week, owing to reports of poor crop. In teas, while there is a lessened country distribution, the demand from jobbers is fairly maintained, and from American points there is still considerable enquiry for Japans. We hear of several car lots being picked up for Chicago. There being some reports current of an

TORONTO, Ont.

easier market the representative of a Japan house cabled yesterday as to the state of the market there and received a reply to the effect that prices were very firm at the advance under very small visible supplies. Ceylons are cabled as advanced a penny. New Valencia raisins are quoted at 4½c. for off-stalk fine 5c., selected 5½ to 5¾c., fine cream layers 6 to 6½c. per lb. An increasing trade is being done in California loose muscatels, 2-crown are quoted at 5½c., 3-crown 6½c. and 4-crown 7c. New currants, Provinces 4½c., Patras 4½ to 5c. per lb. in bbls. in case 5 to 6½c. New French prunes are in the market at 14c. for 120's, ranging to 7c. for 80's. Figs, fine to superior 12½ to 16c. Canned goods are receiving little attention, and the packers are being allowed to carry stocks. The combination report an intended advance Nov. 1st.

HIDES AND TALLOW.—Dealers are buying light hides at 4 to 4¼c. per lb. for No. 1, and steers at 5 to 5½c., and sales of cured are reported to tanners at 5 and 6c per lb. respectively, though some tanners are refusing to pay more than 4¾c. for No. 1 light. Lambskins are steady at 55 to 60c. Tallow dull at 3½c. for unrendered, and 5 to 5½c. per lb. for rendered.

LEATHER.—Of leather there is very little selling, and every indication points to a very quiet November. There is, however, no great surplus of stock in any line just now, and prices remain fairly steady. No advices of any interest have recently been received from England, sole goes forward steadily but very little black leather. We quote:—Spanish sole, B. A. No 1, 18 to 20c.; do. No. 2 to B. A., 17 to 18c.; No. 1 ordinary Spanish, 17 to 18c.; No. 2, 16 to 17c.; No. 1 slaughter, 18 to 20c.; No. 2 do., 17 to 18c.; American oak sole 39 to 43c. waxed upper, light and medium, 24 to 26c.; do. heavy, 20 to 24c.; grained 24 to 26c.; Scotch grained, 25 to 27c.; splits, large, 13 to 16c.; do. small, 11 to 12½c.; calf-splits, 27 to 30c.; calfskins (35 to 40 lbs.), 50 to 60c.; imitation French calfskins, 60 to 70c.; colored calf, American, 23 to 27c.; Canadian, 19 to 21c.; colored pebble cow, 12½ to 13½c.; russet sheepskin linings, 30 to 40c.; harness, 18 to 23c.; buffed cow, 9 to 11c.; extra heavy buff, 12½c.; pebbled cow, 8 to 12c.; polished buff, 9 to 11c.; glove grain, 9 to 10c.; rough, 16 to 17c.; russet and bridle, 40 to 50c.

METALS AND HARDWARE.—There has been no activity to note in these lines since last writing. Pig iron has shown little movement beyond some car lots of Siemens No. 1 at $17.25, a 100 ton lot of railway cast scrap sold the other day at $14.50. The only Scotch iron here is Summerlee at $21 and Carnbroe at $18.50. Tin and Canada plates are unchanged; black sheets No. 28 has sold at $2.25 to $2.30. Copper has been offered at 9½c. in fair lots, tin and lead as before, antimony also stationary. Spelter is weaker, and Silesian is reported at $3.90 to $4.25 as to lot. American $4 to $4.25. Sheet zinc is easier at $4.50 to $4.75 and some large transactions are reported to have been made below the inside figure. We quote:—Coltness pig iron, none here; Calder, No 1, none here; Calder No. 3, none here; Summerlee, $21.00; Eglinton, $18.50; Gartsherrie, none here; Langloan, none here; Carnbroe, $18.50 to 19.00; Shotts, none here; Middlesboro, No. 3, $17; Niagara No. 2, $18.50 to 19.00; Siemens, pig, No. 1, $16.50 to $17.25; Ferrona, No. 1, $16.50 to 17.00; machinery scrap, $15.00; common do., $12.00; bar iron, Canadian, $1.65; British, $3.25; best refined, $2.40; Low Moor, $3.10; Canada plates—Blaina, or Garth, $2.05 to 2.10; all polished Canadas, $2.75; Terne roofing plate, 20 x 28, $5.75 to $6.00. Black sheet iron, No. 28, $2.15 to 2.30; No. 26 $2.15 to 2.30; No. 24 $2.10; tinplates—Bradley charcoal $3.25 to $3.50; charcoal I.C. $3.50; P.D. Crown $3.75 to 4.00; do. I.X. $4.75 to 5.00; Coke I.C. $2.75 to 2.90; coke wasters, $2.75; galvanized sheets, No. 28, ordinary brands, 4½ to 4¾c.; No. 26, 4; No. 24, 3¾c. in case lots. Morewood 5½ to 6c.; tinned sheets, coke, No. 24, 6 to 6¼c.; No. 26, 6¼ to 6½c., the usual extra for large sizes. Hoops and bands, per 100 lbs. $2.25 to 2.30. Steel boiler plate ¼ inch and upwards $2.00 to 2.10 for Dalzell and equal. American steel plates, $1.90 to $2; do. three-sixteenths inch, $2.70; common tank iron, $1.65 to 1.75; tank steel, $1.80; heads, $2.85. Russian sheet iron, 10 to 10½c. head, per 100 lbs.; pig, $2.75 to 2.80; sheet, $4.00 to $4.25; sheet, $6.00 to 6.50. Best cast steel, 10½ to 12c.; spring, $2.50 to 2.75; tire, $2.50 to 2.75; sleigh shoe, $2.40; round machinery steel, $3; Lake tin, 17½ to 18½c.; bar tin, 25c.; ingot copper, 9½ to

11c.; sheet zinc, $4.50 to 4.75; Silesian spelter, $3.90 to 4; American do., $4 to 4.25. Antimony 10½ to 12c.; bright iron wires, Nos. 0 to 8, $2 65 per 100 lbs.; annealed do, $2.70; galvanized, $3.35; the trade discount on wire is 20 per cent. Barb and twisted wire and staples, 3½c. Coil chain, ¼ inch, 5c.; ⅜ inch, 4½c.; 7-16 in.. 4½c.; ½ in., 3¾ to 4c.; ⅝ in., ½c.; ¾ in., 3¼c., ⅞ in., and upwards.

Oils, Paints and Glass.—Business in all these lines rules fairly active, and is expected to continue so until the close of navigation. Linseed oil rules very firm at quotations, and is expected to show further advance in England, where there is a scarcity of seed, due to the buying up of 50,000 tons of seed by an American speculator, said to be Phil. Armour. A marked advance in raw oil is reported in the United States. Other lines are unchanged. We quote: Turpentine, 43c. per gallon for single barrels; two to four barrels, 42c. Linseed oil, raw, 57c. per gallon; boiled, 60c.; 5-barrel lots, 1c. less; olive oil, machinery, 90c.; castor, in lots, 6½c.; single cases, 6½ to 6¾c.; tins, 7c.; Nfld. cod, 38 to 40c. per gal.; Gaspe oil, 38c. per gal.; steam refined seal, 38 to 40c., in small lots. Leads (chemically pure and first-class brands only), $4.50 to 5.00; No. 1, $4.50; No. 2, $4.25; No. 3, $4.00; dry white lead, 5c; genuine red do., 4½c.; No. 1 red lead, 4c.; putty, 2c. in bladders per brl.; London washed whiting, 40 to 45c.; Paris white, 90c.; Venetian red, $1.50 to 1.75; yellow ochre, $1.50 to 1.75; spruce ochre, $2.25 to 2.50; window glass, $1.20 per 50 feet for first break; $1.30 for second break; third break, $2.80.

Wool.—The market is very quiet at the moment, and transactions have been few since last reports. Stocks of foreign wool on spot are extremely light. Cape is quoted at 13½ to 16c. per lb., though there is one lot of extra fine for which 17½c. is asked; B.A. scoured, 26 to 33c.; domestic fleece, 17 to 20c.; pulled supers, 20 to 21½c.; extra, 23 to 26c. per lb.

TORONTO MARKETS.

Toronto, Nov. 1st, 1894.

Drugs.—A fair amount of activity has characterized the week's trade, but, as one merchant puts it, "there is nothing to boast about in drugs." Payments are a little slow. Values tend upwards rather than down. Cables concerning opium indicate strength in primary markets, as the result of continued drouth; the feeling on the local market is, in consequence, one of strength. Morphine is reported advancing abroad, as are codeine, verona, orris root, and cuttle bone. Turkey gum tragacanth is stronger in Constantinople. Oil peppermint is easier here. Quinine remains unchanged.

Dry Goods.—For the retailer the all-important consideration is the weather. A cold spirt is needed to put trade on a firm footing. With the wholesale merchant trade is between seasons, and the actual movement of goods in consequence rather limited. Spring samples of prints are now complete, as are samples of woolen goods. Samples of carpets are coming to hand. Tapestries and Brussels are no higher in price than they were a year ago, while ingrains and hemps are decidedly lower. Linens are a little easier, and prices a shade lower. Dress goods for the spring trade are attracting a good deal of attention.

Grain.—Wheat is in good, steady demand for local milling purposes, but otherwise it is quiet. Receipts at Ontario points are not very liberal, and farmers appear to be holding for higher prices, or, possibly, the rumor is correct that they are feeding wheat to stock. The Liverpool *Corn Trade News* estimated European wheat crops in the present and the preceding year at 1,420 million bushels, those of 1892 at 1,367 millions, and those of 1891 at 1,205 millions; with North American crops this year at 585 millions; last year at 530 millions; in 1892 at 614 millions, and in 1891 at 752 millions. Oats are steady, and farmers are delivering stocks very freely. Barley is a little weaker; some small lots are moving to the United States. Local brewers are not making any heavy demands upon stocks, and are evidently using up their old malt. Rye is lower at 47 to 48c. Buckwheat has declined in price and stands at 38c.

VISIBLE SUPPLY OF GRAIN.

The visible supply of grain in the United States and Canada, according to the computation of the secretary of the Chicago Board of Trade, is as follows, with comparisons :

	Oct. 27, 1894. Bush.	Oct. 28, 1893. Bush.	Oct. 29, 1892. Bush.
Wheat	78,190,000	69,327,000	61,649,000
Corn	2,759,000	9,174,000	13,290,000
Oats	9,223,000	5,273,000	8,464,000
Barley	3,509,000	2,710,000	2,075,000
Rye	435,000	522,000	522,000

The stocks of grain in store at Port Arthur on Oct. 20th were 1,419,658 bushels. During the week there were received 808,711 bushels, and shipped 816,172 bushels, leaving in store on Oct. 27th, 1,412,197.

GROCERIES.—Neither the retail nor wholesale trades report activity. Valencia raisins are in abundant supply, and with the prospect of further arrivals within a couple of weeks time the feeling is slightly easy. There is a fair enquiry for currants, and prices are without quotable change. Sugars are dull and jobbers are reported to be shading prices on granulated. Canned goods present no new features. Salmon is fairly active, while in vegetables the situation remains without change.

HIDES AND SKINS.—Hides are without perceptible change since last week. The Chicago market remains weak, and the feeling here is easy. Private advices received here indicate an advance in South American hides, and the views of Spanish sole tanners are stronger. Sheepskins made the usual 5 cent advance today, Thursday, and now stand at 55 cents ; the market is slow and dull. Pelts are not worth within a dollar a dozen the price they brought two years ago. Stocks of tallow are a little scarce ; prices have almost reached an import basis ; dealers are paying 5½c. and offering at 6c.

LEATHER.—Trade this week has shown more life, and both in the movement to local houses and to Quebec has increased in volume. Some shipments of sole have been made to England, and the export enquiry is good. Advices indicate that Spanish hides are likely to go higher, and one large tanner states that he expects to buy his next cargo of hides only at an advance of 1c. a lb. In consequence, while quotations of Spanish sole are no higher, transactions are not made with the same advantage to buyers as has characterized the past several months.

PROVISIONS.—A slight improvement has been made in trade this week. Butter is easy ; receipts both on the street and at the farmers' market have been very liberal ; choice descriptions command 18c. per lb.; medium and common grades are still neglected ; some sales have been made at 12c., and more can be had at this figure. Cheese is quiet and easy. Eggs are steady at 15 cents a dozen. Some sales of evaporated apples have been made at 6½c., while dried apples remain quiet. Receipts of poultry are coming in freely and quotations stand as follows : Turkeys, 8c. ; geese, 6 to 6½c. per lb. ; chickens 35 to 40c., ducks 45c. per pair. In hog products the market is easier ; long-clear is quoted at 8 to 8¼c. ; breakfast smoked, 11½c. ; rolls, 9 to 9¼c. ; lard, 9 to 9½c. a lb. Receipts and shipments from Chicago for last week of pork were 298 and 2,082 bbls. ; of lard, 984,000 and 6,595,000 lbs. ; of meats, 2,908,000 and 12,246,000 lbs. Chicago receipts of hogs last week were 154,000 ; shipments, 38,600, or 14,000 more than estimated a week ago.

WOOL.—Transactions made in fleece wool by Toronto dealers during the week have been few and unimportant. Some large shipments, however, have been made, one dealer shipping 100,000 lbs. of fleece to the United States. This wool had been sold in July ; it consisted of both coarse and fine sorts, and we understand 17½ and 18½ cents were the prices realized. For pulled wools there is but poor enquiry, and merchants consider the outlook rather discouraging. Some considerable quantities of extra super have recently been imported from Chicago, and the local market is in consequence depressed. Some low grade foreign wools arrived this week.

Paid-up Capital .... 100,000 00 Reserve 54,720 00

Business in force over $4,000,000 00

The attention of the insuring public and live progressive agents is called to the following reasons for selecting this company:

First—It is the only Canadian company giving its policyholders the security of a four per cent. reserve; all others without exception reserving on a lower standard.

Second—The policy contract is as liberal as any issued. No restriction as to residence, travel or occupation, and incontestable after one year.

Third—The premium rates are low and the cost to the policyholder is certain to be less than in any other company because a better rate of interest can be earned in the west than at the home of any other company.

Fourth—Every desirable plan of insurance is issued from the low priced "PAY AS YOU GO" plan to the shortest single premium endowment.

MR. CHAMBERLAIN'S PROGRAMME OF SOCIAL REFORM.

However tempting may be the scheme of social reform which Mr. Chamberlain sketched out to his constituents the other night, any attempt to carry it into effect would, we fear, lead to grievous disappointment. This is especially the case with the plan he suggested for enabling artisans to become the owners of their own houses by means of advances made by the State through the municipalities. As to the expediency of the State entering upon this class of business and supplanting all the building societies and other private organizations by which it is now conducted, we need not at present stop to inquire. It is quite sufficient to point out that, on his own showing, Mr. Chamberlain has very greatly overrated the advantages that would result to the working classes from such a new departure. Here is how he says the scheme would work: "I will take," he said, "an ordinary workman's house in Birmingham, which is let at a rental of 5s. 6d. a week. That would be a fairly comfortable house—a house such as a prosperous working man in fair employment would be likely to occupy. I inquired of one of the leading surveyors in Birmingham what would be the cost of such a house, and he tells me that the average market price would be £140. If the working man occupying the house were to find one-fifth of the purchase money—£28—from his own savings, and if the State were to advance him, through the municipality, the remaining four-fifths—£112—and if then he were to continue to pay the same rate as at present, he would have paid off his loan, with interest, and he would be the absolute owner of his house in ten years." And he went on to speak of the practicability of tens of thousands of working men becoming "the owners of their own dwellings, without adding in any way to their present charges."

Such is the prospect Mr. Chamberlain holds out to his constituents, but everyone who has had the smallest dealings with property must know that it is quite delusive. It is true that a payment of 5s. 6d. a week would suffice to pay off in ten years a loan of £112 with interest at 3 per cent. But the conversion of a tenant into a proprietor would immediately burden him with fresh charges. He would have to pay the rates, which previously had been charged against the landlord, and this Mr. Chamberlain admitted would cost him 1s. a week more. Further, all the expense of repairs and maintenance would have to be borne by him, and that, on property of the class, would hardly amount to much less than another shilling a week. Add to this the ground rent—for the property is assumed to be leasehold—the cost of insurance, and the loss of interest on the portion of his own capital invested in the property, and the most moderate computation of the additional charge to the workman converted from a tenant into an owner of the house, cannot be put down at less than about 2s. 6d. a week, or £6 10s. a year. Nor is this all; unless he puts past something each year as a leasehold redemption fund, he will be consuming his capital, and he will further have to take into account the risk of a loss of capital, if, owing to vicissitudes of trade or any other cause, he should be compelled to shift his place of residence. We are not contending that it would not be profitable for the workman to become an owner on these terms and under these conditions, and we are quite at one with Mr. Chamberlain as to the political advantage of having a large body of working-class property owners. What we do object to, however, and that very strongly, is any attempt to beguile the workmen into the fallacious idea that through State intervention they can be endowed with the property in their houses without any additional expense to themselves. That is a sheer illusion, and we cannot but regret that Mr. Chamberlain should seek to base a political programme upon it. He ought to know better than build on such sand.

Nor have we much, if any, faith in the realization of his favorite scheme of temperance reform. It is very easy to speak of taking the drink traffic into the hands of the State or the municipalities, and conducting it without any idea of profit and only in the public interest. That is a fine ideal. In practice, however, we fear it would be very different. Both the State and the municipalities are in chronic need of money. There are always things they want to do, and which they are only kept from doing by lack of funds. And if they had such an easily-worked source of income as the drink traffic in their hands, the temptation to work it for all it could be made to produce would, we are afraid, prove irresistible. And if it be said that, at all events, the profits which private persons now make out of the traffic would then go to the public, the obvious answer is that Mr. Chamberlain insists upon full compensation to those who are dispossessed. As to the third of Mr. Chamberlain's proposed reforms, the institution of old age pensions, we have on so many previous occasions given our reasons for believing the particular scheme he advocates to be impracticable, that we need not now trouble our readers with them again. It is enough to say that, taken as a whole, Mr. Chamberlain's programme appears to have been constructed rather to sell than to work.—*Economist.*

SYSTEM OF BUSINESS CREDITS.

A press dispatch from Chicago one day last week, brought the following news:—

"Twenty-five of the largest wholesale manufacturers of clothing in Chicago have just organized the strongest defensive association ever formed by the manufacturing interests of this city. Under an elastic set of by-laws they propose to reorganize the system of credits that has prevailed so long to protect their interests.

"There are thirty-one large establishments in Chicago where men's and youths' clothes are made. They will organize under the name of the Merchants' Association of Chicago, and will represent an invested capital of from $15,000,000 to $20,000,000 and employ from 10,000 to 15,000 tailors, butters and seamstresses. Their annual sales reach many million dollars, for the readymade clothing of the entire West and Northwest is largely supplied by these houses. Officers have been chosen for one year, and all arrangements made to make the association permanent.

"The first object of the association is said to be to prevent over-purchasing by that class of merchants which goes into bankruptcy just after laying in a large stock of goods. These dishonest failures have hit wholesale clothiers harder than any other manufacturers. The entire system of credits has been changed. Instead of each firm making credits by itself, without stopping to learn whether a customer has been buying heavily in other houses, there is now an interchange of credit news, which works so perfectly that any firm can learn from headquarters whether a shaky customer is overbuying.

"At first glance this association might seem to be formed solely in the interests of the manufacturers; but if we look at it closely it will appear to be even more in the interest of the honest retail merchant than of the wholesale house, or manufacturer. No honest merchant is able to meet the competition of the one who is described above as 'failing just after he has made large purchases.' In every such case the goods so secured are slaughtered in order to turn them into money, a shape in which the property can more conveniently be made away with. Again, if there was more system and less laxity in giving credits, and thus making possible just such failures, goods might be sold at a closer margin of profit by the wholesale merchant, and thus the retail dealer could reap a larger profit. If the wholesale merchant, or manufacturer, loses 25 per cent., or 10 per cent. of his sales through failures, these losses must be made up by charging just that much more for all goods sold. Thus the provident and the honest, the intelligent and the enterprising must pay for the wastefulness, the thieving, the ignorance and sloth of those whose business careers are marked by these traits."

AN AMATEUR PUBLISHER.

The following story by the author tells of the launching of Kipling's first ballads: My verses had the good fortune to last a little longer than some others which were more true to facts and certainly better workmanship. Men in the army, and the civil service, and the railway, wrote to me saying that the rhymes might be made into a book. Some of them had been sung to the banjoes round camp-fires, and some had run as far down coast as Rangoon and Moulmein, and up to Mandalay. A real book was out of the question, but I knew that Rukn-Din and the office plant were at my disposal at a price, if I did not use the office time. Also, I had handled in the previons year a couple of small books, of which I was part owner, and had lost nothing. So there was built a sort of a book, a lean oblong docket, wire-stitched, to imitate a D.O. Government envelope, printed on one side only, bound in brown paper, and secured with red tape. It was addressed to all heads of departments and all goyernment officials, and among a pile of papers would have deceived a clerk of twenty years' service. Of these "books" we made some hundreds, and as there was no necessity for advertising, my public being to my hand, I took reply postcards, printed the news of the birth of the book on one side, the blank order-form on the other, and posted them up and down the empire from Aden to Singapore, and from Quetta to Colombo. There was no trade discount, no reckoning twelves or thirteens, no commission, and no credit of any kind whatever. The money came back in poor but honest rupees, and was transferred from the publisher, the left-hand pocket, direct to the author, the right-hand pocket. Every copy sold in a few weeks, and the ratio of expenses to profits, as I remember it, has since prevented my injuring my health by sympathizing with publishers who talk of their risks and advertisements. The down-country papers complained of the form of the thing. The wire binding tore the pages, and the red tape tore the covers. This was not intentional, but heaven helps those who help themselves. Consequently, there arose a demand for a new edition, and this time I exchanged the pleasure of taking in money over the counter for that of seeing a real publisher's imprint on the title-page.—*Rudyard Kipling, in McClure's Magazine.*

PACIFIC COAST INSURANCE.

In reply to some enquiries made of him by the New York *Bulletin and Journal of Commerce*, Mr. W. J. Landers, manager of the Sun, Imperial and Lion on the Pacific Coast, says on the subject of rebates:

"I am perfectly well aware that agents in the so-called 'excepted cities' would be very glad to work under a uniform rate of 15 per cent. provided the rebate feature could be eliminated or very much lessened.

"As stated, the head officers of companies and the Coast managers as well should come to a better understanding on the point of making greater effort than has hitherto been the case to uncover the 'demon rebate' in order that it might be put were it belonged, i.e., as lessening the premium column instead of adding to the expense side of the business, and that agents properly reached would uncover to their principals the instances where they have allowed rebates almost invariably in order to maintain or continue the business upon their books as against rebates offered by other agents. In my opinion the Pacific Insurance Union, while succeeding in accomplishing a great deal in the way of results, has erred upon the side of electing to ignore rebates until recently, when the matter has received some attention, and also upon the side of failing to equalize rates according to localities.

"As matters now stand rates are higher in the chief towns and cities than they should be and lower in the great bulk of towns and villages, as well as upon risks not subject to the conflagration hazard, and that as a result the average profit to companies has been found in San Francisco and a few large cities, whereas the same should be more equitably distributed over the Coast as a whole, requiring as nearly as possible each class of risks and each grade of town to bear its own burden."

—The annual meeting of the Star Loan Company was held in St. Thomas recently. Mr. Donald Turner, of Southwold, was elected a director instead of Mr. A. N. C. Black, of Dutton. The annual report showed that the earnings of the year beyond the dividend declared of $13,177.09 and expenses, were $2,000. The rest account now amounts to $15,000, and the contingent account to $3,500. The loans during the year were $76,540.87, and the deposits $172,657.29.

—The ex-manager of the Brantford branch of the Bank of British North America is one of the best liked and best trusted men who were ever in that town. On Saturday evening last he was presented with a phaeton and single harness by representatives of this bank from the Atlantic to the Pacific. Among the bank officials present on the occasion were: Manager Morrison, of Hamilton; Manager Inglis, of London; Manager Cran, of Paris; Accountant Mackenzie, of London, and Accountant Chapman, of Paris.

THE prosperous condition of the Sun Life of Canada is doubtless due to its fair treatment of policyholders, its unconditional policy and prompt payment of death claims.

NOTWITHSTANDING the financial depression of the year 1893 it was the most successful in the history of this progressive company. The New Business completed is greater than that secured by any other Canadian Company in one year, and must be gratifying to policyholders and directors alike.

Substantial Increases have been made in **New Business, Total Business in Force, Income and Assets.**

WHAT IS THE 7% Guaranteed Income Bond
OF THE
North American Life Assurance Company ?

It is a contract that may be secured by the payment of 15 or 20 annual premiums, and should death occur within the period selected, the full face of the Bond becomes payable.

If living at the maturity of the Bond, the guaranteed cash value, as also the surplus, may be withdrawn, or a paid-up Bond (payable at death) taken out for its full face, and in addition a 7% Guaranteed Life Annuity secured; in which case the surplus is also payable.

Pamphlets explanatory of this admirable plan will be given on application to any of the company's agents, or to

TRADE REVIEW AND INSURANCE CHRONICLE.

Vol. XXVIII—No. 19. TORONTO, ONT., FRIDAY, NOVEMBER 9, 1894. $2 A YEAR 10c. Per Single Copy

John Macdonald & Co.

TO THE TRADE:

Cash Discount Versus Net Terms.

Filling Letter Orders A Specialty.

Orders Solicited.

DID it ever strike you that buying one hundred dollars' worth of goods net, and adding ten per cent. as your profit, gains ten dollars? While buying the same amount with five per cent. cash discount, and adding ten per cent. on the amount bought, gives you a profit of fifteen dollars. A benefit of fifty per cent. more profit by taking the five per cent. cash discount.

We give a liberal cash discount.

Our stock is now well assorted in General Dry Goods, Gents' Furnishings, Smallwares, Woollens and Carpets

DECISIONS IN COMMERCIAL LAW.

IN *re* L'HERMINIER, MOUNSEY v BUSTON.—It is held by North, J., that power to deal with the income of a fund to an unlimited extent carries with it power to deal with the capital. And therefore a power of appointing income extends to the capital which produces such income

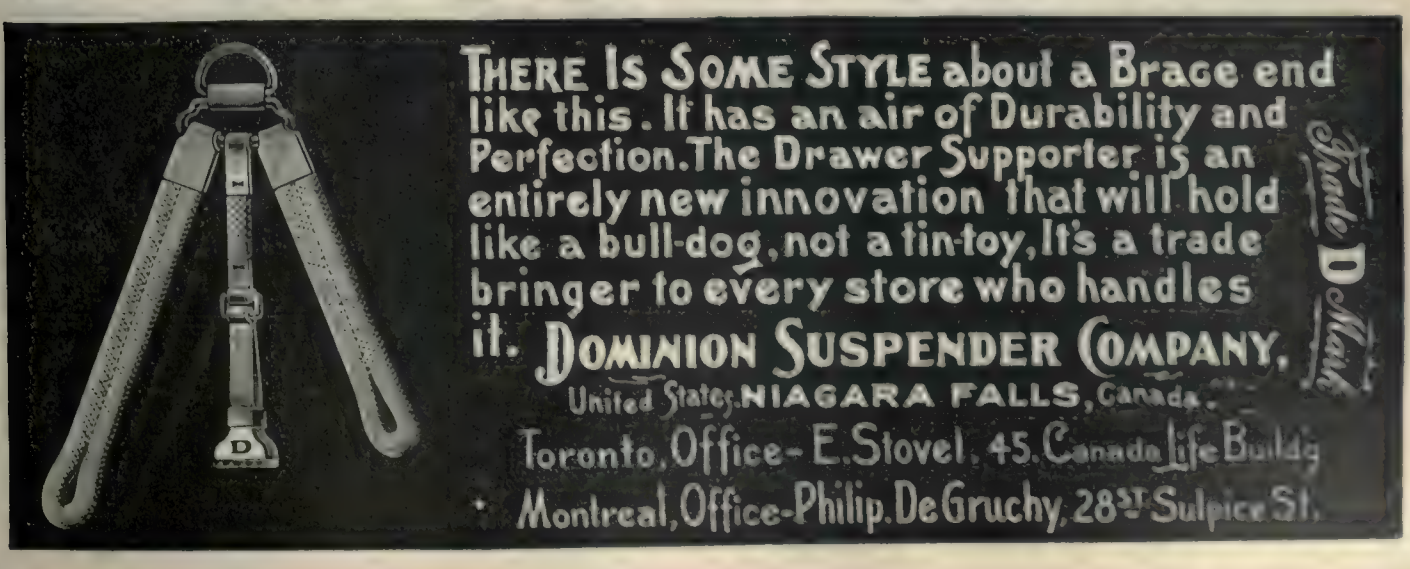
BRINSDEN v. WILLIAMS.—A solicitor who as agent for a trustee, and with full notice of the trusts, received from such trustee a cheque representing trust moneys intended for investment on a mortgage, which is an improper security, and pays such cheque into his own banking account, and next business day pays the mortgage money to the mortgagor by his own cheque for the same amount, is not liable as a constructive trustee, according to North, J., and it would seem that the case would be the same if notes were given to the solicitor instead of a cheque.

IN *re* FARBENFABRIKEN VORMALS, FREDRICH BAYER & CO.'S TRADE-MARK.—Upon the application to register the word "Somatose" as a trademark in respect of an article made from meats, and called a pharmaceutical product, its object being nourishment of the human body, the Court of Appeal of England held that "Somatose" was not an "invented word," bus that even if it was an invented word it was not a "word having no reference to the character or quality of the goods" within the meaning of the Patents Act, and consequently could not be registered.

KEITH vs. NATIONAL TELEPHONE CO.—This is an important decision to telephone companies who allow customers to retain their instruments after rent is due. A motion was made to continue an interim injunction till the trial of the action, restraining the defendants from disconnecting the wires and removing the telephone instruments, the use of which the plaintiffs had hired from the defendants for three years at a rent payable quarterly. After the term had expired the parties continued the agreement by mutual consent. The ground upon which the motion was based was that the defendants had given a notice determining the tenancy at the expiration of a quarter which expired on the 30th December, but it was proved that they had also demanded and accepted payment of rent up to and including the 31st December, being one day beyond the quarter, and it was claimed that this acceptance operated in law as a waiver of the notice determining the tenancy. The objection was taken that an injunction was not the proper remedy, as the plaintiffs were in substance, seeking specific performance of an agreement to supply them with telephone communication, but Kekewich, J., was of the opinion that the court might properly interfere by injunction to restrain the breach of the agreement on the defendants' part. He was also inclined to the opinion that there having been an overholding and an acceptance of rent after the original term of three years had expired, the relation of tenant from year to year had been acquired by the plaintiffs, and that the defendants were no longer in a position to give a notice to terminate the tenancy forthwith under the original agreement by a six months notice but, though doubting the sufficiency of the notice determining the tenancy, his decision is based on the acceptance of rent for a day beyond the 30th December, as having worked a waiver of the notice, even if it were good.

COPYRIGHT—COUNTRY OF ORIGIN

A curious point in the law of international copyright arose in Hanfstaengl v The American Tobacco Company and Others. The plaintiff was suing the company and Messrs. Allen & Ginter, the well-known cigarette makers of the United States, under the following circumstances: An artist named Andreotti, of Florence, had painted, in 1888, a picture called "The Love Letter." He sold it to a dealer in that city named Molena, and Molena in turn sold it to the plaintiff, who published photographs of it, first in Munich and then in England. In 1893, the defendants published reproductions of the picture in England and America, as forming part of advertisements of their goods. This seriously affected the value of plaintiff's picture. The defence was that the picture was originally produced in Italy, and, therefore, did not come under the International Copyright Act of 1886, because in that country copyright could only be secured by registration, and as there had been no registration of this painting, plaintiff had no claim, as under the Act it was provided that no person could have any greater rights than the original owner in the country in which it was first produced. On the part of the plaintiff, however, it was submitted that Germany was the country of origin, and that, as no registration was required in that country, he was entitled to succeed. Mr. Baron Pollock, who heard the case without a jury, was unable to accept this view, and gave judgment for the defendants, with costs.—*Stationery Journal*



THERE IS SOME STYLE about a Brace end like this. It has an air of Durability and Perfection. The Drawer Supporter is an entirely new innovation that will hold like a bull-dog, not a tin-toy, It's a trade bringer to every store who handles it. DOMINION SUSPENDER COMPANY,

Mercantile Summary.

THE Guelph *Mercury* understands that Messrs. Wilson and Henderson, of Brantford, who recently patented a bicycle chain rivet, have sold the patent in the United States for $17,000.

THE quantity of gold amalgam purchased from miners by the Edmonton branch of the Imperial Bank, has so far amounted in value to $11,200 for the present season. This is about $500 more than was purchased in the same time last year.

THE North American Bent Chair Company of Owen Sound, who do a home and foreign trade in their chairs and furniture, have a four-story brick factory. The chair machinery used is mostly of their own construction, we are told, and they employ some 130 hands. J. G. Hay and A. B. Hay constitute the firm.

SOME days ago the Dundas Board of Trade and business men of that town held a meeting to discuss granting a bonus to the Toronto, Hamilton & Brantford Railway. The general opinion expressed was, that while Dundas is badly in need of better railway facilities, the speakers were not satisfied that the T., H. & B. would fill that long-felt want, and advocated a waiting policy. The by-law is referred to a joint committee of the council and merchants.

Special Notice to you who Sell Oysters in Bulk

This season we are giving away to every purchaser of 1,000 oyster pails a very handsome window display card with the words "Bulk Oysters for sale here," printed in gold leaf on heavy morocco board, size 19x12, or a handsome chromo lithographed in fifteen colors. The retailer will find it greatly to his advantage to use these cards as a notice to the passing public that he is in the oyster business.

We are offering this special inducement to obtain your trade, as our facilities are 60,000 per day, and every pail guaranteed uniform, perfectly liquid tight and second to none on the market. Our prices are as low as any. Send in a trial order for your pails and get one of these cards.

Mercantile Summary.

A VANCOUVER despatch states that the shipment of a schooner load of lumber by the Brunette mills to San Francisco has proved satisfactory, and a second schooner has been chartered. A Vancouver mill also contemplates opening a lumber yard in San Francisco and entering into competition with Puget Sound mills.

THE quarterly meeting of the Dominion Commercial Travellers' Mutual Benefit Society was held at the rooms of the society, Montreal, on the 3rd inst. The members whose names follow were chosen by acclamation officers and trustees for the ensuing term: Chas. Gurd, president; G. O. Stanton, vice-president; F. Birks, J. T. Dwyer, E. H. Copland, Max. Murdock, Robert White, T. Hughes, trustees.

THE manufacturing industries of Owen Sound appear to be prospering. The saw mill of Maitland & Rixon has all it can do. This firm has had a large contract for the new branch of the G.T.R., which is now finished and opened to Owen Sound. The connection, which is on the Wiarton branch at Bond Head, passes through a very pretty, picturesque part of the country. The new station is built close to Maitland & Rixon's wharf and warehouse, and not far from the centre of the town.

Mercantile Summary.

ALREADY is Miss M. A. Porter, of Ottawa reported assigned, who only began business in the millinery line last May.——Peter Bougie, a grocer and butcher at Alexandria, has assigned to the sheriff of the district, having small liabilities.

THE new building for the branch of the Bank of Hamilton at Owen Sound is now occupied. It is on the corner of Poulette and Division streets, a central position. With plate glass frontage and modern fittings, it is quite business-like. Mr. Ewing Buchan, the manager, has an office comfortably fitted up.

AMONGST the many good buildings on Poulette street, Owen Sound, is the corner store of R. P. Butchart Bros., who are hardware merchants. We see that Mr. T. I. Thompson, in the same line of business, not to be behind his neighbors, is now enlarging and refitting his store, which will also have plate glass windows.

IN the course of a few days, says the Waterloo, Que., *Advertiser*, the South Eastern Railway will pass into the possession and control of the C.P.R. Ever since Bradley Barlow failed twelve years ago the road has been nominally operated by three trustees, but really by the C.P.R., which owned $1,200,000 in first mortgage bonds.

H. C. BAKER, Mgr. Ontario Dept., Hamilton.

THIS Company will sell its instruments at prices ranging from $7 to $25 per set. Its "Standard Bell Telephone Set," (protected by registered Trade Marks) designed especially for maintaining a perfect service and used by the Company in connection with its Exchanges, is superior in design and workmanship to any telephone set yet offered for sale.

This Company will arrange to connect places not having telegraphic facilities with the nearest telegraph office, or it will build private lines for firms or individuals, connecting their places of business or residences. It is also prepared to manufacture all kinds of Electrical apparatus.

For particulars apply at the Company's Offices as above.

S. Greenshields, Son & Co. Montreal and Vancouver, B. C.

Mercantile Summary.

WE observe that the evening classes under control of the Council of Arts and Manufactures for the Province of Quebec are begun this week at the school rooms on St Gabriel street, Montreal. Instruction is given in free hand drawing, architecture, principles of machinery, wood-carving, plumbing and shoe-cutting.

THE new brick buildings erected on the site of the recent fire in Harrow, Ont., are rapidly nearing completion. Henry Herdman is occupying his new building. The frame work of Charles Bell's and F. W. White's buildings are pretty well forward, and Joseph Rumball expects to be able to occupy Drummond's new building this week.

AN increase is shown in the traffic receipts of the Canadian Pacific Railway for the last week of October. The return of traffic earnings from Oct. 21 to Oct. 31 is as follows:

1894	$711,000
1893	703,000
Increase	$ 8,000

ON Thursday of last week, at a meeting of the Central Trades and Labor Council, at Montreal, the credentials of the Socialist Labor Party, No. 2, were rejected, on the decision of the chairman, Mr. P. J. Ryan, because the constitution did not provide for the admission of such a party. An appeal was taken, but the ruling of the chair was upheld. Notice of motion was then given to amend the constitution.

Type Presses Printing Material

GWATKIN & SON

57 Bay Street
Toronto

THE grocery stock of W. H. Farr, of Port Stanley, was sold at 40 per cent. discount.——Paddison Bros., wagon makers at Lisle, have assigned.

AFTER cabinet-making here sixteen years, Wm. Roberts, of Toronto, has come to financial grief, but the trouble was not in his business. Real estate investments swallowed all his surplus and now he assigns.

THE fancy goods firm of Arthur Brosseau & Co., Quebec, is endeavoring to effect a settlement at ten cents on the dollar. It has been under seizure for rent.——George Roy, tanner, whose offer of compromise we lately noted, has now assigned; the liabilities are $44,000.

MRS. LANNING is the sole partner doing business under the style of Charles Lanning & Co., dealers in clothing, etc., here. But she has evidently been at her wits' end for some time as to how to meet her bills, and to-day she consults her creditors as to her future course.

A DEMAND of assignment has been made upon De B. MacDonald & Co., Montreal, manufacturers of corsets, dress shields, etc. The liabilities are put at $18,500.——J. & N. Choquette, a St. Hyacinthe firm of carriage makers, have compromised $2,000 of liabilities at 50 cents on the dollar, cash. They were lately burned out.

A ST. JOHN, N.B., jeweller, W. C. Gibson, is reported to be offering 35 cents on the dollar. His liabilities are put at $5,300, nominal assets $7,000. He was in trouble and compromised some years ago.——At Poquiock, in the same province, J. A. Scott, general dealer, has assigned. Several judgments have lately been taken out against him by Montreal houses. His liabilities are about $3,000, of which $1,300 is preferred.

IN 1882 Kauffman & Haugh, woolen manufacturers, New Dundee, dissolved partnership. The business has since been continued by Chas. L. Kauffman. He met with a serious loss by flood destroying his dam, in 1884. Still a surplus of $5,000 remained. He was supposed to be doing fairly well until July last, when he gave a chattel mortgage of $1,100. Now he assigns.——Several creditors have been pressing James Gordon, lumber dealer in London, principally on commission. He assigns, with liabilities of $7,000, and it appears that he has no assets.——Last February, F. Fulton, founder at Orillia, died, and his two sons continued the business, with but poor success. Their assets have been mortgaged for some time, and they assign.

THE stock of E. A. Draper & Co., manufacturers of fly nets at Aylmer, Ont., will be sold on Monday next.——The hardware stock of R. A. Green at Chatsworth was to be sold on Wednesday, the 7th inst.——On Wednesday next the grocery stock of A. Vanbrick, Port Elgin, will be sold by auction.

Two years ago E. Hagey bought the dry goods stock of R. Wilkinson, Preston, with the assistance of his uncle, Isaac Hagey, who became a special partner, investing $1,200. The uncle retired about eighteen months ago, withdrawing his capital. Then his father and father-in-law granted further assistance, but not sufficient to tide over his troubles, and we now hear of his assignment.

A MEETING of the creditors of the estate of G. L. Simpson, who kept a variety store in Victoria, B.C., was held a couple of weeks ago, and the statement showed assets of $5,827, and liabilities, secured and otherwise, $4,000. It was decided to sell out the business before the end of the year.——In the same place a butcher named B. Van Volkenburgh, has been sold out under a chattel mortgage.

A CONTRACTOR and manufacturer of sashes and doors at Sherbrooke, Que., F. X. Simoneau, has been asked to assign. The liabilities are fixed at about $6,000.——Joseph Potvin, of St. Cyriac, Que., formerly a farmer, and only a few years in the storekeeping line, is asking his creditors to accept 25 cents on the dollar.——Arsene Laroche, baker and storekeeper at Baie St. Paul, is also reported as seeking a compromise, but particulars are not yet available.

THE general store firm of McEwen & Co., Sudbury, Ont., are in embarrassed circumstances, owing they state to excessive competition from several bankrupt stocks being forced off in the same town, and are seeking some indulgence from their creditors. They are reported to owe about $15,000, and to show a nominal surplus of about $5,500. Their affairs are at present being investigated, and a general meeting of creditors will likely be held in a few days.

FOR some time Sudbury has had its full share of bankrupt stocks, and McEwen & Co., dealers in clothing in that place, allege this as the cause of their trouble. A few days ago an informal meeting of their creditors was held, and adjourned without accomplishing anything. The liabilities of the firm are about $15,000. Their nominal assets exceed this sum by $5,000.——Last July, J. & M. Wilson, lumbermen at Wingham, gave a chattel mortgage to a private banking firm. This is now foreclosed.——Early in 1892, Adolph Rivard started as a dealer in hats, caps, etc., in London, with $1,500 cash. Since then he has barely made a living, and at last is compelled to assign.——John E. Varcoe, general storekeeper, removed from Sonya to Orono about a year ago, and since received some assistance from his father, but could not make progress. Now he makes his principal creditor his assignee. He has stock estimated at $4,000 or $5,000.

THERE are two saw-mill men in trouble this week. One is Charles Birge, of Horning's Mills, who has a good record of ten years, but lost his mills by fire April last. Since rebuilding, being too heavy a strain on his capital, he assigns. The other is H. Colclough, who resides in Saginaw, Mich., but owns mills at Johns Island in Lake Huron. Moiles Bros. managed the business, but could not keep clear of law suits. A number of judgments have been entered against them, and now the sheriff is in possession.

TWELVE years ago E. & J. Park started a general store at Jarvis. The senior member sold his farm and invested the proceeds, $5,000 or $6,000, in the business. They were unsuccessful, and in 1887 compromised liabilities of $10,500 at 85 per cent. This left them a nominal surplus of $2,000, but it was not sufficient, and they assigned in July, 1890, owing $9,000. The stock was then bought by Mrs. Jacob Park, and the business carried on under the style of Park & Co. Since then she has been entirely in the hands of a wholesale firm here. An assignment was made yesterday.

IN June, 1891, the G. T. Smith Middlings Purifier Co. at Stratford became the North American Mill Building Co., with a capital stock of $75,000. This was principally composed of plant and machinery patents. Their manager being somewhat unsatisfactory, J. P. McDonald was put in his place, but retired a few months since. In July, 1893, they suffered a slight loss by fire, and no dividend was paid last year. Now they assign to their present manager, with liabilities of $78,000. Of this sum $52,000 is secured to their banker.

ABOUT seven years ago A. Godfrey started a hardware store in Vancouver. The following year his brother was admitted a partner, and the style of the firm became Godfrey & Co. In 1891, A. Godfrey retired and T. J. Blowery was admitted a partner, investing $5,000. Owing to ill health he was obliged to retire two years ago, leaving $4,000 in the business, and the

firm assigned last February, but subsequently was granted an extension of eighteen months, but being unable to comply with its terms an assignment became necessary.——In the same city, James A. Kemp, one of the oldest contractors there, has got into trouble through locking up too much capital in real estate Last month he was sued, and judgment being obtained against him, he now assigns

THE creditors of A. M. Wright, druggist, in Toronto, held a meeting on Saturday last. Wright has assigned, and the stock will be disposed of by auction on Tuesday next.——W. N. Larmour, tailor, who has been unable to arrange a compromise with creditors, will have his stock sold on Wednesday next.——Robt. C. Webber, formerly of Bingham & Webber, printers, made a bad failure in 1891, and his wife continued the business as the Webber Printing Co. Maxwell Johnston, printer, also made a failure as of the firm Johnston & Spears. Since then his wife, too, has continued the business under the style of Maxwell Johnston Co. These two concerns amalgamated a little over six months ago, but it appears that the union was not a happy one. Trouble arose and assignment is the result. The market was not made any more profitable for printers by the career of these firms. Quite the contrary.

AN assignment has been made by Mrs. Nixon, milliner at Teeswater. She will not owe much. ——Nugent & Tudhope, grocers, Welland, have assigned, owing $1,400, and have nominal assets $200 in excess of this sum. ——Henry Barber & Co., of this city, have taken charge of the general store of J. H. Strickland at Cannington. In September, 1888, he succeeded A. C. Campbell, his father, a prosperous farmer, contributing the greater portion of the purchase money. A little more than a year ago, J. H. S. admitted as partners three of his brothers without either capital or experience. In March last, as they did not find the business a mine of wealth, they retired, J. H. becoming sole owner. Shortly after this he opened a branch store at Bolsover, but this was not sufficient, and another store was started at Argyle. On the 2nd inst. a chattel mortgage for $2,150 was given to H. Strickland. No doubt this will be contested.

IN Nova Scotia the following recent failures are to be noted: T. G. A. Wilson, a shoe retailer, has arranged a compromise at 33⅓ cents on the dollar. He has been in complicated shape since the failure of R. Taylor, wholesale boots and shoes, a year or so ago.——A. G. Heisler, formerly a shipmaster, began business in the grocery line about five years ago Being without previous business experience, his success has all along been questioned Latterly he has shown much financial strain and his assignment is now announced. His first preference liabilities are $3,178, second preference $1,289, third preference $180, but the total amount of his indebtedness is not yet known. ——Already we hear of the assignment of Mrs M A. Henderson, whose name was used as a cover for her husband, who started a shoe business in the fall of 1893 in opposition to a brother

THE weekly list of Montreal failures is as follows: R. G Gaucher, a young hardware merchant, who began business several years ago with a very fair capital furnished by his father and under more favorable auspices than many, has not improved his chances as he might, and has made assignment of his estate, Liabilities are about $11,000, as near as can at present be ascertained.——L. D. Richer, blacksmith, has assigned on demand. The liabilities are large for one in his line, being placed at $6,481.—— J. B. Terry, saloonkeeper, is reported an absentee, and a meeting of his creditors is called for the 12th inst.——Another in the same line, W. H. Knapp, who is located in the outskirts of the city, at a place known as the Blue Bonnets, has been served with a demand of assignment.——Brosseau, Frere & Co., sash manufacturers, have turned over their estate to an assignee, with a list of liabilities footing up $12,500.——Mrs. J. Wright, groceries, etc., whose failure was noted lately, is seeking a settlement at 50 cents on the dollar.——An assignment on demand has been made by F Brisson, jun The amount due creditors is $5,670 —— Gaudry & Leclair, a shoe firm of only a few months establishment have assigned, and owe $6,414 They will be wound up

WEDNESDAY, October 31st was a busy day at the rooms of Suckling & Co., in Toronto. On that day the stocks of merchandise mentioned below were offered at auction, with the results indicated The dry goods stock of Thorne & Co., Hamilton, amounting to $11,676, was sold to James Shea, of that city, at 70½ cents in the dollar The stock of W Stanford, Ottawa dry goods, valued at $30,000, was sold to P Rochon of Ottawa, at 59 cents in the dollar And that of A McDonald, Guelph also dry goods worth $3,000, was sold to Mrs McDonald at 38 cents in the dollar. T. J. Death & Son, Toronto, found their stock of men's furnishings sold to Bachrack & Co., city, for 25 cents in the dollar. the greater part of sale of $800 was made up of shop fixtures and furniture On the same occasion, W. A. Campbell, assignee, sold a stock of boots to S. J. Griffis, of St. Catharines, at 41 cents on the dollar The stock of J McFarlane Wilson, crockery dealer, Peterboro, $13,000 in amount, was withdrawn at 64 cents in the dollar. That of Fyfe & Co., Barrie, consisting of dry goods and clothing valued at $19,000, was withdrawn at 58 cents on the dollar. There was offered at Suckling's, on November 7th, the stock of Danford, Roche & Co., restrained by injunction from the Court of Chancery from doing business in Aurora. Stock amounting to $10,000 was withdrawn at 54½ cents.

TORONTO, FRIDAY, NOVEMBER 9, 1894.

THE SITUATION.

North of Edmonton, the Dominion Government has had an experimental boring for oil made to a depth of 1,000 feet, with the most promising results. Should the predictions be correct, Pennsylvania will be outdone in our new oil regions of the far north. If we had nothing but a single boring to guide us, no general result could safely be drawn from it. But we previously knew from evidences of great overflows of petroleum, over a wide region in the north land, that great stores of oil must be hidden under the surface. The experimental boring is sufficient to prove the accuracy of the presumption drawn from the overflow. At the outset, our Government finds itself in a position so to deal with these vast stores of potential wealth as to yield the greatest public benefit. Monopoly requires to be guarded against, without discouraging production. If there is to be any monopoly, it might be a Government monopoly carried on in the general interest. Better this than corporate monopoly, though neither may be really desirable. Great care should be taken not to alienate a large extent of the petroleum lands. Perhaps this can best be done by restricting quantities and insisting on suitable conditions, for, if grants are to be opened, they must be opened to all alike. In any case, a large part of the petroleum lands, within practicable reach, should be reserved unless experimental working shall enable us to see what policy will be best in the public interest.

On the grading of wheat at Port Arthur and Fort William a difference of view has been developed between the leading boards of trade; those of Montreal and Toronto being of opinion that it is defective, while that of Winnipeg contends that the standard at these ports is equal to that at Duluth. And the fact is cited that more than 100,000 bushels of Manitoba wheat, inspected in the Province, has gone to Duluth, and on inspection been granted Duluth No. 1 hard wheat certificate. But is not this Winnipeg wheat unmixed, and in that respect different from Port Arthur and Fort William wheat? The Winnipeg board aims to carry the war into Africa, asserting that "disreputable adulteration" of Manitoba wheat takes place in Montreal and Ontario, mixing it with "low grade Ontario wheat." The wheat so mixed, the accusation proceeds, is exported as Manitoba hard wheat. But a Montreal dealer has denied this charge. "Certain Ontario millers," whose names, by-the-bye, are not mentioned, are accused of having refilled empty flour sacks bearing the name of Manitoba mills with flour made from this adulterated wheat. This practice is spoken of as a thing of the past. The memorial to the Government, which embodies these accusations, protests against the right claimed by eastern Canadian dealers to interfere with the grading of Manitoba wheat. If anything occurs to give them cause of complaint, they are told their proper course is to apply to the tribunals for a judicial remedy. Appeals to the Government are deprecated. Within proper bounds this seems reasonable enough; but the question of how to deal with smutted wheat, for instance, is one which eminently concerns the public health and the reputation of the country. Smut is a violent emmenagogue, and is capable of destroying the life of infants unborn. The boards of trade which call for precautions against this danger are answered by the statement that smutted wheat can be treated as to be made to rank as No. 1 hard. This is more than doubtful. On this point the public would feel better assured if informed on the evidence of disinterested experts. What about the law which restricts smutty wheat to a No. 8 grading?

A new offer to bid for the Toronto loan has been made in general terms, by Mr. R. Wilson Smith, of Montreal, who had previously made an offer for a 3½ per cent. loan. His solicitors now say that he can afford to pay more than the Scotch firm can for four per cents, as well as for 3½'s, and they intimate that if they were informed of what the Scotch offer was, their client would be prepared to make "a distinct offer to be carried out at once." A better offer we suppose is meant. But an offer to make on offer, on conditions, is not a distinct bid. The conditions are that the amount of a previous offer should be revealed to them; and yet they complain, not unreasonably, that the same thing was done against their client. The Treasurer denies that he communicated this information and refuses to believe that anyone else did. As we remarked before, the trouble arose from a limit of time not having been named for the receipt of tenders. Under the circumstances, the suggestion of Alderman Hallam points to the only fair way of getting out of the difficulty. If no contract has been made, new tenders should be called for and a limit of time for receiving them named. They should embrace both 3½ and 4 per cents, if the latter be not absolutely undesirable; and then when the two kinds were received, an actuary could tell which was the best.

A check on the advance of free trade is the general result which will be deduced from the triumph of the Republican party of the United States in the November elections. The defeat of Mr. Wilson will be regarded as giving emphasis to this conclusion. But though the fact would seem to be undeniable, there is little reason to believe that even the Republicans will be desirous of retracing the tariff legislation of last session and going back to McKinleyism pure and simple. What may be expected is that an immediate further advance will be checked, while what has been done may be accepted. As it stands, the new tariff is more the work of the Republicans than of the Democrats. And some leading members of the victorious party have of late renounced extreme protectionism. Many causes united to produce the result of Tuesday's voting. The bad odor in which Tammany had been brought by the exposures in the New York police department, the long siege of heavy depression in the ranks of trade and industry, and the dissatisfaction of many Democrats with the meagre reforms

of the tariff, resulting from dissensions in their own ranks, all aided to swell the adverse vote. The Populist party appear to have shared the fate which has speedily overtaken all distinct farmers' parties in the Republic, and if it has not suffered annihilation, it has made no noteworthy progress.

France, by her Chamber of Deputies, has ratified the treaty with Canada. The wines embraced in the agreement can scarcely be said to come into competition with Canadian; they have a place of their own in public estimation. But it is necessary that care be taken to see that wines are genuine, at a time when spurious fabrications have become common, and a question about their exclusion is sure to arise. On the ground of public health, false wines ought to be excluded. The chief mischief in the case both of wines and spirits, is done by adulteration, or, what is still worse, wholly false articles. Presumably the wines of the treaty are genuine wines, though no direct provision is made for the exclusion of fictitious. Spurious wines were not excluded under the old duties, but under the treaty by which certain kinds of wines are favored, care must be taken to see that they do not get a preference; if admitted at all there will be discrimination in their favor, for some of them profess, falsely, to be of the class covered by the treaty.

MORTGAGE LOAN COMPANIES, ETC.

On another page is presented a statement showing in aggregate the various items of asset and liability of 82 loan companies and building societies in all parts of Canada reporting to the Dominion Government. Seventy-one of them are domiciled in twenty-four places in Ontario, eight are in Quebec and three in Nova Scotia. These companies are not all alike, but differ materially in age, size, method. One has $10,919,000 of loans; another, a new one modelled on an Old Country concern, has only lent $1,000. Some take deposits at interest, some receive payments on the instalment plan, others borrow entirely on debenture. The return has lumped together the transactions of all these companies according to a form which is broadly indicated in the statement on page 609 of this issue. The aggregate subscribed capital of the 82 companies reaches $93,766,651.

Among the liabilities of these organizations we find capital stock amounting to $35,445,252. This consists of $19,941,188 in fully paid shares, and $15,504,064 partly paid up, the proportion paid, in the case of individual companies, varying from 10 per cent. to 25, but the average being 21 per cent. It must not be imagined that the holders of these shares are all wealthy capitalists. On the contrary the lists show the greatest number to be people of limited means, artisans, shop-keepers, trustees, widows or the like, who hoose the business of lending money on mortgage as a safe one, but who have not the appliances or the knowledge to conduct it properly themselves. Hence they put their money into these societies, whose managers try to make it yield a yearly income to shareholders.

Reserve funds, $10,930,000, and contingent funds, $1,178,000, consist of the accumulated earnings of years over and above what has been paid in dividends. The contingent funds are as a rule held in liquid form to provide against possible losses in the realization of the item $8,298,000 placed among the assets as "loans secured on real estate held for sale." All the first seven items in the list, aggregating $50,047,000, represent money which belongs to shareholders.

We now come to the money of the public which has been loaned to these societies either in the shape of unsecured deposits or on the security of debentures or debenture stock. Canadians have lent to these companies $28,559,000, of which $18,531,000 is deposits and $10,028,000 on debenture. But the companies have borrowed nearly twice as much from people in the Old Country, namely, $49,408,000 on the strength of debentures, and $2,613,000 in perpetual stock—in all more than fifty-two millions of dollars.

Of this aggregate of $82,362,000 borrowed from the public in Great Britain and Canada, about sixty millions [$59,436,500, to be exact,] is represented by debentures, which have as a rule a life of five years, and are payable or renewable at the end of that time. That there is much activity of movement in these securities is shown by the fact that the companies repaid $8,258,000 during the year, and that they borrowed afresh no less than $9,712,000, part of it, very likely, at a lower rate of interest.

Judging by the sum set down for the total of interest paid and accrued for the year, the average rate of interest paid by the companies for their borrowed money was 4·66 per cent. But we know that the more prominent companies are getting money in Britain at from 3¾ to 4 per cent. The annual rate obtainable on mortgages in Canada has fallen from 8 or 10 per cent. a dozen years ago to 6 or 7 per cent. to-day. In fact, what are termed gilt-edged loans, on first-class city property, are now effected at 5½ or even 5 per cent., while 6 per cent. is a common rate for new first rate farm loans.

Turning for a moment to the assets side of the account, we find that the companies have made loans of $115,847,000, and possess besides lands, office buildings, securities and cash to the extent of $17,903,000 more. Of the aggregate loans more than 96 per cent. have been made upon real estate. The total advanced upon land has been $110,916,559, and the value of the lands thus loaned upon is given at $227,849,872, which leaves a margin of value of about 52 per cent.

Exactly what proportion of this $115,000,000 is loaned upon farm property, there is no means of knowing. It would be a huge mistake, however, to suppose, as some appear to do, that Canadian farms are mortgaged to loan companies for the whole of this sum. A great aggregate is lent on the security of residential property in country towns, great sums on business blocks and the like in the cities. We know, for example, of loans having been made in Toronto of from $30,000 all the way to $200,000 each.

The loans on other property than land are but limited, amounting to only $4,430,000, about $1,600,000 of which is on Canadian municipal securities and loans on the companies' own shares, the rest being unspecified.

The nearly eighteen millions [$17,903,499] worth of property owned by these companies or societies consists of $2,729,000 in cash, $2,770,500 in Canadian town or Government securities, $1,517,000 in office premises, $3,298,000 arrear loans for which real estate security is held, and other property, unspecified, put down at $7,543,000.

GAMBLING IN QUEBEC.

It appears that the Central Trades and Labor Council of Quebec has been finding fault with the provincial authorities for not having combatted with sufficient vigor the lottery evil and other forms of gambling in that province. The Attorney-General of Quebec, Mr. Casgrain, replies by letter to the council showing that during the three years of his tenure of that office "lotteries have been completely abolished" in the province. The moment a Quebec newspaper advertises a lottery, notice is sent the paper to drop the advertisement or be prosecuted, so that, practically, the

papers have ceased to advertise lotteries. Then Mr. Casgrain points out that he had the principals in the Turf Commission Agency, a gambling association, arrested, convicted and put in prison. Parties in Montreal keeping gambling houses were arrested and punished, and throughout the province a great many roulette tables, gaming tables and instruments of a similar kind, have been seized and destroyed at the instance of the Government. In short, he declares that "never before have those who live by gambling, make a trade of it or habitually indulge in it, been subjected to such persevering attacks as those made by myself and colleagues."

Altogether the honorable gentleman makes a successful defence of his Government from the council's charge of neglect of duty. Indeed it seems to us, at this distance, that they have done wonders, considering the fondness of the people of that province for games of chance. A love of the lottery seems to be born in the French Canadian, just as it is in the Louisiana French descendant or in the inhabitant of old France or any other Latin country. As well may Inspector Archibald try to prevent Toronto newsboys pitching coppers in the interval of evening editions as to hope to eradicate this disposition. Besides, who that has seen, in the nave of St. Peter's Cathedral, Montreal, amid the commotion and cigar-smoke of a "Kermesse," wheels-of-fortune whirling their merry round, and their "paddles" being purchased freely, all for the financial advantage of Mother Church, can wonder that it is found difficult to get the populace to believe that what has received the sanction of the Church will be interfered with by the law.

AN OPENING FOR REFORM.

In these days of new methods, typewriters, stenographers, short forms of documents and other modern improvements and abridgments of legal process, we appear to need reform in the laws regulating procedure and the making up of bills of costs. Considering all that has been done in the last few decades in the departments of banking and commerce to get rid of anachronisms, to make transactions more direct, to lessen the cost of negotiations, it does seem only reasonable that the expensive forms and antiquated processes which have grown up around the ancient profession of the law should undergo some modification, and that justice may be reached by litigants without the professional fol-de-rols which were deemed needful half a century ago, to try one's patience and his purse.

A case in point is that of the St. Thomas *Journal*, which has been sued, along with some seventeen other newspapers, for having made comments upon certain alleged proceedings of a Mrs. Beaton. The verdict in Mr. Brierley's case was a dollar damages for Mrs. Beaton, and this verdict carried costs with it. These costs, as made out by the solicitor, amounted to $229.19; but $41.14 was struck off this sum by the taxing officer at Hamilton, which left the costs the newspaper had to pay, $188.05. Now, says the *Journal*:

> From the moment the suit was entered against the *Journal* it was determined that, so far as the defence could govern the matter, the case should be conducted cheaply. Not an act entailing unnecessary expense was undertaken. The defendant acknowledged the publication of the article complained of, filed his statement of defence and went down to trial. Not a witness was called by either side, with the exception of the defendant himself. No questions of law were involved, and the actual time spent in court by plaintiff's solicitors did not extend over two hours. It will thus be seen that in its elements there could hardly be conceived a case, coming within the purview of the High Court, more simple and less calculated to breed costs than was the case against the *Journal*. Yet the solicitors for the plaintiff are allowed to collect from the defendant—in payment for value which they are, by legal fiction, supposed to have rendered to the plaintiff—the sum of $188.05.

The bill, the recital of which occupies a column and a half of a daily newspaper, consists of 123 items. These items range from 50 cents for a letter, and 8 or 6 cents for postage thereon—sixty-eight of these 50-cent entries appear in the bill of costs—to $5 for "attendance," and $30 and $50 respectively for counsel fees. There is "paid sheriff," so much; "paid cryer," so much; "notice to produce, and copy," half a dollar; notice to admit, and copy," another half dollar; "drafting notice of libel," so many folios; "drafting statement of claim," further folios; "drawing record," so many more folios. The overworked lawyers for the prosecution, according to their own recital, spent their waking hours in "drafting"—"engrossing"—"attending"—"searching"—"preparing"—"instructing" (or being instructed)—"copying"—"serving"—"giving notice"—"replying"—"filing."

Well, we are not blaming the lawyers for getting what the law allows them for their labor in such circumstances. It is very evident to the lay mind, however, that the law which requires or even permits such roundabout and expensive methods of arriving at justice needs to be amended. Fancy the plaintiff in this case being made to pay fourteen dollars additional because he had asked to have this bill of costs taxed! To a person not versed in law this seems a monstrous flagellation. A man's request for adjustment of his bill according to a legal tariff is made an instrument to scourge him further! Then, says the *Journal*:—

> It will be noticed in the bill referred to that a considerable sum is charged for proceedings to secure production of documents bearing on the case, and that a series of charges are even made because the plaintiff imagined he wanted to see the affidavit made by the defendant that he complied with the order for production. It is claimed by members of the profession that this circumlocution should be abolished by a simple rule of court; that all documents bearing on the case, held by either party, should be produced within, say, ten days after the pleadings are closed. In other words, let that be made a matter of course which is now made a matter of costs.

It will be apparent to any one not a lawyer that Mr. Brierley, the defendant in this suit, ought not under the circumstances to have had to pay $188.05, or the half of it. If this sum in costs is the result in a cheaply conducted case, as the defendant declared he tried to make it, what in the name of the daughter of Themis—who typifies the august profession of the law—would it have been if the procedure had been extravagant? No opportunities should be offered for such oft-repeated petty transactions as appear in this bill. All temptation to multiply proceedings needs to be removed, and the gentlemen of our High Court of Justice should begin the reform.

TIMES AND CAUSES OF FIRE.

There has been an impression that Russia is a country which does not suffer much from destruction of dwellings or other buildings by fire. Nevertheless it is asserted that the number of fires in European Russia during the last five years has exceeded 200,000, and that they burned 708,350 houses, resulting in a loss of $178,877,500. These figures, which appear in the *Insurance Post* of London, England, appear striking enough when seen by themselves. But when compared with those of the United States and Canada they are less so, for on this continent it has been for years a common thing to find the fire loss 180 to 150 millions in *one* year.

It is interesting to observe that the main causes of this fire loss are put down to circumstances that seem quite familiar to us on this side the Atlantic: Defective stoves are among the first mentioned, and to them are attributed 14.2 per cent. of the fires in towns. Carelessness is blamed for 31.7 per cent., a very heavy proportion, but one which manifestly includes a number of proximate causes, carelessness being the remote cause. Incendiarism is charged with 14.7 per cent. of the fires in the towns and 15 per cent. of those in the country. Lightning caused

only a fraction over 1 in the hundred in town and 4 in the country districts. But in the Vistula district the lightning fires were 8 in the hundred in the towns and 6 in the country.

These figures are official, being published by the Russian Ministry of the Interior, who have taken careful note of the time of year when fires occur. They are less frequent in the winter and spring, strange to say, than other times. The proportion of fires occurring in the spring was 24.9 per cent.; in summer, 29.4 per cent.; in autumn, 28.1 per cent.; in winter, 17.6 per cent. So that summer and autumn were the worst seasons for fires. The houses in Russia, by the way, are mostly built of wood.

TORONTO TRADE FIGURES.

It looks as if people in Canada were persisting in judicious economy. The customs returns at several principal cities indicate lessened imports of dutiable goods. Montreal and Halifax are instances in point, and at Toronto also there is a decrease in dutiable imports last month as compared with October, 1893, though in free goods, including raw material for manufactures, there is an increase. The total imports are, October, 1894, $1,438,367; October, 1893, $1,387,532. The principal items of dutiable goods imported are given in the following list:

IMPORTS.

	Oct., 1894.	Oct., 1893.
Cotton and manufactures of	$44,847	$42,180
Fancy goods	47,467	42,414
Hats, caps and bonnets	7,386	12,313
Silk and manufactures of	41,037	40,832
Woollen manufactures	99,927	102,005
Total dry goods	$240,664	$239,744
Brass and manufactures of	$ 5,648	$ 7,073
Copper, "	1,377	922
Iron and steel goods	91,881	101,651
Lead and manufactures of	1,532	1,332
Metal composition, etc	7,740	8,133
Total metal goods	$108,178	$119,111
Books and pamphlets	31,839	74,062
Coal, soft	29,780	30,203
" hard [free]	190,345	.....
Drugs and medicines	18,329	20,166
Earthen, stone and chinaware	20,005	28,689
Fruit, green and dried	31,485	30,791
Glass and glassware	21,417	12,807
Hops	3,696	12,313
Jewellery and watches, etc	35,485	18,298
Leather and manfrs. of	6,115	17,737
Musical instruments	9,230	17,292
Oils, various	10,823	15,088
Paints and colors	2,064	15,985
Paper and manufactures of	34,069	33,720
Spirits and wines	10,007	7,817
Wood and manufactures of	12,724	17,059

EXPORTS OF CANADIAN PRODUCE.

Produce of	Oct., 1894.	Oct., 1893.
The Mine	$53	$109
" Fisheries	.....	6
" Forest	9,164	38,031
" Field	163,511	52,265
Animals and their produce	175,904	79,291
Manufactures	77,492	62,330
	$426,124	$250,032

No lumber appears in the exports for last month, an unusual circumstance which possibly the Grand Trunk freight circular may have helped to explain. The amount under the head of "other articles" among field produce is unusually large. It consists of seeds, dried apples, hops, potatoes and hay. Animals and their produce is a considerable item in the last month's return. Dead meats form, as usual, the largest share.

The Insurance Club of Detroit has re-elected its old officers, as follows: C. F. Peltier, president; A. Saenger, vice-president; J. S. Vernor, treasurer; E. F. Chapman, secretary, with the following executive committee: G. W. Chandler, L. H. Fox and F. O. Davenport.

A TANNERS' SECTION OF THE TORONTO BOARD OF TRADE.

In accordance with the motion of adjournment made at the meeting of Ontario tanners in Toronto on October 10th, the tanners came together again on Wednesday of the present week. The meeting was even better attended than that of three weeks ago, representatives of the following firms being present: Bickell & Wickett, Beardmore & Co., Chas. Knees, Toronto; Breithaupt Leather Co., Lang Tanning Co., Berlin; Marlatt & Armstrong, Oakville; King Bros., Whitby; C. J. Miller, Orillia; Daville Tanning Co., Aurora; Newton & Bros., Richmond Hill; Beal Bros., Uxbridge; Andrew Davison, King; Jas. Robson & Sons, Oshawa; Barrie Tanning Co., J. & S. Grant, Woodstock. Mr. Wickett took the chair. There were a great many questions to be discussed, and but little time for discussion, as the session lasted but three hours.

The first work of the meeting was to condemn the *Globe* for remarks made in announcement of the present meeting. The champion of the anti protectionists noting that there was but 17½ per cent. duty on leather, observed: "This disregard for the tanners, it is hoped, will be remedied by a strong organization." As a matter of fact the question of duty was not discussed at the last meeting, nor, so far as we can learn, was it the intention of any one to bring it up at the adjourned meeting. The all-important work of the meeting was the steps taken to form a permanent organization. The sole leather tanners, the millers, manufacturers and jobbers of various descriptions are all associated more or less closely together. Then why not an organization of Ontario upper and harness tanners? Mr. L. J. Breithaupt moved, and Mr. F. T. Daville seconded the following motion: "That the Toronto Board of Trade, offering facilities for the formation of sections in the interests of the various departments of trade and commerce, resolved, that with a view to the promotion of the tanning industry, application be made to the council for authority to form a tanners' section of the Toronto Board of Trade."

Mr. Breithaupt's motion was enthusiastically adopted, and a committee, consisting of Messrs. Davis, Beal, Marlatt, Breithaupt, Knees, Bickell and King, appointed to frame a constitution and by-laws for the section. Mr. Wickett was appointed chairman *pro tem.* Such questions as inspections, freight and other subjects were casually discussed, but decision upon them was left over until December 5th, when another meeting will be held.

MAY VOTE BY LETTER NOW

The Toronto Board of Trade has become in some degree a provincial institution, and in accordance with this position members living outside of the city of Toronto have been granted the privilege of voting for its officers by means of letter instead of in person. There are 184 members of the board who do not live in Toronto. At the last election of officers only 44 outside members voted, and it is estimated that a full vote of the members residing in the various towns and cities of Ontario could not have been polled at less than an average cost of $10 per member. The board did not think it just or expedient to disfranchise so important a part of the membership. And as a result of the change in the by-laws, effected on Monday last, a number of applications for membership have already been received from provincial business men, and it is expected that the list will receive further additions.

THE TAILORS' BAD ACCOUNTS.

When the funny man of the newspaper has exhausted all other resources, he makes a joke about a tailor's bill. And many tailors in the course of a business career lose a good deal of money through accounts that cannot be collected. That their own imperfect methods of business are largely to blame for this condition of affairs there is not a shadow of doubt. A Yonge street merchant tailor tells us that although during the last ten years he had done a business aggregating $200,000, his losses covering that period were but little over $1,000, or about half per cent. of the total amount. What one man has accomplished another can at least attempt. The tailor in instance may be a favorite with old Dame Fortune, but we prefer to ascribe his success to the exercise of careful judgment in giving credit and a systematic way of looking after delinquent debtors.

—One of our city clergymen, in a recent sermon, referred to the coming of Mr. D. L. Moody, the evangelist, and expressed the opinion that if a revival of religion in Toronto would result from Moody's efforts and the prayers of the churches, one of the first effects of it would be a great wave of debt-paying all over the city. And, sure enough, among the first things Moody told his hearers on Sunday morning last at the Massey Music Hall was: "Pay up what you owe, or else tell your creditor why you don't. A man has no right to be called a Christian who does not pay his debts."

J. M. COURTNEY,
Deputy Minister of Finance.

N. S. GARLAND, F.S.S., F.S.A.,
Clerk of Financial Statistics.

FINANCE DEPARTMENT, OTTAWA, 8th August, 1894

NO PROFIT IN CHEAP GOODS.

A manufacturer's agent who has become grey while selling textiles, had a tale of woe for us the other day. He represents a German house, the fabric productions of which are renowned the world over because of their superior excellence. "I can't sell our goods," he remarked. "They tell me there is no longer a demand for really good fabrics; people now-a-days want something cheap, paying but little consideration to the matter of quality. The fault, to my mind, rests not with the public, but rather with the merchant and his assistants. Should a woman gaze at the shop windows visions of low prices stare her in the face. When she enters the store the first object that meets her eyes is the 'bargain counter,' while the clerk in attendance displays first, last and always cheap goods. A low price is the worm with which he baits his hook. Possibly it is the quickest way to land the fish, but with different bait and more skilful angling, in the long run better results would be obtained. For not every sort of fish, or even the best sort, can always be caught with that bait."

The words of our informant contain some truth. The public may have a weakness for low-priced goods, but the merchants are not wise to encourage that liking to the exclusion of considerations of quality and wear. There is more money alike for manufacturer and merchant in making and handling the better and more durable qualities of goods, and in consequence every energy should be turned towards pushing the sale of such descriptions. A clerk who is credited daily with a large volume of sales has not necessarily done his best for the house. If his work had been performed with more care and judgment—although more slowly—the element of profit might play a more prominent part in his department.

DRY GOODS JOTTINGS.

Linens are easier both abroad and locally.

The feeling abroad appears to be strong for velvets this winter.

The manufacture of mohair began in England as early as 1820.

Golf capes of Scotch tweed with plaid linings are selling well. A Toronto firm turns out some very jaunty ones.

The silk trade is apparently dead; the holiday season will, it is to be hoped, bring life again to certain lines.

A large double display window of a King street merchant is filled with silks of endless variety in shades, and all marked at one price, 50c.

An advance has been made abroad in the prices of certain glove materials, namely, chamois skins and skins suitable for eight-button suede gloves in medium grades.

The wholesale houses have now completed their stocks of handkerchiefs for the holiday trade. Some beautiful Japanese silk, Swiss embroidered and linen goods are being shown.

Messrs. C. M. Lampson's London fur sales closed on the 19th ult., having occupied three days, and it has been roughly estimated that skins to the value of about £150,000 were disposed of.

"Most of the wholesale Canadian buyers," says the Bradford correspondent, "who were in Bradford have gone to Scotland and the Continent, but are expected to be back here later on to complete their purchases."

Economist predictions for next spring's dress goods favorites are: "Mohair favored for next season"; "transparent weaves to the fore"; "the prominence of black goods"; "crepons increasing in popularity."

The clothes may make the man:
But it's a struggle all his life
To keep from going broke
When he's getting them for his wife.
—*Chicago Inter-Ocean.*

Exports of silk handkerchiefs and piece goods from Yokohama from July 1st to October 10th last: handkerchiefs—to America, 357,386 dozen; to Europe, 114,040 dozen. Silk piece goods—to America, 73,575 pieces; to Europe, 35,041 pieces.

Toronto dry goods circles have witnessed the advent of another wholesale house this week. The Merchants Import Co., as the new firm is styled, will deal exclusively through samples, and in saving the interest upon moneys invested in stock, claims to be in a position to give satisfactory terms to close buyers. Mr. John Northway, who has won considerable fame as an import buyer, is the inspiration of the new company, which has situated itself on Bay street.

It is very much to the credit of Mr. James P. Murray, of Toronto, that he has, as we learn from an item in the *Carpet Trade Journal*, which we copy elsewhere, been the means of floating in so important a manufacturing city as Philadelphia a new industry with a large subscribed capital. The reputation that chenille axminster carpet has already made amongst us leads to the belief that this fabric will obtain great vogue in the larger market of the United States.

A correspondent writing from Leeds, Eng., says: Except in the case of the principal London buyers, not much attention is given to the new patterns of coatings, suitings and mantlings which are there to pick and choose from for the coming spring trade. The buyers from the north and west of England are giving their attention mostly to medium and low fancies in unions, cheviots, and tweeds. These are not selling at as high prices from manufacturers' hands as was expected before the last wool sales began, and Scotchmen in particular seem to appreciate this state of the case to the full. The best known firms have sufficient orders on hand for the present for fancy worsteds, serges, and vicunas, the quotations in which cases are scarcely at all different from those of twelve months ago.

The *Draper's Record* contains the following paragraph of Canadian "personals": "Recent arrivals from Canada include Messrs. George Hyslop (Messrs. Hyslop, Caulfield & Co., Toronto), R. E. Burns (Messrs. Cornell, Spera & Co., Winnipeg), R. C. Struthers (Messrs. R. C. Struthers & Co., London, Ont.), and W. T. Minnes (Messrs. Macree & Minnes, London, Ont.). Mr. P. H. Burton (Messrs. Caldecott, Burton & Spence, Toronto), has, I understand, returned home. Mr. Burton completed his hundredth trip across the Atlantic some time ago. Mr. Stobart (Messrs. Stobart, Son & Co., Winnipeg) has been the principal buyer from Manitoba this season. A report was current recently in the north that Mr. Stevenson (of the Dominion Colored Cotton Mills Co., Montreal) was buying machinery in Lancashire, but I believe that his visit was in connection with the purchase of certain grades of goods not made by the company with which he is connected."

PRESCRIPTIONS FOR DRUGGISTS.

Opium is firmer.

Quinine remains steady.

Shake before using—dice.

Chlorate of potash is easy abroad.

Pineapple juice is said to have cured diphtheria.

Cod liver oil continues firm in primary markets.

Spice markets at home and abroad are quiet and easy.

Manufacturers in London are said to be cutting prices of bismuth salts.

A transaction was made in senega root in New York during the week at 29½c.

It is said that thymol applied to warts will cause them to shrivel and disappear.

Toilet soap, in the form of paper, but slightly larger than visiting cards, is used in France.

Carbolic acids, crude acid crystals are dull in English markets, and the tendency is for lower prices.

Lyman Bros. & Co., of Toronto, report an increasing demand for chloroform and sulphuric ether in concentrated preparations for anæsthetic purposes.

Lactucarium increases the efficacy of camphor in the treatment of chordee. They are combined in equal proportions, say two grains of each to a pill, and one or two pills given at bedtime.—*Druggist's Circular and Gazette.*

The *Reporter* lists the following drugs as advancing in price: Opium, morphine, beeswax, caffeine, cod liver oil, balsam tolu, asafœtida, ginseng root. On the other hand, menthol, balsam fir, juniper-berries, senega root, coriander seed, have declined in value.

Two young ladies recently walked into a Bedford avenue drug store and one said to the green young clerk, "Lettuce cream, if you please." "All right," replied the astonished young man, "scream away, if you want to, the boss won't be back for an hour."—*Wechsler & McNulty's Weekly.*

At the last auction sale of cinchona bark held in London, Oct. 16, the following proposition was submitted: "That with the decreased and decreasing interest the London bark market now offers to quinine manufacture, the remaining auctions for 1894 should be held Nov. 13 and Dec. 11, and that throughout 1895 they should be held not oftener than monthly."

Crousel (Bul. Soc. Pharm. Bord.) recommends the use of citric or tartaric instead of sulphuric acid, for dissolving quinine, as the bitter taste is not so much developed, and they harmonize better with the digestive fluids, and do not lessen their action. To render soluble one gram of quinine sulphate, he uses 20 centigrams of tartaric or 60 centigrams of citric acid.

A filter for acids has been patented in Berlin, an ingenious chemist having discovered a means of preparing a tissue which is unsurpassed in filtering liquids of decided acidity. Cotton cloth is steeped for about an hour in nitric acid of 40-50 degrees B. After the immersion the

tissue is lifted, washed in plenty of water in such a manner as to take away all trace of acid, and plunged anew in ordinary sulphuric acid of 66 degrees B. It is then washed again in water, and when freed entirely from acidity the tissue possesses the necessary permeability, and will last four times as long as an unprepared filter. Even concentrated hydrochloric acid may be passed through it without injury to the filter.—*Reporter.*

FOR GROCERS AND PROVISION DEALERS

A. Leviene & Co have started a bakery in Berlin.

Messrs. Martyn and Wimer have opened a pork store in Paris.

The hop crop of British Columbia was a good success this year.

E. & A. Wigzell have taken over the confectionery business of W. J. Watson, Chatham.

Ogdensburg merchants complain that produce is smuggled across the border from Canada.

Messrs. A. M. Smith & Co., wholesale grocers of London, are adding to their bsuiness premises.

From New Westminster, B.C., one day recently 40,000 barrels of salt salmon were shipped to Liverpool, Eng. This trade is increasing every year.

Gananoque butchers have formed an association for protection. It appears that the stores sell fresh meat, and the knights of the cleaver will endeavor to restrict these sales to not less than a quarter of beef or lamb, as the case may be

This world is but a fleeting show,
And no wise man regrets it,
For man wants little here below,
And generally he gets it.

At the C.P.R. stock yards there are fourteen cars of cattle going east for export to France, a new port that has recently been opened for Canadian live stock. They are being shipped out by Mullins & Wilson, of Toronto, and were picked up along the M. and N.W. Railway. The animals are choice. One shipment of Manitoba cattle made by this same firm to France a few weeks ago gave complete satisfaction to the purchasers.—*Free Press, Winnipeg*

The Renfrew Creamery Company are now constructing what is said to be the largest creamery in Canada. It is 44 feet wide, 160 feet long, three stories high. The boilers are 35 horse power and the engine 12 horse power. Two separators will be used for the present, with more when the demand requires. Two 400-gallon churns, one receiving vat of 500 gallons, two creamery vats of 300 gallons and one tempering vat of 250 gallons are named in the contract for the furnishings. The milk will be skimmed at four skimming stations and the cream sent on by rail to the central creamery.

BOOT AND SHOE ITEMS.

Wet weather, which has at last begun, has stimulated trade in rubber goods.

Toronto retailers are selling a patent leather walking shoe, Goodyear welt, at $4.50.

For men's evening dress a patent leather, with cloth top and medium toe, at $4, is selling well

For winter wear a tan boot, Blucher cut, that can be retailed at from $3 to $4, should find good sale.

The swell walking shoe to-day is of patent leather, with razor toe, either plain or with toe-caps or wing-tips.

Foot-ball boots still retain a prominent place in window displays, although the season for the fascinating game is drawing to a close. Hockey comes next.

When leather is discolored an application of aniline dye, in color to match, and a coating, when the dye is dry, of the white of an egg will restore the original color of the spots.—*Review.*

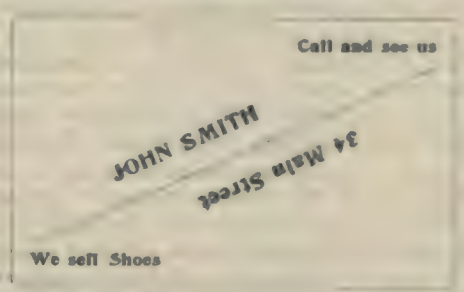
A retailer the other day was objecting to the disuse of the word "women's" by the trade. Price tickets and placards universally read, "Ladies' Shoes." There is no reason for the change; "woman" is good old Anglo-Saxon, and should be preserved. Saleswoman is a preferable word to "saleslady."

More than usual attention is being paid to cork soles this season, both as regards men's and women's footwear After the rain has ceased to fall many dislike to be bothered with rubbers, but the small pools that linger on the pavements make these a necessity unless cork-soled footwear be worn. This branch of trade has received considerable attention at the hands of manufacturers, and no great objection can now be made to them on account of either appearance or weight

In conversation with the representative of a large Quebec boot and shoe house, he expressed himself as very strongly opposed to an advance in the price of leather at the present juncture The boot and shoe trade now stands, he says, as it were upon the threshold of better things, and until further progress is made in the right direction nothing should be done towards raising prices All of which means that he would have thetanners grin and bear the pressure of inadequate profit just a little longer.

Shoe manufacturers, says the *Chicago Review*, are in the main busy, and all the accounts of salesmen are to the effect that there will be a recurrence of prosperity next spring The craze for shoddy foot gear is thought to be dying out It may be trusted to the common sense of the American people that they will not continue to buy that dearest of all articles of wearing apparel—the cheap shoe On the other hand, costly and expensive styles, designed for the ultra-fashionables, will not be wanted in large quantities Durable goods of correct style and finish, that can be offered at reasonable prices, will enjoy the most prosperous run.

There is nothing more effective in drawing trade than a live advertisement in a good medium. Change your display weekly It pays How would something like the following do for next week's issue



The three words up side down on the under side of the line have just mystery enough about them to make the reader reverse the paper to see what they say. Men are inquisitive—as well as women.

LUMBER AND TIMBER PIECES

The value of the building operations in Woodstock, New Brunswick, this year, exceeded in the aggregate $100,000

The saw mill of Moore & Macdowall, of Prince Albert, Saskatchewan territory, was closed down for the season on Oct. 1st.

John Piggott & Co., of Windsor & Chatham, Ont., have bought a million feet of pine lumber from Pitts & Co,, of Bay City, Michigan, which transaction emphasizes what was said on page 578 of last issue

The last consignment of shingles of the season, about 550,000, arrived recently from Mr. A. Gibson's mill for Mr. J. Willard Smith. During the season Mr. Smith has received six million shingles from this mill.—*St. John, N.B., Telegraph.*

The corporation drive is expected to reach the Fredericton Boom Company's booms in about a week, and the river will then be entirely clear of logs, the 10,000,000 feet which were hung up above Woodstock being all in this drive. Some of the logs have passed the city.—*Fredericton Gleaner*

A prominent Ottawa lumberman informs a *Citizen* reporter that almost all the deals to be sawn next year in that district have been sold, a great deal of it having been bargained for during the past week. As far as known all the manufacturers, with the exception of Mr. Booth, have sold the season's cut

A Fort Kent lumberman says that the cut on the American side at the head waters of the St. John will be smaller than usual this year. On the Canadian side the cut will be increased. Page and Mallett will get out two millions for Randolph & Baker; C. H. Dickey, a million and a half for Steton, Cutler & Co.; John Sweeney, a million, for S. T. King & Sons. Neil McLean, a million, for Miller & Woodman. W H Cunliffe, two and a half millions. J A. Lavertie, a million, for Randolph & Baker. A Cushing & Co. two millions J L. Stevens, a million and a half, for E L. Jewett J A Morrison, a million and a half, for Hale & Murchie.—*St John, N B., Record*

This winter the lumber operations in this county will be conducted on a larger scale than ever before. In some sections the fires of the past season have made it necessary to cut extensively to avoid a large quantity of lumber going to waste The Shulee Lumber Company will probably get out about five times the quantity ever cut a single season before Upwards of 60,000 or 70,000 pieces of piling will be taken out, and 6,000,000 feet of sawn lumber At present they have 10,000 pieces of piling yarded in the woods, forty or fifty horses are at work, and 100 men By the end of November there will be 150 horses and 300 men in the woods at different points working for the company Two portable mills will be run all winter The other operators who lost heavily in the late fires will be forced to cut extensively.—*Parrsboro, N S., Leader*

LEATHER, HIDES AND SKINS.

The tanners were in town this week, and dignified looking men they are.

There must be a rumor abroad in the land that tanners are making money. Within the last few weeks the tanneries at Richmond Hill, Aurora and Whitby have been visited by burglars

The week has ruled rather quiet in the Chicago packer market. Holders are said to be well sold up and what firmness there is may be wholly attributed to the smallness of the stocks in salt.

Exports from Canada to the United States of hides, skins and furs during the June quarter were valued by provinces as follows: Maritime Provinces, $7,838; Quebec, $27,224; Ontario, $122,857.

A Leicester, Eng., correspondent, writes: "The sales of leather are very small, and supplies of English, American and Australian tannages are very abundant, and prices are extremely low."

What is described as "the largest shipment of hides ever made from Ottawa" was shipped last Saturday by Messrs. Slattery & Terrance. They consigned 2,877 hides to Mr. John Price, of Montreal. They were sold, our informant says, at 4 5-8 cents per pound.

"We are not complaining of market quotations," said a tanner, "although they are low enough. The shading of these quotations are what we object to. It is all nonsense to lay all the blame for low values upon the eastern tanners; some of the Ontario men have been selling at prices which if continued must eventually close us all up."

After six weeks of confinement to the house, through an unfortunate driving accident, Mr. D. W. Alexander has again appeared on the street. We congratulate Mr. Alexander upon his recovery. Last week a change was made in the business premises, and Mr. Alexander's warehouse is now situated on the corner of Scott and Esplanade streets. The building was formerly occupied as a warehouse by Eby, Blain & Co., and is roomy enough to do the whole leather, hide and skin trade of Toronto.

The official figures copied from the books of the secretary of the Stockyards Company, says the Chicago *Review*, show that the slaughter of cattle for the ten months of this year is 192,835 head less than for the same period of 1893. In connection with this fact it should also be remembered that 1893 marked a decline in the kill of more than 200,000 when compared with 1892. From this it would appear safe to place the decrease of slaughter in Chicago for 1894 as compared with 1892, at 400,000 head.

INSURANCE MATTERS.

One day last week, presentation of a piece of plate in the form of an inkstand and tray, was made to Mr. Edward R. Munro, late inspector of the Guarantee Company of North America, on the occasion of his leaving Montreal for Pittsburg, Pa., to enter upon his new duties as secretary of the company at that branch. Mr. Munro used to reside in Toronto, and went to Montreal about 1886.

The quarterly report of the Philadelphia Fire Insurance Patrol, says the *U. S. Review*, shows the number of fires occurring during the quarter ending with September to have been 378, causing a loss of $177,181, as compared with 417 fires, with losses of $168,051, during the corresponding period of 1893. The report for the first nine months of the year showed 1,224 fires, with losses of $989,991, against 1,174 fires, with losses of $852,150 for 1893, a very decided increase in the fire loss.

Therefore, I would say to the timorous, hesitating agent: Be not dismayed by a defeat. What is defeat? Nothing but education, nothing but the first step to something better. Fight the battle of life with courage. Here a little excess of fierceness even is far more excusable than a distrustful sluggishness. In the ringing words of glorious Will: "Be stirring as the time; be fire with fire; threaten the threatener; outface the brow of bragging horror; so shall inferior eyes that borrow their behaviors from the great grow great by your example and put on the dauntless spirit of resolution."—*Geo. W. Phillips*,

Incendiary fires seems to be on the increase in New York, where certain foreigners, and especially on the East side, most do congregate. Deputy Fire Marshal Thomas Freel got information of over six fires before the same were started, and caught the incendiaries redhanded. On Canal street the other day, with a Central Office detective, he bounced into a big tenement ordering people out as he ran, and caught a fire bug and his accomplice, a woman, who with stolen clothing in their possession were leaving a room. The usual can of benzine and fuses leading up to it were there, and a healthy fire started. Mr. Freel has clear evidence in these cases, and has evidently proved a valuable officer.

It is now almost a quarter of a century since the Agricultural Insurance Company, of Watertown, N.Y., began insuring farm property in Canada. For many years the company did a large business in that class of risks. However, during the last few years, and especially since he change of management took place here, the farm house branch was not pushed as formerly, the reason being that it was not found profitable. Now we learn that arrangements have been made with the London Mutual Insurance Company to carry all the existing farm risks of the Agricultural, and the policy-holders in the latter company will have their policies exchanged for those of the London Mutual. This company has, as everyone knows who has had any transactions with it, always paid its claims promptly. The Agricultural will of course continue to write policies in cities and towns as formerly, and its $2,170,000 of assets will be available in the event of loss.

BOOKS RECEIVED.

TWELFTH ANNUAL REPORT, Ontario Board of Health, for he year 1893. The report of this board, of which Dr. Macdonald, of Guelph, is chairman, and Dr. P. H. Bryce, of Toronto, secretary, contains reports on Steam Disinfection; on the Air Space and Ventilation of Buildings; the Examination of Drinking Water, which are all of interest. Also annual addresses and reports of officers, reports on special examinations and the annual reports of loca boards of health in Ontario cities, towns and villages.

REPORT OF THE SUPERINTENDENT OF INSURANCE of the Dominion of Canada, for the calendar year 1893. S. E. Dawson, Queen's Printer, Ottawa.—We are glad to have now, with the compliments of Mr. Fitzgerald, the completed volume, portions of which have been acknowledged from time to time. It consists of 573 pages, of which 448 are devoted to reports of companies, while 125 comprise the report of the superintendent, with the abstracts, &c., compiled under his direction, together with legal decisions and extracts from Orders-in-Council, &c.

HISTORICAL ALBUM—The Queen's Own Rifles.—This neat book* will no doubt find many to buy it, as well as welcome it, for there are ex-members of the famous Queen's Own scattered up and down the Dominion who will be glad to know of the issue of such a book and anxious to possess a copy. The feature most generally attractive will doubtless be the portraits, of which there are about a hundred and twenty, beginning appropriately with those of Col. Durie and Col. Gillmor, after whom follow in order subsequent commanders of the battalion, the majors, surgeons, captains, lieutenants, winding up with an array of some twenty sergeants. An historical sketch of the origin, growth and career of the regiment is furnished by Capt. E. F. Gunther. He tells how the first four companies were reviewed in 1860 by the Prince of Wales in the Queen's Park; how four months and six months' frontier duty was done by three companies in 1864, during the American war; how, when Canada was worried by the pestilent Fenians in 1866, half the battalion went with other corps to the Niagara frontier, and left seven of its men dead and twenty wounded on the field of Ridgeway. Again, in 1877, service involving hardship and risk was done by a detachment sent to Belleville to protect railway property on the occasion of a strike of hands on the Grand Trunk Railway, while the half-breed rising in the Northwest, and the part our volunteers took therein, is described with soldierly brevity. The compilation of lists of members of companies, etc., is carefully done by Mr. H. Bruce Brough, and the book is clearly printed on toned paper by the Brough Printing Company, limited.

CLEARING-HOUSE RETURNS.

The following are the figures of the Canadian clearing-houses for the week ended with Thursday, Nov. 8th, compared with those of the previous week:

CLEARINGS.	Nov. 8.	Nov. 1.
Montreal	$14,196,293	$10,180,286
Toronto	6,149,448	5,117,886
Halifax	1,295,422	1,043,426
Winnipeg	1,650,810	1,483,150
Hamilton	903,396	.....
Total	$24,195,369	$17,824,748

Aggregate balances this week, $3,921,533; last week (Hamilton not furnished) $2,270,149.

—It is a serious thing to chill enthusiasm, or to disappoint hopes of a holiday, and yet this is what THE MONETARY TIMES has done in one case at least. By an error on page 575 of last issue, in printing the first Monday in November as the date of Labor Day, instead of, as we should have said, the first Monday in September, we disappointed one young man who called on us to complain that we had spoiled his holiday on the 5th instant.

* Illustrated Historical Album of the Second Battalion The Queen's Own Rifles of Canada, 1856-1894. Printed and published by permission of the Officers of the Regiment. Price one dollar. The Toronto News Company, Toronto.

Correspondence.

WHEAT STANDARDS

Editor MONETARY TIMES:

SIR,—I have nothing to do with either the Montreal or the Toronto Boards of Trade—officially, that is, and I don't propose to defend them in the action they took in complaining of mixing wheat in Lake Superior elevators. They can probably do this themselves. But what riles me is the scornful and stand-and-deliver sort of way that the Winnipeg Grain Exchange talk back at them.

This memorial that the Winnipeg men send to Government seems to me to have been written by two different men, an old head and a young head. One part takes the pains to argue the questions in dispute. The other cheekily says: "Who are you Montreal and Toronto men, any way? What business is it of yours how we run our business? You are a disgruntled lot of sand-baggers down in the effete East. We have no grievances, and why should you have any? You are worse mixers than we are, anyhow. Finally, you go to Jericho."

Now, Mr. Editor, this is no way to settle a business question, namely, the degradation of grain, which, in my opinion, is too important to the whole country to be burked by bullying language. If Eastern men are guilty of it, let them be found out and punished. If Winnipeg or Port Arthur men, ditto. This memorial talks about "right and title to the business of Manitoba." Why, God bless us all! if it had notbeen for these much abused "Eastern men," there would never have been a Winnipeg Grain Exchange. Yours truly,

SOBER SIDES

Kingston, 7th Nov., 1894

AMERICAN CURRENCY QUESTION.

ADDRESS OF HON. JAMES H. ECKELS BEFORE THE BANKERS' ASSOCIATION AT BALTIMORE.

Mr. President, Ladies and Gentlemen,—When it was suggested that I should prepare a paper for this occasion, I replied that having had the honor at the last convention of the American Bankers' Association to deliver an address, I should content myself now with simply a few extemporaneous remarks. I felt that I should like to meet those here present because the great majority, I take it, are in the system over which I have the honor to preside. That system, springing out of the necessities of a great war, founded for the purpose of affording to the United States a market for bonds necessary to be issued to meet the expenses of government, has grown until at present there are more than 3,800 National banks throughout the Union, employing a capital of more than 650 millions of dollars, possessing assets amounting to more than three billions, and whose business relations extend, not only over this great continent of ours, but reach to every point within the circle of the globe where the doings of commerce are carried on. In the past it has been a successful system. It has met in a large measure the needs and wants of the people in their daily business transactions. It has done much to uplift and simplify the business transactions of the world. It has given a currency which, at least, has been sound in fact, so that every bill which has been issued by it is of the value which it purports to carry.

Whether that system, now that other changes are coming upon the people, will meet the requisites of business and of the daily transactions in the matter of the issue of currency, is a question which is open to discussion. Whether or not any system of issuing currency, founded upon a deposit of securities, has that other equal requisite, a quick response to the needs of the people in their business transactions as well as safety to the holder, is a question which can be discussed with profit at such a gathering as this

There is nothing so deserving of attention, so deserving of candid thought and intelligent study, as the question of finance. We may have upon the statute books laws which interfere with the individual liberty of the citizen, and yet the American people can stand up under such a burden. We may have on the statute books laws which unjustly take from one and give to another, and yet the mighty energies of the American people can so assert themselves that we can still compete with the whole world in manufacture and in art. We may have upon the statute books laws which are unjust in interfering with the proper rights of property, and yet our country prosper. But we cannot crystallize into a statute and make it the law of the land any idea which makes, either at home or abroad, the soundness of our financial system a matter of question.

No legislator ever sitting at Washington, in the discharge of his duty, legislated upon a financial question for the American people alone. The questions of finance touch not alone our own people, but they touch the people of every country with whom we are carrying on financial transactions. There may be those who have discovered the art of making this country of ours, within and of itself, able to maintain a money discredited elsewhere, and yet not suffer for it; but if there be they have not demonstrated by the events of history that the thing has been accomplished. You cannot, if you try, separate the United States and its financial system from the other countries of the world and their financial systems until you have builded about it a wall that is more certain to keep the outsiders out than a Chinese one, and you cannot here maintain a financial system which does not accord with the financial systems of the countries other than ours, until it has been determined by statute and carried out by the acts of the people, that this country shall carry on no business transactions with others save the people who reside within our own borders

Therefore, however friendly we may feel to any money, whether it be of metal or paper, unless it is evident by facts instead of theory that that money will meet the obligations of the people of this country both at home and abroad, this country cannot afford to enter upon the use of it. You cannot experiment in finance without danger. You cannot undertake a system of currency unless it possesses the confidence of the people, and it can only possess the confidence of the people when every dollar of it is either intrinsically or representatively of the value which it purports to carry. There has never been an experimental statute placed upon the statute books but that it has found its fruition in widespread financial distress. There never has been an attempt on the part of a nation or State to have either a monetary system or a banking system that was inherently unsound, but that the result has been great panics and great financial disorders. The history of the legislation of this country, colonial, federation, State and national, demonstrates the truth of the assertion, and the record of panics from first to last has been that the origin of them in the very largest measure has been in the enactment and the operation of some financial law of the country. The financial depression through which this country has just passed had for the culminating cause a piece of experimental legislation upon the silver question, and it found its results, as was predicted by the student of financial history here and the observer abroad at the time it was finding its enactment, in what the people of this country have just witnessed

It is, then, worthy not alone of your attention, but of the attention of every citizen, whether he be a manufacturer, a merchant, a capitalist, or, above all, a laborer whose only income is the money which he receives in payment of his daily wage, to consider whether or not this country can afford to have any other than the very best financial system that the world knows, and a money which under any and all circumstances carries the full value which it purports to carry.

Unwise financial legislation has produced disasters in the past. It will produce disasters in the future, and greater disasters even, because each disaster through which the American people pass lessens their energies and depletes their material resources. Therefore, it cannot but accomplish good when there is brought together a body of men who, animated by the single purpose of accomplishing good for the country, for the government and for the people, undertakes and does discuss intelligently and patriotically monetary subjects.

I congratulate you upon this meeting, and I trust the outcome of the discussion upon the currency, which I understand is upon this day's programme, may not alone be profitable to you but to the whole people, and whether or not you may formulate a plan which will commend itself to the legislative body at Washington you still will have advanced the cause, because you will have directed the attention of the people and of Congress to the fact that at last you are thinking upon a plan which will be definite, and which you desire to submit for their consideration.—*Rhodes' Journal of Banking*

MONEY AND SHARES

The week has not been without its encouraging features and the stock market shows activity averaging as [illegible] than a week ago. But as the more [illegible] have been disappointments in the share market. At the time of writing [illegible] are reported at 62½ and 63 in New York, and 62½ and 63 in Montreal and the London market having closed [illegible]. The break in Montreal of Dominion Cotton Company stock is to be regretted as this has been numbered among the best of our industrial securities. The decline was caused by a notice that the quarterly dividend, which is to be paid soon, will be 1½ per cent. instead of the usual dividend of 2 per cent. A reduction in the earnings of the company was to be expected. For although the wages of the employees in the various mills have been reduced and [illegible] working expenses pruned the decline in prices of manufactured cotton [illegible] must have seriously affected the net earnings of the company. The dividend per annum stands now at 6 per cent. three years ago the annual dividend amounted to 10 per cent

Money is easy, but bankers decline to lower the rates. And it would appear that its low price is not without drawbacks. Many [illegible] are taking advantage of the low rates to increase their indebtedness by floating debentures. But debt is debt, whatever be the rate of interest, and debts some day have to be paid. Municipal corporations, like private persons, are often encouraged to enter into extravagance by cheap credit. There is some talk of bringing down the rate of gilt-edge call loans to 4 per cent., but for the present it remains at 4½ to 5 per cent. In New York the call loans on stock collateral are offered at 1 per cent. The time loan market is also extremely [illegible]. Business is reported to have been done as follows: 1 per cent for thirty days, 1½ per cent. for sixty days, 2 per cent. for ninety days, 2½ per cent. for four months, and 3 per cent. for longer dates

BREAKERS AHEAD

The world moves. Knowledge is increasing. Science is moulding opinion. A great change is coming over the surface of one phase of life insurance. Past experience and the laws of nature are convincing many well-meaning but misinformed advocates of the assessment system of life insurance that the ship they originally launched to ride the waters of human life will not stand the heavy seas and dangerous coasts. Far-seeing and expert mariners, like George D. Eldridge, of Washington, and L. G. Fouse, of Philadelphia, have been for some years mapping out the course and taking the soundings of about twenty well-known assessment insurance companies. They have also been looking through their telescopes, and as a result they have hoisted the signal, "Breakers Ahead." This warning, coming from assessment insurance men, and addressed to assessment insurance companies, has all the more force; and, moreover, it is a warning based on *facts*

It may not be generally known that since the year 1885 the leading assessment companies in the United States have been each year supplying their actual experience of exposures, deaths and lapses to a central bureau, which has tabulated their combined experience, from which valuable lessons are being drawn

Mr. L. G. Fouse, perhaps the leading authority in America on assessment insurance, says:

"So far as the mortality element is concerned, I say to you frankly, we should adopt one of the standard tables. We (assessment companies) have no immunity from [illegible] and the gain from careful selection [illegible] temporary, its effect disappears entirely about the seventh or eighth year. Those companies which have [illegible] rate they have had during the first year of their existence, will before a great while be confronted with the *vengeance of the law of average*. If the death rate has been phenomenally low for a term of years, it simply means that it will be phenomenally high for (approximately) a corresponding term of years. To be on the safe side, a company should always collect the tabular rate even if the death rate should be 50 per cent. below it

These are the words of the president of an assessment insurance company, and [illegible] dent of the Convention of Assessment Life Underwriters

Again, Mr. Geo. D. Eldridge, lately of Washington, now an officer of the Mutual Reserve Fund Life Association, writes thus:

"Is there any reason for us to suppose that we can say we are able to furnish life insurance, as life insurance, any cheaper than the experience from (old line) standard tables indicates that pure life insurance can be furnished? *I see no reason for expecting that anything of the kind will occur.* I see no reason for expecting that (as far as pure life insurance is concerned, and for those who have been in the companies 10 years or more), we (assessment companies) can do any better than the experience of the old-line companies shows can be done; and that is what I am getting at. It has been held out by certain parties that we can furnish life insurance cheaper, and this assumption has been based upon the computations and calculations which have been made upon *recently selected* lives. Therefore, if I was going to answer this question, I would answer it that our experience shows that the premium rates for pure life insurance, based upon the compilations of mortality statistics of insurance companies, are practically the pure rates upon which *we* can furnish life insurance."

Here is food for reflection for members of assessment societies. Here is the opinion of careful students of the laws of mortality. The secret is out. Unless the great mass of assessment societies get out from the breakers into the deep waters of the standard mortality tables, *the vengeance of the law of average* will overwhelm them.

Messrs. Fouse and Eldridge are in advance of their fellow-laborers. Many of the latter will only be convinced when it is too late.

A sign of the times was the admission of President Harper, of the Mutual Reserve Fund Life, when he stated at the 1893 Assessment Convention that "it was only within the last sixty or ninety days that I called a meeting of my board *to increase the rates;* but before I could get my notices out, the mortality ran down to such an extent that it was not necessary to make the change."

In the following table (column 2) we give the actual death rate of 22 assessment insurance companies reporting to the bureau above referred to. We add the corresponding experience of the 30 American life offices, also that of the Mutual Life of New York. It will be seen at a glance that while the assessment rate of mortality is lower in the early years of the policy, yet after the 6th year it rapidly increases beyond the old-line rate, and in the 16th policy year it is as high as the old-line rate is in the 26th year.

DEATH RATE PER 1,000.

Policy Year.	22 Assessment Companies. (Actual Exp.)	30 American Old-time Co's. (Meech.)	Mutual Life Experience. (1874.)
1st	2.28	6.29	4.98
2nd	5.85	8.10	6.49
3rd	7 82	9.21	7.61
4th	8.95	10.00	8.55
5th	9.50	10.91	9.28
6th	10.75	11.36	10.08
7th	11 23	11.68	10.35
8th	12 57	12.25	11 07
9th	13.64	11.96	10.02
10th	15.63	12.31	11.51
11th	18.24	12.73	12.20
12th	17.87	13.36	14.19
13th	18 62	14 91	13 60
14th	19 94	14.06	10.50
15th	21 18	14.64	12.23
16th	30.56	14.79	14.44
.....	..	....	....
.. ..	..	....	....
26th	..	30.78	30.16

(No conclusions can be drawn from the rate (2.28) for the first policy year in assessment companies.)

Looking these facts in the face, the Executive Committee of the Assessment Underwriters say:

"It is evident at a glance that the advantage gained during the first six policy years is lost during the succeeding seven policy years."—*Life Echoes.*

THE INEXORABLE FACTS OF HEREDITY.

"I have drank whiskey every day for thirty-five years," remarked a gentleman of sixty, rather proudly, "and I don't see but I have as good a constitution as the average man of my age; I never was drunk in my life." He was telling the truth, but to learn the whole truth you would have to study his children. The oldest, a young lady, had perfect health; the second, a young man, was of remarkably nervous and excitable temperament, as different from his phlegmatic father as possible; the third, a young lady of seventeen, was epileptic and always had very poor health. Did the father's whiskey-drinking have anything to do with these facts? The instance may be duplicated in almost every community. Think over the families of your acquaintance in which the father has long been a moderate drinker, and observe the facts as to the health of the children. The superintendent of a hospital for children at Berne, Switzerland, has found by careful observation, that only forty-five per cent. of those whose parents used intoxicating liquors habitually had good constitutions, while eighty-two per cent. of the children of temperate parents had sound bodies. Of the children of inebriates, only six per cent. were healthy. Can any man "drink and take the consequences," or must his children take the consequences?—*The Quarterly Journal of Inebriety.*

CANADIAN HOMES AND THEIR SURROUNDINGS.

Is it not possible, with comparatively little effort or expense, to make our homes and their surroundings more beautiful and attractive, not only in summer, but all the year round? It must be admitted we have in Canada a good deal to learn in this respect. Our cities and larger towns are now doing fairly well, and in many cases developing a love of natural beauty.

Many of our towns, too, are awakening to the fact that beauty, as well as utility, has something to do with their prosperity. . . . The municipal mind has begun to grasp the idea that it is quite as cheap in the end, and immensly more pleasing, to have streets laid out with grassy boulevards and avenues of elms or maples or chestnuts, as to have broader thoroughfares left year after year in a bare and untidy condition.

Whilst there are many beautiful and happy homes in Canada, and they are rapidly increasing, what does candor compel one to say of too many of them, especially our village and farm dwellings, even in wealthy and long-settled districts? Take our average village first. Here and there you will find pretty houses and lawns, but they are something like oases in the desert, whilst the "ninety and nine" look as if they had been pitched together in blissful ignorance of any such art as architecture, and left without a tree, or shrub, or flower, to hide their naked deformity.

In many parts of Ontario, there has been great improvement in our farm residences and surroundings of late years, and not unfrequently you now find enterprising farmers who, estimating aright the dignity of their calling and one of the chief charms of life, have erected handsome houses on a well-kept knoll or lawn. But how many good houses do you still see standing bare and solitary, without a bit of green sward or other ornamentation around them, and what a vast amount still remain, in whole or in part, of the old, patched-up pioneers, with a weather-beaten, decrepid fence in front, and not unfrequently between the back door and the barn a sort of slough of despond, across which you can only pass by a little Blondinism on a six-inch plank or a ragged piece of scantling?

This condition of things is behind the age in which we live, at least wherever improvement is practicable. In some cases this may not be so. Where a farmer or villager can only improve his home by neglecting his work or running into debt, his duty is to bear with things as they are until he can better them. But for any Canadian who is comfortably off, to go on from year to year adding dollar to dollar—salting dollars down, so to speak—whilst his home is not comfortable, cheerful, happy, and in some respects, even beautiful, I can scarcely imagine any greater folly! Such a one misapprehends the true objects of life and labor, is unjust to himself and family, and he need not be surprised if he finds his sons wandering off to spend their evenings elsewhere, and even rushing into the glare and glitter of large cities and becoming lost to him forever.

The day has already come in Canada when the man whose front yard consists of a dilapidated tree or luxuriant weeds, including his lordship the thistle, is considered a shiftless and undesirable neighbor. On the other hand, the citizen whose dwelling, however humble, is kept neat and trim, and beautified by even a few tastefully placed trees, shrubs, vines and flowers, is regarded somewhat as a public benefactor, for his place is not only a source of pleasure to himself and family, but he adds to the attactiveness of his town or neighborhood; and every lover of nature—and who is not?—enjoys the scene as well as himself.—*Hon. James Young, in Canadian Magazine.*

THE BITER BITTEN.

The Germans are not noted for their humor, but the reply of their Foreign Office to American protests against the prohibition of imports of American cattle is rather neat. It is that the "empire as such" has done nothing to offend the most delicate American sensibility, but that the separate states, purely as sanitary measures, over which they have entire control, have seen fit to keep out American cattle. The humor of this, which may, after all, be unconscious, lies in its being addressed to a country which has advanced the same excuse for much graver offences. When Rudini was thundering away about the slaughtered Italians in New Orleans, and the government of China was calling for reparation for the massacred Chinese in Oregon, our answer was that the States were alone responsible and that the federal government could do nothing. If men can be killed on that theory, certainly Texas steers can be excluded. It is not often that a diplomatic chalice is so speedily commended to the lips of those who first offered it.—*N. Y. Post.*

—Mrs. Browne—"Shall we go to the whispering forests or the murmuring sands, Henry?" Mr. Browne—"I don't care, so long as we get away from the muttering creditors."

—Guelph claims to have put up over $150,000 worth of new buildings this year. This includes $37,000 for the new Opera House and $30,000 for St. Joseph's Hospital. The rest are mostly private dwellings.

—Head of the Firm—"Did you get an order from that buyer you were with yesterday?" Trainmaker—"No, sir." Head of the Firm—"But you were opening wine with him all day." Trainmaker—"I know it. But when we got through he couldn't write."

Partner Wanted.

In an old-established and profitable wholesale business in Winnipeg, to take place of one who wishes to retire on account of ill-health, but would retain financial interest: capital required not less than ten thousand; excellent opening, especially for young man desiring to start in business. Apply in first instance to W. B. McMURRICH, Esq., Q.C., Toronto.

For Sale

Good paying, well established broker business and fire insurance agency, representing the Ætna, Hartford, North British and Mercantile, Liverpool and London and Globe, Manchester and other first-class companies in the best town in western Ontario. Splendid opportunity for practical, responsible man. Satisfactory reasons. Terms easy. Address **Box 275, Berlin, Ont.**

Store for Sale or to Rent

A well established general store business in the thriving town of Georgetown; the best store and stand in the place; fitted up with all the modern improvements; gas, electric light, plate glass; this town is surrounded by a cluster of villages, having a population of about 1,300 and a rich agricultural country. The chance of a life time for a live business man. Possession when agreed upon.

WM. McLEOD & CO.,
Georgetown, Ont.

Office, Cellar and Top Flat of

FIRST-CLASS WAREHOUSE

on Front St. East, for rent. Exceptional facilities for shipping and handling heavy goods. Address

"B," Care Monetary Times.

PARTNER WANTED.

Capital required $10,000. For a well established, profitable wholesale business. I personally investigated and recommend it.

G. W. YARKER,
Union Bank Bldg., Toronto.

CHENILLE AXMINSTER CARPET IN PHILADELPHIA

One of the most important transactions of the past month was the organization in Philadelphia of a company for the manufacture of genuine chenille axminster by power. This, we believe, has never been attempted in Philadelphia, though hand-made axminster of a creditable kind has been made here. The present patent hails from Canada, being owned and made exclusively by the Toronto Carpet Manufacturing Company, of which Mr. James P. Murray is president. Mr. John R. White, of Boyd, White & Co., is the principal organizer of the new enterprise, in the formation of which he has had, during two weeks of the past month, the active presence and direction of President Murray himself.

The fabric to be made was exhibited at the Chicago Exposition, in the booth of the Toronto Carpet Manufacturing Company, on the main floor of the Palace of Manufactures. The extraordinary heft and deep pile and ingenious back of this axminster deeply interested such experts as stooped to examine. The award given it was the only one granted, so far as we know, to power loom chenille axminster designated as such at the Exposition. This fabric, which was perfected at Toronto, is notable for its remarkable wearing qualities, for the tenacity of its pile (sweeping off being almost impossible), the unlimited range of its colors or designs, and for its remarkable cheapness.

This organization will be styled the White-Murray Carpet Company, its chief business being the manufacture of power-loom chenille axminster carpeting, rugs and mats. The rugs from this fabric are now widely used over Canada, and the makers of late have been unable to keep pace with their orders. The fabric has the same affinity for light and delicate colors that is observed in moquette, but discloses its strength quite as well in dark-rich colors. A special emblematic design in crimson, recently executed for the Toronto Athletic Club, is pronounced a remarkably attractive carpet.

The company has been organized on a basis of $200,000 capital, the intention being at an early date to place the requisite number of looms and to proceed at once to the weaving of goods in Philadelphia. It is presumed that Mr. John R. White will be president of the company, and that the board of directors will include some of our leading capitalists. The promoters feel assured of a quick market for their product, the experimental stage having been passed two years ago in the Toronto mill.

This new axminster and the machinery to produce it is covered by patents both in Canada, the United States, and European countries.—*Carpet Trade Journal*

The oldest of lighthouses in the modern world is that of Cordonan, in the Bay of Biscay, at the mouth of the river Gironde, in France. It was begun in the year 1584 and finished in 1610, a hundred years before the English Eddystone lighthouse.

Banking Office in Newmarket.

Banking office in Newmarket—the late stand, with vault and fittings complete, of the **Federal Bank**; previously occupied by Consolidated Bank, and formerly by the Royal Canadian Bank. Apply to

UNITED STATES FIRE BUSINESS.

Touching this, in which so many British offices are interested, the returns for the first six months of 1894 show a considerable improvement upon the corresponding period of 1893, but no improvement as against the corresponding period of 1892. As 1892 was a very different year for British companies in the United States—in fact all around it was a very lean year—it is clear that the worst has not yet been seen of business in the Eastern States, and the outlook is anything but encouraging. To the few offices who avoid touching the business, it is a puzzle why the British offices remain in it, as, taking an average of years, no money is made. Sometimes a big haul is made, and the offices are jubilant until the following year, when the fire fiend awakes and devours the profits. The step taken by the Guardian to retire from the field was a bold, as well as a wise one, and all kinds of excuses have been framed on the part of our American contemporaries to account for the withdrawal, the principal one being that of niggardliness; but such an excuse will not for a moment hold good, as it is well known that the Guardian is not an office that a charge of niggardliness can be levied against. Mr. Relton is not the man to throw away a quarter of a million of premiums if even the very moderate surplus of 4 per cent. on the trading account could have been secured. The step was a wise one, and we may venture to predict that it is one that will be followed by other British offices in the near future. Rumors are current about several companies, and there is never smoke without fire.

The following are the returns for the six months ending 30th June, 1894, of the operations of the British fire insurance in the United States, referred to above:

	Income.	Expenditure.
Caledonian	$1,520,617	$1,017,172

—Irish Investors' Guardian.

—Up to date, says the Winnipeg *Free Press* of 3rd inst., the receipts of wheat at the Fort William elevators from Manitoba have been 5,500,000 bushels, which is about the same amount that was received to December 1st last year, showing a full month's business in advance of 1893. The activity still continues, and it is believed will extend into the new year.

MONTREAL MARKETS.

MONTREAL, Nov. 7th, 1894.

ASHES.—Owing to a light export demand there has been a slackening in the value of pots, which are now quoted at $4.30 to $4.35; seconds can hardly be quoted at more than $3.80. Pearls show better value, being quoted at 40 shillings in London, and 42 shillings in Liverpool, which would warrant a local quotation of $6.75 to 7.00 per cental.

CEMENTS AND FIREBRICKS.—There are some very fair lots of cements going forward on orders booked previously, and the indications are that stocks carried over will be light. We quote: English, $1.95 to 2.05. Firebricks are in light demand, but stocks are small and prices firm at $17.00 to 22.00 per M.

DAIRY PRODUCTS.—Last week showed a material improvement in cheese shipments, 72,770 boxes having been taken by outgoing steamers, making the aggregate to date 1,512,329 boxes, which is nearly 40,000 ahead of last year at date. We quote fine Western, 10¼c.; Townships, 10 to 10⅛c.; Eastern, 9⅛ to 9½c. per lb. The export trade in butter this season has been a mere bagatelle, shipments of only 30,876 being reported. A fair local business is being done in late made creamery, but other grades are dull. We quote creamery 18½ to 20½c.; Townships' dairy, 18 to 19c.; Western, 16 to 18c. Good boiling eggs bring 15 to 17c.; packed, 13 to 14c. per dozen.

DRY GOODS.—We do not learn of anything especially interesting in recent English advices, except that there has been recently a rather better demand for goods. Woolen goods are firm, and there is a supposition that there may be some advance in goods for next fall trade. American cottons, which were advanced upon the settlement of the tariff question, are back to old prices. In domestic fabrics enquiry develops nothing new. There are indications of colder weather, which is badly needed to help along retail trade, which has been very slack in both city and country, and assorting business has been small of late in our warehouses.

Speaking to You

GROCERIES.—Interior traffic is hampered by bad roads, and orders are reported on the light side. In teas, however, there has been some very fair business done, principally in low grade Japans, for which there is a particularly strong market. One house reports sales of 812 packages to two western American points, and a bid from St. Paul for several hundred packages at a similar figure has since been declined. Even finer goods are now getting scarce in first hands. A London letter just to hand reports an advance of a penny to 2d. in Assams and Ceylons, with large transactions taking place. There is not the usual fuss over new dried fruits, and business is just moderate. Valencia raisins this season are considered rather "off" in quality. Currants are cabled three shillings up, and some dealers would not sell under 4c. for London standard. Quotations for new Bosnian prunes are just to hand, and the cost laid down will be about the same as last year. The second Mediterranean steamer arrived last week with further supplies of Valencia raisins and currants, but imports this season are unusually light. Molasses is a shade stiffer under decreasing stocks, and 28c. per gal. is now asked in quantity, single puncheons 30c. Canned goods have apparently become a mere side show, and are little heard of.

LEATHER.—Quietness marks the situation. A little slaughter and Spanish sole is selling, but very little black leather. There is not much leather coming forward, and stocks are reported smaller than usual at this season. Most of the travellers for shoe manufacturing houses are now out with spring samples, and fair sales are reported in some cases. We quote:—Spanish sole B. A. No. 1, 18 to 20c.; do No. 2 to B. A., 17 to 18c.; No. 1 ordinary Spanish, 17 to 18c.; No. 2, 16 to 17c.; No. 1 slaughter, 18 to 20c.; No. 2 do., 17 to 18c.; American oak sole 30 to 42c.; waxed upper light and medium, 24 to 26c.; do heavy, 20 to 24c.; grained, 24 to 26c.; Scotch grained, 25 to 27c.; splits large, 18 to 19c.; do small, 11 to 12½c.; calf splits, 27 to 30c.; calf skins, 35 to 40 lbs., 50 to 60c.; imitation French calfskins, 60 to 70c.; colored calf, American, 23 to 27c.; Canadian, 19 to 21c.; colored pebble cow, 12½ to 13½c.; russet bridle leather, 30 to 40c.; harness, 18 to 22c.; buffed cow, 9 to 11c.; extra heavy buff, 12½c.; pebbled cow, 8 to 12c.; polished buff, 9 to 11c.; glove grain, 9 to 10c.; rough, 16 to 17c.; russet and bridle, 40 to 50c.

METALS AND HARDWARE.—Trade is dull. There have been attempts at business but with comparatively slim results. In pig iron no hear of no recent actual transactions, either in Scotch or domestic. Some moderate lots of American iron are said to be coming in at a cost of about $17 50 to 17 75. The Siemens furnace at Londonderry, N. S., is not likely to go into blast before January. It is said a 100-ton lot of Summerlee has been offered at $20 to arrive. Domestic bars are very easy, and it is reported some transactions have been negotiated at under $1 60 in quantity. Rolling mill men are apparently inclined to be rather eager sellers. Tinplates are easy at quotations. Some lots of inferior brands are said to be in the market at much under our inside quotation. Wasters are little enquired for, and $2 65 would be a sufficient quotation. Lead is slightly stiffer at home. A sale of 20 tons was made last week at $2 75, which is considered a good price. We quote:—Coltness pig iron, none here; Calder, No. 1, none here; Calder No. 3, none here; Summerlee, $21 00; Eglinton, $18 50; Gartsherrie, none here; Langloan, none here; Carnbroe, $18 50 to 19 00; Shotts none here; Middlesboro, No. 3, $17; Niagara No. 2, $18 50 to 19 00; Siemens pig No. 1, $16 50 to $17 25; Ferrona, No. 1, $16 50 to 17 00; machinery scrap, $15.00; common do., $12 00; bar iron, Canadian, $1 65; British $2 25; best refined, $2 40; Low Moor, $5 10; Canada plates—Blaina, or Garth, $2 05 to 2.10; all polished Canadas, $2 75; Terne roofing plate 20 x 28, $5 75 to $6.00; Black sheet iron, No. 28, $2 15 to 2 30; No. 26, $2 15 to 2 20; No 24, $2 10; tin plates—Bradley charcoal $5 25 to $5 50; charcoal I C, $3 50; P D Crown, $3 75 to 4.00; do I X, $4 75 to 5.00; Coke I C, $2 75 to 2.90; coke wasters, $2 65; galvanized sheets, No. 28, ordinary brands, 4½ to 4¾c.; No. 26, 4c.; No. 24, 3¾c., in case lots; Morewood, 5½ to 6c.; tinned sheets, coke, No. 24, 6 to 6¼c.; No. 26, 6¼ to 6½c.; the usual extra for large sizes. Hoops and bands, per 100 lbs., $2 25 to 2 50. Steel boiler plate, ¼ inch and upwards, $2 00 to 2 10 for Dalzell and equal American steel plates, $1 90 to $2; ditto three-sixteenths inch, $2 00; common tank iron, $1 65 to 1 75; tank steel, $1.80; heads $2 85; Russian sheet iron 10 to 10½; lead, per 100lbs., pig, $2 75 to 2 90; sheet, $4 00 to $4 25; shot, $6 00 to 6 50; best cast steel, 10½ to 12c; spring, $2 50; tire $2 50 to 2 75; single shear, $2 40; round machinery steel, $3; ingot tin, 17½ to 18¼c.; bar tin, 25c.; ingot copper, 9¾ to 11c; sheet zinc, $4 50 to 4 75; Spelter, 5c., $3 90 to 4; American do., $4 to 4 25. Antimony 10½ to 12c.; bright iron wires, Nos. 0 to 8, $2 65 per 100 lbs.; annealed do, $2 70; galvanized, $3 35; the trade discount on wire is 20 per cent. Barb and twisted wire and staples, 5¼. Coil chain, ¼ inch, 5c.; ⅜ inch, 4½c.; 7-16 in. 4¼c.; ½ in., 3¾ to 4c.; ⅝ in., 3½c.; ¾ in., 3½c.; ⅞ in. and upwards.

OILS, PAINTS AND GLASS.—Nothing very new can be reported in these lines. The movement continues a fair one. Linseed and remains very firm at quotations, and no further changes are likely to come forward by vessel steamers. Turpentine easy under the competition recently noted. The imperfect returns given 40 to 41c. net cash which is not a great way off the regular trade quotations. Fish and castor oils are unchanged. A German steamer in port has a 500 box lot of glass, about the last of the season, and some stiffening in prices is not improbable on close of navigation. We quote:—Turpentine, 43c. per gallon for single barrels, two to nine barrels 42c. Linseed oil, raw 57c. per gallon, boiled 60c. 5 barrel lots 1c less; olive oil, machinery 90c., castor in lots 6½c., single cases 6¾ to 6¾c., cod, 7c.; Nfld. cod 38 to 40c. per gal.; castor oil 8½ per gal.; steam refined seal, 38 to 40c., in small lots. Leads (chemically pure and colorless brands only), $4 50 to 5 00; No. 1, $4 50; No. 2, $4 25; No. 3, $4 00; dry white lead, genuine red do., 4½c.; No. 1 red lead 4c.; putty

The Time Has Come

The "Economy" Hot Water Combination Heater.

When it is necessary to provide Heating Apparatus for your residences, churches and stores for the coming winter. If your present heaters are unsatisfactory, or if you require a new heater, let us send you our new catalogue and book of "Opinions" of the Economy Heaters. We are engaged EXCLUSIVELY in the business of heating and ventilating all classes of buildings, and we can succeed where others have failed.

TORONTO MARKETS.

TORONTO, Nov. 8th, 1894.

DRUGS.—While business is not active, neither can it be described as dull. A fair amount of orders come in from retailers throughout the city and province. Neither the "ups" nor the "downs" of market values are attracting special attention, and quotations remain without important change. Advices from Smyrna concerning opium are of the "bull" order, and in consequence the feeling is one of firmness. In sympathy with opium morphine is firmer in price. Reports of oil cassia from primary markets indicate firmness with practically nothing offering. A sale of Manitoba senega root, 1,000 lbs., brought 29½c. Quinine is steady and unchanged.

DRY GOODS.—The comptroller of the weather, who at this season of the year wields the destinies of dry goods merchants, is favoring trade at present. The days are raw and cold, putting people in remembrance of the fact that in November warm textiles should be purchased. The wholesale merchants at best find but a limited amount of business to be done. Retailers, however, in the city, and, from all reports, throughout the province, are doing well. Values remain unchanged. The low price of raw cotton appears to have put a damper upon the talk of higher prices in cotton goods.

GRAIN.—It is a pleasing change to be able to report wheat firmer. The daily advances in British markets are a very encouraging feature. During the past week red wheat n Liverpool has advanced 2½d. per cental, and the average rise in London is over a shilling per quarter. Quotations on the local market are about 1c. per bushel better all around than they were a week ago. The receipts at outside points are fairly liberal. Barley, too, is firmer and is moving quite freely. Some considerable shipments have been made to the United States for malting purposes. A large share of the present activity may be ascribed to a desire to escape the advance in freight rates, which takes effect next week. Oats are quiet and steady. Buckwheat is dull. Rye presents no feature of special interest.

The stocks of grain in store at Port Arthur on Oct. 27th were 1,412,197 bushels. During the week there were received 791,019 bushels, and shipped 781,636 bushels, leaving in store on Nov. 3rd, 1,421,580.

GROCERIES.—A fair amount of business is doing. Valencia raisins are decidedly dull and the market is easy. In currants the following prices are quoted: Provincial and Filiatras, 4c.; Patras, 4½ to 6c.; Gulf and Vostizza, 6¾ to 8c. New Persian dates per direct boat are expected in New York by the 12th or 13th inst. Stock *via* Southampton is looked for by the 16th inst., the first boat, "Taurus," being due in London 8th inst. Competition in sugars has lead to lower quotations in granulated; yellows remain unchanged. There is a good distributing movement in teas. Ceylons and Indian teas are very firm and prices are advancing.

HIDES AND SKINS.—The situation in hides has altered but little during the past several weeks. The outward movement is about equal to receipts, and stocks are not accumulating. Sales of cured have been made at 4½c. Sheepskins are unchanged at the advance made on the first of the month. Tallow continues in light supply, at least so far as local jobbers are concerned. Some of the large tanners, we believe, are importing from Chicago, which they are able to do, escaping the duty which the middleman must pay

LEATHER.—In so far as sole leather is concerned, trade is fairly active. Orders from the east are not liberal, but sufficient to keep affairs from being considered dull. Local jobbers find a very good movement, while at least one large Ontario manufacturer is buying stock. No sole has been exported to Britain this week, but shipments are in the course of preparation Good heavy harness leather finds sale, but light weights are neglected. The principal subject of conversation in leather circles has been the meeting of Ontario tanners in the Board of Trade building, of which we make mention elsewhere.

PROVISIONS.—Trade remains quiet. Butter is weak, as has been the case for some weeks past; best qualities bring 17c.; the market is glutted with medium and common stock, and sales have been made at 10½ to 11c.; a carload of Manitoba summer butter is offering here, and we are advised that there is more on the way. Cheese is quiet and steady. In hog products the feeling is easier; long clear brings 7¾ to 8c.; hams, 11½ to 12½c.; rolls, 9c.; lard, 8¾ to 9¼c. Dressed hogs are coming in fairly well and bring $5.65 to 6.00. Receipts and shipments at Chicago last week were 250 and 4,650 barrels pork, 491,000 and 8,635,000 pounds lard,

These prices are wholesale by the car-load.

2,821,000 and 12,985,000 mats. Receipts of hogs at Chicago last week were 172,503: shipments, 46,859. Dried and evaporated apples move but slowly.

SEEDS.—Trade is now confined almost exclusively to the purchases made by wholesale firms, and our Prices Current indicate the prices which are being paid to growers. Timothy is moving only in a moderate way; fine bright colored flail-threshed seed will bring more than our quotations; alsike clover has declined somewhat in value since the beginning of the season, but for the last week or so the market has been steady, with prices ranging at from $4 to 5 per bus. The Canadian crop of red clover has not commenced to move as yet, nor will it until the frost sets in, when threshing operations usually begin.

WOOL.—There are indications of more life in domestic fleece wool. Country merchants who have been holding for an advance in price are getting discouraged in their wait for better things. As a consequence, a number of letters have been received during the week offering stock. The lots for the most part are small, but when totalled together make a considerable amount. Since the removal of the duty prices have not altered, and dealers are paying 18c. The outward movement is sufficient merely to describe it as existing; the export demand is weak, although some mixed sorts were disposed of to American mills this week. Pulled wools are slow of movement; imports from the United States continue, and the market is depressed.

BRITISH MARKETS.

The circular of S. W. Royse & Co., dated Manchester, October 27th, says:

CHEMICALS.—This has been a fairly good month, but is closing quietly. Shipments to certain markets abroad are now slackening, and the spot demand in the home trade is at present only moderate. The general enquiry for next year's delivery is scarcely up to the mark for this time of the year, indicating apparently a not very sanguine feeling as to the future Bleaching powder is, however, receiving a good share of attention, and contracts have been placed with some freedom, but buyers of caustic soda are holding back; there is also less business now doing in ammonia soda for next year, consumers not quite seeing their way to the prices for which makers are now very firmly holding. Chlorate of potash is easy, and quoted lower for forward delivery. The Board of Trade returns show an increase in the exports of both alkali and bleaching materials during last month as compared with September, 1893, the shipments to the United States of America being more than doubled; there is, however, in alkali a decrease in weight of 24,622 tons, and in value of £326,033, and in bleaching materials a decrease in weight of 9,540 tons, and in value of £9,693, during the nine months ended Sept. 30th, 1894, as compared with the corresponding period of 1893, and during these periods the respective values per ton are £6 10s. 4d. and £8 6s. 1d. in 1893, and £5 14s. and £7 18s. 2d. in 1894. Tar products in general are quiet; pitch is, however, a notable exception, being scarce and commanding high figures for prompt delivery; creosote is easier, and not much business doing; solvent naphtha is steady, with just a moderate enquiry; carbolic acids, crude and crystals, are dull and tending to lower prices; benzoles are rather firmer. Sulphate of ammonia has been losing ground, but other ammonia salts are unchanged. Acetates of lime are steady, but little business is being done at present figures. Acetate of soda seems to have touched bottom, and is receiving more attention. Acetates of lead are quiet. Sulphate of potash is easier. Carbonate and caustic potash are quiet, but unchanged in value. Yellow prussiate of potash moves off steadily at old prices. Oxalic acid has little enquiry at present. Sulphate of copper is slow on spot, but has more enquiry forward. Green copperas continues in too plentiful supply. Phosphates of lime are quiet, with prices nominally unchanged, but the feeling easier.

THE GREAT-WEST LIFE ASSURANCE CO.

HEAD OFFICE: WINNIPEG

Subscribed Capital...	$400,000 00	Government Deposit	$56,000 00
Paid-up Capital .. .	100,000 00	Reserve . .	54,720 00

Business in force over $4,000,000 00

The attention of the insuring public and live progressive agents is called to the following reasons for selecting this company:

First—It is the only Canadian company giving its policyholders the security of a four per cent. reserve; all others without exception reserving on a lower standard.

Second—The policy contract is as liberal as any issued. No restriction as to residence, travel or occupation, and incontestable after one year.

Third—The premium rates are low and the cost to the policyholder is certain to be less than in any other company because a better rate of interest can be earned in the west than at the home of any other company.

Fourth—Every desirable plan of insurance is issued from the low priced "PAY AS YOU GO" plan to the shortest single premium endowment.

THE MEDICAL EXAMINER.

There is a good deal of monotony, doubtless, in the work of a medical examiner for a life company. But it is rarely that any one's occupation does not yield some diversion to persons who have any perceptions of humor. And so we find, as we were quite prepared to find, the medical officer of an important American company dwelling upon the funny things he has come across in the pursuit of his duty. Dr. Davis, who is the medical director of the Union Central Life Insurance Company, sends to the *Medical Examiner* a curious collection of remarks from country agents or doctors which show how much bad spelling exists among the members of what is known as a learned profession. We are used to such slight slips as "drownded," or "attackted," or "Wensday," or "buisness," but Dr. Davis has some words that would astonish even a phonetic speller. The doctor sensibly says:

"Poor spelling by no means always indicates a poor examiner, and the home office often puts more faith in a lame and limping description than in the glib rhetorical phrases of the better educated physician. For, after all, honesty and experience are more to the company than are fine literary attainments and strict technical knowledge. An examiner's report may be formally perfect and give evidence of scholarly proficiency and thorough study, but at the same time it may bear the impress of immaturity in practical experience, while the blurred and awkward and illiterate examination made by some shrewd and practical old country doctor, has far greater weight in the home office, because it embodies reliable judgment and keen ability to bring out facts desired, however clumsily expressed. Nor is this proposition made as an apology for bad spelling, but with the kindly desire to shade the light a little, while we expose to view a few of the solecisms which the records of one office have received in the past few months. And while, of course, a doctor will see no fun in a mistake which he readily recognizes as his own, there may still be enough in the blunders of others materially to soften the reproach which the erring brother ought reasonably to appropriate to himself."

We quote below Doctor Davis' examples;—

In describing an applicant's race the examiner covered the ground fully when he wrote *Europen whit*, and he was much more lucid than was the doctor who wanted to know "if we could accept a risk with a little Indian in him!" And he did far better than one who asked "if the negro ever runs out enough to be acceptable?"

Temperament is a term of mediæval origin which means much to some old-fashioned medical directors, but some examiners find its significance very cloudy. For instance, one inquires: "Does it mean metaphysical constitutionality?"—which is almost as clear as Esoteric Buddhism.

Once in a while the temperament is *plithoric* or *blethoric:* or it may be only *nervious, chaleric, anemic,* or *vigorous, steady* or *mild*. It is also *common, good, smooth* or *well-balanced*. Once the temperament was reported as *equitable*—evidently a weak attempt to boom President Hyde's company.

It is sometimes *limphatic* or *sanguinary*, and once the temperament was *98 1-2 normal!*

The occupation often throws doubt on the risk, particularly when the trade is *dying*, as was that of one man.

A *retale* dealer is not so bad; though the lowest depths of graveyard insurance are typified by a member of the salvage *corpse*.

A *grosrie* clerk is all right, and so is a *plaster* who plasters (when he is not too porus).

A *ministe* of the *gospell* is no worse than a *mister* of the gospel.

We have a rich policyholder who works for the *gass* company, and another—poorer—who is only in a *clareck* a *bucher shop!*

The female risk by no means escapes the questionable attention of our literary brother. For sometimes she has reached the *menapaus;* and again the *ceacation* of *menseas* has a different explanation. Sometimes *childburth* is fatal, while *childberth* is natural, and *confindment* is normal. But once in a while there is something called *purrpile* fever—recognized elsewhere as a *puerpal* condition. Several applicants had one or more *dissieas;* very taking among them were *hart decese* or *decease* of the *hart*. *Hereditary decease* seems to be widely prevalent, and an agent should not be discouraged even if several ancestors have suffered from it.

Among new zymotic "deceases" some of our distinguished applicants have had *thyphoid* fever; *thyphonoid* fever; *colera, remiting, malaril* and *maliary* fevers. One or two relatives were destroyed by that dreadful malady, *coharhea mobpus* attended with *cholic!*

Besides *dropsey* and *drapsey* and a general *brakedown*, there is an instance of the rare disease *Dropsey* of the *stomache!* which is, of course, worse than "some indigestion of the *stohmac*." The so-called *bowells* were often involved.

Conjestion and *yellow gendris* afflicted one man; of course *dissiness* was a symptom. One instance is given of the rare disease *biles*, which in no sense means *boils*, but *piles*. And then the *ingual* hernia was bad; and the *canser* and the twins *parulysis* and *paralisis*.

One history showed "a *lite actact* of *La Grippe*," but there was no *sequelly;* and the doctor was *aleapathic* too!

And we have discovered *pheumnonia*. A parent "contricted a *bade* cold." He doubtless is the man who had *siatick*. One poor fellow had *iresipelas;* and *exzema* and *drownding* played havoc with various relations.

One man died of *fibroid thesis!* A dry, tough thesis killed him. Now, if it had only been a long sermon, or even a dry medical lecture, the fatal result could have been more readily explained.

One man had nothing *hereatary* in his family; and one cannot *accertain pertickelars*. An examiner, evidently afflicted with coryza, speaks of *applican's grandparens*.

One doctor has known applicant since he has *growen* up; another is an "*intamate acquantance*." One has *freaquantly* met the party; and another has "given the *co* the *igzact* facts." One doctor cannot *illicite* information. An applicant "don't *remmember granparents*."

One man is very light weight, "because he is *loosing* so much *sweet* this season of year"—and sugar advancing right along, too!

One man was "hurt in a R. R. *reck* and begun *spiting blud:* had 4 or 5 of *thoes speals*—the *ingerury* was not bad.

One rascally fellow *dissembles* his father! Poor old man! How sharper than a serpent's tooth is a thankless child!

Some men make *refference* to *pollicy:* others to a *clame:* or to an *esstate:* also to an *assylum*. And some doctors when very positive write *yess*.

Applicants' habits, as sometimes described, are an interesting study. For instance, in some places in the south men become intoxicated, but don't get drunk; or they drink to excess, but never go on a spree; or perhaps they are on a spree once in a while, but are never intoxicated!

These different shades and degrees of conviviality are perplexing to the ordinary medical director. He wishes the applicant were one of those persons called "a *temporanis* man," or a *temperent* man, or even a *tempret* man. He thinks a good deal of "a sober and *uprite* man," and also of the man who "drinks none *whever*," and he has little against the "*modrate usuer* of *tobaco*."

The matter of identification is not neglected. Some applicants have *sicatrices* and others a *cycatrix*, some a *scarr* and some "a *escarr*;" and one victim had a "*scare* on his knee!"

One applicant was doubly blighted with "*mold* on left leg, also *hair lip*." He was possibly a brother who had "*mould* on coccyx, but it does not hurt risk."

One man has right foot amputated, but it does not "*mitigate* the risk!" Shades of Mrs Partington!

One risk is readily recognized by a "slight *ginshot wond* above *illium;* only slight."

"CHEAP" BOILER INSPECTION EXPENSIVE.

The danger of employing unqualified boiler inspectors was recently well exemplified in a small English town by a boiler explosion which did considerable damage to property in the immediate neighborhood of the scene of action. The boiler in question, it would seem, had gone the way that many boilers unfortunately do go, after having served nearly the full period of their usefulness, from its last place of fairly safe operation to the paint shop of a second-hand dealer, from which it emerged spick and span, ready to be sold again to some one unacquainted with its history and eager for a bargain. Paint has a wonderfully rejuvenating power over boilers, as well as some other things, and with the help of an unprincipled inspector's certificate, soon had this boiler again at work, with the result, before long, of a wrecked boiler-house, damaged buildings adjoining, though, happily, no loss of life, and a bill for the owner for the costs of the usual investigation by the local authorities. The payment of the costs was exacted "as a warning to other steam-users who rely upon unqualified, incompetent inspection, because it is cheap, and afterwards plead ignorance as an excuse for their conduct."

The episode pointedly directs attention once more to the subject of cheap boiler inspection and insurance, which off and on has been condemned for many years, though evidently not with sufficient vigor to have brought about its suppression. Cheap inspection and insurance rates, in fact, seem to possess an allurement to many boiler owners which is quite surprising, when even slight consideration will show that cheap service of any kind in connection with boilers is simply not worth having. It cannot be profitable, but certainly will prove dangerous. England, more than any other country, has suffered from a multiplicity of boiler inspection and insurance companies, and with growing competition among these, and failure on the part of steam-users to properly appreciate the value of thorough and conscientious examination of their boilers, decrease in price and corresponding decrease in the reliability of the service rendered have become natural and unavoidable results. There is a price, as has often been argued, below which a guarantee of faithful inspection cannot possibly be extended without seriously affecting the financial stability of any insurance company. A close approximation to what this price is could probably be made in most cases without much difficulty, and any offer of insurance and inspection at a much lower rate should be regarded with suspicion. In the United States, if not elsewhere, the truth of this seems to have been thoroughly realized. Boiler inspection and insurance competition are there at a minimum. The work is practically all in the hands of one company, and for a long term of years has been carried on in a painstaking, thorough manner, which has demonstrated its merits beyond all question.—*Cassier's Magazine*

PAY YOUR PREMIUMS.

We most heartily commend the proposed amendment to the by-laws of the Chicago Underwriters' Association with regard to more prompt payment of premiums. It is proposed to make it a declaration of the policy hereafter, by rider or otherwise, that all premiums shall be due and payable on delivery of the policy, and that unless the premium shall be paid by the fifteenth of the next month following the date of issue, the policy shall be void and cancelled. Unquestionably one of the serious evils of fire underwriting is, and for a good while in the past has been, the "unpaid premium" evil. When it is remembered that the companies reporting to the New York insurance department carried an aggregate, at the close of last year, of almost fourteen millions of dollars of unpaid premiums on their books, a good deal of which has proved a dead loss, the need of some united, business-like method of stopping this leak in the underwriting craft will be seen. A period of credit such as the above proposition covers is certainly liberal enough, but if strictly enforced all over this country would, we believe, reduce the unpaid premium burden now carried by at least four or five millions of dollars. There is no sound business reason why a company should, good-naturedly, give John Smith indefinite credit when it sells him insurance indemnity at cash rates, than there is for a cash grocer to sell to John Brown a barrel of sugar and wait indefinitely for his pay. Insurance is a cash article, and the public should be made to treat it as such.—*Argus.*

—The town council of Essex, Ont., will establish a curfew. In Kingsville, in the same county, on Hallowe'en night, the boys stole the curfew bell, and it has not been found since.

—Another evidence of the great productiveness of the prairie soil has been placed on record by a remarkable yield of oats on the farm of Mr. Henry Krueger, a settler near Leduc, on the Calgary & Edmonton Railway. Last spring Mr. Krueger secured a fine sample of oats, and he decided to test them by sowing one acre. He sowed them on land that had been previously planted with potatoes, and from the one acre he got a yield of 207 bushels.

The Next Division of Profits

Of the **Canada Life Assurance Company** TAKES PLACE AS AT

31st December, 1894.

Insure Now AND SECURE

ONE FULL YEAR'S PROFIT.

Sun Life Assurance Co. of Canada . . . . . .

HEAD OFFICE—MONTREAL.

THE prosperous condition of the Sun Life of Canada is doubtless due to its fair treatment of policyholders, its unconditional policy and prompt payment of death claims.

NOTWITHSTANDING the financial depression of the year 1893 it was the most successful in the history of this progressive company. The New Business completed is greater than that secured by any other Canadian Company in one year, and must be gratifying to policyholders and directors alike.

Substantial increases have been made in **New Business, Total Business in Force, Income and Assets.**

HON. EDWARD BLAKE, Q.C., M.P., President
E. A. MEREDITH, LL.D. } Vice-Presidents
JOHN HOSKIN, Q.C., LL.D }

The Company acts as **Executor, Administrator, Receiver, Committee, Guardian, Trustee, Assignee,** and in other fiduciary capacities, under direct or substitutionary appointment.

The Company also acts as **Agent for Executors and Trustees,** and for the transaction of all financial business, invests money at best rates in first mortgage and other securities; issues and countersigns bonds and debentures; collects rents, interest, dividends, &c. It obviates the need of security for administrators, and relieves individuals from responsibility as well as from onerous duties.

The services of Solicitors who bring estates or business to the Company are retained. All business entrusted to the Company will be economically and promptly attended to.

DECISIONS IN COMMERCIAL LAW.

FINCH v. COMBE.—A testator who seeks to obliterate a passage in his will by pasting paper over it must, in order to do so effectually, be careful to use paper that is not transparent, for where he omits this precaution, and the obliteration is made after the will is executed, and such obliteration is not properly attested, the words of the will in its original form, if they can be deciphered, will prevail. In this case a testator had altered his will in the manner thus described, and, by the consent of parties, the will was submitted to an expert to see if he could make out what was originally written, with instructions not to use chemicals, water, or to remove the slips of paper pasted on. By surrounding the slips with cardboard, and holding the will to a window pane, the expert was able to decipher what had been originally written. The President of the Court of Probate in England decided that the words thus made out were "apparent" within the meaning of the Wills Act, and must be admitted to probate.

ROUSE v. BRADFORD BANKING CO.—If a creditor has two principal debtors, one of whom by subsequent arrangement between themselves, to which the creditor is no party, *and does not assent*, becomes primarily liable for the debt, and such arrangement is notified to the creditor, the one secondarily liable has thenceforth the rights of a surety as against the creditor, and is discharged if time is given to the other debtor without his consent, according to the English Court of Chancery.

IN *re* PICKARD, ELMSLEY v. MITCHELL.—The simple question here was whether the debentures of a municipal corporation which were charged "on the revenue of all landed and other property of the corporation," were a charge on land within the meaning of the Mortmain Act. North, J., decided this question in the negative, holding that a charge on the revenue of land is not a charge on the land itself.

ARGLES v. MCMATH.—The plaintiff was the assignee for creditors of a firm of traders who occupied premises in Toronto under a lease from the defendant. The action was, in form, for conversion of certain chattels of the insolvents, which the defendant, the landlord, claimed as fixtures. The lease was of the usual kind, under the Short Forms Act, and contained the covenants by the tenants to repair, "reasonable wear and tear and damage by fire and tempest excepted," and to repair, according to notice, "as aforesaid," and to leave the premises in good repair, "wear and tear excepted as aforesaid." Applying the statute, says Chancellor Boyd, the covenant to repair means, among other things, to keep and maintain the demised premises, with appurtenances, in good and substantial repair, and all fixtures and things thereto belonging or which at any time during the said term shall be erected and made, when, where, and so often as need shall be. Wilson, C.J., once held that under the full text the tenant had the right to put up fixtures and things upon the demised premises during the term, and if he did so was bound to keep them in repair equally with the whole of the demised premises as he received them. The other covenant "to leave in good repair" means "to yield up the demised premises, with the appurtenances, together with all buildings, erections and fixtures thereon, in good substantial repair and condition." Do these words apply to fixtures which have been put up during the term by the tenant, or are they to be limited to fixtures which, at the beginning of the term, formed part of the demised premises? The former would appear to be the reasonable inference from the language used, as interpreted by the late Chief Justice Wilson. If the fixtures put up by the tenant are to be kept in repair equally with the premises as originally demised, it would seem to follow that he must yield up the premises, as added to by him during his tenancy, in good repair, and, if so, it would not be competent for him to diminish the premises by removing any of the fixtures so to be kept in repair. In brief, if the covenant be to repair, fixtures erected by the tenant for the purposes of trade can not be removed at the end of the term. The gas fittings or gasaliers are embraced in the term "fixtures." The present ruling extends to the "shelving" and "office," with its platform, also the gas fixtures, mirrors, brass window fixtures, and the ouside awnings. All these are affixed to the freehold, and although when brought on are independent personal chattels, yet, being so physically, attached by nails or screws, become fixtures within the comprehensive language of the covenants to be yielded up at the end of the term. The carpet would, however, be a personal chattel, spread with tacks only for the purpose of keeping it in its place, and not to attach it to the freehold.

ALLAN v. CITY OF MONTREAL.—The Supreme Court of Canada decides that in matters of expropriation, where the decision originally of a majority of arbitrators who were men of more than ordinary business capacity has been given, such decision should not be interfered with on appeal upon a question which is merely one of value.

There's Style about this fastener for the back of a Brace. It is Small Neat Durable. Can't Break Away. And unlike the multitude of big tin Clasps that are objectionable to the wearer who don't want his back covered with metal. It's a seller every time.

Mercantile Summary.

THE stock of the Winnipeg Jewelry Co. is advertised for sale under power of a chattel mortgage.

THE creditors of the ocean steamship line, the Canada Shipping Company, held a meeting on Saturday last in Montreal. Messrs. H. E. Murray and George Hyde were appointed liquidators of the company, and Messrs. Hugh McLennan, A. M. Crombie, Robert Mackay, James Crathern and Jonathan Hodgson were appointed an advisory committee. This was done before Judge Delorimier in the Insolvency Court.

NEWS comes from Truro, N.S., under date Saturday last, that orders have been issued at the Acadia mines to have thirty of the coke ovens started as soon as possible. James Lunn, of Debert, has the contract for getting the ovens ready by the last of November. The local railway track between the blast furnaces and the rolling mills has been taken up and strengthened and relaid.

THAT extensive concern, the Dominion Organ and Piano Company, is evidently flourishing under the new management. Not only is the company doing a good home trade, but we are told it has orders from Demerara, Nice and Geneva in Italy, Dunedin in New Zealand, and Hamburg in Germany. The same careful

Mercantile Summary.

wathfulness over every detail of construction is being observed as being necessary to perfection, and the company will ever be on the alert to improve its instruments by all legitimate methods. The management retains all the leading features which have given the goods from this factory the reputation which places them in the front rank of the makers of musical instruments.

PETERBORO continues its improvements and also adds to its industries. A substantial block of new buildings is now erected and nearing completion on Hunter and Water streets. The block consists of six stores on Hunter and one on Water streets, and the new building which is on the corner of both streets, is to be occupied by the Canadian Bank of Commerce, and will be finished about the 1st of March next. The block and bank building are erected by Mr. Geo. A. Cox, now of Toronto, president of the bank, and one of the city's longest residents and best friends. A new industry, the manufacture of curling stones, has also been introduced. It is a branch, we understand, of one of the well-known makers, the Kays of Haugh, Mauchline, Scotland. They occupy for the present the Blyth building, situated in the northern part of Peterboro. Mr. W. J. Wyllie is the Canadian manager.

Special Notice to you who Sell Oysters in Bulk

This season we are giving away to every purchaser of 1,000 oyster pails a very handsome window display card with the words "Bulk Oysters for sale here," printed in gold leaf on heavy morocco board, size 19x12, of a handsome chromo lithographed in fifteen colors. The retailer will find it greatly to his advantage to use these cards as a notice to the passing public that he is in the oyster business.

We are offering this special inducement to obtain your trade, as our facilities are 60,000 per day, and every pail guaranteed uniform, perfectly liquid tight and second to none on the market. Our prices are as low as any. Send in a trial order for your pails and get one of these cards.

Mercantile Summary.

IN the city of Quebec, Jean Lortie, a shoe dealer, has assigned Liabilities not yet ascertained ——A A Cantin, the St Roch's suburbs grocer, whose embarrassment we noted, has settled at 80 cents ——E T Nesbitt, lumber dealer, also reported failed last month, has been successful in arranging a compromise at ten cents in the dollar.

A BRIGHT instance of the free handed generosity of commercial travellers towards a person in distress is given us by a Montreal correspondent "Last Saturday night," says his letter, "some members of the D.C.T.A. got to know that Mrs ———, the widow of a commercial traveller who used to be a member of the Association, was in financial distress. It was not possible for the association as an association to relieve her because of circumstances not necessary to explain, but 'the boys' soon made up a subscription of $200 among themselves and sent it to the distressed woman, greatly to her relief."

FOUR years trading in Belmont, Man., was enough for James J. Armstrong, who has assigned. In March last he claimed a surplus of $4,000, but this must have disappeared, for we now find that two of his creditors have bills of sale on his stock of lumber and furniture.——In 1891 the Regina Electric Light and Power Co. was incorporated with about $15 000 paid capital, but it now appears that company never made any money. The plant is mortgaged for more than it will realize. Beside this there are unsatisfied judgments On Monday next the plant and assets will be offered for sale.

EARLY in 1891 Joseph Armstrong started a dry goods store in Peterboro claiming to have invested $2,000 cash at the time. However, he was very ambitious, and endeavored to do very much more than his capital would permit His efforts have not been crowned with success, and he has been obliged to assign ——In the same town Wm Clancey, hotel keeper, has been sold out under chattel mortgage.——W. Bernard & Co have been keeping a general store at Sutton for many years, and succeeded fairly well Some time ago Mr. B. claimed to have a surplus of $6,000. The advent of the Patrons of Industry, together with the general depression in business, has caused his assignment to E. R. C. Clarkson, with liabilities of $14 700 His nominal assets, which consist largely of real estate, are $700 less

A GENERAL storekeeper of about two years standing, at Bathurst, N.B., H. W. Meahan, has made an assignment. Liabilities are small, and mainly in St. John.——Berthiaume & Co., of St. Jerome, Que., whose troubles, due to a recent fire, we noted a fortnight ago, are making an offer of 57½ cents, cash.

WE observe the assignment of W. V. H. Stanford, in the dry goods business at Arnprior, Ont., where he moved from Renfrew last summer. He has been a supply account of a Toronto house, we are told. The creditors met in Montreal on Monday last. Liabilities are given at $26,000 and assets only $17,200.

WE are pleased to hear that the Department of Marine is going to make its own buoys instead of importing them. An order to make a number of new buoys has been given by the department to Messrs. J. Matheson & Co., New Glasgow, N.S. The material will be iron from Pictou, N.S., and the plates are being manufactured by the Nova Scotia Steel and Forge Co.

ON Tuesday last Mr. John J. Arnton died in Montreal at the age of 61. Deceased was for years a successful auctioneer, having been brought up to that business by the late John Leeming. Mr. Arnton had been in the city council, and was for some years a director of the Canadian Bank of Commerce. Some twelve years ago he was unfortunate enough to lose his eyesight.

A MONTREAL firm of furniture dealers, Perrault & Co., have assigned, owing $8,575. Mr. G. H. L. Rolland, of the lately insolvent firm of Rolland & Bro., was a special partner.——W. V. Gordon & Co., grocers, lately reported failed, are offering creditors 50 cents, cash, a settlement which will likely be accepted by all.——T. Boyer, baker, also of Montreal, is seeking a compromise at the rate of 50 per cent. at four months, secured. The liabilities are small.

IN consequence of the foreclosure of a chattel mortgage, John Teutzer's tailoring shop in Hamilton is closed, and the precise whereabouts of John is not known.——A. W. Garbett finds after eleven years work as a jeweller in Picton, that, through frequent ill-health in his family, and its attendant expenses, he can no longer pay his bills. Therefore an assignment is made.——In 1885 the Napanee firm of Hinch & Hinch was dissolved, and George S. Hinch continued the Tamworth branch of their store, and did a moderate trade, although his surplus stock was his sole capital. Latterly he has been pushed for small sums, and now finds an assignment necessary.

O. VINETTE, a Montreal boot and shoe manufacturer of moderate calibre, is one of the latest failures, and his liabilities are placed at about $25,000. It was only last year that he effected a compromise of liabilities of $48,000 at 35c. in the dollar, but he has not been able to re-establish any general credit, and has been forced to stop. The estate will likely be wound up.

M. A. PAGE and C. H. Keefe have been trading under the high-sounding style of the Dominion Produce Co. for eight months in Toronto. They claim to have invested $1,500 cash in the venture. If this be true they very soon got through it, and they now assign.——Last week we noted the troubles of Chas. Lanning & Co., clothiers, in Toronto. At a meeting of creditors held on Friday last it was decided to sell the stock by auction on yesterday

THE stock of Risser & Co., book and stationery dealers in Toronto, is advertised for sale on the 28th inst.——Wm. Brown's carriage stock will also be sold on the same date.——The assets of Gates & Gardner, carpet manufacturers in St. Catharines, will be sold on Monday next.——At Fenelon Falls, the general stock of R. Taggart realized 75 per cent.——On Tuesday next the assets of the Bowman Hardware Co., in Hamilton, will be disposed of.

A DRY GOODS concern in Montreal, Isaie Rivet & Co., have made an assignment. About five years ago they got into difficulty, and settled $20,000 of liabilities at 50 cents on the dollar. They have not been able to pick up since, owing largely to the deterioration of their location, on Notre Dame street east, as a business stand. The present liabilities are about $13,000.——A. T. Smith, men's furnishings, etc., has arranged a twelve months' extension of liabilities amounting to about $2,000.

AN industry established only this year, the Belleville Box and Basket Co., finds such a demand for its goods that it has been compelled to enlarge its premises by the addition of a two-story building, 30 x 75 ft., of frame, covered with fire-proofed iron. The new structure is intended for packing purposes, and each grade of basket or box is kept in a room by itself. The *Intelligencer* notes also a mat factory just established on Moira street, in Belleville, by Wildbur & Moses, who make cocoa mats and matting, wool mats and fibre spinning. They will weave the cocoa matting such as is used for the aisles of churches. A new building for their weaving is spoken of in the coming spring.

THREE of the Dominion Ministers from Ottawa are visiting the collieries of Pictou county, Nova Scotia. A despatch from New Glasgow says they went down into the Drummond mine, one of the best equipped collieries on the continent. This year its output, 225,000 tons, is the largest in its history. Had not two of its chartered steamers, running up the St. Lawrence, been wrecked, its output would have been much larger. Five hundred hands are employed. Thence they went to Stellarton, where the collieries of the Acadia Company were inspected. The company caters to the domestic trade, and its output is about 100,000 tons.

Two years ago or more the hardware business of Cunningham Bros. at New Westminster, B.C., went into the hands of a joint stock company, with a paid capital of $33,000, which assumed the liabilities of the firm, which were too much for their capital. Then being ambitious of doing a large trade, the concern became overstocked with goods. Now it has been decided to wind up the business, with James Cunningham as liquidator.——In the same place, James Beer, who has been in the grocery business about four years, was obliged in February last to mortgage his stock. Now that mortgage is foreclosed.——Mrs. Mary Campbell, dry goods dealer, also in the same city, wishes to compromise at 50 per cent.

THERE has been a comparative lull in Quebec Province failures for the last week or two, as compared with the situation of affairs in that respect a month or three weeks ago. Outside the cities there is little new in the way of insolvency.——M. Ross, general dealer at Amqui, whose failure, with details, we described several weeks ago, has been able to compromise at 60 cents on the dollar.——Boily & Claveau, of Chicoutimi, whose failure has also been reported, are offering 75 cents on the dollar.——An assignment has been made by J. & R. Lowndes, general store, Gaspe, on whom a demand was recently made, to J. McD. Hains, of Montreal. The liabilities are $7,698, while the assets, apart from a claim on the insolvent estate of H. S. Lowndes, are only $500 or $600.——Alphonse Bernier, general dealer at Cap St. Ignace, has suspended, and wishes, it is said, to arrange a compromise on obligations of about $3,300. Owing to lack of education and experience, his success has been all along questioned.——G. Marcotte, a liveryman at Drummondville, has assigned, owing about $3,000.

AND . . .

CLOTHIERS' TRIMMINGS

59 Front St. West Toronto

MR. CHARLES HUDSON, late of the firm of Henry & Hudson, has been appointed manager of the Rathbun Company's flour and feed store in Belleville

A. ANDERSON & SON, general merchants, etc., at Goldenville and Sherbrooke, N.S., have assigned. The senior is quite an old trader in the district, and was at one time reputed worth a fair amount of money, made out of hotel keeping, mining rights, etc. He, however, made some heavy losses a couple of years ago, and latterly has left the business management largely to his son, who has not shown the ability or attention requisite, and they have been found very slow pay for the past year or more.

IN 1889, Wm. Mayhew started a general store at Huntsville and soon secured a good country trade, but in April last a fire occurred in his premises which resulted in a loss of $2,000 above insurance. This misfortune, with some bad debts connected with a lumberman, cramped him very much, and now he assigns with liabilities of $16,750, and nominal assets of $14,800 ——D. A. Eaton, tinsmith in Woodstock since 1887, has made no progress. His assets have been mortgaged for years, and being in arrears for rent the bailiff has taken possession and the stock is advertised for sale.

A. C. COLE opened a general store in Grimsby, bnt being easy going never made any progress since he began in 1889, and now assigns with liabilities of $2,000 and nominal assets of $1,300 ——An assignment is also made by A Morrison, implement agent, Atwood.——A year ago J. A. Reid opened a grocery store at Coldwater, and with the assistance of his son-in-law managed to keep his store open, but last month the former gave a chattel mortgage to better secure his friend, and now this is foreclosed. ——The bailiff has, at the instance of two creditors, seized the effects of Wm. Cardwell, hotel-keeper at Omemee

A SUBSCRIBER has sent us copy of the report made by the assignee in the matter of the insolvent estate Stevens & Burns, machinists, London, which exhibits a startling condition of affairs. The preferred claims amount to $9,545, viz., bank liens, $6,100; wages, $1,434; taxes, $948; insurance, $130; mortgagees' distress, $850; advertising auction sale, $83. To these must be added the costs of assignment At the auction sale held on September 18th. no offer was made that would realize even one-half of the preferred claims, and the stock had to be withdrawn from sale. Subsequently an offer was obtained from the mortgagees of $10,000 for all the assets, and this was accepted by the inspectors as the very best that could be done under the circumstances We now learn that the estate does not pay the unsecured creditors one cent in the dollar, and that these unsecured liabilities reach $40,000. Yet the concern is running again under the style of the Stevens Manufacturing Company, and is asking credit. They make the statement to one house whose goods they want that their position now is better than ever, as they have no liabilities and have all the assets of the old company, "when as a matter of fact the buildings, machinery and stock are owned by Fallows, Fitzgerald & Labatt, the mortgagees, who will not be liable for any new debts as they were in the Stevens & Burns Co." One cannot wonder at the strong language in which our correspondent stigmatizes this failure. The facts as detailed above speak for themselves. Yet doubtless the new concern confidently expects credit, relying on the easy-going good nature of Canadian houses. And we should not like to predict that they will not get it.

SOME weeks ago we noted another failure in this city, which in results to creditors, seems fit to rank second to the above. It is that of Withrow & Hillock, so long established and respected builders in Toronto. It now transpires that they have been for years financing on the strength of their good credit. After numerous sales and exchanges, they succeeded in consolidating their principal real estate. This consisted of the factory, with plant, on the corner of Queen and George streets, also houses on Wilton avenue, Jarvis and Queen streets. By mortgaging these properties they succeeded in raising the sum of $50,000. Besides this they owe their banker about $22,000, the Beard estate nearly $10,000 and [illegible] the mortgagees of $22,000. The principal securities these creditors hold consist of second mortgages. To satisfy these claims the firm have nominal assets of $40,000 in hardware supplies, lumber, refrigerators, horses and book debts. About $30,000 is composed of book debts, which it is thought may realize about $2,000. Besides this there are the items of sleighs and wagons which will reach the sum of $8,534, but only realized when sold to Mrs. Hillock, by tender, a little over $2,000. It thus appears that general creditors will be in luck if they obtain a dividend of 5 per cent. Fortunately for their interests, the recent fire that occurred in the premises will furnish the estate with some additional assets.

MAILING CASES

We beg to notify the trade that we have been appointed sole agents in Canada for the United States Mailing Case Co. and the Boston Mailing Case Co. These two companies control all the mailing case patents. By the use of these cases, our goods will go all over Canada through the mail. Circulars giving full particulars sent on application.

THE SITUATION.

Dissatisfaction with the marking of Canadian cheese which does not give the date of the make, is finding expression among English importers. The complaint is made that June cheese is sent out as fit for market in September, when it is in fact too green for use. This representation is, without circumlocutory phrase, branded as deception. If this charge be true, the practice must be abandoned. If the enforcement of penalties, or even an alteration of the law of marking be necessary, the great interest at stake requires that this should be done. Canada, by years of careful effort, has established her reputation as one of the foremost cheese making countries in the world, and her good name must not be tarnished by the dishonest tricks of trade, the work of individuals. There is nothing to show in the complaint made that the cheese has any other fault than want of age. All that is needed is that it should have time properly to mature. It has now begun to be recognized that cheese may be too old as well as too new. There is no danger that makers or dealers will elect to keep it too long. If individual consumers choose to do so, that is their own affair. This is the first time that we have heard any complaint against any Canadian cheese-makers or dealers, and we may reasonably conclude that the practice complained of has not gone far. In the past we have encountered a more serious difficulty in the form of fraudulent marking of American cheese as Canadian, against which measures of protection were taken.

Special enquiry into the alleged mixing of wheat, graded as No. 1 hard, at Port Arthur and Fort William, is being made on the spot, by an officer of the Inland Revenue Department, Mr. W. Gerald. When a standard is fixed, the chief requirement is that all samples which pass as No. 1 hard, or any other denomination, should not fall below the standard which it is required to attain. Does it therefore follow that if some grain, in its natural state, is found above the requirement, a reduction to the standard is not permissable? When a purchaser bargains for No. 1 hard, he is entitled to get wheat which comes up to that standard as fixed; is he entitled to say that if the wheat was originally above the standard it shall not be reduced thereto? Any number of grading must be up to the standard set for that number—it cannot be below; is there any more reason that it should be above than below? If weight alone were the guide, there would be no difficulty; for all that would be required to make the requisite weight would be more of an inferior quality. But this will not do when the object is to get a certain standard of quality. If the contention be set up that No. 1 hard, though it attains the standard, shall in no case have reached that level through reduction, it is doubtful whether it can be maintained, for that would be not merely to exact compliance with the standard, but something beyond it. It seems clear that nothing beyond or below the standard can be made the rule; for this would be to abandon the standard, and to put deviation from it in its place.

France's protectionist policy, after a trial of two years, has resulted in reducing her exports between forty and fifty millions of dollars. She made the mistake of supposing that she could curtail her imports without producing reflex action on her exports. She failed to see that while the imports employed directly in their production foreign labor, they indirectly employed home labor to produce for the purpose of exchange what the foreign labor required to supply their wants; she failed to recognize that in order to stimulate exports she must herself import liberally. She now finds by experience that when she puts obstacles, in the form of excessive duties, in the way of imports, she not the less diminishes her own exports, which it was her object to increase. But that she will profit by the lesson does not at all follow. She may attribute the decline in her exports to anything rather than the true cause; being convinced against her will, she is not unlikely to remain of the same opinion still. The result is, however, not one of chance; it was foreseen by keen-sighted economists and predicted just as it has happened. This pervision gives certitude to the correctness of the laws and the method by which it was attained.

Government finance, in Australia, is following the disastrous fortune of commercial finance, which reached the unprecedented catastrophe of last year. Victoria has a deficit of over $11,000,000 (£2,373,000) and New South Wales over $7,000,000 (£1,465,000). This state of the treasuries of these two colonies has an interest for us in more than one way. The deficits form an obstacle to anything like tariff reciprocity, on a descending scale, and they diminish the ability if not the disposition to aid the Pacific cable. The shock given to commercial credit in Australia paralyzed the resources of government. What strength of recuperative power the country may develop remains to be seen. Some of the methods of borrowing before the financial explosion will not be avoidable in future, notably the borrowing of deposits in England with which to carry on banking at the Antipodes. A process of repaying has been begun, which is to extend over a long term, and while it continues the revenue of the Government will feel the pinch. It may become a matter of necessity to resort to that form of tariff which promises to yield the largest revenue. The changes are not likely to be in the form of heavy reductions, and the Australian colonies may be obliged to make tariffs to suit their own circumstances rather than with a view to arrangements with other colonies.

Alderman William Temple Stewart has been found by Judge Macdougall guilty of soliciting bribes from a company that had put in a tender for a civic contract which had to be passed upon by his and his fellow aldermen's votes. The ordeal was in the nature of an enquiry, not a trial, and the finding of the judge is not to be confounded with a legal conviction of guilt, to be followed by sentence. Ulterior

proceedings may take place as the result of the enquiry. During the investigation other aldermen's names were revealed to the counsel for the city and the judge; but as the evidence against them was confined to the statement of Alderman Stewart, the names, written on a slip of paper and handed to counsel and the judge, were not divulged. The secrecy observed was justifiable under the circumstances. On Tuesday night the city council enlarged the powers of the investigating judge so as to enable him to enquire into any alleged wrong-doing by aldermen in connection with civic contracts and franchises. Among other things, the contract between the street railway company and the city is likely to get an overhauling. Meanwhile the public will maintain an attitude of neutrality or expectancy. The disclosures in the case of Alderman Stewart show the existence of a state of things to which suspicion has for some time pointed, but of which no proof had been adduced. What more remains behind will shortly be made known.

President Cleveland, after long cogitations, has at last made up his mind that a gold loan of $50,000,000 has become necessary. It could scarcely be launched under more favorable circumstances than exist at present. Owing to the state of the law, the interest will be five per cent.; but there will be plenty of takers at a rate that will net them three per cent. The New York banks hold $68,000,000 in excess of legal requirements, and many individual investors have of late been under the necessity of trenching on capital for current expenses, because they have been unable to find any satisfactory interest-yielding investment. Guaranteed stock and high class mortgages are selling in the Republic at higher prices than ever before realized. Five per cent. Government bonds, issued last February, the interest payable quarterly, sold at a rate last week, before the loan was announced, to yield the investor 2 3-5 per cent. A year ago, the financial stringency was greatly aggravated by hoarding money; capitalists refused to trust anybody, and even withdrew their money from the banks. A much less degree of distrust exists to-day, but gilt-edged securities, and especially governments, get a decided preference. Such securities go up in price, while their earning power is reduced. The New York banks are figuring to get the loan at a rate that will yield 3 per cent., but it would not be surprising if there were some outside bids at a lower figure. Since it was regarded as certain that a loan would be asked, the five per cents, issued last February, fell to rates that made them yield 2¾.

CUTTING PRICES.

One may not boycott the foolish merchant who gives away all his profit to his customers; that would be doing something in restraint of trade. We may not use either physical or other violence to the man who breaks the market on some article, not only losing money himself, but compelling other merchants around him to lose money or cease selling. The law would intervene. But we may, if we choose, cease to deal with such a man. The sort of fool who is forever cutting prices has given trouble to his competitors—and his creditors—time out of mind.

We observe that some steps have been taken lately by the associated druggists in the States to prevent the stupid and ruinous cutting of prices on patent medicines. The chairman of the Committee on Proprietary Goods of the National Wholesale Druggists' Association, Mr. M. N. Kline, has issued a circular on October 31st, reciting the efforts recently made to prevent violations of the rebate plan. At the New York meeting of the N. W. D. A. last month, the names of ten concerns were reported as being actively engaged in supplying their preparations to a well-known cutter of rebate prices in Cincinnati.

This being the case, what was to be done? Before removing the names of these houses from the official list of rebate proprietors, the committee communicated with the ten offenders, with the view of securing their pledge to cease these objectionable transactions. We learn from the *Shipping List* that five of the concerns so addressed assure the committee that in future they intend to insist upon a maintenance of their contract terms. Of the other five, several have not yet responded, but probably there are special reasons for the delay, and favorable answers are looked for. This is the way in which the Americans are proceeding in cases where price-cutting is indulged in.

CURRENCY REFORM IN THE STATES.

As has been elsewhere noted, steps are being taken by the Baltimore Board of Trade to assist in the dissemination in pamphlet form among bankers and public men in the United States of the Baltimore currency plan. The subject of currency reform is, we are told, to be strongly presented to Congress by the President in his annual message and by the Secretary of the Treasury in his annual report. The well-informed Washington correspondent of the *Journal of Commerce aud Commercial Bulletin* says that Secretary Carlisle is reticent in regard to details and is still studying the Baltimore plan, and the arguments made for and against it. "He is also studying other plans for providing a proper currency, and will set forth the arguments at considerable length for the plan which finally commends itself to his judgment. The substitution of a banking currency for the complicated system of forced legal tender paper, which has so long been advocated by the *Journal of Commerce and Commercial Bulletin*, is rapidly winning converts in official circles and is likely to become the definite policy of the Administration. Assurances have been received from New York and Boston that the banking community are nearly unanimous for the retirement of the legal tenders by degrees and the substitution of bank notes."

What chance there is of passing a measure through Congress for a banking currency is a question that looms up. All are agreed that it cannot be done without the open support of the President. In Washington, it seems, the feeling is that the elections have weakened the free silver advocates by the defeat of Bland and all their leaders, and that the sentiment in its favor is partly dissipated. "The Administration, however, does not care to trust the reform of the currency to a Republican Congress," for reasons. The conclusion is that the President will likely present a definite plan of currency reform and trust to the people in the future to carry it into law, if he cannot secure action at the short session of Congress which begins next month.

THE LUMBER TRADE.

Should the Upper Lakes remain open through the month, navigation must end on Nov. 30th, for after that date the canals are closed. As a consequence of the approaching end of the navigable season lumber shipments are very active. Trade with the United States is gradually improving, but as the semi-annual stock-taking period is not very far distant, dealers are not buying more stock than they feel competent to handle on the spot. Until the new year begins it is not probable that any inclination to stock up the goods will be made manifest.

The question of freight rates has been happily settled

and the former tariff re-established. Further than this, the Grank Trunk authorities have agreed to maintain this rate unchanged until April 30th, 1895, and should it be their intention to make an alteration then the lumbermen are to be given notice in February of the contemplated changes. A refund of the excess in charges made since October 1st has been given to the lumbermen, who, very naturally, are not a little elated at the way in which the Grand Trunk has made amends for its mistake.

The duty imposed upon boom logs brought into Canada from the United States still continues to cause American lumbermen very much annoyance. It is one of those dis agreeable annoyances incidental to a protective tariff which do no one any good, and at the same time serve as restrictions upon the free course of trade. There are at present about 2,000 pieces of timber being held on the Spanish River until the payment of the 20 per cent. duty which the Government demands. It is to be hoped that the Comptroller of Customs will see fit to remove this impediment in harmony with the conditions of freer trade in lumber with the United States, which are so full of promise to the interests of this country.

How the cut in Ontario woods this season will compare with that of last winter it is as yet too early to surmise. A canvass of eight firms, Canadian and American, operating in Ontario, leads us to believe that the cut of 1894 will be little if any larger than that of last year. Some mill men are getting out an increased number of logs this year, but others on the contrary report that their cut will be somewhat smaller than it was a year ago. The fall so far has, we understand, been very favorable to lumbering operations, and should suitable conditions continue to exist the season through it may materially affect the size of the cut.

WAGE EARNING DURING THE AMERICAN DEPRESSION.

The year 1893 is generally considered to have been one of great distress for the wage-earners of the United States by reason of the pronounced business depression in that country. And doubtless there was much disturbance of an unusual kind last year among the industrial population of that great country, accustomed as they have long been to general activity and reasonably good wages. It is a relief to learn that things have not been so bad, however, as has been thought or represented in that sphere of labor. According to an article in the November *Forum* by Mr. Samuel W. Dike, a student of industrial statistics, based upon facts gleaned by the Massachusetts Bureau of Labor Statistics, the wage-earner's loss during the times of depression has been less than is generally supposed. In the lowest paid industry of that State, in the cotton mills, where a lower class of operatives are found, and the great majority are women and children, and more than two from a family are usually at work, the average annual earnings in 1893 were $348.60 for each individual.

Mr. Dike says that the great body of wage-earners in Massachusetts were kept at work when the depression was most severe, earning in the course of the year nine-tenths of what they got the year before. In the matter of employment, then, the picture is not so very dark, for in the month of greatest idleness—in September—there were 22 per cent. of those at work in April, the best month of that year, out of work, leaving 78 per cent. still employed at a time when, besides the depression in business, vacation, repairs and other similar special causes combined to keep many mills idle. Many will be surprised when they learn that the average number of persons at work in all these industries, taken together, in the last three months of 1893, directly after the month of extreme idleness (September), were seven-eighths the number having employment in the last and most prosperous quarter of 1892.

It appears that the real distress of the wage-earner during the business depression, great as it may have been, was not out of all proportion to that of other periods, nor so extensive as to occasion despair. The vast majority of laboring people in the varied industries of Massachusetts, as well as in her manufactures, are neither going to the almshouse nor losing the greater part of their usual income. The cheapest labor suffers most where the margin between income and necessary cost of living is smallest, and ignorance is content to live slovenly and from hand to mouth. These figures, being confined to Massachusetts, do not of course take into account the state of the great industries of other States, such as the coal workers of Pennsylvania, the iron workers of that and other States, of whose difficulties we in Canada were in the way of hearing more. But the facts brought out in this article are reassuring and of good service.

SOME MUNICIPAL CONSIDERATIONS.

Solon divided the Athenians into four classes, according to their wealth, and citizens of the first class alone might aspire to the high offices of state. To the Greek the state and city were one. If a modern Solon were to divide the inhabitants of modern municipalities into four groups, according to their ownings, it would be interesting to note the relation of our civic legislators to the rest of the community. That they would not occupy the first rank, we feel very confident; that a few of them might attain the second class, is quite possible, but the great majority would undoubtedly be consigned to the third and fourth divisions. It is a strange anomaly that many of the wealthiest cities of Canada and the United States are ruled by men possessed of no considerable means. It does not necessarily follow that because a man is poor he will make a dishonest and incompetent mayor or alderman. Still, a needy man is often an unsafe man. The person with no visible means of support is not the person to be chosen for alderman of a city. The higher municipal offices, however, may with greater safety be reserved for those who in their business or professional careers have achieved marked success. Many a man who has failed to conduct a business of a few thousand dollars dimensions is intrusted with the affairs of a municipal corporation where many thousands are involved, and quite naturally his administration proves a failure.

Why are men of inferior calibre able to reach to these offices? Either because better men do not seek prominence in civic affairs, or because the respectable and well-to-do "cannot be bothered" working or voting to keep a questionable man out of the council or to put a desirable man in. In the classical ages the individual lived for the state; in modern times the interests of the state are held strictly subservient to those of the individual. Affluent men are intent upon obtaining greater wealth, and the conduct of the affairs of the municipality is often left to men who, like the immortal Micawber, are constantly "looking for something to turn up." Occasionally a wave of dissatisfaction sweeps over the community, and good citizens are aroused to action; but, like a tidal wave, it soon subsides, and conditions, which may almost be styled chronic, return.

The citizens of Toronto have had presented to them within the last few days some facts that should arouse the sense of duty to the place they live in, a sense which appears to have been dormant. How comes it that such an outrageous attempt at blackmail of a [commercial concern

by an alderman of the city, as that laid bare by the investigation before Judge MacDougall, was possible? How comes it that we find in a civil suit before Judge Falconbridge, money being paid by a manufacturing firm for the services of an ex-alderman of the city in an attempt to secure a contract with the Street Railway? The reason is that the qualified voters of Toronto have been false to their trust in either voting for civic representatives without means or moral sense, or refraining from voting at all, and thereby allowing improper men to be elected to the council.

IRON AND STEEL PRICES.

The extraordinary reduction in prices of iron and steel in the United States during the last two or three years is occasioning, as must have been expected, much comment and some apprehension in England. Naturally enough the iron masters there look upon the course of events in the States as menacing the pre-eminence of English and Scotch iron masters. Besides, there is Germany to be considered as a producer of iron and steel, and Belgium, though in neither of these countries has the fall in prices of late been so marked as in England and the United States.

Comparing 1890 with 1893, the London *Economist* shows that in England there has been a decline of 18 to 23 per cent. in different classes of iron and steel products, the higher figure being that of railway steel. But in the United States, taking the same years, while steel rails have only fallen 11 per cent. and refined bar iron 17 per cent., anthracite and grey forge pig iron have fallen 21 and 26 per cent. respectively, bessemer pig and steel billets as much as 32 per cent. The decline in Germany is nearly 20 per cent. on an average of half a dozen articles. It is a natural and proper subject of enquiry, says the *Economist*, how this remarkable decline of prices has been brought about, and how far it is likely to be permanent.

It is to the United States that we must first proceed for an explanation of a movement of prices that has had few parallels in the recent history of industry. American manufacturers have been enabled to reduce by one half the prices of Bessemer pig-iron and steel billets, in consequence of four great changes that have been brought about within the last few years, viz.:

1. A large reduction in the price of iron ore.
2. A similar fall in the prices of fuel.
3. A cheapening of the cost of transport; and
4. A reduction in the cost of labor.

"In noneo f these influences has the change been so remarkable as in reference to the prices of iron ore. It is not so many years since the cost of the iron ore alone at most of the blast furnaces in the United States was considerably more than the price of the pig-iron to-day. So recently as 1889, the highest grade of iron ore in the Lake Superior region sold at 23s. per ton at Lake Erie ports, some hundreds of miles from the furnaces at which it had to be smelted. To-day, this ore is being bought for a little more than 12s. per ton at the same ports. Soft hematite ores sold in 1889 at $3.75 per ton, and can now be purchased for $2, or nearly one-half. Low phosphorus (Bessemer) ores have also fallen to about one-half of the prices at which they were sold in 1891. But while this means that the American iron trade have now at command almost, if not quite, as cheap ores of the highest class as those firms in Great Britain that depend on Spanish supplies, they have the advantage of considerably cheaper coke. For a large part of the current year good blast furnace coke has been sold at Pittsburg at 90 cents per ton, which is less than one-half the price that has been quoted for, at any rate, four years past in our own country.

"The cheapening of the cost of transport has been such that while many works in the United States have to bring their raw material from very long distances—800 to 1,000 miles being a not uncommon average—this does not hinder them from producing pig and finished iron and steel at the low rates already quoted, while it is estimated that within the last two years the average wages paid to labor in such works has fallen by 20 per cent., and ordinary labor, having regard to what is expected of it, and to the greater pace at which it is driven, is deemed to be very little, if any, dearer than corresponding labor in this country, which, while it is nominally 30 or 40 per cent. cheaper, is yet considerably less efficient, as measured in terms of weekly or annual product. Nevertheless, the United States, as a manufacturing country, have to face the serious disadvantages of great distances. But for this fact the iron-masters of Alabama would now be flooding English markets with their common forge and foundry pig-iron, which they are selling at furnaces for four or five shillings per ton less than the same quality of iron is sold for in this country. But the chief iron-making districts have a long land or river as well as a long sea transport to face before they can make any impression on European markets."

FIRE LOSSES IN AMERICA FOR OCTOBER.

The smallest monthly fire loss for nearly three years in the United States and Canada is that for the month of October last. It amounted to $8,186,000, as compared with $11,014,000 for the previous October and $13,349,000 in October, 1892. This is a very low figure, comparatively, says the New York *Journal and Bulletin*, as will be seen from the following table showing losses by months:—

	1892.	1893.	1894.
January	$12,564,900	$17,958,400	$10,568,400
February	11,914,000	9,919,900	11,297,600
March	10,648,000	16,662,350	9,147,100
April	11,559,800	14,669,900	11,540,000
May	9,485,000	10,427,100	10,777,800
June	9,265,550	16,344,950	8,282,300
July	11,530,000	12,118,700	16,307,000
August	10,145,300	13,222,700	10,432,800
September	7,870,800	10,508,700	10,149,900
October	13,349,200	11,014,700	8,186,700
Totals	$108,341,550	$132,847,400	$105,789,600

The footings show, says the daily newspaper quoted, that the losses for the first ten months of 1894 are enormously lighter than the record for the first ten months of 1893, and this marked diminution promises to aid in repairing the depleted surpluses of the fire insurance companies, unless some extraordinary conflagration takes place between now and January 1. During October there were 166 fires of a greater destructiveness than $10,000 each.

"The fire underwriters are of course greatly relieved at the lessening of the fire waste. In 1893 it reached alarming proportions and swept away a large fraction of the surplus of many an underwriting institution. At present, however, rates are much higher throughout the country and losses lighter, so some profits may be expected to be revealed by the January 1, 1895, statements."

COLLECTION OF INSURANCE PREMIUMS.

The credit system in fire insurance premiums is an anomaly, and it should not be allowed to continue. Neither the customer who secures his policy through an agent nor that agent himself should be permitted to take their own time in paying the premium thereof. And yet the easy-going habit has been contracted by agents of allowing their clients 30, 60, 90 days, or even more. The companies, too, have been lax in giving their agents corresponding time, instead of insisting on cash on delivery of policy. This is

true of the United States as well as of Canada. We learn that the Chicago Underwriters' Association, having felt the annoyance of such laxity, is now determined that agents shall remit premiums more promptly. They recommend an amendment to the by-laws as follows:

Premiums are declared to be due and payable in bankable funds at par on the delivery of policies, and this policy shall become void on the 15th day of the next month following date of issue, unless the premium named herein shall have been actually paid at or before 12 o'clock noon on said 15th day: and this notice is accepted as sufficient to comply with cancellation notice required by the printed conditions of this policy. Brokers and solicitors are to be required to pay over all premiums as soon as collected, and not later than the 15th of the month succeeding the month in which the policy takes effect

Further, it is proposed to enact that settlement between members of the association and payment of their balances to each other shall be made not later than the 25th of November (for example), for the business of October. Some Canadian insurance men have strong views on the necessity of cash transactions. Said one: "A man should be posted and his risk cancelled if he does not pay his insurance premium promptly." Said another: "This dawdling business of one to three months' credit on premiums is all wrong. If a merchant has not money enough to pay for insurance he had better get out of business." A representative of a Canadian company admitted that there was too much laxity in this respect all along the line; while the manager of a British company declared that the agents are too frightened of losing a risk to insist upon the cash, and hence the custom of granting time.

In the cities, where insurance business is done through brokers, companies appear to have more difficulty in getting their money than in country districts. Some brokers give no reason for complaint in this respect; others, to use the words of an angry manager, are impecunious, slow, and not always truthful. This being true, it seems curious that managers of companies treat such functionaries so gingerly and give them so much latitude. Insurance companies must be very much afraid of one another, if they hesitate to deal sharply with a dilatory agent for fear they may lose such premiums as he can control. There is too much of this cowardliness.

THE STATE OF TRADE.

From the Pacific coast we have more cheerful advices. Writing on October 31st, from Victoria, Mr. H. G. Ross says: "In answer to your question, 'How are collections?' I would say they are easier in all directions than they have been for some time past, and there is a more hopeful feeling in all branches of trade. Mining is attracting a great deal of attention, and the year 1895 will see lots of development work done and capital invested in this direction. The removal of the United States' duty off our coal has been the means of increasing shipments to that country. Lumber matters remain quiet, but it is much to be hoped an improvement will soon take place, for this is an important industry in British Columbia, and it is only a question of time and transportation rates when the lumber of this province will find its way into all the markets of the world."

The Messrs. McPherson, of the Wellington Carpet Co., Guelph, write: "In reply to your enquiry beg to say that for the past six or nine months business has been very dull and collections very slow, but things are reviving and business looking up. We believe we shall be very busy from now till next spring; we have a good many orders for spring now and expect to have all we can attend to very soon. The outlook is much better for the future than it was some time ago."

The experience of Messrs. S. S. Clutton & Sons, of the Vienna Woolen Mills, makers of blankets, flannels and yarns, is as under: "Replying to your card *re* collections, business with us this year has been good, but collections are still slow. We have doubled our output and can hardly supply the demand for our goods."

A manufacturing firm write us with great frankness and some feeling as under:

"We received your card of October headed 'Fall Collections.' As you ask several questions, we might give you some brief information. You ask, how are collections? This is a very difficult question to answer; some days they are so good that one would scarcely realize that times were hard, but next day they are so dreadfully bad and so many renewals are asked for, that one is inclined to think we are in the midst of pretty hard times. The greatest difficulty we have in collections we account for in this way. Two thirds of the business men of to-day ought to be digging drains instead of running a business. They do not understand what a draft means, nor do they know enough to many cases to answer letters in regard to their accounts. We have on our books an account with an eastern contractor who purchased a quantity of goods in January last. He gave a 4 mos. note to cover same. At maturity of the 4 mos. bill he asked for a renewal at 30 days to run, with interest and exchange added, and when the renewal was due he asked for a further renewal at two months. We refused the latter without security, and insisted that the account be paid. We wrote two letters to him on the subject, *and he did not answer either*. Subsequently we advised that unless the account was paid forthwith we would hand the same to our solicitors for collection. The debtor now states that this letter was nothing short of blackmail. We do not know whether you have so much trouble as this collecting accounts for THE MONETARY TIMES, but if you were to write us a card and state that you would discontinue our subscription unless you received one dollar,' arguing on the lines of our eastern friend, we would say it was simply blackmail—'coercion' would not cover it. We do not find trade so very bad, but it might be better. In Manitoba and British Columbia there is no business doing at all, we find. In short, those to whom we would like to sell are not buying, and those who want to buy we are afraid to sell to."

A commission merchant in Winnipeg writes thus:

"Your post card, with not a little fund of humor in it, is to hand The necessary remittance goes herewith. You can take this as an indication that Manitoba is still to the fore, and, despite the hard times, is going to 'stay with' and overcome her troubles. The loan companies intend to help her through by lending a friendly hand to the farmer, recognizing as they do, that without the farmer the bottom falls out of the province."

"I reply with pleasure," is the tone of T. H. McCallum, of Exeter, tanner, who writes on Nov. 8rd: "I beg to say I received your card as a gentle reminder, and am pleased to be able to say business is very good Am well pleased with THE MONETARY TIMES, and wish you every success"

THE SUGAR QUESTION.

Montreal grocers have met to protest against the action of western firms in cutting sugar prices. We do not know that Hamilton and London grocers are selling sugars without profit, but there are Toronto wholesale jobbers who do not conceal the fact that they are disposing of sugars at cost price, and report has it that sugar has been sold at a loss to the seller. Some are inclined to think that this action is due to large stocks which certain jobbers hold. But we doubt if any considerable stocks of sugar are being carried by jobbers here, and incline to attribute their action to a desire to waken up trade and draw out a tardy consumptive demand. Selling sugars has never made wealth for either the wholesale or retail trades. What the grocer loses in time and perhaps in money, too, by the sale of sugar, he hopes to make up in teas, coffee, dried fruit, or some other line of groceries.

But giving away an article in such general demand as sugar may be an expensive means of drawing trade. We are told that Canadian granulated sugars have been sold at $4.10 per 100 lbs in Toronto, and 1 off. The price of the same sugars from refiners' hands is $4 12½, Toronto, net cash, 14 days. There is not much chance for financiering on these terms. This means a loss of 6¼ cents per 100 lbs. or about 20 cents a barrel. It may just be possible, however, that one of the refineries is not in all instances adhering strictly to market quotations, and that some of the jobbers are enabled to buy at terms below those granted the trade in general

The situation is all the more complex because of the importation of German granulated sugars. These sugars are refined from beet roots, and can be laid down in Toronto at 3⅞ to 3¾c per pound, or ⅛c cheaper than Canadian refined. The sale of 2,150 bags in New York on Canadian account was reported a week ago. What future these sugars are to have remains to be seen. They have not the bright hue of the domestic refined sugar, while the mode of package [illegible] are used—places them at no inconsiderable disadvantage. Since the change of tariff in July last Demerara sugars have been coming into prominence in our markets. Although sometimes a little grey they are nice dry sugars and very taking in appearance. Their one disadvantage is lack of dissolving properties, and on this account they may not receive any very general favor here. The cost of laying these sugars down in Toronto is, we believe between 3 and 3¼, which is somewhat below the cost of the same grade of domestic sugars.

OIL BORINGS IN ATHABASCA AND IN GASPE.

When, some years ago, the Senators at Ottawa were accustomed to be told by one of their number, Dr. Schultz, now Lieut.-Governor of Manitoba, about the vast fields of petroleum existing in the Athabasca region of the North-West, they were not greatly impressed with the importance of the prospect. But the Doctor never lost an opportunity of exploiting the claims of that territory to public attention for other reasons as well as that of its wealth in oil. The present Minister of the Interior, Mr. Daly, some months ago instructed an expert at oil-boring, Mr. A. Fraser, to make some trial borings. Mr. Fraser was set to work 250 miles north of Edmonton, by Dr. Selwyn, of the Geological Survey, who said that when he bored 600 feet through the shale the oil stream would be reached. He has now bored 1,000 feet and has not yet got through the shale, but he thinks he is close on it now. He, however, ran out of pipe and had to go east to get a supply. When through boring where he has now started, he will experiment at other places. He declares that there are vast fields of petroleum in Athabasca,

Twenty-eight or thirty years ago much interest was aroused in the petroleum fields of Gaspe, in the Province of Quebec. Members of Parliament, which in those days sat alternately in Quebec and Toronto, visited the district, and some of them invested money in borings for oil. Whether it was that the methods employed were crude, or that the proper places were not tried, the results were not satisfactory, and the enterprise, to use a phrase of that day, "got a black eye." Interest in the subject has re-awakened of late. News comes from Gaspe to the Montreal *Star* that the lands of the International Land Company, purchased about six years ago for $800, and consisting of four hundred acres, were sold on the 8th instant at public auction for $2,500 cash, to the Petroleum Oil Trust, of London. This, in the opinion of the sender of the despatch, means that oil has been struck, but as all the employes are warned to secrecy, nothing has been made public.

MUNICIPAL MEMORANDA.

The good town of Waterloo, Ont., has some Old Country notions. It has just laid $500 worth of cement sidewalks instead of wooden ones.

The St. Johns corporation is pressing ratepayers in arrears for taxes to some purpose. Since the first of January over $7,000 in arrears have been collected.

The Berlin waterworks have now 514 water takers, which shows a liberal consumption. The waterworks of the city of Belleville are owned by the same company.

The Chatham Waterworks Company, which it appears has not been a financial success, offers to sell out to the town for $132,000, and the people of the town will vote on the question in a few weeks.

According to an admission made at a meeting of its townspeople last week, the village of Bedford, Que., has the poorest streets in that province. Now that they realize this, the inhabitants will probably take steps to have the streets improved.

Last week the town council of Amherstburg was empowered by Ontario Order-in-Council to pass a by-law authorizing the issue of debentures to the amount of $9,000, bearing 5 per cent. interest, for the payment of some $5,300 already expended on extensions of the waterworks, for the expenditure of $1,000 in placing a second boiler in the waterworks, and for $2,700 to pay for extensions to the waterworks to be hereafter made.

An undertaking to improve the character of the town's water supply has been given by the water company of Coaticook. And not before it was needed, judging by the following extract from the report of the provincial health inspector: "I must say that the water supplied to the town of Coaticook from the three intakes near the Grand Trunk crossing on Riendeau and McKee's farms, is in such a condition as to be unhealthy and unfit to drink."

While, according to the municipal census, the population of St. Thomas, 10,563, has not increased during the last twelve months, some addition has been made to the wealth of the place. The assessors find the value of real estate there to be $8,771,579, as compared with $8,672,044 a year ago. There is, however, these officers say, no increase in other forms of wealth there, but the contrary. The value this year of personal property is $255,450, a decrease of $35,685; of income assessment, $225,750, a decrease of $21,200.

It is declared likely that a by-law will be submitted to the ratepayers of Brockville in January next, asking their votes on the question whether they shall have a street railway, and, if so, whether it shall be run on Sunday. A Boston man, Mr. Wilgus, representing American capitalists, offers to build an electric street railway in Brockville. They ask for a twenty-year franchise, an acre of ground for buildings, exemption from taxation and permission to run the cars on Sunday. In return they offer a complete and well-equipped electric car service with a five-cent fare.

The city of Halifax having advertised that it desired to borrow $52,000 for sewerage purposes, received offers from Montreal, Toronto and Halifax. The tenders for 4½ per cent. stock were as under: Imperial Trust Company, Toronto, premium, $4.38; G. A. Stimson, Toronto, premium, $4.26; J. C. Mackintosh, Halifax, premium, $3.33½; Hanson Bros., Montreal, $3.25. The following were the offers for 4 per cent. stock: Imperial Trust Company, Toronto, per $100, $96.84; G. A. Stimson, Toronto, per $100, $96.75; J. C. Mackintosh, Halifax, per $100, $96.50; Hanson Bros., Montreal, per $100, $96.26. The *Herald* states that the tender of the Imperial Trust Company, of Toronto, will be accepted.

The council of Lachute, Que., proposes to repeal the taxes on business and rental values, and raise the town revenue mainly by means of a real estate levy. Now here is a proposal to give a demonstration of the practicability of single tax. Let us hear how the municipal councillors of Lachute succeed in this venture. If there are any residents of that place who are bloated capitalists and coupon-clippers, but who own no real estate, they of course will approve the single tax movement, because the town will collect nothing from them. Then the merchant who does his business in a rented shop, and lives in a rented house, will pay nothing towards the town revenues, for business tax and tax on rental value are to be repealed. But the Lord help the fellows who own the land within the town borders; *they* must pay *all* the taxes. Wonder how the good land-owners of Lachute like the prospect.

FOR DRY GOODS RETAILERS.

Christmas is but thirty-nine days distant.

The tendency is towards smaller knots in neckties.

British importations of American Axminsters are on the decrease.

A knitted wool glove for men to retail at 25 to 50 cents is selling well.

In men's gloves tans and assorted browns are the all-prevailing shades.

G. A. Dixon & Co. are removing their clothing store from New Glasgow, N.S.

White dress bows are narrower in width and smaller in size than they were last season.

Manchester, Eng., merchants have decided to found a local cotton market and association of cotton brokers.

Messrs. Thos. Hickey and H. Scott are starting a knitting business in Berlin. There specialty will be bicycle hose.

English Derby walking gloves in all the new shades of red and tan will be *the* glove for street wear this season.—*Economist*.

The Corticelli Silk Co., St. Johns, Que., will light their factory with gas and electric light supplied on their own premises

Some Sarnia merchants are agitating to have the early closing by-law amended so as to allow stores to open on Monday nights.

The clothing establishments of New Westminster, B.C., are to be closed every night at 7 o'clock except on Saturday and days before holidays.

Father—"Why is it that you have no money the day after you receive your salary?" Son—"It is not my fault, daddy—it is all owing to other people."—*Truth*.

"Yes," said Mrs. Shopper, "I bought this dress at the bargain counter, but I am not sure that it was not the shopkeeper who made the bargain."—*Boston Transcript*.

Checks and stripes appear to have lost caste in neckwear, although some very pretty ties are being shown in both these designs. The general tendency appears to favor floral and neat object designs.

Merchants in Leeds report that trade with Canada is beginning to brighten up somewhat and orders on Canadian account are being placed more freely. This applies more particularly to the better class of goods.

Both city and country retailers find a good demand for a men's glove which can be retailed at $1. Can you not push this? A Toronto house reports that a line of two-ball fasteners, kid-lined gloves is among their best selling stock.

"For one month scarcely anything was seen on the streets of London in the shape of neckwear that had not a tinge of green about it," so remarked the English buyer of a Toronto dry goods firm. "But the style was too pronounced to take here. You will see a fair sprinkling of green in the windows of Notre Dame or King street gentlemen's furnishings' stores, but the country merchant wants none or little of it."

Jobbers are now putting the finishing touches upon their stocks of neckwear for the Christmas trade. Better values in lines that retail at from 25 to 50c. will be offered this year than ever before. During the last eighteen months the course of the raw silk market has been a downward one, and this has enabled manufacturers to place goods of excellent quality on the market at low prices.

Nothing has reminded us so strongly of the near approach of Christmas as a peep at John Macdonald & Co.'s stock of holiday novelties. There are goods of every description. Articles made of bronze, steel, porcelain, glass, china, plush, leather, wood, and other commodities. There are picture frames, clocks, perfumes, toilet soap, dressing cases, and a host of things that appear to have no use other than to look pretty and adorn their surroundings

At this season of the year there is but little inclination on the part of the retail merchants to buy stock. No one knows this better than the wholesale trade, and in consequence special efforts are being made to find the susceptible part of the retailer's heart. The period which many houses devote to semi-annual stock taking will soon be at hand, and before it arrives many odds and ends must be cleared from the warehouse. The air is rife with special bargains in dress goods, suitings, gloves, underwear, hosiery, neckwear and a host of other dry goods lines.

The prevailing shapes in neckwear, according to the *D. G. Economist*, are the Teck, plain and flowing ends, four-in-hand and loose, and tied bows. The stock tie had but a very ephemeral vogue and is now relegated to the "has-beens." Ascots are practically dead, with but few indications of their revival. The loose and made-up club ties and bows promise to be very popular, and are more of a feature of fall and winter wear than ever before. The made-up flat scarf is again beginning to receive favorable attention from makers and buyers. As to patterns, neat striped and flowered effects are the present vogue.

FOR GROCERS AND PROVISION DEALERS.

Good to a void —Food.

Brantford market fees may be abolished.

Hamilton retail grocers may close early on Saturday nights.

Australian pine-apples are selling in British Columbia at 10 to 20 cents each.

In 1893 the cheese output of the county of Oxford amounted to 6,725,000 lbs.

The Windsor salt works is increasing its steam power by the addition of two large boilers.

The Strathroy Canning Co. is reported to have doubled the operations of last season this year.

Messrs. Parrish & Lindsay will open a wholesale flour, feed and general grocery store in Brandon, Man.

Lewis Wigle, ex-M.P., Kingsville, Ont., has sold $20,000 of tobacco leaf in Montreal, the product of Essex county

E. A. Hanrahan, of Windsor, has purchased the wholesale and retail liquor and bottling business of G. W. Baby, St. Thomas.

Preston butchers complain of competition from Galt, Berlin and neighboring places; they think that a by-law should be passed in their interests.

The Edmonton, N.W.T., Creamery Co. closed operations for the season on Oct. 1st, having made about 8,000 pounds of butter. None of the butter was exported

A movement is on foot in St. John, N.B., to organize a wholesale grocers' association in that city, or to take such steps as will bring the trade into more intimate relations.

A special cable from London to the *Evening Telegram* says "The imports of Canadian apples just now are large. Prices range from 12s. 6d. to 23s. per barrel, according to variety and quality.

The world's visible supply of coffee, November 1, just compiled, shows 3,011,715 bags, against 2,927,544 bags October 1st, an increase of 84,171 bags, and compares with 2,443,295 bags same time last year.

The shipments of Canadian cheese from Montreal to England this season still keep ahead of last season. The total forwarded is now 1,573,969 boxes, as against 1,558,606 boxes last year to corresponding date.

Doctor—"I would advise you to take quinine in all the whiskey you drink."

Old Pepper—"But, great Scott! doctor, isn't quinine in such quantities injurious?"—*Puck*.

The Starch Works promise to do a large business in the hands of the new company. Brantfordites now interested in the concern include G Foster, I Cockshutt, A Robertson, Dr Lowery, H W Brethour, E Sweet, J. Grace, H B Yates and T White. *Courier*.

The Montreal Chamber of Commerce has asked the Local Government of Quebec to send circulars to all the agricultural societies of the province, in order to ascertain how many acres of land would be available for beet root culture in Quebec province. Hon. Mr Beaubien agreed to do this

Montreal wholesale grocers are very much annoyed at the action of some Ontario merchants, who for some time have been selling sugars at ruinous prices. The Montreal men have decided to lay the matter before the Dominion Grocers' Guild and it is hoped an amicable settlement will be arrived at.

The Wholesale Grocers' Association held a meeting in Montreal on Monday, which is understood to be in relation to the customs duties on figs. Our customs authorities claim that figs coming from England should pay duty on the ruling price there, which is enhanced by the English duties. The importers claim that these articles are purchased in bond, and that this rule places the valuation too high

British Columbia salmon carried off further honors at the recent British and Colonial Exhibition, held in Manchester, England. The Federation Canning Company exhibited about 6,000 cases, and judgment was pronounced upon samples taken at haphazard, and by experts declared to be worthy of the gold medal for firm, flaky fish, rich in oil and excellent in color. The same company, says the *Colonist*, also exhibited samples of fruits put up by the Okell & Morris Fruit Preserving Co., of Victoria, which also gained highest honors for canned fruits

A meeting of the Toronto retail grocers' guild was held on Monday evening. The following were nominated for officers during the coming year President, E F Roberts vice-president, H W McCulloch, A Sinclair, A. White, T. Mulqueen, F. Johnson, J. Butcher, W. Sykes, J S. Bond; hon. secretary, Robert Mills, R. A. Donald, treasurer, E. W Clarke, M. McMillan. A large number of nominations were made for the executive committee. The elections will take place at the next monthly meeting of the association, and it is expected that there will be still further nominations. It was decided that the annual banquet will be held after the installation of the officers at the January meeting, and that the tickets will be only disposed of to the trade, and to commercial travellers in connection with the trade

RETAILING BOOTS AND SHOES.

Wet weather, and rubber goods selling well.

There promises to be a run on big buttons in women's footwear next spring.

The chances are that the light tans of last spring will be replaced by darker hues next spring.

The needle-toe, between a Piccadilly and a razor-toe, promises to be "all right" for next spring.

A two-buttoned strap shoe—the buttons are large—promises well for next spring. It can be retailed at $3, and may be had in colors as well as black

Not before the first fall of snow will the retail merchant give his order for fur-lined goods. We have had our initial snow storm, and in consequence orders are being placed for all descriptions of warm fur-lined footwear.

It is impossible to conduct a first-class trade without first-class appointments. Are the settees in your store not only comfortable but presentable in appearance? There may be room for improvement; you cannot see yourself as others see you

To say that jobbers in rubber goods are busy conveys a very faint idea of the activity with which they are engaged. Shipments of lumbermen's supplies and other lines are being made up in order to go forward to North Shore points before the close of navigation.

Mr. Larke, Canada's Trade Commissioner to Australia, says that Quebec manufacturers think they will be able to export boots and shoes to Australia. We believe, however, that at Mr. Larke's Quebec meeting there was not a large attendance of the shoe men. There are no natural conditions to prevent this trade. With improved machinery and a tariff favorable to importations of raw material, Canadian boot and shoe manufacturers can compete with the world

"Talk of Montreal and Quebec manufacturers monopolizing the Ontario market," said Mr Stevens of Lawlaw Watson & Co. London, "and you have only given one side of the story. I have just returned from Montreal where I took orders far exceeding my expectations. We make almost exclusively the better grades of goods, and I consider this as a promising augury for next spring. We have had enough of cheap goods; they afford no satisfaction to either manufacturer or consumer."

The Toronto agency of the Granby Rubber Company is working night and day to fill their orders, and Mr. Romack, the manager of the agency, thinks that the present season promises to be the best for

several years past. Their best selling brand is probably the "Protector,' which, with a high vamp, neat appearance and extra light weight, is certainly very attractive. The "Piccadilly," in both plain and rolled edges, is also finding good sale, and when fitted over a razor-toe or Piccadilly boot, gives the foot of the wearer a very neat appearance.

HARDWARE AND METAL TRADE NOTES.

Ottawa has a Hardware Hockey Club, with Mr. Thomas Birkett honorary president.

Montreal plumbers consider themselves unjustly treated by the manufacturers and wholesale merchants of the city.

The Hull Iron and Brass Foundry, owned by Mr. Thos. Lawson, of Ottawa, took fire last Saturday evening and was badly damaged.

A steamer has arrived in Montreal harbor, with 300 tons Summerlee pig iron. And the steamship "Tiber" has reached that city with 1,200 tons of Ferrona pig.

The increased number of tin plate mills in operation has sharpened competition for orders, and quotations are a shade lower.—*British Iron and Steel Trades Journal.*

A cubic inch of cast iron weighs .26 of a pound, but for making estimates is usually called .25. By dividing the number of cubic inches by four we have the weight in pounds.

A company is being formed, with a capital of $100,000, for the establishment in Ottawa of a factory for the manufacture of carbons, porcelain, and other electrical supplies.

It would seem that within the near future iron smelting will be one of the great industries of this city. Particulars at present cannot be given for certain reasons, but the *Record* has been shown a very superior quality of iron ore secured in this vicinity and also the pure iron smelted from the same find. It is tough, compact and susceptible of a very high polish; in fact it is not surpassed in the world. And there are millions of tons of it.—*St. John, N.B., Record.*

James Watson & Co., Glasgow, under date of Nov. 2nd, say: "We have again to report a dull steady pig iron market with a moderate business doing in Scotch warrants. There is a fair demand for shipping brands, and prices are well maintained."

Shipments of pig iron from British centres of production since the first of the year have been: Scotland, to Oct. 27, 197,085 tons; Middlesbro', to Nov. 1, 786,688; Cumberland, to Oct. 27, 298,819 tons. Shipments during the same periods last year were; Scotland, 251,150; Middlesbro', 793,265; Cumberland, 226,433 tons.

"With few exceptions," says the Cleveland *Iron Trade Review*, "iron and steel manufacturers are protectionists, and now that the country is practically beyond the possibility of further advances toward free trade for two or three years at least, it is to be expected that the business policy of individual buyers will be governed by their judgment as to the improved outlook. Sentimental improvement is already present; the next development to be expected is an improved demand and freer trading."

CLEARING-HOUSE RETURNS.

The following are the figures of the Canadian clearing-houses for the week ended with Thursday, Nov. 15th, compared with those of the previous week:

Clearings.	Nov. 15.	Nov. 8.
Montreal	$12,726,527	$14,196,293
Toronto	6,322,050	6,149,448
Halifax	1,316,467	1,295,422
Winnipeg	1,492,242	1,650,810
Hamilton	770,044	903,396
Total	$22,627,330	$24,195,369

Aggregate balances this week, $3,969,927; last week, $3,921,533.

—Investigation is being made into alleged frauds upon the Government of New Brunswick in connection with work on the Suspension Bridge over the St. John river in 1892. Richard Retallick, engaged to be supervisor for the Government at $3 per day, swore that he kept no books or memoranda, but made up his pay sheets from another man's time book. It appears, indeed the witness admitted, that he paid $2 per day to men and charged the Government $2.50 per day, keeping the difference for himself. He seemed in no wise disturbed when taxed with this fraud, thinking perhaps, as many do, that it is no wrong to cheat the Government. The examination was still proceeding at the time of our last advices. A little wholesome punishment for such unjust stewards might assist in overcoming the prevalent notion that it is no harm to cheat a municipality or the country.

—There are some pointed signs of the times in the semi-annual statement of the Bank of Montreal up to close of October. The reduction in earnings of that bank for the period named illustrates the difficulty of getting investments when so much money is offering in every financial centre. It shows, too, the reduced scale of rates of interest. The increase of interest-bearing deposits from $21,266,440 this time last year to $23,938,571, while complimentary to the bank, can not be a welcome feature to the management at the present time. The deposits to current accounts and not bearing interest have also increased from $6,579,678 to $7,631,449. These accumulations doubtless mean that capitalists are timid about making manufacturing or commercial investments, and are willing to let their money lie in bank with or without interest. A decrease of nearly a million and a half is shown in current loans and discounts; while the mortgage-secured obligations and the past due debts are both reduced. The bank's earnings for the six months have been $604,862.10, which is very little in excess of the dividend. For the last six months ending Oct. 31, 1893, they were $30,000 greater.

—A Victoria telegram of Monday last anticipates some of the work of the British Columbia Legislature, which was to open on that day and to last probably until 20th December. The body is convoked thus early in order to ratify the unlooked for expenditure caused by the Fraser river floods. The speech from the Throne will, it is said, express hope that a comprehensive scheme for the future prevention of floods in Fraser valley may soon be initiated, and also that the reclamation of large tracts of land in this fertile valley may incidentally be accomplished. The progress of mining (both coal and precious metals), the success of the sealing and fishing industries during the year, and the bright prospects of immigration, are touched upon briefly. Among the important Government measures foreshadowed are bills for the better government of cities and the final settlement of the long pending dispute relative to lands in the railway belt. The House will be asked to consider the general depression of trade and the heavy disbursements necessitated by the Fraser floods in view of the fact that the revenue will be found somewhat less than estimated. Nothing is said in the speech regarding the British Pacific Railway project.

—The Dominion Commercial Travellers' Association, whose headquarters are in Montreal, is an important body, numbering as it now does 2,490 members. At its recent meeting, of which we give an account on another page, the retiring president, Mr. David Watson, gave some interesting figures showing the extent and character of the investments made of its accumulated funds. These now amount to $131,650. Some $16,000 which had been invested in mortgages, has been paid in this year and is now re-invested. The rate of interest obtained from the association's funds ranges from five to six per cent. There is $89,000 in first mortgages on real estate at 5 per cent.; $21,500 in first mortgages at 5½ per cent.; $7,970 in Montreal harbor bonds at 6, and $8,180 at 5 per cent.; $5,000 in secured mortgage bonds, Montreal Board of Trade, at 5 per cent. A yearly revenue is thus shown from invested funds of $6,769.70, equal to an average return of about 5.15 per cent.

—It is always agreeable to see an appointment to a position under Government, requiring business ability and integrity, made with a strict view to the attainments and commercial repute of the appointee. The spectacle is not too often seen. But in choosing for the responsible post of Deputy Provincial Treasurer, Mr. Walter N. Anderson, late general manager of the Canadian Bank of Commerce, the Ontario Government has shown good judgment. Mr. Anderson will, we believe, prove a valuable officer. He has never been politically prominent, and he understands, we have no doubt, that his duty is to administer the affairs of his department as a trust for the people and not for the behoof of party hacks or ward heelers.

—We learn further with respect to the proposed modification of the currency system of the United States now known as the "Baltimore Currency Plan," that the board of trade of that city has decided to co-operate with the Baltimore Clearing-House Association in their proposed endeavors. It is stated by the Baltimore *Journal of Commerce* that the clearing house of that city is now preparing a pamphlet describing the Baltimore Currency Plan in detail. for distribution to all the United States bankers; and the board of trade will make use of the same pamphlet and place it, with their endorsement, in the hands of the boards of trade and chambers of commerce throughout the United States.

—By reason of the Thanksgiving Day holiday, we shall have to go to press on Wednesday with our advertising forms. Will advertisers therefore send in their changes one day earlier than usual next week.

MONEY AND STOCKS.

The week has been an uneventful one in financial circles. Bank stocks are firm. A large block of Commerce shares was thrown upon the market during the week; it was all absorbed without in any way depreciating the value of this stock. Imperial is also considered extremely good property, and is held 1 point higher than at the beginning of the week. The shares of loan and insurance companies remain steady and have shown little disposition to vary in value. While miscellaneous stocks have been fairly steady, the close of the period under review finds them at a slightly lower basis of values than a week ago. Large sales of Montreal Street Railway have been made in Montreal. Consumers' Gas remains steady. C.P.R. closes the week lower both here and abroad. Taking the whole list of miscellaneous stocks into consideration, there have been fewer transactions this week than during the previous week.

Until the last few days it was impossible to obtain money from the banks at a less rate than 4½ per cent. But as we premised last week, the rate has been reduced to 4 per cent.; this applies only to money loaned on the very best security. The Bank of Montreal statement was issued on Thursday morning. We elsewhere note the nature of this report. In New York, according to the *Bulletin and Journal of Commerce*, the time loan market is quiet, as lenders are conservative. The offerings for short dates are restricted, although the rate nominally quoted continues at 1½ to 2 per cent For ninety days and four months 2 to 2⅛ per cent. is quoted, and for five to eight months 2⅜ to 3 per cent. The volume of business in commercial paper was small. Rates were 2½ to 2⅝ per cent. for sixty and ninety day receivables; 3 per cent. for four-month singles and prime commission house names, and 4 to 7 per cent for singles not known. The market affords a quick sale only for choice notes.

POSTAL REFORM IN BRITAIN

Postal reforms are always welcome, even though they come in homœopathic doses. Three months ago the Postmaster-General conferred on the public the boon of being allowed to affix a halfpenny stamp to what is known as a "correspondence card" and of despatching it as a letter. He now comes forward with another useful concession. Speaking at Bristol yesterday, he announced that at the opening of the New Year all charges for redirection on every class of correspondence are to be abolished. According to the existing rule, letters only are exempt from these charges. If people move from one address to any other, in town or country, they are entitled to have their letters retransmitted free. Mr. Arnold Morley proposes to extend this benefit in future to book packets, circulars, and similar documents, parcels being alone exempted. Such a change, however, is not to be altogether unattended with drawbacks. While conferring favors on the one hand, Mr. Morley exacts some kind of compensation on the other. He wants to relieve the Dead Letter officials of the burden that has lately rested upon them in connection with the returned circulars and packets. Ever since the coming into force of the new regulations which allow these documents to be sent in open envelopes, the returns have multiplied to an enormous extent Last year they amounted to more than ten millions. The practice has hitherto prevailed of taking the majority of these back to the senders post free, thereby entailing an amount of trouble and cost to the Department which the halfpenny stamp is far from covering A different system is now to be followed. The returns are to be classified under three categories. In the first will be placed packets which are presumably of some importance. These are to be at once returned to the senders. The same principle will apply to packets whose senders express on the outside a desire to get them back on payment of a second postage. All other packets on which a halfpenny only has been prepaid will be "diposed of" at the office of delivery. Mr. Morley expects to reap a double benefit from this change. He hopes not only to lessen the work of the Department, but also to accomplish a saving sufficient to meet the expense of redirection, and thus to be relieved of the necessity of imposing any additional burden on the taxpayer. Those who look to other portions of Mr. Morley's speech in the hope of getting any light on vexed questions relating to the American mails and Imperial penny postage, will be disappointed.—*Glasgow Herald, Nov 2nd.*

THE ECONOMIC POSITION OF WOMEN

Miss Irwin, Glasgow, Assistant Commissioner, late Royal Commission on Labor, gave the opening lecture to the Ladies' Dialectical Society on the 1st instant in the Philosophical Institution, Edinburgh, the subject being the economic position of women. Miss Hadwen presided, and there was a large attendance of ladies on the platform. Miss Irwin touched on the value of the political suffrage for women, and the need for it in view of the increasing share women were now taking in public as well as in industrial life She thought the trend of modern politics was strongly in the direction of social and industrial legislation, and she urged the expediency of all women making themselves acquainted with the conditions constituting social and industrial problems, as she considered that these would be the problems with which they would in the near future be called upon to deal responsibly when they obtained the franchise. Miss Irwin also remarked on the anomaly that was presented when the new Factory Acts Amendment Bill, regulating the conditions of work for thousands of women, was lately introduced, and not one woman had any direct voice in the matter. It was her belief that the wages question was the question of paramount importance for the social reformer, and, speaking generally, she had found that the health, morality and standard of social life among working women was more largely regulated by the wages they received than by anything else.

Miss Irwin went on to speak of the various features that characterize women's industries, the want of a standard and uniform wage for the same work throughout the trade and district, the disorganized competition between the sexes and among women themselves, etc. She urged also the need for careful and systematic inquiry into the conditions of work in the various trades, with a view to ascertaining whether legislation could be applied to such grievances as might be disclosed, and how far these were met by present labor enactments. She thought this work might be taken up by the State or by private agencies—preferably by the former—and on lines similar to those followed by the Royal Commission on Labor. Miss Irwin gave an account of the work of the National Federal Council of Scotland, recently formed for dealing with the question of women's work, and of which she was honorary secretary. An interesting discussion followed in which Mrs Patrick Geddes, Miss Wigham, Miss Hill Burton, Miss Thompson, and other well-known ladies took part

PERCENTAGE OF WRONG-DOERS.

I crossed on one of the big Atlantic liners lately with 500 other saloon passengers. They were naturally people of intelligence and presumably of easy circumstances Yet at least half of those people were planning to rob the United States Government of money by contriving plans to avoid paying duties truly owed To do this all of them had to lower our [illegible] as most cases [illegible] to be dishonest.

Many of them were pleased to accomplish the theft by the bribery of our custom-house inspectors. One was openly making memoranda that he had to bribe other men on the wharf. In the city I left there was a saying that it was understood that they are an average honest class of people. Outside of buildings on which twenty people live and drop in a dozen times [illegible] one where the body of a horse [illegible] would mean that all must eat [illegible] warm [illegible] But I cannot think in the poorest and vilest parts of the city you have where the percentage of liars and thieves and bribe-givers is as large as was that among the first-class passengers on that floating palace. Each continental society has its own standard. And I believe [illegible] to the percentage of wrong-doers to the whole.—*From "The Hon. Peter Sterling" P. I. Ford*

CHANGED CONDITIONS IN THE FISH TRADE.

The arrival in our port recently of a steamer from St. John's, Nfld., with [illegible] quintals of green codfish, clearly illustrates the changing conditions to which our chief item of export is gradually being made subject. It has been said by many experienced merchants in the fish trade that steamers were invented for the transportation of such a perishable commodity as dried and partially cured fish, but the remarkable lack of facts to practically demonstrate a complete revolution of ideas on the question Large quantities of cod have been carried here in steam vessels from St. Pierre and some of the outports on the western coast of Newfoundland for some time past, and it is understood that the results have been entirely satisfactory to consignees as a rule These shipments have been made in some instances in baskets so called, or what may be described as large hampers of netting or lagging, while specially constructed cases of wood with handles of rope have also been used in order to accomplish the purpose of prompt delivery in all weathers The "empties" are returned and made available in successive voyages, ensuring results varying by but slight degree from the conveyance of ordinary non-perishable articles The cargo of the "Nimrod" referred to is in bulk, however, and is designed for treatment by the process in use at the fish drying establishment of Messrs. Whitman at Lawrence, Mass. Operations of this nature are successfully carried on in France, notably at the *secheries* in Bordeaux and other seaports in that country, and there is no reason to doubt that the methods employed will be equally productive of good results here

It seems obvious that the development of a system which will enable the fisherman to prosecute his calling more vigorously and continuously, leaving the drying and curing to experts, can hardly fail to be of the greatest possible benefit to all concerned in this great industry. In most of the [illegible] harbors of Europe a complete subdivision of labor is the rule, the fish [illegible] delivering the [illegible] to others whose business is to prepare the article for market The unrivalled superiority of Scotch finnan haddies, and of the Dutch herring as known throughout Europe for their flavor are remarkable instances of the results possible of attaining by separate agency handling of the fish as soon as possible after they are taken. Nature has designated Halifax as a great centre of the fishing trade which has been an important factor in our prosperity since its earliest settlement, and every thing connected with the most modern and improved methods of handling the great industry is a matter of deep interest to all classes of the community Values in our fisheries are stationary proves that our fisheries are far and away the most important of our possessions, and the declaration of the great Lord Bacon nearly three centuries ago "that the fisheries in those waters contained richer treasures than the mines of Mexico and Peru," is as true and applicable to-day as it was in the infancy stages of the discovery and colonization of the continent

A reliable authority places the aggregate annual catch of cod alone by those nationalities, Britain, French and American on North American waters at nearly two million quintals, the value of which would be about [illegible] million dollars. Closely identified as this industry is

with the export trade to Europe, to the tropics, and South America, the importance of promoting measures ensuring the adaptation of modern methods of handling and curing and of transportation by steam of the great staple, can hardly be overestimated. The impetus in our export of fish owing to the removal of duties in the Spanish West Indies may reasonably be expected to bring back the old time stir in the stores and on the wharves along the harbor front. In place of six or eight steamers, the future possibilities of the West India and South American trade point to a fleet of twice or three times the number plying regularly to and from the marts which have been the objects of enterprise for Halifax merchants from its earliest days. The *Maritime Grocer* has awakened the echoes so frequently with regard to modern facilities of rail connections along the wharves from north to south, that further ventilation would seem a tiresome repetition. Its connection with the subject under discussion is so obvious that our readers can make their own comments.—*Maritime Grocer, Halifax*

HOW TO PREVENT FIRES.

A Detroit hardware firm prints and issues to its customers the following advice on the subject:

1. Keep matches in metal boxes, away from children and rats.
2. Keep oiled rags in metal boxes; never throw them in closets, nor near hot air or steam pipes.
3. Keep dust and sweepings out of hot air register openings
4. Where gas brackets can be swung against wood, protect wood with a sheet of asbestos.
5. Rags used for cleaning lamps should be kept in a crock or metal box.
6. When wood is used for fuel, clean the chimneys at least twice a year; when coal is used, once a year is sufficient.
7. Use sheet iron pails or barrels for ashes; never deposit ashes in wooden barrels or boxes, unless they are placed at least 30 feet from the house or fence.

AN AMERICAN LINER.

On Monday last the first of the two steamships built in the United States for the International Navigation Company was launched from the Cramp's shipyard, Philadelphia, in the presence of President Cleveland, members of the Cabinet and a large throng of the people. Mrs. Cleveland stood sponsor for the vessel and christened it the "St. Louis." The new steamer is not only the largest steamboat built in the States, but her construction marks a departure in shipbuilding in America. The dimensions of the "St. Louis" are: 554 feet 8 inches over all; 63 feet extreme breadth, and 26 feet draught. The gross tonnage is 10,770 tons, and when loaded to the draught line the steamship's displacement will be 16,000 tons.

CANADIAN SHEEP IN ENGLAND.

What are we to do with the Canadian farmer? The point is really one of serious moment. Mr. Gardner has done his feeble worst; but, despite his forcible feebility, the Canadian farmer has, during the nine expired months of the year, sent live sheep to British markets to the value of £121,663. Within a few weeks 1,800 sheep have been landed at Islington, and sold at 4s. a stone, or 6d. per lb., including offal. This is a portent—a serious, ominous portent. These 1,800 sheep indicate that the vast prairie regions of the North-West have entered the arena of competition against the English farmers. We are told by those engaged in the sheep trade that these prairie animals will prove more popular than frozen Australian mutton.—*Mark Lane Express.*

SAW DUST IN THE OTTAWA.

The chief analyst of the Department of Inland Revenue has been engaged in making an analysis of samples of the Ottawa River water taken at various points between the Deschenes Rapids and Montreal, with a special view to ascertaining what effect the throwing of immense quantities of sawdust into the river at Chaudiere Falls has had on the water below that point. This bulletin will prove of special interest, in view of the fact that the Ottawa lumbermen will undoubtedly make a big fight in Parliament next session to get the Act prohibiting the throwing of sawdust into the Ottawa River, which comes into force on 1st May next, extended for another year, on the ground that they have not had sufficient time afforded them to provide means for disposing of the mill refuse in any other way than by dumping it into the river. At a meeting held in Ottawa the other day, two of the spokesmen for the sawmill proprietors defended the practice of dumping sawdust into the river, and hinted at taking their mills away from Ottawa if they were compelled to burn or otherwise dispose of it.

AN IRISH WIT.

Had he ever voted at an election, the late Father Healy, of Ballybrack, might have applied to himself Mark Pattison's saying that "he dined with the Tories and voted with their opponents." Although a Nationalist, he was a welcome and frequent guest at Lord Londonderry's and other Unionist houses, and was wont to declare that he was a member of the Con-vincibles, not the In-vincibles. Quaintness and spontaneity, rather than wit, characterized his "good sayings," which owed their charm to the old man's musical voice, sparkling eyes, and handsome features. Father Healy's dinners to select parties of brother priests were renowned in Dublin. The cookery, although plain, was invariably perfect, and the whiskey "a dream." Dr. Nedley, the only rival of the deceased in Dublin society as a *raconteur*, attended him in his last illness.

Father Healy was of very humble origin, and his mother, a poor widow, had managed out of the takings of a small "sweety" shop in a back street to save enough money to educate her son for the priesthood. On one occasion, at a dinner at the Viceregal Lodge, a snobbish newcomer, thinking to "get a rise" out of the old priest, asked him whether he had known the Duchess of Richmond, wife of a former Viceroy. "I did not," replied Father Healy. "But surely," continued the other, "you must often have been at the Castle in the Duke's time?" Father Healy assumed an air of mystery, and at last whispered audibly, "I don't mind revealin' a sacret after this lapse of time; the fact is, me mother and the Duchess never *quite* hit it off."

A PULLMAN CAR OR STEAMSHIP CABIN DRUG STORE.

—Why is it, or how is it, that drug stores in particular are often found in country places so sumptuously fitted up and so attractive in appearance? They beat the dry goods store, or the hardware store, or the shoe store, in plate glass and lighting, while in decoration they beat the church itself. We are not finding any fault with this; we merely ask how it comes about. Here we find a whole column in the Renfrew *Mercury* describing the new drug store of Mr. J. Clark, and really that interior must be a compound of a modern palace car and an ocean steamer's cabin. We read of "the four long and broad counters, 22½ feet in length, two of them three feet wide, and the other two with plate glass tops 30 inches wide, the whole length—artistically panelled, made of British Columbia cedar, finished in the natural wood, as are the whole of the exposed fittings of the wall show-cases, drawers and shelving. The background of the wall-cases is stained cherry." Then we are told of mirrors 7 feet high and 6 feet broad, of the latest styles of drug bottles and drawer pulls, imported from New York, with their silvered and enamelled brightness, and so on, steam heat, a nine foot basement, central telephone station on the premises, fancy goods on one side the store, drugs on the other, wall paper near by, etc. We should like to be a commercial traveller, with "a day off," just to visit that shop.

THE BRITISH MONEY MARKET.

Upon his return from England, whither he had gone on business connected with the recently floated Canadian loan, the general manager of the Bank of Montreal was interviewed by a Montreal *Gazette* reporter, and replied to enquiries as under:

"There is very little sign of a revival in business on the other side, that is, at least so far as I could see. Canadian securities, good ones, stand high, but the market will look at nothing that is not first-class. This is shown by the result of the Dominion loan, the most successful one ever floated in the Dominion of Canada. It was very well taken up by a very good class of investors, and numbers applied to whom nothing could be allotted.

"Our Canadian banks, I am glad to say, applied for the first time as tenderers for a Canadian loan, and though they did not bid sufficiently high to obtain any of it, the moral effect of a number of bids from Canada was very good, showing entire confidence in the financial standing of Canada, and was a factor in forcing up the general price.

In answer to the question, "When do you look for a revival of business?" Mr. Clouston said:

"When confidence returns, and it can be shown that investments are good, money will flow in. At present there is [on the other side of the Atlantic] a feeling of uncertainty that prevents people from investing except in safe

securities They do not care to enter into any new enterprises. The only evidence I saw of speculation was in West Australian and South African gold mines."

"Just at the time we issued the loan," Mr. Clouston went on, "matters were not very favorable. People were expecting the death of the Czar and there was considerable uncertainty about future complications on the continent Fortunately we carried through the loan before anything transpired. The success of the loan was the best answer to the detractions hurled against Canada, showing what the investing people of England think of the Dominion."

OPIUM POSSIBILITIES.

Few commodities have greater use in the drug market than opium, and at present all eyes are turned towards Turkey, certain districts of which country are important centres of production. It is said that about one spring sowing in ten in recent years has proved favorable to the planters, the plants not being sufficiently hardy to withstand frosts and other weather conditions which are apt to prevail in the opium districts during the early spring. As an instance of the uncertainty of the crop, estimates made in the early months of the calendar year placed the yield of the spring sowing at something like 6,500 cases. It actually amounted to 2,850 cases. Dealers, therefore, naturally look to the fall sowings as a basis for calculation on the new crop. As a rule the fall sowings are made during October, but a severe drought has prevailed continually for the last month throughout the opium districts, and unless this be relieved the crop must be a failure.

GRAND TRUNK MEETING.

The Grand Trunk meeting is over and the board has not been turned out. On the contrary, considering the wholesale misrepresentations freely made and scattered about during the previous week, the proceedings were more than usually quiet, the largest shareholders evidently being determined that comparatively unknown men with, perhaps, no very large amount really at stake, should not be allowed to prejudice a position already serious enough without a wrangle between the board and the proprietors. The malcontents may say they have scored, since the accounts are to be investigated in Canada by an independent legal expert, acting under the instructions of a committee of *bona fide* holders at this side, owning among them half a million of the company's capital But this proves the exact opposite of any such contention It shows that the board has nothing whatever to conceal. They welcome rather than otherwise any possible help that may be rendered from such an audit. As for ourselves, we doubt very much if any good will result, because all this loose talk about leakages in Canada is mere hare-brained assumption. Things are bad, therefore something must be wrong. That is the sum total of the reasoning, sight being entirely lost of the fact that matters are worse elsewhere, and that the causes of depression were entirely beyond the control of any one, and were altogether exceptional. We know of our own knowledge that the accounts are most carefully audited here in London, and we more than doubt whether any irregularities will be discovered in Canada. The investigation will, however, be a thoroughly *bona fide* one, and it will be a satisfaction to the proprietors to have it made The London deputation suggested, and the board acquiesced in, the appointment of Mr. Samuel R. Barker, formerly solicitor of the Great Western of Canada, who will act under written instructions and investigate the accounts in Canada.

Now that the excitement of the meeting is over, the proprietors can look to the future with greater equanimity. We should recommend them not to sacrifice their holdings at present prices, for, though recovery may be delayed, it ought to come some time. Business is recovering in the United States, and that must react favorably on Canada. Sir Henry Tyler thinks the Canadian coal tariff will shortly be modified, and it certainly ought to be. It would mean £80,000 a year to the Grand Trunk. Mr. Seargeant, the general manager, is looking for better rates. Hopes have been so long deferred that it would be well not to be too sanguine. But one thing we take to be certain, that the

Canadian Pacific cannot go on much longer as it is, and must come to terms with the Grand Trunk. The two roads could regulate local business at any rate. In the United States there is a good deal of talk as to the necessity of legalizing pooling, and the interdependence between prosperous railways and good trade. But mere verbiage like this will not do the thing, and in the meantime railway rates are going from bad to worse. Immediate relief from this quarter is doubtful. A promise has been given that all possible economy shall be strictly exercised. We would point out that it is possible to carry that too far. A labor strike, for instance, might prove the last straw on the camel's back. The board have very skilfully kept clear of that in recent years, and we trust will continue to do so.—*Herapath's Railway Journal, London, Nov. 2.*

Commercial.

MONTREAL MARKETS.

MONTREAL, Nov. 14th, 1894.

ASHES.—First quality pots are quoted easier at $4.30, and dull at that; seconds, $3.75 to $3.80. Receipts have fallen off very much, and the demand is also weak. Pearls would be higher in price were there any available, but there are only 2 brls. of seconds in store, and a cable order from London for 5 brls. cannot be filled at the moment.

BOOTS AND SHOES.—Spring orders for foot wear are not coming in so freely from retail dealers as might be desired; some good orders, however, have been placed by jobbers with Quebec manufacturers, one especially large order for 40,000 pairs being reported, which shows that there is faith in activity of demand some time this fall or winter.

DAIRY PRODUCTS.—The shipments of cheese last week were 61,643 boxes, about 21,000 boxes less than the corresponding week last year. The total shipments for 1894 to date are 1,573,969 boxes, about 15,000 boxes ahead of last year. The market has recovered a little in steadiness, but no advance in prices can be noted. We quote finest Western 10¼ to 10⅜c., Townships 10 to 10½c., Eastern 9⅞c. per lb. In butter there is only a fair local movement; we quote creamery 19 to 21c., Townships dairy 18 to 19c., Western 15 to 17c. per lb. Eggs are in request at 16 to 17c. for boiling stock, ordinary 13 to 14c. per dozen.

DRY GOODS.—Though the weather has been more wintry, the effect on trade is not yet very noticeable, and sorting orders from both country and city retailers are hardly up to expectations. There has been a falling off in failures among general dealers or dry goods retailers, but general collections are still slow, though Manitoba and Northwest remittances show improvement.

MONTREAL GRAIN STOCKS IN STORE.

	Nov. 10, '94.	Nov. 11, '93.
Wheat, bushels	692,676	654,551
Corn, "	....	1,582
Oats, "	11,186	82,896
Rye, "	1,337	36,766
Peas, "	95,312	216,916
Barley, "	1,603	46,680
Buckwheat, "	1,214	23,946
Total grain	903,228	1,063,337

The quantity of flour in store here on Saturday last was 24,114 barrels, as against 21,593 barrels the previous week, and 38,912 barrels at like date last year Of oatmeal the stock was only 485 barrels, and on the previous Saturday 217 barrels.

VISIBLE SUPPLY OF GRAIN.

The visible supply of grain in the United States and Canada, according to the computation of the secretary of the Chicago Board of Trade, is as follows, with comparisons:

	Nov. 10, 1894. Bush.	Nov. 11, 1893. Bush.	Nov. 12 1892. Bush.
Wheat	81,220,000	74,052,000	67,203,000
Corn	2,638,000	8,141,000	13,113,000
Oats	9,064,000	4,746,000	8,195,000
Rye	449,000	366,000	1,269,000
Barley	3,993,000	320,000	2,762,000

FURS.—As yet there are few raw furs offering, and such as there are show poor quality. Choice mink and otter are in demand at the moment for local wants; of common there is plenty. European advices are not very favorable as to the prospects for shipping furs. We quote for average prime skins: Bear, $10 to 14.00; cub, $3 to 5.00; beaver, $3 to 3.50; otter, $7 to 10.00; mink, $1 to 2.00; marten, 75c. to $1; fisher, $2.50 to 4.00; red fox, 60c. to $1; skunk, 20, 50 and 75c.; fall rats, 4 to 8c.; coon, 15, 40 and 60c.

GROCERIES.—As winter freight rates go into effect on the 15th inst., there has been rather more activity in the movement of goods during the past week, but this will likely be only temporary. Teas are quieter than they have been, but are very firm as to price, and first hands hold but few japans. Sugars are without change; granulated at factory 4⅛ to 4¼c. per lb. as to lot; yellows, 3¾ to 3⅞c.; low grades are still scarce, and the raw material to make them is not here. The German refined beet sugar, before mentioned, came to hand last week, and seems to have afforded satisfaction, repeat orders being placed in some instances. Molasses is in fair request at 30c. per gal. for single puncheons of Barbadoes, lots 28 to 29c. Coffees are firm at 20 to 21c. per lb. for Rio; Maracaibo, 20½ to 22c.; Java, 23 to 28c.; Mocha, 27 to 31c. Canned goods are still moving very slowly. Corn and tomatoes, 90c. for standard brands; salmon, $5.50 per case; lobsters, $7. Bosnian prunes are now in the market at 4⅜ to 5c. per lb. French, same figure for 90's to 110's. On the whole the movement in dried fruits is quiet for the season.

LEATHER.—As already anticipated, November is proving a very quiet month for leather dealers, and there is next to nothing doing. Account sales just to hand from England show no change in prices over there, and business is not very active, but better things are hoped for after the turn of the year. A couple of English leather men have been in the market here, but beyond buying some small lots of cheap sole, did not do much. They solicited consignments of splits, but as good prices can be got here. We quote:—Spanish sole B. A. No. 1, 18 to 20c.; do No. 2 to B. A., 17 to 18c.; No. 1 ordinary Spanish, 17 to 18c.; No. 2, 16 to 17c.; No. 1 slaughter, 18 to 20c.; No. 2 do., 17 to 18c.; American oak sole, 39 to 43c.; waxed upper, light and medium, 24 to 26c.; do. heavy, 20 to 24c.; grained, 24 to 26c.; Scotch grained, 25 to 27c.; splits, large, 13 to 16c.; do. small, 11 to 12½c.; calf-splits, 27 to 30c.; calfskins (35 to 40 lbs.), 50 to 60c.; imitation French calfskins, 60 to 70c.; colored calf, Ameri-

METALS AND HARDWARE.—Trading in iron and heavy metals generally is dull, and we hear of little doing beyond a few small lots of domestic iron at quotations. The steamship "Tiber" arrived in port a few days ago with 1,215 tons of Ferrona pig-iron from Pictou. The "Amarynthia" has 300 tons of Summerlee pig on board, 200 tons of which is placed; the balance could be bought at something below quotations to save putting in store. Holders are asking $21.00 to 21.50 ex-yard. There is some moderate supply of Carnbroe pig, but other brands of Scotch iron are scarce. Bars and plates are without change. Lead is again cabled a little lower We make the quotation for Silesian spelter $4 00 to 4 25, though it has been offered in lots somewhat below the inside figure We quote:—Coltness pig iron, none here; Calder, No. 1, none here; Calder No. 3, none here; Summerlee, $21 00 to 21 50; Eglinton, $18 50. Gartsherrie, none here; Langloan, none here; Carnbroe, $18 50 to 19 00; Shotts, none here; Middlesboro, No. 3, $17; Niagara No. 2, $18.50 to 19.00; Siemens, pig, No. 1, $16 50 to $17 25, Ferrona, No 1, $16 50 to 17 00, machinery scrap, $15.00; common do., $12.00; bar iron, Canadian, $1.65; British, $5 25; best refined, $2 40; Low Moor, $5 10; Canada plates—Blaina, or Garth, $2.05 to 2.10; all polished Canadas, $2.75; Terne roofing plate, 20 x 28, $5 75 to $6 00 Black sheet iron, No. 28, $2.15 to 2.30; No. 26, $2.15 to 2. 20, No.24, $2.10; tin plates—Bradley charcoal, $5 25 to $5 50, charcoal I C $3.50 I P Crown, $3 75 to 4.00, do I X $4 75 to 5.00 Coke I C $2 75 to 2.90; coke waisters $2 65 galvanized sheets, No. 28, ordinary brands, 4½ to 4¾c.; No. 26, 4c., No 24, 3¾c., in case lots Morewood, 5½ to 6c; tinned sheets, coke, No 24, 6 to 6½c., No 26, 6½ to 6¾c. the usual extra for large sizes Hoops and bands, per 100 lbs., $2 25 to 2 50 Steel boiler plate ¼ inch and upwards $2 00 to 2 10 for Dalzell and equal American tee; latex, $1.90 to $2 ditto, three-sixteenths inch $2 60; common tank iron $1 65 to 1 75 tank steel, $1 80 heads, $2 85 Russian sheet iron 10 to 10½c lead, per 100lbs., pig, $2 75 to 2 90, sheet $4 00 to $4 25, shot, $6 00 to 6 50 Best cast steel, 10½ to 12c spring, $2 50 tire $2 50 to 2 75 sleigh shoe, $2 40; round machinery steel $3 ingot tin, 17½ to 18½c.; bar tin, 25c.; ingot copper, 9¾ to 11c., sheet zinc $4 50 to 4 75, Silesian spelter, $4 to 4 25 American do $4 to 4 25 Antimony 10½ to 12c bright iron wires Nos 0 to 8, $2 65 per 100 lbs.; annealed do, $2 70; galvanized, $3 35 the trade discount on wire is 20 per cent Barb and twisted wire and staples, 3½c Coil chain, ¼ inch, 5c.; ⅜ inch, 4½c.; 7-16 in., 4½c; ½ in., 3¾ to 4c., ⅝ in., ½c; ¾ in., 3½c., ⅞ in., and upwards.

OILS, PAINTS AND GLASS.—The trade movement is still fairly maintained in these lines, but will drop off with the close of navigation in course of a week or so There is much complaint of cutting in prices of linseed oil by Western houses, which is considered quite unwarranted in view of the comparatively small stocks and the reported corner in seed Some united action on the part of the local trade is being considered in order to meet the difficulty In the meantime quotations are maintained as below. In turpentine, leads, paints, etc., there is no change. Stocks of glass are now all forward Prices are $1 20 for first break, $1 30 for second break; 50-box lots 5c. less, but may stiffen shortly. We quote:—Turpentine, 43c per gallon for single barrels two to four barrels, 42c. Linseed oil, raw, 57c. per gallon; boiled, 60c.; 5-barrel lots, 1c. less; olive oil, machinery, 90c.; castor, in lots, 6¼c.; single cases, 6½ to 6¾c.; tins, 7c.; Nfld. cod, 38 to 40c. per gal.; Gaspe oil, 38c per gal.; steam refined seal, 38 to 40c., in small lots. Leads (chemically pure and first-class brands only), $4.50 to 5.00 No 1 $4.50 No 2, $4.25; No. 3, $4 00; dry white lead, 5c., genuine red do., 4½c.; No. 1 red lead, 4c.; putty, 2c. in bladders per brl.; London washed whiting, 40 to 45c.; Paris white, 90c.; Venetian red, $1 50 to 1 75, yellow ochre $1 50 to 1 75 spruce ochre, $2 25 to 2.50; window glass, $1 20 per 50 feet for first break; $1 30 for second break; third break, $2 80

WOOL.—The market is very dull, and there is little stock of foreign wool available here at the moment. A cargo of Cape, amounting to some 1,100 odd bales, will be due here about the end of the month. Samples of it are to hand, and show fine quality; prices will range from 12½ to 16½c per lb., there being a considerable proportion of fine border wools among the lot. A 50,000 lb lot of B A scoured is absent to hand, and is quoted at 26 to 32c. There is little greasy Australian available at 15c., and British Columbia at 10 to 11c Domestics as before

TORONTO MARKETS

TORONTO, Nov 15th, 1894

DRY GOODS.—This so far as the wholesale merchant is concerned, is a 'between seasons' period and trade is slow. Previous to the stock taking of December, merchants are seeking to clear up the odds and ends of stock, and retailers, who are always on the outlook for bargains, are buying odd lots of dress goods, suitings, underwear, hosiery oil cloths, etc The retail trade has not been very brisk this week but with colder weather better results may be looked for The first fall of snow, as usual, brought out a demand for cloaks, mantles, and cold weather goods. Values remain without any marked change. Reports from abroad are however, if anything, a little firmer this week

FLOUR AND MEAL.—There is practically a trial of strength now in progress between the holders and the buyers of flour In sympathy with the wheat market prices were advanced and merchants are seeking to uphold this advance. Plenty of orders are coming in at the old figures, but merchants, so far as we can learn, are refusing to sell The advance must be sustained, we sincerely hope it is but everything must depend upon the course of the

STEAM BOILER & PLATE GLASS INSURANCE CO.

wheat markets. Some shipments are going forward to the eastern provinces. Oatmeal remains unchanged at $3.60 to 3.75. Mill-feed is in fair demand at unaltered quotations.

GRAIN.—The advance in wheat which we reported last week has not only been maintained, but increased strength has characterized the market again this week. The demand is confined principally to that from local millers, but values have almost reached an export basis. Oats continue unchanged and the recent advance in freight rates appears to have kept prices down. A steady market in barley can be reported; some shipments of superior quality have been sent to the United States, but otherwise the trade done is of a local character. Rye is dull. Corn continues to be uninteresting.

The stocks of grain in store at Port Arthur on Nov. 3rd were 1,421,580 bushels. During the week there were received 650,427 bushels, and shipped 922,222 bushels, leaving in store on Nov. 10th, 1,149,785.

Oats, "	15,149	17,795	600
Buckwheat, "	3,586	2,951	....

GROCERIES.—Trade on the whole may be described as good. Navigation will close on Nov. 30th, if not before, and the movement to North Shore points is attaining daily larger volume. Dried fruit brought per steamer "Avlona" is now in stock. Valencia raisins remain easy, with off stalk quoted 4¼, and fine off stalk 4¾c.; Sultanas are worth 5½ to 8½c. There is a good general movement of sugars, and prices are very low, as we note elsewhere. Domestic syrups are scarce. Teas are very firm, especially Ceylons and Japans.

HARDWARE.—The general volume of trade is keeping up well, and during the last few weeks the movement has been good. This has been practically the result of a desire to take advantage of the lower freight rates, as a change in the tariff was made to-day, Thursday. The near approach of the close of Upper Lake navigation has also stimulated trade. Beyond these reasons there is, however, a good general demand from country merchants for general lines of hardware. In the early season retailers placed their orders very cautiously, and it is but natural that large repeat orders should be given now.

HIDES AND SKINS.—If anything the hide market is a little firmer than it was a week ago, and buyers are selling to better advantage. The consumptive demand is being well sustained, stocks are light, and no accumulations are taking place. Dealers are still paying 3½c. for cows and 4c. for steers, with sales at 4¼ and 5c. Sheepskins are unchanged at 55c. There appears to be an accumulation of skins throughout the country, and stocks are not selling as readily as they should. Tallow is being well sold up, dealers paying 5¾c., and selling at 6¼c.

LEATHER.—We cannot say that the lapse of a week has brought any distinct improvement to the tanners' commodity, but on the other hand trade conditions are no worse than they were seven days ago. Spanish sole moves well, and there is no accumulation of stocks; slaughter, however, is just a trifle slow. For the descriptions which Canada exports there is better enquiry abroad, and shipments of Spanish sole will be made during the coming week.

PROVISIONS.—Trade in this line is not characterized by any special activity. A marked dulness still hangs over the butter market; choice rolls are quoted at 16c. and tubs at 17c. per lb. Common descriptions are entirely neglected. Only the usual moderate jobbing trade is doing in cheese. Hog products have not gained any strength this week, and in sympathy with dressed hogs stocks are selling at low values. Dressed hogs are worth $5 to 5.25, the latter price being paid for choice weights. Eggs are quiet at 15c. per dozen for held fresh and 18c. for new-laid; pickled bring 14c. Country merchants are paying 4½ to 4¾c per lb. for dried apples and selling here at 5¼c Evaporating apples are offering at low prices, but buyers do not appear anxious to take them. The market is, at the moment, glutted with poultry and quotations are low; we enumerate: Turkeys 7 to 8c., geese 4 to 5c. per lb.; chickens 25 to 35c., ducks 40 to 60c. per pair. There is no life to the few transactions taking place in hops, and prices remain on a low basis.

SEEDS.—Since our last report little has transpired to move the market either up or down. The frost of last Saturday will put a stop to out-door work on the farm, and we may expect farmers to turn their attention to threshing out their seed and marketing it. Quotations remain without change for any descriptions.

WOOL.—The situation remains rather disappointing. Domestic mills are not enquiring after stock, while the demand from the United States for Canadian fleece wools is at present non-existent. The local wool buyers continue to make a few purchases at 18c., but receipts are small and holders in the country are evidently waiting for better prices.

BRITISH MARKETS.

Farnworth & Jardine's Liverpool wood circular, of 1st November, shows that the arrivals at that port of timber ships during October from British North America have been 42 vessels, 36,517 tons, against 32 vessels, 28,501 tons, during the corresponding month last year, and the aggregate tonnage to this date from all places during the years 1892, 1893, and 1894, has been 370,828, 342,002 and 369,354 tons respectively. N.S. and N.B. deals, it will be seen, have been overshipped and the stock has accumulated.

The dulness reported in our recent circulars still continues; imports, with few exceptions, have not been heavy, but still more than sufficient for the demand, and stocks of all articles

These prices are wholesale by the carload.

are ample. There is no change in value to report, though, owing to the uneasiness caused by the late failures in the trade here, some articles have slightly given way.

CANADIAN WOODS.—*Waney and Square.*—The import has been small, but the deliveries have been very small, and the stock is quite ample; there is no change in value to report. Red pine has not been imported; the demand is very limited, and prices rule low. Oak has moved off very slowly during the month, and although there is little change in the value of first-class wood to report, recent sales of Southern States wood have been at exceedingly low prices; the stock is too heavy. Ash has been imported more moderately; there has been a fair enquiry, but prices are low, and the stock is quite sufficient. Elm has not been imported, the demand has been very moderate, and the stock is sufficient: there is no change in value. Pine deals have arrived too freely, and although the deliveries have been fair, values have not improved, and the stock is much too heavy.

NEW BRUNSWICK AND NOVA SCOTIA SPRUCE AND PINE DEALS.—Of spruce deals the import has been very excessive, viz., 14,236 standards, against 7,809 standards same month last year. The deliveries have been fair, viz., 9,118 standards, still the stock has accumulated, and is now too heavy; early in the month prices were steady, but latterly have slightly given way. *Pine Deals*—The demand is very limited, and no change in value to report.

BIRCH.—Of logs the import has been small; the deliveries have been light, although there is rather more enquiry, and prices are firmer. Of planks the arrivals have been too heavy; there is rather more enquiry, but prices still continue very low, with too large a stock on hand.

UNITED STATES OAK.—Of logs there has been no import; the stock, however, is still too heavy, and prices rule very low. Of planks the import has been moderate, but the deliveries have also been small. There is rather more enquiry for first-class planks of special sizes, but for inferior quality, of which a large portion of the present stock consists, sales can only be effected at very low rates.

PITCH PINE.—The arrivals during the past month have been four vessels, 4,475 tons, against one vessel, 1,325 tons, during the like time last year. Of hewn there have been no arrivals; the deliveries have been on a large scale, and the stock is in a moderate compass. Of sawn four cargoes have arrived, embracing two steamers which have gone up to Saltport, one contract cargo for Birkenhead, and one cargo which was disposed of here by auction; the consumption has been large, but stocks are very excessive, and there is no prospect of any early improvement in value. Planks are dull of sale, but boards are in fair demand, though prices have been lower of late; the stock is ample.

SEQUOIA (CALIFORNIA REDWOOD).—There has been no import; the demand continues limited, prices are low and without change, and stocks are too heavy to induce importers to entertain future business.

BRITISH COLUMBIAN AND OREGON PINE.—There has been no import; the demand has been very limited; prices are without change, and the stock is heavy.

UNITED STATES STAVES.—Stocks of these are too heavy, the arrivals continue on a large scale, and quite in excess of the requirements of the trade; values are slightly lower all round.

BALTIC AND EUROPEAN WOODS.—The arrivals during the past month have been 25 vessels, 13,904 tons, against 24 vessels, 13,172 tons, during the like time last year. *Fir Timber*—The only arrival has been a cargo of Dantzic on contract; the demand is very limited, and the stock, though moderate, is sufficient. *Red and White Deals*—There has been a fair import, chiefly from Russia, chiefly as usual on contract; the deliveries have been on a moderate scale, and the stock is large. Of flooring boards the import has been light; there has been a moderate consumption: there is no change in value, and the stock is in a fairly moderate compass. Of masts and spars there has been no import, and the demand keeps very limited. Mining timber and props, however, have arrived freely, and these, as usual, go direct into consumers' hands.

SEE THE NEW
Unconditional Accumulative Policy
ISSUED BY THE
Confederation Life Association
TORONTO, ONTARIO,

It is a simple promise to pay the sum insured, in the event of death.
It is absolutely free from all restrictions as to residence, travel and occupation.
It is entirely void of all conditions save the payment of premium.
It provides for the payment of the claim immediately upon proof of death.
It offers six modes of settlement at the end of the Dividend Period.
It is absolutely and automatically non-forfeitable after two years, the insured being entitled to
(*a*) **Extended Insurance,** without application, for the full amount of the policy, for the further period of time definitely set forth in the policy, or on surrender, to a
(*b*) **Paid up policy,** the amount of which is written in the policy, or after five years to a
(*c*) **Cash value,** as guaranteed in the policy.
Full information furnished on application to the Head Office or to any of the Company's Agents.

UNION MUTUAL LIFE INS. CO.,

PORTLAND, MAINE.

INCORPORATED 1848.

FRED. E. RICHARDS, - - - President.
ARTHUR L. BATES, - - - - Vice-President.
J. FRANK LANG, - - - - Secretary.

The Union Mutual Life Insurance Company has had a business experience of forty-four years. Its policies are generally conceded to be of the most liberal character. It is the ONLY company issuing policies under the Maine Non-Forfeiture Law. It has 36 millions of dollars of insurance in force upon its books. It has an annual income of one and a quarter million dollars. It has already paid to its policyholders 27 millions of dollars.

AGRICULTURAL INSURANCE CO'Y.

GEO. H. MAURER, Manager,
Rooms 34 and 35, 34 Victoria St., Toronto.

RICHARD A. McCURDY PRESIDENT.

Is commemorated by the issuance of two forms of "Semi-Centennial Policies."

The Five Per Cent. Debenture

—AND—

The Continuous Instalment

Agents find these policies easy to place because they afford the best insurance ever offered by any company.

For details address the company at its Head Office, Nassau, Cedar and Liberty Streets, New York, or the nearest General Agent.

THE GREAT-WEST LIFE ASSURANCE CO.

HEAD OFFICE: WINNIPEG

Subscribed Capital... $400,000 00 Government Deposit $56,000 00
Paid-up Capital ..... 100,000 00 Reserve 54,720 00
Business in force over $4,000,000 00

The attention of the insuring public and live progressive agents is called to the following reasons for selecting this company:

First—It is the only Canadian company giving its policyholders the security of a four per cent. reserve; all others without exception reserving on a lower standard.

Second—The policy contract is as liberal as any issued. No restriction as to residence, travel or occupation, and incontestable after one year.

Third—The premium rates are low and the cost to the policyholder is certain to be less than in any other company because a better rate of interest can be earned in the west than at the home of any other company.

Fourth—Every desirable plan of insurance is issued from the low priced "PAY AS YOU GO" plan to the shortest single premium endowment.

THE LIFE INSURANCE AGENT.

Many fine things have been said and written about the life insurance agent. After-dinner speakers have asserted that he ranks next to the minister of the gospel in doing good. He induces men to look into the future. He convinces them, often with difficulty, to think ahead—to provide, so far as their incomes will permit them, for the protection of those dependent upon them. Every man, of course, expects or hopes to accumulate money, and to "leave something," when he dies, for his wife and children or for others. The accumulation of money, however, is slow and uncertain, and statistics show that most men fail to accumulate anything worth speaking of. It is a fact, sad but true, that most husbands and fathers have a limited income, all of which goes between the first of January and the thirty-first of December, in each year, for "living expenses." Very little bed-rock economy is practiced by Americans. Even our foreign friends who come here with the most economical principles, lose, little by little, their strict habits of thrift, and, in a generation or so, they or their descendants are spending their money as freely as the "Americans" whose ancestors came over in the "Mayflower."

A vast majority of the citizens of the United States, whether they earn five hundred dollars or ten thousand dollars a year, live from hand to mouth; that is they lay by very little for rainy days. Any emergency which suddenly deprives them of their salaries finds them unprepared to sustain themselves for a long period. We doubt very much whether the average American citizen—except in so far as he may be advantaged because he had hitherto paid his bills to the grocer and other tradesmen, thereby creating a "credit" which may last for a time—is so far away from actual destitution as sixty days. Because most men in an occasional rational moment realize how little they have accumulated, and how little they will accumulate under their manner of living, the work of the life insurance agent is lightened. It is much easier for a man to leave a thousand dollars to his family by an expenditure of twenty-five dollars a year to pay a life insurance premium, than it is to save a thousand dollars, dollar by dollar. Hence it is that so many salaried men have adopted the rule of providing for their families through life insurance, and, aside from the sum set apart for the payment of premiums, of "living up" to their incomes, whatever they may be, every year.

This being true, how should one measure the responsibility of life agents? Does the ordinary agent feel that he stands next to the minister of the gospel in doing good? He likes to hear the after-dinner speakers and the insurance writers, all of whom are more or less "carried away" by their subject, say that he, the agent, is a great benefactor, that he should be welcomed wherever and whenever he calls, instead of being "put off," as is sometimes the case. But does he realize that if he sells a life insurance policy, issued by a company whose financial strength is doubtful or on a plan which may not prove advantageous to the beneficiaries of the insurant; or if he secures the application through promises which he knows will not be fulfilled, thus casting a burden upon the policyholder which, possibly, may cause him to sacrifice his insurance—if he does these things, or any of them, does he realize the extent of the injury he may inflict upon the man whose application for a life insurance policy he has sought and obtained?

The loss of life insurance always means a great deal to the policyholder and those depending on him. There is always a chance, after the lapse of years, that a man may be no longer insurable. Under the most favorable circumstances a new policy will cost him, per thousand dollars, considerably more than the insurance he has lost. And so it happens that, although a life insurance agent is, in most cases, a doer of good, he is sometimes an enemy, a traitor, to his client. He is a friend, provided he sells an honest policy in a sound company, but he is a traitor if the policy he offers, or the company he represents, is in any sense unworthy of the trust which he has induced the insurant to place in it.

The trust which a husband or father places in a life insurance company should never be betrayed. Few, if any, breaches of trust can be more far-reaching and injurious in their consequences than those which result from the selling of life insurance policies of doubtful value. Poor life insurance is not worth having. We have seen letters, within a few days, written by men who trusted life insurance corporations which have recently failed. Some of the men are no longer insurable. The loss to them and their families is far greater than the actual money loss as it will be calculated by the accountants employed by the receivers. In several instances the only means by which these men could possibly provide for their families has been swept away.—*The Chronicle.*

DOMINION COMMERCIAL TRAVELLERS' ASSOCIATION.

On Saturday last, in Montreal, the Dominion Commercial Travellers' Association held their quarterly meeting in the Board of Trade building. Mr. David Watson, the retiring president, occupied the chair, while Mr. H. W. Wadsworth acted as secretary.

The past year's work, the president declared, had been eminently satisfactory, and he quoted the following figures: The association has now 2,271 ordinary and 219 associate members, making in all 2,490, 400 being French-Canadians, or an increase to November 1st of 96 over the preceding year. The revenue shows an increase of about $2,000, partly from increased member ship and partly by lessened expenses of administration. The death rate among members has been heavy during the year, however, the aggregate amount of mortuary claims being $21,060 where at the same date of 1893 they had been only $13,938. But this will be met without having to fall back upon the reserve fund, and there will be $5,000 or $6,000 to go to the rest account. From 1884 to 1888, inclusive, the death claims of the association show a yearly average of about $6,000, as follows: 1884, $3,200; 1885, $3,700; 1886, $10,000; 1887, $6,400; 1888, $6,800. Total, $30,-100. But the figures for the five years following show that the average claims reached $10,185 per year:—1889, $7,600; 1890, $10,800; 1891, $6,175; 1892, $14,400; 1893, $12,900. Total, $50,925, which is nearly double the previous five years. The president urged that effort to add to the reserve fund should continue until it reached a quarter million. Its figure is now $131,650.

Mr. Watson referred in his address to members' certificates, to the P.E. Island tax on travelling salesmen, for which legal remedy is being sought, and to the excess baggage question. The present condition of this last, he said, was a grievance which should be adjusted. According to the present rules of the railway companies the rates charged, he declares, are heavier than if the traveller sent his baggage by express, and the speaker made the suggestion that they charge a rate equal to the double of first-class freight. In concluding a very practical address, Mr. Watson called attention to the benevolent fund, which had not been treated as liberally as in former years, and he hoped that at least $500 would be placed at the disposal of that particular committee.

The nomination of officers was proceeded with. Mr. Watson refusing to be nominated for the presidency for a second term, Col. Fred. Massey received nomination for the office by a number of most influential members, among them Messrs. George Sumner, Geo. Cains, Fred. Hughes, J. A. Cantlie, J. T. Dwyer, J. N. Lassonde and others. The other candidate, Mr. Joseph H. Morin, received the support of Messers. J. Harris, J. D. Rolland, Gustave Piche, C. H. Cochrane, Geo. Beaudoin and others. After all the nominations for the office of vice-president had been handed in, it was found that the contest for that office would be between Messrs. Alfred Elliot, John Taylor, John Bryers and Max Murdock. It appears that there is to be no contest for the position of treasurer. Mr. Fred. Birks was elected by acclamation, during his absence in the West, and the announcement was received with cheers. Mr. Birks was treasurer before, and for several years, if we remember correctly. Five members of the Board of Direction retiring, ten or a dozen members were nominated to fill the vacancies. These were: Messrs. Joseph Youngheart, C. Prevost, Newton Nicker, of Thos. May & Co.; C. H. Cochrane, of S. H. & A. H. Ewing; J. T. McBride, of McBride, Harris & Co.; John Stewart, of St. Johns, P.Q.; A. D. Gall, of the Royal Oil Co.; W. C. Wonham, John Fales, of Sherbrooke; James Armstrong and W. D. McLaren, jr.

The annual meeting was decided to be held on December 15th, at the Fraser Institute Hall. The poll will close at 5 o'clock p.m. on the day before the annual meeting, and Messrs. F. X. de Grandpre, W. P. Beauchamp, O. E. Brewster, J. T. Dwyer, J. S. Bullick, Fred. Birks, T. H. Clark and W. A. Craven are chosen as scrutineers.

Various notices of motion were given looking to the amendment of by-laws, etc. And Mr. Frank Gormley gave notice of a commendable motion intended to bring into existence a fund for members who may be totally incapacitated for work.

It was intended that the annual reunion should take the form of a dinner. The committee to arrange date and details is composed of Messrs. Joe Morin, J. T. Dwyer, Jno. Taylor, U. P. Beauchamp, Lieut.-Col. Massey, Geo. Cains, Frank Gormley, W. Galbraith, J. Clark, W. H. Callahan, F. X. Grandpre, Alfred Elliot and Lawrence Wilson, with power to add to their numbers.

CANADA COMPLIMENTED.

In a recent issue of a prominent New York journal, the *Commercial Advertiser*, appears an article very complimentary of Canadian enterprise and Canadian intelligence. That journal congratulates Canada "upon successfully placing upon the London market a large 3 per cent. loan, maturing in 1938 (forty-four years hence), at 97½, or at 3.076 per cent. interest." After reviewing the financial position of the Dominion as regards the public debt and rate of taxation, to the disadvantage of Canada as compared with the United States, it concludes that "in view of these facts, the Canadian loan was a marked success. The United States has never placed a loan, all things considered, upon as favorable terms." The reasons for this are summed up as follows:—

"First—Because the Canadian Government followed the action of Great Britain in adopting a single standard of exchange or measure of values.

"Second—Because the leaders of neither political party in Canada have ever pandered to the populistic demand for the free coinage of silver.

"Third—Because the leaders of both political parties have steadfastly opposed the issue and circulation of coin or paper currency of doubtful value.

"Fourth—Because the bank currency of Canada is payable in gold coin on demand.

"Fifth—Because the monetary system of Canada has never been made a political issue.

"Sixth—Because the electors of Canada have persistently demanded honest money irrespective of their party affiliations."

We can afford to accept compliments of this kind, because they tell the truth. American statesmen and (sometimes) business men may affect to belittle Canada, but they may and do learn from her all the same.

—Frederick the Great drank tokay, according to a French writer, who has been investigating the favorite drinks of great men; Peter the Great drank Madeira; Cardinal Richelieu, romanee; Rabelais, chablis; Rubens, marsala; Cromwell, like Clarence, malmsey; Marshal Saxe, champagne; Talleyrand, Chateau Margaux; Byron, port; Goethe, Johannisberg; Humboldt, sauterne; Charles V., alicante, and Francis I., sherry.—*Philadelphia Record.*

—A monument has been erected at Bar-l Duc, a small town in France, to Michaux, father and son, the inventors of the bicycle. One day a hobby horse was brought to their engineers' shop to be repaired—a toy on wheels, on which the small boy sat astride and pushed himself along by striking his feet on the ground. Ernest Michaux conceived the happy thought that the wheels could be propelled by levers worked by the feet, and thus the velocipede sprang into being.

—The twentieth annual meeting of shareholders of the Sherbrooke Loan and Mortgage Company was held November 6th. The dividend of 5½ per cent. was satisfactory to the shareholders, and on motion the statement presented was received and adopted. The former board was unanimously re-elected. On motion it was resolved that application be made to the Provincial Legislature at its approaching session for the passage of an Act to amend the charter of the company and to extend its borrowing power. At a subsequent meeting of the directors, Mr. L. B. Lawford was reappointed president, and Mr. G. E. Rioux vice-president.

The Investment Annuity Policy
—OF THE—
North American Life Assurance Company

Provides that at death, or if on the Endowment Plan, at the maturity of the endowment period, the Company will pay the amount of insurance in 20 or 25 equal annual instalments, the first of such to be paid on the occurrence of the event or at the expiration of the endowment period. This plan at once secures to the beneficiary an absolute guaranteed income for the period selected.

The particular features of this plan are not embodied in any other policy of insurance offered to the insuring public of Canada. It contains elements which no company has yet offered to the insured.

A much lower rate of premium is chargeable on it than on the other plans of insurance, on account of the payment of the face of the policy being extended over a period of twenty or twenty-five years.

The favorite method of accumulating the profits is equally applicable to this plan of insurance as to the other investment plans of the Company.

For further particulars apply to any of the Company's Agents, or to

DECISIONS IN COMMERCIAL LAW

WHEELER v WESTBROOK.—The case was tried in the Queen's Bench Divisional Court. A partnership for a definite term which has not expired can be put an end to by the voluntary assignment of one of the partners of his interest in the business, at his own instance, or at the instance of his assignee, against the will of the other partner. And where a partnership is put an end to, the assignor being the lessee of the premises on which the business is carried on, and assigning the term to the assignee, the latter is entitled to recover possession of the premises against the other partner without notice to quit or demand of possession. Where the holder of a tavern license enters into a partnership with another person to whom he assigns an interest in the tavern business, such an assignment is not an assignment of his business within the meaning of the Liquor License Act, and does not require a transfer of the license.

IN RE O'CONNOR AND FIELDER.—The Queen's Bench Divisional Court holds that it is a general rule, applicable in all cases of private authority, trust or reference to be exercised by several persons, that unless the constituent instrument permits action or decision by a majority, the office is regarded as joint, and all must act collectively. Different considerations arise when the duties are public in nature, but in transactions between individuals they make their own bargain, and so become a law unto themselves. And where a submission to arbitration provided that the award should be made by three arbitrators, the award by two of them, the other dissenting, was set aside on summary application.

IN RE THE ONTARIO EXPRESS AND TRANSPORTATION COMPANY.—The Chancery Divisional Court of Ontario held that where a director of a company is appointed an officer of the company, he does not hold such appointment as director; and, therefore, where an act of incorporation enacted that no by-law for the payment of the president or any director should be valid or acted upon until the same had been confirmed at a general meeting of the shareholders, this applied only to the payment of money for the services of a director, *qua* director, and of the services of the president as presiding officer of the board of directors, but that the company having appointed the directors to various salaried offices, and there being in this case no contract with the company upon which they could recover remuneration, they were nevertheless entitled to a *quantum meruit* for services rendered to the company during the time they discharged the duties of their respective offices.

HELLEMS v CITY OF ST CATHARINES.—It is provided by the Municipal Act that officers appointed by the council shall hold office until removed by the council. It was held by the Common Pleas Division of the Divisional Court that all such officers hold their offices during the pleasure of the council and may be removed at any time without notice or cause shown therefor, and without the corporation incurring any liability thereby. Where therefore a city commissioner was appointed by a resolution of the council, and shortly afterwards another resolution was passed rescinding the former one, the appointment was rescinded without the corporation having incurred any liability.

HEROD v FERGUSON.—In an action for the value of surgical and medical services rendered by the plaintiff to the defendant, it appeared that after all the services had been rendered and charged to the defendant only, in the books of the plaintiff, the defendant's son had asked the plaintiff to send the account to him; that the plaintiff had done so, making out the account in the son's name, which the son had promised to pay; that the plaintiff had recovered judgment by default against the son for the amount, but finding him worthless, had not issued execution, and had then brought this action. It was found as a fact that the contract for the services had been made with the father and not with the son. There was no evidence of any agreement by the plaintiff to accept the son as his debtor and to release the father. It was held by Street, J., that the son became liable to the plaintiff, if at all, upon a subsequent promise, which was not a satisfaction of the original cause of action, but collateral to it; that the original cause of action still existed, because there had been no novation of it, no payment or release of it, and no judgment recovered upon it, and the plaintiff was entitled to recover.

SUIT AGAINST BANK OFFICIALS

That bank directors should use vigilance and inform themselves with respect to the manner in which their cashiers conduct their own and the bank's transactions, would appear to be the view upheld in the following suit, which we find recorded in *Rhodes' Journal*:

W. A. Latimer, receiver of the First National Bank at Sedalia, Mo., has filed a suit for $358,000 against the directors of the suspended institution. The petition makes public the alleged methods of President Cyrus Newkirk and Cashier J. C. Thompson, and the directors, in conducting the business of the bank. Only three of the directors have property that can be reached by the suit. J. C. Thompson, the cashier, is a fugitive in Mexico, and Cyrus Newkirk, the president, is now residing in California. It is charged that the directors allowed Newkirk to overdraw his account $101,000, and permitted Thompson to gamble away $71,000 in stocks, wheat and real estate deals, besides allowing insolvent parties, without security, to draw $90,000 out of the vault.

For Durability, Simplicity and perfection, this Brace Buckle stands supreme. It's without teeth and cannot slip. the harder the pull, the tighter it gets. No need to take off the ends to adjust it up or down. A favorite with everyone who wears it, and a seller every time.

Mercantile Summary.

$10 BILLS of the defunct Acadia Bank, of Liverpool, N.S., are in circulation.

THE Summerside Electric Company have commenced to do some inside wiring of shops, etc., at Summerside, P.E.I.

A HENSALL correspondent of the *Expositor* says that J. Pope, merchant tailor, has disposed of his business at Fullarton, which was under the management of Mr. John Norris, to that gentleman.

WE are advised by circular from Woodstock, N.B., that the business heretofore conducted by Wm. Balmain and Geo. E. Balmain, under the name and style of Johnston & Co., will hereafter be carried on under the name of Balmain Bros. This firm deals in farm implements, carriages, organs, sewing machines, bicycles, etc., and hopes to do a larger trade than ever before.

THE following item appears in the Amherstburg *Leader*: Messrs. Robinson Bros. own and manage a flourishing grocery in Leamington, and work a farm too with very little assistance. They have grown from 50 acres the following: Wheat, 309 bushels; oats, 300 bushels; corn, 1,600 bushels; potatoes, 700 bushels; roots and hoed crops, 2,500 bushels, in addition to planting 18 acres in fruit trees. At present prices the produce grown is worth $1,533.

Special Notice to you who Sell Oysters in Bulk

This season we are giving away to every purchaser of 1,000 oyster pails a very handsome window display card with the words "Bulk Oysters for sale here," printed in gold leaf on heavy morocco board, size 19x12, or a handsome chromo lithographed in fifteen colors. The retailer will find it greatly to his advantage to use these cards as a notice to the passing public that he is in the oyster business.

We are offering this special inducement to obtain your trade, as our facilities are 60,000 per day, and every pail guaranteed uniform, perfectly liquid tight and second to none on the market. Our prices are as low as any. Send in a trial order for your pails and get one of these cards.

Mercantile Summary.

ASSIGNEE CLARKSON will receive tenders for the purchase of 390 shares, of $100 each, of the capital stock of the Consolidated Plate Glass Co., up to Friday, 30th November.

FROM our travelling agent, Mr. Oliver, who has been in the Ottawa district for some time, we hear accounts of activity in the manufacturing industries of Ottawa city. He tells us that the Eddy Works and the various saw-mills are now working night and day. The McKay Milling Co. has doubled the capacity of their mill, and are now turning out some 870 barrels flour per day. They have opened a branch office, store and warehouse in the premises of Gould & Son, Montreal.

AT Granby, Que., some days ago, the mayor, Mr. Miner, on behalf of the Rubber Co., handed the secretary-treasurer a cheque for $15,330, being the par value of stock held by the corporation in that company and a balance of interest. This return for their investment, in the opinion of a councillor, fully justifies the action of the ratepayers who voted in favor of taking stock in this company. The factory has been running for six years, and with increasing prospects of success, and the money, which with fear and trembling was advanced to aid this industry in its infancy, has been returned to the corporation.

Mercantile Summary.

THE treasurer of the County of Waterloo will receive tenders up to 13th December for the purchase of $10,000 worth of that county's debentures. They are to be repaid in instalments within twenty years.

THE business portion of Ottawa has of late received many alterations and additions. Old buildings have been enlarged and improved, while fine new blocks have been erected in various parts of the city. Two entirely new stores have been put up by two of the oldest business houses in the city, viz., J. Roberts Allen, the successor of the late John Roberts, chemist and druggist, and by G. May & Sons, well-known leather merchants and manufacturers. These stores are built of Don Valley pressed brick, are four stories in height, with stone basements, and have plate glass windows to the fourth story. The interiors are fitted up with taste and suitable offices have been provided on every floor. Among the old stores refitted and extended are those of such old firms as C. Ross & Co.; G. R. Blyth, who is one of the oldest dry goods merchants in the city, and John Murphy and Co., on Sparks street, the last-named firm, a branch of John Murphy, of Montreal, G. Gamble being the manager of the Ottawa branch. This store has been extended to the depth of 150 feet.

MONTREAL & VANCOUVER, B.C.

Mercantile Summary.

THOMAS R. ALLISON has been dealing in groceries in different parts of this city since 1886. Not satisfied with his profits, in the spring of this year he opened a blacksmith shop, hiring a man to look after it. Besides, he operated in real estate. In view of all this no one will be surprised to hear that he has assigned to Henry Barber & Co. He has since compromised at 80 per cent., secured by his brother.

MR ROBERT JAFFRAY has been in Montreal for some days in connection with the amalgamation of the Montreal Freehold Company and the Consolidated Land Company under the title of the Montreal Land Company. The sanction of the Quebec Legislature is now only required to complete the amalgamation. Mr. Robert Archer has been elected provisional president, and Mr. D. Morrice provisional vice-president of the new company, and Mr. R. L. Gault and Dr. Buller are also on the board as representing Montreal capital.

READERS of our summary columns, seeing, week in and week out, descriptions of failures, executions, assignments, compromises, until they wonder if such happenings will ever end, may read with a sense of relief, and as a sort of antidote, the rare conduct of Henry Bigelow Williams, of Boston, who went through bankruptcy in 1878. He owed at that time nearly $200,000, and he recently paid every dollar of his indebtedness—from which he was released by the court proceedings—together with 6 per cent. interest. Creditors who hesitated to accept the interest, which amounted to almost as much as the principal, were told by Mr. Williams that they must take all or nothing.

INTERESTING sketches of business men and establishments in Westport, on Rideau Lake, are given in the illustrated issue of the Westport *Mirror* of last week. No less than 22 portraits of leading townsfolk, a photogravure view of the picturesque town itself and various other cuts adorn the pages of this creditable number. When Mr. W. H. Fredenburg now retired, went to Westport in 1846, it was a hamlet of 100 persons. It is now a thriving place of nearly 1,000 population. Among its prominent business men are W. J. Webster, who after twenty years merchandising, is now a private banker; W. C. Fredenburg, saw mill proprietor and railway man; R. Janson & Co., general dealers; D. G. Ripley & Son, roller mills; Wing & Mulville, J. H. Foley, postmaster.

On Wednesday the stock of the Bowman Hardware Co. was sold by auction at 50 per cent.

F. X. Soucy, a grocer and general trader on the Champlain market, Quebec, has assigned, and owes some $5,500. Some four years ago he was unsuccessful as one of the firm of Soucy & Bedard.

Last week we noted the troubles of J. Beer, grocer, New Westminster, B.C. Now he offers creditors 50 per cent. of their claims.——The sheriff has advertised the effects of G. B. Scuitto, hotel-keeper, Vancouver, for sale.

R. Warner, an implement dealer and general agent, of Osnabruck, Ont., has made assignment to the sheriff of the district. He was left a good farm some years ago, but was not able to hold it, and has been on the down grade for some time past.

Mrs. P. Lalonde, grocer, Ottawa, who for the past several years has been continuing the business formerly carried on by her late husband, Fulgence Lalonde, has been obliged to assign. The total indebtedness is $3,500, of which $2,400 is in the shape of a mortgage.

Mrs. Mary Campbell, dry goods and clothing, New Westminster, B.C., is in trouble. Being pressed by a Montreal clothing house, she secured them by a chattel mortgage, and proposes that the other creditors accept 50 cents on the dollar.

Upwards of $50,000 city of Ottawa debentures bearing 4½ per cent. interest, for which the city received a very handsome premium, have just been purchased by Mr. George A. Stimson. We are told that the price paid was the largest the city of Ottawa has ever got for its debentures.

It is necessary to correct an item in our last issue, page 634, which located the firm of Hinch & Hinch referred to at Napanee. It never was a Napanee firm, and never, we are assured, had any connection with Hinch & Co., of Napanee. They did business at Centreville and Tamworth villages, 14 and 21 miles from Napanee respectively.

W. B. Smithett, general storekeeper, purchased the stock of Buchan & Co. at Saltcoats, in the North-West, in the spring of 1893. He made a small payment and then gave a chattel mortgage to secure the balance. This has been the means of bringing about his assignment. ——The grocery stock of L. J. Hazlewood at Moosomin, Man., has been seized under the power of a chattel mortgage.

There is to be a monument in Montreal to Maisonneuve, the founder of that city. Some $19,000 or $20,000 has been subscribed in Montreal towards it, and the Dominion Government gives $1,000.

Being tired of farming, W. H. Osborne started a grocery at Bowmanville eighteen months ago, and he was not long in displaying his lack of judgment in making purchases. This being continued, resulted in his assignment.——An extension of six months time is asked from the creditors of J. G. Bennett, dealer in crockery, etc., St. Thomas. His statement shows that he owes $1,500, and has nominal assets of $3,500. He has also been indiscreet in buying, considering the dull trade.

In February, 1882, after clerking a number of years, Thos. Kelley opened a dry goods store in Peterboro', and did a large business. But he soon undertook too much for his capital. This resulted in March, 1890, in compromising liabilities of $18,000 at 25 per cent. discount. His assets, nearly all in stock, amounted to $23,000. Since then he has been struggling along, and lately the landlord took possession for $600 rent. Now he assigns with a stock nominally worth about $10,000.——The landlord has also taken possession of Frank Mercer's fruit store, in the same place, and in consequence of this an assignment has been made.

The Quebec leather and shoe trade is not yet altogether free from troubles. Moise Hamel, a leather dealer in a small way, is proposing a 50-cent settlement. His liabilities are light and altogether local.——Jean Lortie, shoes, whose failure we chronicled a fortnight ago, now offers 25 cents on the dollar.——Thivierge, Morin & Morin, a firm of curriers in quite a modest way, are reported to be seeking a compromise at ten cents on the dollar. Liabilities are reported at about $3,000, with assets practically nil. They were in trouble in February, '94, and then settled at 25 cents.

Unusual activity has been shown in the harbour of Montreal for some days in view of the approaching close of navigation. Usually the wharves are very quiet places on Sunday, but last Sunday was an exception. Steam winches were in full operation, and large gangs of men were hustling as fast as they could the cargoes from the steamships "Rosarian," "Dominion" and "Storm King." It is explained that the shipping agents found themselves compelled to work their ships on the Sabbath day in order to get the vessels away in proper time.

According to the Brantford *Courier*, a well known dry goods firm recently sued a citizen for an account, and upon getting a verdict, put in an execution. Afterwards a receipt was produced for the account and the gentleman interested has now instructed his lawyer to bring suit, claiming $1,000 damages.

Last week we noted the failure of Park & Co., general storekeepers, Jarvis. Now their stock is advertised to be sold to-day. Next Thursday the grocery stock of E. Hagey, at Preston, will also be sold. On Wednesday last a number of stocks were to be sold by auction at Suckling's. Up to 5 p.m. on that day the sales were going on and we were unable to get particulars.

Emigration from Britain and Ireland this year declined a good deal, and emigration from other European countries to America declined still more. The figures for the ten months ending with October were 139,163, as against 193,616 last year. Emigration to the United States dropped from 141,023 in 1893 to 94,311 this year; to Canada from 23,937 to 14,621, and to Australasia from 9,178 to 8,734. South Africa is the only colony that shows an increase.

The Government of Quebec proposes to institute a provincial park, which is to be called the Laurentides. The district selected is a tract of some 2,500 square miles of unsettled territory to the north and east of the settled district around Quebec city. The purpose is to make the park a place for the preservation of large game and the study of forest growth. A smaller tract in the township of Grandison, in the eastern part of the province, has also been set apart as a sanitarium.

Twelve years ago, Levi Mackie succeeded his brother in a general store at Spanish River. But not content with this, the last few years he began quite extensive operations in lumber, entirely, indeed, beyond his means. Some time ago he gave a chattel mortgage, which was foreclosed, and he was sold out by the sheriff. ——Essex & Co. four years ago incorporated their business as the Essex Brass and Iron Works, Ltd., London, with a capital of $30,000, about half of which was subscribed. They made no progress, and of late could not meet their payments. Creditors are asked to compromise liabilities of $8,000 at 50 per cent. They have nominal assets of $16,000.

One important thing which manufacturers and others should remember is that they should advertise to get customers. Millers frequently

advertise in journals which go to millers; insurance companies in papers which circulate chiefly among insurance men, and manufacturers in periodicals which circulate principally among manufacturers, etc. Neither of these accomplishes the object in view, because they reach principally readers in their own line of business—competitors, not customers. An advertiser should place his announcement where it will reach the men who purchase his wares. *American Druggist.*

In Montreal the following are the failures for the week: A. L. C. Merrill, a dealer in carpets and oilcloth, has suspended payment, and owes about $16,000.——W. A. Harper, a pork-packer at the Western Abattoir, has assigned on demand, with liabilities stated at $10,463. — F. C. Miller, livery stable, has assigned; liabilities are $3,396. C. Chouinard, hardware dealer in St. Henri suburbs, whose failure has been already recorded, has arranged a compromise at 50 cents on the dollar, in instalments at 3, 6, 9, 12 and 15 months. Liabilities are about $10,000, ordinary; mortgaged and privileged, $3,950. Assets apparent are $17,000, but there are $6,750 of book accounts, many of them doubtful.——Miss Annie Fitzpatrick, milliner, has assigned upon the demand of a Toronto house. Liabilities are $1,924.——Napoleon Turcot, plumber, has arranged a compromise at 50 cents on the dollar, payable in 3, 6, 9 and 12 months, and secured by his father. Liabilities, $5,590.——Martineau & Guerin, a young dry goods firm, only dating from February last, have already had to assign. They bought out the Ontario street branch of J. Perrault & Co., whose late suspension has involved them.

We note the following country failures in Quebec Province: At St. Valerie, Champagne & Senez, a general store firm of about two years' standing, are making an offer of compromise, at the rate of 40 cents on the dollar, on liabilities of $2,926, payable in instalments of 3, 6, 9 and 12 months.——A demand of assignment has been made upon A. Bernier, general store, Cap St. Ignace. His troubles are said to be due to an inability to collect in his outstandings. He owes $3,900, and claims assets of $6,600.——L. Perusse, of St. Alban, general store and stone contractor, whose embarrassment we noted a couple of weeks ago, is offering his creditors 10 cents cash and 10 cents secured.——L. H. Chouinard, a somewhat extensive general dealer of Matane, on the Lower St. Lawrence, and who has also carried on one or two branch stores on the coast, had a meeting of creditors last week, at which it was deemed best he should assign. Too many book accounts and poor collections are assigned as the principal causes of his troubles. He has been hard up for some time past, and was recently sued by one creditor for $4,400. Liabilities are figured at $15,000, with nominal assets of $34,000. A compromise at the rate of 75 cents has been broached, and some creditors seem favorable to such a settlement.——Ovide Julien, an old bachelor who has been engaged in a small general store trade at Scott Junction for the past fifteen years, has met with a very small measure of success, and now wants creditors to accept 25 cents on the dollar in full of their claims.

TORONTO, FRIDAY, NOVEMBER 23, 1894.

THE SITUATION.

Sir Charles Tupper, the other day, announced to a Scottish audience that, owing to the unsettled state of affairs in the East, the Canadian Government was prepared to furnish and support at its own expense an infantry regiment, as a general contribution to the defence of the Empire. He received the news from Acting Governor-General Strong, of the Supreme Court, Ottawa. It is probable that the Canadian Government was in possession of information which made the condition of things in the East appear more critical than they looked to those who have not special sources of information. However this may be, there are conceivable cases in which the great body of the Canadian people would regard it as no more than their simple duty that they should take part in the general defence of the Empire. To meet an emergency as it arises is the least objectionable way of rendering assistance. It would not always be possible to wait for concerted colonial action, and if time pressed, each colony would have to act alone, if it were not pledged in advance to meet a given call from the centre of the Empire. It may not be necessary for Canada to send the regiment now proffered, but whether or not, the question will come before Parliament at Ottawa. The offer anticipates and pre-supposes parliamentary authority, which has yet to be formally obtained. The Government must have felt safe in counting on an act of indemnity if its offer were accepted in the meantime. Such authority, if it is to be used in future, should be obtained from Parliament, in advance of its exercise, unless it should be necessary to act before the authority could be secured.

Sir Adolphe Caron, Postmaster-General, has been visiting Brooklyn, New York State, to inspect the working of a new means of rapid mail delivery for cities, by means of a travelling post-office on a trolley car. Sending all mail matter, collected at different points in the city, to the central office, and sorting it there for distribution, causes an unnecessary loss of time as compared with a system of posting on the trolleys, sorting the matter on a special postal car, and putting it into bags destined for the different points of delivery. The latter plan has been in operation at Brooklyn only about six weeks, so no time is being lost in ascertaining how it works, with a view to its possible adoption in Canada. The time is perhaps too short to have indicated with accuracy all the results of the change of method, but from its general features it may be possible to draw a rough conclusion on the relative advantages of the two systems. From the nature of the comparison it is evident that a considerable saving in time would result, and in these times this is a great point gained. The question of cost will form an element in considering the adoption of the new method. A car 28 feet long would count in the haulage when it is added to a motor with trailer, and this item of the cost would be considerable. There may be savings in other directions, in the way of compensation. If adopted at all, in Canada, the new mode of distribution would have to be confined to the larger cities at first. The limit of the economic use of the postal trolley car would be ascertained, in time, and economy and convenience together would be likely to determine when and where the change in the mode of distribution should be made.

"Practically all the export shipments of Manitoba wheat, this year, have gone by way of New York." Such is the statement of Mr. C. N. Bell, secretary of the Winnipeg Board of Trade, who has been in Ottawa this week. The rule has of late been that the fraction of American wheat exported followed the line of the domestic consumption. Now, the surplus of our North-West is following in the same track. How does this come about? Has Montreal any answer to this question? Has Toronto any? Mr. Bell is reported to have given as a reason that the grain is more satisfactorily handled in New York than in Montreal. It is, according to him, a question of buyers; he represents that it is nearly impossible to get "a fair buyer of Manitoba wheat outside of New York." Manitoba exporters cultivate the New York market, several of them having agents there. The relative cost of carriage is one that deserves to be considered; in fact all the elements which go to give a preference to New York over Montreal as a market for our Western wheat, must be taken into account before it is possible to explain satisfactorily the reasons for the direction which this produce is taking. Mr. Bell gives only what might be one of several reasons which goes to determine the result—the existence of a satisfactory buyer nowhere but in New York—but this is itself a determining one. The only question is whether Mr. Bell is correct in stating that satisfactory buyers can only be found in New York. If this question be answered in the affirmative, it will remain for the Montreal grain men to explain why this is so. In the meantime, we cannot assume it to be correct. The purchases made in New York are made on English account, and the buyers would naturally see that the grain is shipped by the cheapest route. We shall be surprised if this does not prove to be the determining element in the diversion of the Manitoba export wheat trade from Canadian sea ports.

Strange as it may sound, the defeat of the candidate of the Rosebery Government, in the Forfarshire election, is said to be due in part to the embargo which is kept up against Canadian cattle in Great Britain. On the eve of the election a deputation of Perthshire farmers interested in the cattle trade waited on Sir Charles Tupper, and listened to his criticism of the policy that excludes the cattle which these farmers want. The echo of the denunciation of this policy was heard by the Forfarshire electors, and is said to have had a distinct effect on their votes. If other Scotch constituencies be similarly affected, Mr. Herbert Gardiner, President of the Board of Agriculture, may get new light on the question. He is distinctly charged by a Radical journal, which usually supports the Government, with following on this question a protectionist policy. Arguments in the

shape of adverse votes from quarters whence support is expected, may prove to be potent. There is no longer reason to doubt that the Scotch electors in the rural districts have become a distinct factor in the cattle embargo question. So long as they confined themselves to deputations and protests, they were unheeded; the new policy on which they have entered promises to prove more effective.

THE JOBBER'S PLACE IN THE DRY GOODS TRADE.

It might never have occurred to us that Canada was destined to revolutionize dry goods trade methods as practised the world over, had not a contemporary raised the question: "Is wholesaleing a necessity or even a possibility of the future?" The dismal picture which the writer of the article in question drew of the wholesale merchant's future lot plainly indicated that, in his opinion, at least, wholesale jobbing must inevitably give way to a new order of things. But the wholesale dry goods merchant is not to be so easily dethroned from the prominent position he has so long maintained. He is not a creature of modern creation. We read of his existence in England's earliest economic history; we can follow him through the commercial records of each country in Europe, and in the United States, that country of trade revolutions, we find his position today unassailed and secure. In periods of depression there have often been pessimists ready to foretell the approaching doom of the wholesale merchant. Their words are honestly spoken; they see for the future an exaggeration of present conditions, whereas those conditions are abnormal and merely circumstances of the hour. When commercial stringency asserts itself—and it does so in almost decennial periods—the manufacturer, experiencing a dearth of orders, bestirs himself to find other than the usual channels of commerce, and sometimes he turns to the retail trade.

The wholesale jobber has certain functions to perform, and for his labor he obtains a certain margin of profit. Could the manufacturer transact, in addition to the services which he already renders trade, those duties now done by the jobber, he would be entitled to the attending profit, and, unmindful of the retailer's feelings, would take it too. Were the elimination of the middleman possible, it would bring little relief to the retail merchant. It is essential that every suitor for trade should have a representative in constant touch with the retail interests. Canada is a vast country, and travelling expenses come high. The travelling salesman of an Ontario or Quebec jobbing house carries with him to British Columbia or the Maritime Provinces samples of the handiwork of several score manufacturers. Under the proposed system it would require several score travellers with several score expense accounts to do the business which one now transacts. Not even Sir Boyle Roche, whose bulls are proverbial, would style this economy.

Good manufacturers are not always successful merchants, a fact that is brought out by a letter in another column to-day. But in which direction lie the interests of the retailer; for he is the element of paramount consideration. Of late years the profits of the dry goods merchants have been sadly cut into by the competition of the large departmental stores. Many have sought relief in direct importation. If goods can be bought to better advantage in this way, well and good; but what is apparently a gain may in the long run turn out to be a loss. The cost of two trips each year to Europe is hardly less than one thousand dollars, and this formidable expense places direct importation at once out of the reach of the great bulk of dry goods merchants. And many of the larger merchants find after experience that they can make more satisfactory purchases in Montreal and Toronto than in Europe. It certainly should be an economic gain to have goods sold abroad on Canadian account selected and purchased by the departmental experts of a few wholesale houses, rather than to have them bought by a great many retail merchants, each creating a separate expense account.

To buy at an advantage abroad, a great quantity of goods must be taken from each house with whom trade is done. This compels the merchant whose wants are limited to forego securing goods of different makes, textures and styles, and often leads to that bane of mercantile life, overloading. Should the merchant himself be compelled to make the trans-Atlantic trip, and this is most often the case, there enters another element to be kept in view. For although buying goods is a considerable factor in trade, selling goods is not less important, and not many merchants are blessed with assistants so competent that the store is conducted as successfully in their absence as in their presence. Altogether, we have faith in the survival of the wholesale importing house which knows its business and is provided, as no manufacturer or mere retailer is likely to be, with the machinery and facilities for importing and distributing goods to the best advantage.

THE A.O.U. WORKMEN.

An important change has recently been made in the mode of levying assessments upon the members of this Order in Ontario. Instead of a monthly printed post card, calling for one dollar, or two dollars, as the requirements of the grand treasurer might happen to be, every member is now furnished with *The Canadian Workman*, a monthly paper, in which the official notices appear. This is expected to result in a considerable saving of postage, but whether it will or will not cause a more than usual number of lapses remains to be seen. Another change, which also came into operation on the first of last July, is that one assessment must be paid before 6 p.m. of the last day of each month, instead of on the 28th of the month. This would yield just $12 a year. But, in addition to this, there must be paid an "additional assessment" of $1 before six p.m. on the 15th day of each January, April, July and October, thus making $16 of regular uniform assessment. But then article 20 of the new laws ends up with "and in addition to said regular assessments, such extra assessments as may be required from time to time to pay and discharge all death calls upon this Order."

This arrangement of the assessments relates to the Ontario members only. Each grand lodge jurisdiction has its own way of collecting, but most of them now operate on the same fixed monthly plan, instead of calling for the money only as it is needed, and by postal cards. But as regards the amount, or maximum of assessments, each grand lodge jurisdiction is assigned a certain number of dollars which it must collect and pay for its own death losses, before being allowed help from the general relief fund of the supreme lodge. And this general relief fund is no longer assessed according to current need in sums of 10 or 20 cents, or 50 cents, or $1.50 per member, as the year's deficiency has hitherto been found. It is now $1.00 per member annually, as a sure thing, but the relief board has power to increase this to $3 if necessary, to meet the death claims of any year. It is payable, like the ordinary assessments of this Order, by young and old alike. The young man of 20, his father who may be 40, and his grandfather of 60 or 65 years of age, each pay $1 at every call without regard to the difference in their chance of living to pay future assessments. As there are now a total of about 332,760 members in the

Order, that many dollars are available from each relief call, to be applied in helping grand lodges whose deaths, at $2,000 each, have cost more than the following scale, fixed for them by the supreme lodge, and to stand for three years at a time, viz.:

THIRTY DOLLARS.

The grand lodges of Pennsylvania, Ohio, Kentucky, Indiana, New York, Tennessee, California, Texas, Georgia and Alabama, and also the supreme lodge. (The supreme lodge takes care of certain individual lodges, and any grand lodge whose membership is less than 2,000.)

TWENTY-EIGHT DOLLARS OR LESS.

The grand lodges of Illinois ($27), Missouri ($27), Wisconsin ($26), Colorado, New Mexico and Arizona ($25), Oregon and Montana ($23) Nevada ($28), Utah and Wyoming, &c. ($22), New Jersey and British Columbia ($20), and Minnesota, Washington and Michigan (each $19), and Iowa and Delaware (each $17).

SIXTEEN DOLLARS.

The grand lodges of the States of Kansas, Massachusetts, Nebraska, Dakota, and the provinces of Manitoba and Ontario.

It will be seen that the number of grand lodges is very large, whose mortality has grown up from an assessment of $10 or $12 a year (which was ample to pay all losses at the commencement) to $25, $28 or $30. Only six out of thirty-one grand lodges are now supposed to get through the year at so small a cost as $16 for the $2,000, plus relief calls and lodge dues and other expenses. If Ontario, for instance, should have a mortality requiring $17 per member to meet it, then Ontario could call on the relief fund for one dollar of that amount. But since this province has to contribute at least one dollar per member to the relief fund each year, this would give nothing back of the thirteen previous years' contribution by Ontario to that fund. And since the relief calls have now grown to a minimum of one dollar, in place of the 10 cents and 40 cents and 45 cents of a few years ago, there has sprung up a very strong demand for a separation by this grand lodge, from the older American lodges, where the deaths have become so burdensome. A Bro. F. Mason of Perth seems to be one of the leaders in this new departure. Notwithstanding that separation was voted down at the grand lodge meeting a year ago at Ottawa, the agitation has broken out afresh, and there is likelihood that it will eventually cause a split among the lodges, some remaining with the parent body, and some resigning and forming a new grand lodge, paying their own death losses. It is something anomalous that a man who is assessed for $30 in New York State, or in Ohio, may drop his certificate upon moving into Ontario, or into Manitoba, or into Massachusetts, or Kansas, and by joining again have only $16 a year to pay in place of $30. There is a pretty strong inducement for the older members from New York, Pennsylvania and Ohio to go west and settle in Kansas, Nebraska or Manitoba, or come over to Ontario. It is no wonder the membership in New York, Pennsylvania, Ohio, Illinois, California, Tennessee and the other older grand lodges, is falling off. In all these States there are other fraternal orders into which the young and healthy Ancient Workmen are transferring their membership, and reducing the cost of their certificates one half. And what has occurred over there will probably soon occur here. Even now there are a number of other orders giving much greater inducements to persons under 35 years of age than the Workmen can extend, owing to the heavy weight of aged members carried by the latter. The death losses are coming along very rapidly now in Ontario, and nearly every claim is upon an old man. This will be more clearly seen if we tabulate the ages at death of those embraced in the death calls for the past five months in Ontario, numbering 84, for the sum of $160,000:—

Months.	Under 35	35 to 45.	Over 45.
July	0	3	16
August	2	7	11
September	1	8	12
October	0	3	11
November	2	6	7
Totals	5	22	57

This table speaks for itself. But lest we should do the Order any injustice by thus showing it to have become, even in Ontario, an Ancient Order of Old Men (A.O.O.M.), we have looked up the record for four months past of the I.O.F., and find that in the case of almost exactly the same number of deaths—85—the comparison is as follows:

Societies.	Under 35.	35 to 45.	Over 45.
Workmen	5	22	57
Foresters	43	22	20

It thus appears that in Dr. Oronhyatekha's society, if we may judge the ages of the living by their contributions to the death losses, the average age is as good as in regular life insurance companies. Out of every 85 members, 48 are under 35, and 42 above that age. But in the Workmen, out of every 84 members living, only 5 are under 35 years of age, and 97 are above that age, and most of these are above 45 years of age. It is not difficult, therefore, from these premises, to forecast the future pretty accurately, as to a rapid increase in the death losses in the Ontario Grand Lodge of the A.O.U.W. It is high time that all young and middle-aged members who can get reliable insurance elsewhere, should see if there is not some way of getting rid of their membership. If not, they are liable to be mulcted in lawsuits, after the manner of the unfortunate "hindmosts" of the defunct Canadian Relief Society, and London Masonic Mutual.

A POINT IN ACCIDENT ASSURANCE.

It has usually been held reasonable that a man who voluntarily exposed himself without just cause to great danger had not the same claim upon an insurance company which insured him against accident as a man who took reasonably good care of himself. But it appears that in Chicago the other day, Judge Horton, of the Superior Court, rendered a decision to the effect that a person insured against accident or accidental death by an accident insurance company, need not exercise due care and diligence to avoid injury. That a man shall exercise such care and diligence, says the *Investigator*, is part of every accident insurance contract, and is designed to protect the company from imposition, and to cause the assured not to recklessly expose himself. The Judge is reported to have asserted that "to make the policy-holder guarantee himself against accident would make accident insurance contracts a paradox." This may suit Judge Horton's ideas, but we hardly think it will "go" with the Supreme Court of Illinois. The case of Shaffer *vs.* The Travelers Insurance Company of Hartford is cited, in which the Supreme Court expresses itself very clearly. The assured in this case endeavored to escape from officers of the law, who were trying to arrest him, by lowering himself from a window by means of an improvised rope. The rope broke, and the assured fell and was killed. Suit was begun in the circuit court to recover on the policy. The judge took the case from the jury, and directed a verdict for the defendant. Appeal was taken to the appellate court, which in its opinion said:

"The bare statement of the manner in which deceased came to his death brings it, we think, clearly within the clause of the policy of 'voluntary exposure to unnecessary danger,' and fully justified the trial court in taking the case from the jury and directing them to find for appellee."

But the complainants were not satisfied and went to the Supreme Court. That tribunal declared :—

"We are entirely satisfied with the judgment of the appellate court. The evidence clearly proves that the deceased came to his death by his own voluntary exposure to unnecessary danger, and there is no evidence tending to prove otherwise. It was proper to instruct the jury to find for defendant."

THE WINNIPEG FIRE.

Special thanksgiving on the part of the people of Winnipeg is eminently appropriate this week for the escape of that city from an extensive conflagration. What took place is serious enough, but it is marvellous that the loss was not greater. What happened was this : At two o'clock in the morning of Friday, 16th, the four-story stone block of the Western Canada Loan Company on Main street was found on fire. It burned slowly and steadily until gutted. While this fire was in progress, between four and five a.m., another started in the Grand Union Hotel, nearly half a mile away, which extensive building was presently on fire in every part. The wind increasing to nearly a gale, the flames flew across to the three-story brick warehouse of Merrick, Anderson & Co., which, with several shops and boarding houses, was also devoured.

Could the fire brigade do nothing to stem the course of the flames? The answer is given by a Winnipeg paper :

When the news [of the second fire] reached Chief Code, at the Western Canada block fire, he was at a loss to know what to do. In the fire department there are three engines, one for each hall. The engine at the North fire hall had for several days been dismantled and in the repair shop at the Vulcan Iron Works, The engine from the South fire hall, after working for an hour or so, had collapsed, and was discarded as useless. So that but a single engine remained, and with the valuable business blocks surrounding the Western Canada yet in danger of destruction, this one engine could not be withdrawn. The chief started to the fire with the chemical engine.

When he arrived the building was shrouded in smoke, but in ten minutes it was a mass of flames, which, says the report, "burst forth like an explosion." Then the reporter goes on :

The fire was almost beyond control, even had the firemen been able to give it all their attention with a complete apparatus but handicapped as they were the flames raged utterly unchecked. Hose was telephoned for and was attached to the hydrants of the waterworks, but the pressure from these hydrants was so ridiculously weak that the puny streams that dribbled through the hose only furnished subject for the contemptuous gibes of the spectators.

These sketches tell the condition of affairs as to fire protection very plainly. If the residents of Winnipeg are satisfied with their fire appliances there is no use preaching to them. But we do not believe they are satisfied. The nightmare of impending disaster must affright them, and we think it will have more effect in bringing about improvement than all the implorings or threats of the underwriters. We close with a paragraph from the Winnipeg *Free Press* of Saturday last: "But calamitous as was the conflagration and great as the loss is, the people of Winnipeg may never fully appreciate how much cause they have for thanksgiving. With a fire brigade disorganized and divided by distance, its apparatus crippled, and the water supply totally inadequate, there was nothing to prevent the unchecked flames from sweeping the entire city. That the fire was confined to half a dozen buildings seems little short of a miracle."

DO YOU DO THIS?

Hamilton's police magistrate had occasion one day last week to censure a merchant for a practice which is unfortunately too common in the towns and cities of Canada. The merchant, who was evidently a dealer in ready-made clothing, had spread his goods all over the front of his store. Some boys appeared upon the scene, and, as it was a cold day, selected some mittens, then ran away. We have no sympathy with shop-lifters, but believe, with the magistrate, that it is simply throwing temptation in the way of those who are all too ready to yield, to place goods outside the shop doors. It is an old-fashioned, often stupid, and not an attractive method of displaying goods. Properly dressed windows draw far greater attention, and to crowd the store front and litter the footpath with goods is simply to destroy a most effective means of advertising. Nor is the custom a popular one with passers-by, and many a man walking in a crowded street feels more like cursing the merchant who thus displays goods than buying his wares.

QUEBEC DAIRY ASSOCIATION.

The general annual convention of the Quebec Dairy Association is to be held in St. Joseph de Beauce on the 4th, 5th and 6th of December next, in the Court House. The proceedings will be carried on mainly in French, but there will be a special English sitting on the afternoon of the second day of the convention. Hon. M. Beaubien, Prof. Robertson, J. C. Chapais, Father C. P. Cote, Antoine Taschereau, P. Macfarlane and others are expected to be present and address the gatherings. It is proposed to discuss various subjects connected with dairying and agriculture. Special arrangements for transportation have been made by the railways. One feature of the gathering will be the presentation to Mr. E. A. Barnard of a testimonial in recognition of his services to the agriculture of the province.

MUNICIPAL MEMORANDA.

The new buildings erected in Galt during 1894 are said to have cost not less than $112,000.

It was resolved at a recent meeting of the town council of Granby, Que., to authorize Messrs. Husband & Mitchell, civil engineers, to make surveys, plans and estimates for a complete system of sewers for that place.

People in the Eastern Townships of Quebec appear to believe in the often disappointing system of bonuses to manufactures. The town council of Richmond passed a by-law granting $2,500 to aid in establishing a trunk and valise factory. And this by-law will be voted on by the people on Monday, 26th.

A sale of lands in arrears for taxes was held in Brandon some days ago. Of the $53,000 of arrears, says the *Times*, about $10,000 was paid in and the properties redeemed before being put up. Twenty-six buyers purchased among them about $10,000 worth, and the city got the remainder, about $33,000 worth.

The merchants on the north side of King street, between Queen and Foundry streets, Berlin, will this week remove their signs as required by law, and will also keep the pavement free from goods and other obstructions. This by-law is strictly enforced in Stratford, Brantford, Guelph and other surrounding towns, and the *News* asks "why should Berlin, a better town than any of them in almost every other respect, be so much behind them in this matter?"

Some time ago, the village of Eastman, Brome county, Quebec, granted a bonus to a manufacturing concern named the Eastman Kindling Wood Factory. We now learn that the factory was sold by Sheriff Cotton the other day and bid in by the corporation of the village at the nominal price of $40, to cover its claim of $3,000. The corporation is prepared to sell the property back to the old company on reasonable terms, provided a guarantee is given to operate it under the terms of the by-law granting the bonus.

Edwin L. Godkin, editor of the New York *Evening Post*, has chosen the municipal history of New York to show the details of the problems of municipal government. He points out that "there is a growing perception that the present condition of city governments in the United States is bringing democratic institutions into contempt the world over, and imperilling some of the best things in our civilization." The volume forms No. 118 of the publications of the American Acadamy of Political and Social Science. City government, says Professor Bryce in his book, The American Commonwealth, is the one conspicuous failure in the United States.

Under the heading, "An Object Lesson," the Lachute *Watchman* recalls the dangers of that town from fire as under: "The town of Lachute has been given many warnings to provide itself with the weapons necessary to fight fire. The fire of Friday night [at the Wilson paper mills], however, was more of the nature of an object lesson rather than a warning. When Mr. Wilson built his mills he showed his forethought in many ways, but in none more than the extraordinary precautions taken, in the first place to prevent fire, in the second place to control it in case of an outbreak. . . . . The result was that when the critical moment came, the fire was conquered, and the calamity averted. Now, if it was wise on the part of Mr. Wilson to provide for mishaps of this kind, how much more wise would it be for the town to see its own position in this matter, unarmed, defenceless, utterly helpless, and rouse itself from inactivity and provide for

the danger. With a stream like that thrown at the paper mill obtainable at any part of the town, no fire could obtain much headway." Other towns and villages may well treasure this homily.

TRADE AT DIFFERENT POINTS.

An unexpected compliment reaches us from the distant shores of Lake Superior. Mr. Wm. McKirdy, general merchant at Nepigon in the Algoma District, sends a remittance, and adds: "By the way, your reminders are 'a thing of life' and have become, if possible, a pleasure to look forward to."

No words are wasted in the communication of Baker & Co., "the one-price cash store," of Rat Portage, Ont. They say: "As we only do a spot cash business, our 'collections' don't bother us, and as we are not 'in the dumps,' we submit that we must be 'negligent' in not sending you before what we now enclose, $4 for subscription to April 18, 1895."

There is no despondency, at least, in the reply of Mr. Fred. W Churchill, of Collingwood, to an enquiry about business and collections. Mr. Churchill is an insurance agent, not only fire, but life, accident and guarantee, boiler and marine, and should know pretty well whether people are hard up or not. He writes, on November 6th: "As to business I have no just cause of complaint, and in the matter of collections I'm very like the man who had both legs amputated, I can't kick."

The agent of the Quebec Bank branch at Thorold, Ont., writes that business has been fairly good in his neighborhood, and that bills have been well met. "We are hopeful in the Niagara district," he adds, "of very good times in the coming year. The great increase in the fruit industry, and the prospect of steam and electric railways, now building and in contemplation, through Lincoln and Welland counties, connecting towns and villages, the canal water power project at Niagara Falls, and other improvements, all point to more than usual activity in all lines of business during 1895."

From Woodstock, in western New Brunswick, Balmain Brothers write: "Having balanced up our year's business we find we have $2 left for THE MONETARY TIMES, after paying all other expenses, and enclose it with this. The year has been a very good one—one of the most satisfactory we have had. Collections are better than is usual at this season of the year, and as a matter of fact have been good all summer. We, however, keep 'everlastingly at it,' in this matter of collecting, and that bills have been met as well or better than usual the past season, we credit in great part to the fact that we have *insisted*, in as kindly a way as possible, that they be paid when due."

From St. John, New Brunswick, we have the testimony of an experienced insurance man and old subscriber, Mr. D. R. Jack, as to a satisfactory year: "We find collections pretty good. Last year was the very best that we have had for ten years, as regards uncollected balances. Fire losses also show an improvement this year over the past two or three years. Real estate, which has been very depressed for some time, also appears to be showing a decidedly upward tendency here. What we really require in St. John is a first-class hotel, modern in every respect, to accommodate the large tide of travel flowing in this direction. A structure of this kind would, I am satisfied, prove a financial success, and would make us all happy."

HARDWARE AND METAL TRADE NOTES

We learn from the Seaforth *Expositor* that Mr. William McKay, for eight years head engineer in Ogilvie's mill in that town, has left for Amherst, Nova Scotia. He has made an engagement with the Robb Engine Company, and will have charge of their Ontario business.

The constructors of the water works at Tokyo, Japan, have bought $400,000 worth of cast-iron pipe in the United States. American makers have been enabled to secure this contract in the face of European competition because they can make pig-iron cheaper than it can be made in any other country.

Mr. W. J. Robertson, of Port Hope, has patented in the States and Canada an improved frying-pan. It is made of grey iron, and so arranged as to get rid of the small particles of grease which fill the air and lodge on the ceiling, walls and wood work of the kitchen, turning them, in time, black. The smoke is "carried into the stove, up the chimney and out of the house," while the stove, he says, is kept clean.

A very sanguinely-worded despatch from Guelph on Monday last to the *Mail*, if it properly indicates the expectations of the citizens, shows that, judging by the disappointed hopes of various other Ontario places, they are likely to be disappointed. The despatch is about smelting works, whose erection, the despatch says, "is now assured. The necessary stock *will be* soon subscribed, and Mr. Patterson, of Wyandotte, Mich., the chief promoter, *is expected* here in a few days to organise the company. It is said the new industry *will* employ one hundred hands." The italics are ours. We shall be very glad to see Guelph the seat of an iron industry.

The St. Stephen's Edge Tool Company is incorporated, and has begun work at the Broad Axe Factory, St. Stephen, N.B. The members of the company are Chas. O. Barker, Fred. M. Murchie, Almond I. Teed, Fred. L. Ham, Gilbert W. Ganong, George F. Hill, Gilbert S. Hall, Fred. Waterson, John Black, Henry E. Hill, Thos. R. Mitchell, Robert Ross, Hugh McKenna, Wm. Dinsmore, James Mitchell, Chas. W. Young, Chas. C. Grant, Fred. E. Rose, Frank M. Ross, Fred. W. Andrews, Joseph McVey, Julius T. Whitlock, all of St. Stephen. The mechanical superintendent is H. W. Broad, and the business manager, Charles O. Barker.

FOR GROCERS AND PROVISION DEALERS

Almost in the swim of holiday trade.

It takes a snail exactly fourteen days and five hours to travel a mile. Don't be a snail.

The Aylmer Canning Company will commence canning poultry and meats within a week's time.

Kerr Bros., lately connected with the Hudson Bay Co., intend opening a grocery store at Calgary.

Out of the seventy grocers of Hull more than fifty have declared themselves in favor of early closing.

It cost $1,000 to take a carload of fruit from Sacramento, Cal., to London two years ago. The rate this year has been reduced to $700.

The New England catch of salt mackerel to date is 39,839 barrels, against 49,309 barrels last year, 48,250 in 1892, 35,965 in 1891, 15,489 in 1890.

Some 25,000 barrels of fresh mackerel have been received in Boston to this date this year, against 21,000 of the same time last year, 21,700 in 1892, 34,000 in 1891, 17,000 in 1890.

The *Chronicle* says that in Halifax potatoes have taken a jump mainly on account of the small crop on P. E. Island. The Island stock is selling at the wharves at 82 and 83 cents per bushel. Turnips from that province are selling from schooners at 25 cents per bushel.

The *Monde Economique*, after careful investigation, estimates the world's coffee production for the current year at 12,000,000 bags. As against this output, larger than that of any previous year, there is a consumption of only 10,500,000 bags.

A careful calculation has been made of the amount of bacon, ham and other hog products imported to Edmonton during the year ending Oct. 1st, says the *Bulletin*. The amount is about 150,000 pounds, worth something like $20,000. The question at once arises, why import?

Calgary has voted a loan of $6,000 for six years, without interest to Ratcliffe Bros., to aid them in establishing a creamery and cold storage warehouse, at an estimated cost of $12,000. The loan is to be secured by mortgage on the entire plant and premises; $1,000 is to be repaid annually, after the first year.

The past week has been an active one in pork-packing operations, the returns indicating a total of 395,000 hogs handled by Western packers, compared with 325,000 the preceding week, 240,000 for corresponding time last year, and 300,000 in 1892. From November 1 the total is 720,000 against 445,000 a year ago.—*Cincinnati Prices Current*.

Cold weather always brings to the country store a number of loungers, who sit on the counter and eat cheese, currants, raisins, crackers, or anything else that can be appropriated without exciting comment. It is the duty of the storekeeper to ask them in the politest terms to "move on," if only in deference to his customers of the gentler sex.

Light weight butter is causing not a little annoyance to grocers and consumers in several Canadian towns. The farmer can talk about sand in sugar, peas in coffee, tea made of brown paper, and numerous cheats ascribed to the grocer, but when accused of selling pound or two pound prints of butter under weight, he raises his hands in holy horror until the scales are produced.

The following is a statement of shipments of black Singapore and Penang pepper from the Straits, January 1 to November 15:

	1894	1893
American, tons	5,890	4,295
Continent, tons	5,245	6,780
England, tons	5,920	6,345
Total	17,055	17,420

The *Manchester Grocer* says that the total produce of the English crop of hops is between 630,000 cwt. and 645,000 cwt., which is equivalent to a yield of from 10½ cwt. to 10¾ cwt. per acre upon the 59,535 acres in hop cultivation in England. "Though the hop yards of Hereford and Worcester (covering an area of 11,372 acres) have not

grown more than an average crop, the greater part of the 43,109 acres of hop land in Kent and Sussex has yielded very heavily, and the 4,846 acres in Hants and Surrey have produced considerably more than an average quantity. A somewhat large proportion of the hops last picked is of inferior quality, brown, and discolored by aphides, and at the prices at present current were scarcely worth the picking. Consumers and producers are now realizing that bright, sound, full-conditioned hops are relatively scarce, so that growers are inclined to wait for better money. At the prices that have ruled since the new season began, the hop crop of 1894 will not do more than pay the expenses of production."

RETAILING BOOTS AND SHOES.

The representatives of Laidlaw, Watson & Co., London, are showing seven different styles of boot toes for the spring trade.

For evening wear a bronze two-strap slipper, white lined with wood heel, is receiving favor at the hands of Toronto women.

A woman's slipper of neat appearance, a slipper designed by a Toronto retail merchant, has a narrow toe, and is white lined, with wood heel. It fastens with a strap, and has as an ornamentation either a bow or a buckle.

A tan Bal, boot is selling well in a Scotch welt; this is a much heavier and coarser welt than the usual run, and is suited to winter wear. The boot has a long toe cap with large perforation, and is almost a razor toe.

The *Canadian Shoe and Leather Journal* has issued an exceedingly neat Spring Trade Supplement, containing a collection of engravings which illustrate the landscape beauties alike of our Great North-West and our beautiful provinces down on the Atlantic coast.

The North-West Shoe Company, with headquarters at Montreal, are applying for incorporation. The capital stock is $40,000. The applicants are E. A. Mahon, Winnipeg, Man.; Wm. G. Cameron, Geo. H. Ansley, Walter Binmore, and A. R. Oughtred, Montreal, Que.

Toronto's four hundred, or at least a considerable number of Toronto's most correctly dressed young men, will attend their evening social functions in Oxford patent leather shoes, with kangaroo or dongola tops and razor toe. A King street retailer says that he is selling nearly ten pairs of these shoes every day. They retail at $3 a pair.

Another toe is added to the great variety of shapes in shoes at this end. It is in striking contrast to the needle and razor points. In contour it draws in abruptly from the ball to a quite narrow width, but terminates in a square toe a fraction over an inch wide. It is, in fact, an extended, narrow square toe, and is dignified with the classical title of "Emerson."—*Reporter*.

At the German manœuvres a new shoe sole for soldiers will be tried. It consists of a kind of paste of linseed oil, varnish, and iron filing, with which the soles of new shoes are painted. It is said to keep leather flexible, and gives the shoe greater resistance than the best nails. Already, in many regiments, the usual iron nails have been exchanged for aluminum.—*Facts*.

The shoe trade is a steady one and staples form the bulk of sales. But there is a chance for you to secure a portion of the hundreds of dollars which will be spent in your town during the holiday season. Slippers have always been acceptable Christmas presents. Over gaiters and leggings make nice presents. Storm rubber boots for children may also be placed in the same category. Be prepared to bring your stock forward and advertise it.

When the extreme narrow toe came into fashion there were many dealers ready to predict but a short existence for it. And from outward appearance, as well as anatomical reasoning, one would naturally judge the "razor toe" or the "needle toe" shoe an uncomfortable one. But experience does not prove it such, at any rate people will not admit it, and designers in this instance—although such is not always the case—can exercise their whim without so far afflicting the walking public generally with serious pain. But look out for in-growing toe-nails.

We have repeatedly drawn attention to the fact that large buttons have a prominent place in samples of styles for the spring of 1895. But if you follow the example of an experienced merchant you will avoid ordering a large stock of these goods. They are attractive to the eye, but will not stand the test of wear. When placed on the shoe they must of necessity be placed at some considerable distance from one another, and after the shoe has been worn for some little time, insufficiently fastened, it begins to gape between the buttons. Large buttons mean large button holes, and these are not likely to aid the powers of endurance of the shoe. The large button is apt to catch in the skirts of the wearer, and nothing causes a woman more annoyance than this. They are not easily fastened, and this again detracts from their utility. Taking everything into account, it would be just as well to order large button shoes sparingly for next spring.

People now-a-days are always on the still hunt for bargains. You are a caterer to the public taste. Some few weeks ago we suggested a special bargain day for children's footwear. Did you try it? If it gave good results try a special day for men's goods next week. Bring your footwear of this description forward, dress your windows with men's boots and shoes, and advertise your effort properly. Most boot and shoe men are not making fortunes at present and so cannot charter half a page in the newspaper; then make the most of a small space. How would something like the following do?

WHO ARE WE?

We are the people who sell your economical, well-dressed friends their boots and shoes. On Monday, Tuesday and Wednesday of next week we make a specialty of men's footwear. We have a boot in stock which is just your size, **neat** and **cheap.** Come and get it. Our store is on Main st., Abernathy.

JOHN SHOE MAKER.

BOOKS AND STATIONERY.

Cadmus was the first postman. He brought letters to Greece.—*Boston Transcript*. So! We thought the first male was left in the Garden of Eden.—*Boston Commercial Bulletin*.

"We sold a hundred and one copies of the magazine containing Tinkleby's poem," siad the clerk in the book store. "Indeed?" "Yes, Mr. Tinkleby bought a hundred of them."—*Washington Star*.

The retail book business of Hart & Riddell, Toronto, has been sold to Tyrrell & Co., and the firm intends to confine its attention to the premises on Wellington street, where they do business as wholesale stationers, binders, engravers, &c.

"Danvis Folks" is the title of a Vermont story which has appeared in *Forest and Stream*. It is good fun, Uncle 'Lisha, Jerusha, and Gran'ther Hill being among the characters. Antoine, the Canadian Frenchman, figures in the story, and Sam Lovel is its hero.

We cannot do much with the 50 and 75 cent novels here, in Picton, so Mr. Beattie tells *Books and Notions*. "Although our people are all very well off, they will buy the cheaper editions. Travellers buy them, but they are grumbling about the price. We often exchange them."

Frank Bolles has written, "From Blomidon to Smoky." This volume details a charming trip to Cape Breton, and is general in its observations of the people (with here and there a quaint anecdote), scenery, and, most of all, its beloved birds. He found eight species on Cape Breton.

The Montreal publishing firm of J. B. Rolland & Fils have issued their "Almanach des Familles," and "Almanach Agricole, Commercial et Historique" for 1895. The first has reached its eighteenth and the second its twenty-ninth year. They are both well known throughout the province.

The third edition of Griswold's Hand-Book of Adjustment of Fire Losses, revised and enlarged by the author, is issued by C. C. Hine, of the *Insurance Monitor*. The volume is bound in leather, and is of convenient size for pocket use. It contains much valuable information for agents and adjusters.

I have travelled over a great part of the earth's surface, says Max O'Rell, have lived in the two great republics of the world, France and America, and it is my firm conviction that there exists on this planet but one people perfectly free from a political and social point of view, and that is the English.

Thomas W. Handford, now of Chicago, but formerly a preacher in Toronto, which city he left rather precipitately, has compiled a book entitled "Lamps of the Temple": choice examples of the eloquence of the modern pulpit. Presumably, Thomas himself is not one of the lamps, though of pulpit eloquence he used to have a very fair share.

Copp, Clark & Co. are showing some neat novelties in stationery. Their boxed assortments of pens, holders, pencils, erasers, &c., are very taking. Pretty nickel holders with knife or pencil are also shown in various designs. The line of Eagle Pencil Co.'s crayon pencils for artists is worthy of remark, each shade of the lead being indicated by the color of the polished wood. The combination of more than fifty colors is quite striking.

It is announced on behalf of the Funk & Wagnall's Company that the second and concluding volume of their Standard Dictionary is to be issued this month. The work has been five years in preparation. Justin McCarthy and A. Conan Doyle speak in very high terms of this dictionary. The latter writes: "I regard it as a monumental work—a work, thus far, perfect of its kind, and for its purpose destined to be a conclusive authority to the English speaking peoples, and to other peoples as well, for many a generation."

The Toronto News Company is handling a large number of Christmas issues of the best-known illustrated weeklies. They arrived in such bulk as literally to be measured by the cord In addition to such stand-bys as *The London News* and *Graphic*, there is the always artistic *Figaro, Pears' Pictorial, Holly Leaves, Yule Tide, Black and White*, from the other side of the Atlantic. Then among American publications there are such special issues as *Puck's Annual, The Judge*, the Christmas *New York Life, Frank Leslie*, and so on.

Two young American students have made a journey across Asia on bicycles, and have written a book about the trip, of which waving the American flag on top of Mount Ararat is one of the incidents. In Peking they had an interview with Li Hung Chang. The beauties of Persia seemed to them largely a figment of the poet's imagination. "A flower crushed at every step" did not seem to fit the country half so well as the Scotch traveller's description, which divided Persia into two portions—"one, desert with salt, and the other without salt."

INSURANCE MATTERS.

The town of Carberry purchased a $6,000 fire engine some time ago. Owing to technicalities the by-law was quashed and the engine taken back. Ronald, the maker, now has in claim for $1,500 damages, freight, etc,, against the town.

So good an authority as the New York *Evening Post* declares that "Safety to the insured, as well as the welfare of the community, would be much better secured if assessment societies could without loss be wound up, leaving the regular form of insurance master of the field."

The Imperial Insurance Company have entered an appeal in the Recorder's Court, Montreal, against the assessment on their building at the corners of the Place d'Armes square and the hill. The assessment is for this year $300,000, which it is claimed was not made according to law

The town fire brigade were out for practice on Tuesday night, says the Magog correspondent of the St. John's *News*. The boys are becoming better acquainted with the new engine now, and are able to make steam very fast. The tank in front of the town hall is little better than useless, as it was pumped dry in eight minutes.

The past fiscal year is the first probably in the annals of the steamboat inspection service of the United States when there has been no loss by fire, one of the most dreaded accidents that can befall a ship The *Marine Review* finds attention directed to this fact in the annual report of the supervising inspector-general of steam vessels covering the last fiscal year.

At a meeting of the council last week of the Ottawa Board of Trade, a communication was read from the Dominion Underwriters' Association, suggesting a conference between the managers of the association and the local lumbermen with the view of settling the differences that are said to exist as to what insurance rates should be on piled lumber, saw mills, etc. Mr. William Scott, the president of the Board, having called upon the lumbermen, they agreed to the conference, which was arranged for Tuesday last in the rooms of the Board of Trade

An eastern newspaper tells an entertaining story of a life assurance transaction that took place in Fall River, Massachusetts. A resident of that place named Pariseau applied for a life insurance policy of $10,000, for which the agent gladly agreed to accept notes in payment. The policy was delivered and the notes given the agent, who turned them over to a local bank to be sold. A day or two afterwards the assured met the agent and demanded his notes, saying he did not want the insurance and had destroyed the policy. The agent said the notes were in the bank, and the assured secured an injunction restraining the bank from disposing of them. He also put his property in the hands of his wife in order to avoid payment of the notes if he failed to secure them. Having made all these preparations for fight, Mr. Pariseau suddenly called at the agent's office and informed him that he would take the policy, and take up the first note as soon as it was due. He explained his conversion by saying that after he placed his property in his wife's name his credit became paralyzed, and he thought life insurance the best policy under the circumstances.

—The action of the Bank of England directors in extending the duration of the Baring guarantee till 15th November, 1895, was not unexpected. The liquidation has been progressing favorably, and it is pleasing to find that the debt of the bank has fallen to £1,999,235. It is to be hoped, however, says the *North British Economist*, that every advantage will be taken to complete the liquidation at as early a date as possible. It is all very well for a going business to nurse its assets for future advantage, but a liquidation is conducted for behoof of the creditors, and should not be protracted beyond such period as will meet their claims.

CLEARING-HOUSE RETURNS

The following are the figures of the Canadian clearing-houses for the week ended with Wednesday, Nov 21st, compared with those of the previous week

Clearings.	Nov 21	Nov 15
Montreal	$10 649 246	$12 726 527
Toronto	4,683,815	6,222,750
Halifax	915,415	1,316,407
Winnipeg	1,309,553	1,402,242
Hamilton	546,218	779,044
Total	$18,155,247	$22,627,330

Aggregate balances this week, $2,639,382, last week, $4,909,927 Only five days' clearings

Carrying lumber by steam vessel has extended to so distant a commerce as Canadian export to the Argentine Republic of South America. On Thursday of last week the steamship "Turret Age," which is of the whaleback type of construction, left Montreal for Buenos Ayres with a million and a half of pine lumber, and the "Turret Bay," which left earlier in the week, had on board an equal quantity. The work of loading was pushed forward day and night, because on Jannary 1st a duty of two dollars a thousand feet goes into effect in the Argentine Republic on all imported lumber. The cargoes were supplied by the Export Lumber Company, of New York. The steamers will call at Sydney, C B., and take the necessary bunker coal for the voyage, and are expected to arrive at Buenos Ayres in about thirty days of their departure from Montreal

—The gross receipts of the Montreal Street Railway Company for the ten years ended with 30th September are thus given :

30th September,	1885	$222,063
" "	1886	242,186
" "	1887	346,922
" "	1888	386,486
" "	1889	412,216
" "	1890	431,589
" "	1891	491,862
" "	1892	569,810
" "	1893	750,751
" "	1894	880,000

The growth has been regular, as may be seen, but in 1892 1893 and 1894 new management and the use of electricity have resulted in remarkable increases.

—An International Exposition of wines, spirits and fermented liquors will be held at Bordeaux from May to November next year and the French Ambassador at Washington has conveyed to the Department of Agriculture a communication in which the wine growers, distillers and brewers of the United States are cordially invited to participate in the display. Bordeaux, which is the centre of the largest and most important wine-producing region in the world is a most fitting place for an international exhibition of beverages Moreover it rumor be true, the product of the vineyards of three continents often enters into the manufacture of good French claret The wine makers of Bordeaux are genuine cosmopolitans, and their wine is truly international in its origin.—*Phil Record*

—On Saturday last, 17th inst., the general quarterly meeting of the Commercial Travellers' Mutual Benefit Society of Western Ontario was held in London The following officers were unanimously chosen for the year President, W L. Underwood, London, re-elected first vice-president, T B Blackwell, London; second vice-president W Coates, London; treasurer, W S Case, London The Toronto directors are F. W Heath, R H. Greene, and James Stevenson

—On Friday last, at a thinly-attended meeting of the Board of Trade, of Chatham Ont., Mr. Marx gave notice of a motion respecting the abolition of exemption from taxation A discussion followed in regard to the poor mail service furnished Chatham, and a committee was appointed to inquire into the mail and postal matters and ascertain if it were possible to establish a better service. The members present requested the president to call a special meeting at an early date to discuss the waterworks question.

—The Bank Statement for the month of October will be found on pages 600 and 700 of to-day's issue Our usual banking review will appear next week.

—The Hamilton Provident Loan Society declares its latest Divid end, the forty-seventh, at the rate of seven per cent per annum

STATEMENT OF BANKS acting under Dominion Gov't charter, for the month ending 31st October, 1894.

J. M. COURTNEY, *Deputy Minister of Finance.*

Correspondence.

DRY GOODS TRADING METHODS.

Editor MONETARY TIMES:

SIR,—I learn from a recent and rather alarmist sort of article in another journal that, according to information "absolutely reliable" possessed by that paper, several large manufacturers are considering the question of selling to the retail trade instead of the wholesale. Query. Does not such a step mean that the said manufacturers are producing more goods than the market can absorb, and that finding the wholesale houses will not buy this surplus product, the mill men threaten to go to the retail? In any case, I hope they will do no such thing. It is a dangerous step. I know a textile manufacturer who was always prosperous until he began to sell goods to the retail trade. Recently he assigned, because those with whom he had entrusted his goods could not pay for them. And does it not stand to reason that if the best efforts of a firm are directed to manufacturing goods, some of the details essential to a jobbing trade are sure to be overlooked?

The art of granting credit may be comparatively easy, when one has to deal with a few large wholesale houses; but selling goods to the retail trade is another matter which needs greater skill and implies more risk. The expense of distribution, it seems to me, may not be materially reduced by combining the functions of manufacturer and jobber in one firm. Experience has proven that it is inexpedient to make a factory the centre of distribution, and several concerns, having made unsuccessful attempts in this direction, have been compelled to create seperate establishments for shipping goods, which have in reality become jobbing houses.

Retail firms may combine in a "syndicate" to order goods from the old country independently of the wholesale men on this side. The same syndicate may of course buy direct from the Canadian manufacturer, and probably do so. And judging from the names of those who are said to compose it, they are able enough to "go it alone." But for manufacturers to sell direct to Tom, Dick, and Harry among country or city retailers, is a trouble and a risk that should not be lightly undertaken.

Yours,
WARNER.

Hamilton, Nov. 20, 1894.

AFFAIRS IN THE UNITED STATES.

The last weekly circular of Henry Clews & Co., New York, has the following:

Although the immediate effect of the bond issue was a realization of profits made in anticipation of the event itself, its ultimate effect will be to strengthen confidence both at home and abroad. Nobody contradicts the fact that the necessity of the loan is a misfortune; but the determination of the Government to protect the national credit by the best possible expedient until the deeper causes for distrust of our currency system can be remedied, is the strongest sort of argument for confidence. Mr Cleveland has been lavish enough in promises to this end, yet his action in the matter has not been prompt enough to meet the preferences of the banking community. Europe, however, can now rest assured that our currency will be maintained upon a gold basis, and this will do much towards overcoming the prejudice of foreign holders, who have very naturally feared that interest and principal of our securities might some day become payable only in debased money. As for business interests, sufficient time has not yet elapsed to actually feel the results of the late election. Everybody now believes that silverism, populism and tariff agitation are questions of the past—or at least that the country is assured of a rest from such disturbances for some time to come.

In some quarters there is a disposition to exaggerate the effects of low prices for wheat and cotton upon the agricultural interests. It is overlooked that both wheat and cotton can be raised much more cheaply than formerly, and that it costs less to handle and transport these articles than ever before. In some portions of the South cotton can be grown probably with profit even at the present depressed price. Again, we have a great abundance of these low-priced commodities, which brings their aggregate value up to normal volume. Consumers are benefited by these low prices, and have more to spend in other directions.

About 50,000,000 bushels of wheat have already been fed to cattle with advantage, not wasted, and good authorities estimate that as much again will be used before the next crop. When all these and other offsets are considered, it will be seen that the present condition of the American farmer, while bad enough, is not quite so wretched as many would have us believe.

As for the industrial situation, that is hopeful. Our textile mills are not fully employed, but they are turning out a larger product at better profits than six months ago. The boot and shoe trade has been very active in low-priced goods for several months. The iron trade revives very slowly; still there is an unusual degree of confidence in the future, and many of the Western establishments which are most favorably circumstanced as to locality and plant are running close to their full capacity. The Stock Exchange is not blind to all these factors. Investors show general confidence in the future, and while often not able to buy, stubbornly refuse to sell.

AUSTRALASIAN BANKING—FIRST EFFECTS OF THE CRISIS OF 1893.

Articles based on statistics are necessarily somewhat wearisome, and are "*cavaire* to the general." But the views we expressed from 1886 to 1893 faithfully reflected every half-year, not merely the expansion of Australasian banking, but also the errors which were gradually assuming a threatening prominence. The principal of these errors were the non-progressiveness of the capital account relatively to the increase of business, large dividends being distributed at the expense of a broad base of security; the almost inexplicable ardor with which seven or eight institutions sought for British deposits at comparatively high rates of interest; and the advancing on securities based on property of potential value, but for the present unproductive. As regards the reproach frequently met with, that the banks locked up too much money in securities which might easily become unrealizable, we do not consider it of importance. For while the lock-up was confined to advances to great productive occupations which yielded the stipulated rate of interest, the danger was infinitesimal. Banking business cannot, any more than any other kinds of business, be conducted on lines sanctioned by pure reason in all its austerity, and the colonial public never manifested any uneasiness while the lendings of the banks went to support profitable industry. They always understood the position, and they were only alarmed when they gradually learnt, first with incredulity and then with amazement, that several banks had become largely committed to the support of heavy ventures in real property, as well as of companies of various kinds formed for purposes, not of development, but of speculation. Without this cause of alarm there would probably have been no crisis, notwithstanding the present temporary depression of Australian pastoral and agricultural interests and the sudden cessation of borrowing for profuse expenditure on public works. The British portion of the public interested as depositors in the Australasian banks could not follow events as closely as the colonial public, and could not understand the position as thoroughly. But when they noted the alarm which was felt in the colonies, they also became, and from their point of view justifiably, anxious to withdraw their money.

One thing which came out clearly in our first series of articles was that banking disasters in the colonies were more frequent and more complete than had generally been supposed, and that the wrecks had, so far as shareholders were concerned, been total. During the period covered by those articles the amount of paid-up capital placed in liquidation and written off was £3,678,000. The writings off made by several institutions at the reconstruction era amounted to £1,145,000, making a total of £4,823,000 virtually lost by shareholders in the shape of capital. Reserve funds—the result partly of premiums on new issues and partly of transfers from profits—were also written off during the eight years to the extent of £2,244,196, and at the reconstruction era to the extent of £3,516,000, making a total of £5,760,196. Summarising the foregoing figures we have the following table:

Paid-up capital—		
Placed in liquidation and written off during 8 years ended March 31st, 1893	£3,678,000	
Written off at reconstruction era	1,145,000	
		£4,823,000
Reserve funds—		
Written off during 8 years ended March 31st, 1893	£2,244,196	
Written off at reconstruction era	3,516,000	
		£5,760,196
Total capital and reserve lost....		£10,583,196

Beyond all question this is a heavy price to pay for the errors and illusions of the past. If the application of the lancet is painful, still it is better than the absolute ignoring of a chapter in banking history which can be studied with profit by the whole world, and which will serve as an economic lesson for all time. For the Australasian banking experience has been quite unique, and grave problems of an unprecedented character have yet to be faced and worked out.

Our eight years' series of articles brought out another thing calculated to excite uneasiness, viz., the rapidity with which the banks invested money in buildings, to the impairment of the effective power of their capital resources. Thus the premises account mounted from £3,689,868 as at 31st March, 1885, to £6,162,283 as at 31st March, 1893, the increase during the eight years being £2,472,415, which compares with an increase of only £681,374 in the paid-up capital within the same period.

Before closing this introduction, we will recapitulate the aggregates of the banks' balance sheets at 31st March, 1885, and at 31st March, 1893, as follows:

AGGREGATES OF BALANCE SHEETS.

	To Mar. 31, 1885.	To Mar. 31, 1893.
Liabilities—		
Capital paid up	£14,893,196	£15,574,570
Reserve fund	6,265,970	8,077,000
Undivided profits ..	199,181	353,209
	£21,358,347	£24,004,779
Deduct — premises, furniture, etc.....	3,689,868	6,162,283
Effective capital resources	£17,668,479	£17,841,496
Dividends to pay ..	921,555	695,404
Notes in circulation..	5,346,734	5,007,426
Bills payable, etc. ..	11,555,367	14,774,686
Deposits, etc.	104,373,027	151,229,908
Total liabilities ..	£139,865,162	£189,549,920
Cash items	£22,159,811	£27,597,228
Government & other public securities..	5,112,322	7,601,156
Discounts, advances, loans, etc.	112,593,029	154,351,536
Total assets*	£139,865,162	£189,549,920

*Exclusive of premises, etc,

What we prefer to call the effective capital resources bore the proportion to the advances of the banks of 15·69 per cent. as at 31st March, 1885, and of 11·56 per cent. as at 31st March, 1893. On the other side the cash items and Government and other public securities, taken together, bore the proportion to liabilities to the public of 22·32 per cent. as at 31st March, 1885, and of 20·50 per cent. 31st March, 1893. The movements were certainly not in the direction of strength. — *Australasian Insurance and Banking Chronicle.*

—A Montreal paper tells of two wee travellers, Norwegian children, a boy aged ten and a girl aged nine, brother and sister, who reached Bonaventure station *en route* from Norway to Grantsburg, Wis., where they are to join their father. The little things had made the entire trip alone, and all that had been given them when they left the old land was their tickets and a letter written in a lady's hand, praying all captains, conductors and trainmen to be kind to the little ones on their long journey. That the request was complied with was evidenced by the condition of the two when they arrived in Montreal. Their cheeks were pink and both looked as fat as butter.

STOCK EXCHANGE VALUES

October has been a month of political "scares." By degrees the aggregate market value of Stock Exchange securities had been rising, until, in August and September, there was a rush upwards. In October much of the sudden gain of the summer months has been lost. Speculation, based on cheap money and the difficulty of finding safe investments for surplus capital, had brought a kind of froth upon markets. This has been swept off by mere breaths of political disquiet; but these came from so many quarters that one or other might well portend some sort of storm. The valuations, going by market prices at the respective dates, have fluctuated as follows:

Aggregate market values of 334 representative securities:

December, 1893.....	£2,753	millions.
January, 1894.....	2,741	"
February "	2,765	"
March "	2,777	"
April "	2,790	"
May "	2,792	"
June "	2,807	"
July "	2,816	"
September "	2,885	"
October "	2,844	"

Thus October prices have run back considerably, in deference to possibilities following the Czar's serious illness, a change of rulers in Afghanistan, the new (Japanese) hegemony of the Far East, and expected fighting in Madagascar. Foreign government stocks have lost only 1¼ per cent. on the whole, home and Indian a shade over 1 per cent., which is not more than a natural concession to current feelings of doubt or alarm. The fall of nearly 5½ per cent. in British railway ordinary stocks is so heavy, however, as to denote the previous existence of an extended speculation for the rise. Home ventures of the unspeculative kind—gas, water, insurance, and so on—are firm or higher. Copper mining shares, which had been swelled up by speculation on borrowed money, have lost more than 10 per cent. We do not include South African mines in a list like this, which, for the sake of comparison with prices recorded for many years past, keeps on the old lines as far as possible. It is in South African shares, however, that the speculative movement had been most sturdy; and even this department has latterly felt the political blight.—*Banker's Magazine, London.*

Store for Sale or to Rent

A well established general store business in the thriving town of Georgetown; the best store and stand in the place; fitted up with all the modern improvements; gas, electric light, plate glass; this town is surrounded by a cluster of villages, having a population of about 1,300 and a rich agricultural country. The chance of a life time for a live business man. Possession when agreed upon.

WM. McLEOD & CO.,
Georgetown, Ont.

People of **Good Common Sense** usually appreciate a good article that is honestly made, well finished and up to date. This explains the great success of

GRANBY RUBBERS

THEY WEAR LIKE IRON

A HEAVY PULL.

For several days last week there was in progress at Detroit, Michigan, an interesting and in some respects novel operation. A huge iron pipe, weighing 150 tons, was being laid in the river Detroit to carry natural gas from the Essex fields to the city. What was done was to draw, beneath the river, from the American to the Canadian shore, a distance of two-thirds of a mile, a huge iron pipe eight inches in diameter, and in sections 600 feet long, by means of locomotives. The pipe is destined to carry natural gas from the Canadian fields to Detroit. A partial test of the plan was made on Wednesday, but its entire feasibility was not thoroughly tested until Thursday.

The plan is this: On this side of the river, says a Detroit paper, is a trench extending a distance of 600 feet to the bank. This trench is lined with a wooden trough, lubricated with soft soap. In the trough lies the main, of eight-inch wrought-iron pipe, with threaded joints, every joint being strengthened by a huge cast-iron basket bolted tightly about it. Each basket weighs 1,000 pounds. At the front or river end of the main is a conical plug designed to keep the water out, and at the same time serve as a sort of plowshare for turning aside the soft mud of the river bottom and making a trench for the main as it is hauled across. Attached to the end of the buoy is the great steel cable which has been strung across the bottom of the river.

On the opposite side of the river, 3,000 feet away, is a huge snatch-block weighing 900 pounds, through which runs the other end of the cable, and beyond which it is attached to three locomotives standing at right angles to the line of the main. When the three locomotives on the Canadian side of the river started to pull the first section of 600 feet of pipe to-day, it slipped along at a lively gait. The second section slipped along as nicely, but a fourth locomotive was necessary to pull it. The remainder of the pipe will be drawn in the same way, though if it takes four engines to draw the second, the fifth and sixth sections will be something of a load. The entire weight of the pipe will be 150 tons, or about twice the weight of the average locomotive.

Although the first section is safely in position, the real difficulty is not yet reached. The bottom of the river at this point is in the shape of a squatty letter W, and when the pipe reaches it the engineers expect to encounter some trouble, but not enough to spoil their plan. A second pipe will be laid as soon as the laying of the first is completed.

IN THE MATTER OF THE

TORONTO PLATE GLASS CO'Y.

IN LIQUIDATION

Tenders addressed to the undersigned will be received up to 12 o'clock noon of Friday, the 30th of November, for the purchase of 390 shares of $100 each of the capital stock of the Consolidated Plate Glass Co. of Canada, on which 66⅔ per cent. has been paid up.

Tenders may be for the whole or any number of the shares.

No tender necessarily accepted.

The Consolidated Plate Glass Company was formed about a year ago of the principal dealers in plate glass in Canada for the purpose of consolidating their interests and minimizing competition. The stock is considered an excellent investment.

—Some idea of the magnitude of the task cast upon Lord Balfour of Burleigh, Sir Courtenay Boyle, and the other gentlemen entrusted with an inquiry into the railway and canal rates in operation throughout the country, may be had from the fact that it was not until Wednesday that the special staff of clerks set by the Railway Clearing House Association to assist the Board of Trade were able to leave Richmond Terrace, Whitehall, for their own quarters at Euston. For five years and a half they have been helping Lord Balfour of Burleigh and Sir Courtenay Boyle in condensing some thousands of Acts of Parliament relating to railway and canal charges into something like reasonable dimensions. In this they have succeeded to the extent of reducing the total number to about fifty. Before leaving, Mr. Chas. Smith and his colleagues were heartily thanked by the Board of Trade for the invaluable services they had rendered the department. On inquiring at the Treasury I was informed that the scheme for the reorganization of the Inland Revenue Departments, outdoor branch, is practically complete, and that it will be forwarded to Somerset House.—*London Correspondent Glasgow Herald.*

—*La Semaine Religeuse* gives the following table showing the number of pilgrims who have visited the famous shrine of Ste. Anne de Beaupre, Que., for the last twenty years:

1874	17,200	1883	58,000
1875	27,000	1884	61,000
1876	28,000	1885	79,282
1877	30,500	1886	85,657
1878	37,530	1887	90,884
1879	37,500	1888	91,437
1880	36,500	1889	100,951
1881	50,000	1890	105,672
1882	54,000	1894	200,000

—An increased traffic between Canada and the United States in animals from the farm during 1894 is indicated in the figures published last Saturday respecting the live stock that have crossed Detroit river westward in the last two years. The Canadian Government Inspector of stock, Dr. Bromlee, of Windsor, in his annual report regarding the stock that crossed the river, says: "There were nearly 2,000 cars more in 1894 than in the previous year. In 1893 there were in transit 12,082 cars containing 133,782 cattle, 228,913 hogs, 379,251 sheep, 5,383 calves, 1,822 horses. This year there were 13,915 cars, containing 127,013 cattle, 325,960 hogs, 493,039 sheep, 8,919 calves, 2,434 horses. The shipments were chiefly from western points to Buffalo."

—After mentioning the death in the Truro jail of a harmless insane female pauper, who had been confined in that building for *twenty years*, the Colchester *Sun* pointedly asks: "When will our county councillors establish a poor farm and hospital. The town of Truro is now seriously considering the erection of one, but we are strongly of the opinion that it should be erected by the joint efforts of county and town, and should be situated some ten or twelve miles from the latter. This system works splendidly in Hants—why not in Colchester county?"

—One thousand years hence—"Tell my daughter that she must not forget that dinner will be an hour earlier to-day. She is in Egypt." "Yes, mum." (Telephones a phonographic signal to Pyramid station No. 99,999.) "I see the air-ship from Market street, Japan, nearing the window. Bring my husband's slippers and dressing gown." "Yes, mum." "Now touch the buttons A, L, R, T, V, W and X. I think that will be all that we will want for dinner. Here comes my daughter on her bi-wind flyer, just in time. Call up No. 8,888." "Yes, mum." —*Boston Globe.*

—In the *Canada Gazette* of Saturday last Messrs. Gemmill & May, solicitors, give notice of application to Parliament for the incorporation of a company to build a railway from Quebec to Port Simpson on the Pacific coast, with power to make connections with Montreal and with a deep water harbor on Hudson Bay, and to work a vessel transportation service in connection therewith, and to operate telegraph and telephone lines along the railway for the benefit of the public.

—A diamond weighing not less than 971¾ carats, and said to be the largest in the world, has been found in the Jaggersfontein mines, Cape Colony, by Inspector Edward Jorgansen. It was brought, well guarded, to the Cape of Good Hope, and put aboard a war ship to be brought to London and deposited in the Bank of England.

Commercial.

MONTREAL MARKETS.

MONTREAL, Nov. 21st, 1894.

ASHES.—With the close of ocean navigation we have to note a decline in pot ashes. For first quality dealers would not now be disposed to pay more than $4.20, and for seconds $3.70. Pearls are steady, and for a small lot $7 was paid last week, but they are very scarce. The total stock in store at the moment is 93 pots, and 10 pearls.

DAIRY PRODUCTS.—For butter export the season just closed must be classed as the dullest for a good many years, and last week's shipments were only 47 pkgs. The local demand, however, is well maintained for good quality. We quote: Creamery, 19 to 21c.; Townships dairy, 18 to 19c.; Western, 15 to 17c. per lb. The cheese market rules pretty firm at 10¼ to 10⅜c. for fine Ontario, Townships 9⅞ to 10¼c., and Eastern 9½ to 9⅝c. per lb. The cable showed a further advance of sixpence at the end of last week, the figure now being 51s. Exports last week were 47,019 boxes, as against 49,009 for corresponding week last year. Eggs are in good demand at 13 to 15c. for ordinary, boiling stock 16 to 18c. per doz.

DRY GOODS.—Assorting business has not picked up much since last writing. The weather has been colder, but retail trade in dry goods has not yet felt much benefit from the change in temperature, and city dealers still find business slow. There has been some little revision of the prices of domestic cottons. The

GROCERIES.—There is no special activity in trade, but a fair number of orders have been lately received from lumber concerns for shanty supplies to be ready to move into the woods with the first snow, and on the whole business is about a fair average for the season. In values there is little new to note. Trading in teas has assumed a quieter phase, but quotations for Japans are very firm, and holders of stock control the situation. A strong market for blacks is also reported from London. For granulated sugars the quoted price at refinery is 4⅛ cents, but this is known to have been shaded a sixteenth for a fair lot, and 4c. might fetch a round lot. A sale of so-called Barbadoes molasses was reported last week at 26c. per gal., but prime Barbadoes is firmly held at 28c. in quantity, and 29 to 30c. in a jobbing way. Coffees are quiet, and hardly so firm as they were. Rice steady, at old quotations. New Tarragona almonds are quoted at 13 to 14c.; new filberts, 8 to 9c.; new Grenoble walnuts are not yet to hand. The importation of nuts this fall has been very light indeed. The bulk of the importation of Valencia raisins this year is very poor stuff, and it was with difficulty that an order for 200 boxes of good fruit was filled the other day at 4½c. per lb. Fruit, such as it is, can be had at 3½c. This state of affairs will prove a great help to the sale of California fruit, and several car lots are close at hand. Prices of these goods are rather firmer; we quote two crown 6c., three crown 6½c., four crown 7½ to 8c.

HIDES.—The American hide market is reported quite a bit firmer, and a good many country hides are finding their way across the lines. A city dealer reports a sale of a car lot for the United States at a satisfactory figure. No. 1 light are being bought green at 4 to 4½c., with moderate sales of cured to tanners at 5c. heavy bring 5 to 5½c. from dealers, with tanners paying 6½c. Lambskins 55 to 65c., with some dealers reported paying even a little higher figures.

LEATHER.—Boot and shoe manufacturers continue to report some slackness in the volume of spring orders, and there is, as a consequence, very little present disposition to buy leather, and an all round quiet time is reported. Prices are nominally unchanged, but a buyer of a fair lot could command some concession. An English leather man who was in the market last week took several moderate lots of fine light splits at prices from half a cent to a cent better than local buyers seem disposed to pay. We quote:—Spanish sole B. A. No. 1, 18 to 20c.; do No. 2 to B. A., 17 to 18c.; No. 1 ordinary Spanish, 17 to 18c.; No. 2, 16 to 17c.; No. 1 slaughter, 18 to 20c.; No. 2 do., 17 to 18c.; American oak sole, 39 to 43c.; waxed upper, light and medium, 24 to 26c.; do. heavy, 20 to 24c.; grained, 24 to 26c.; Scotch grained, 25 to 27c.; splits, large, 13 to 16c.; do. small, 11 to 12½c.; calf-splits, 27 to 30c.; calfskins (35 to 40 lbs.), 50 to 60c.; imitation French calfskins, 60 to 70c.; colored calf, American, 23 to 27c.; Canadian, 19 to 21c.; colored pebble cow, 12½ to 13½c.; russet sheepskin linings, 30 to 40c.; harness, 18 to 23c.; buffed cow, 9 to 11c.; extra heavy buff, 12½c.; pebbled cow, 8 to 12c.; polished buff, 9 to 11c.; glove grain, 9 to 10c.; rough, 16 to 17c.; russet and bridle, 40 to 50c.

METALS AND HARDWARE.—Trading in these lines is of very limited character and few transactions of any moment can be reported. There is no pig iron now on wharf, and from $21 to 21.50 is the asking price for Summerlee, and $19.50 for Carnbroe, ex yard, these being about the only brands of Scotch iron available. Domestic iron remains as last quoted; prices of bar iron are being cut worse than ever, and $1.60 is apparently now the general quotation even for small lots; the demand for tin plates that British makers calculated on from the United States has not materialized, and heavy stocks and easier prices are reported in England. Canada plates are notably weaker, and though $2.05 is the nominal price for Blaina and equal, it is reported that some houses have made offers of moderate lots as low as $1.95; a lot of 8,000 boxes is on the "Dominion," one of the last steamers now in port. Ingot tin shows some decline in England and is now quoted at 17 to 18 cents here.

OILS, PAINTS AND GLASS.—The past week was quite a busy one in the getting away of goods, but matters are now slackening down considerably. There was a trade meeting last week to consider the cutting in linseed oil, but beyond a general discussion nothing was done, and prices remain as quoted. Stocks on spot are comparatively light, and laid down cost is now enhanced. In other lines there is really nothing new. We quote:—Turpentine, 43c. per gallon for single barrels; two to four barrels, 42c. Linseed oil, raw, 57c. per gallon; boiled, 60c.; 5 barrel lots, 1c. less; olive oil, machinery, 90c.; castor, in lots, 6½c.; single cases, 6¾ to 6¾c.; tins, 7c. Nfld. cod, 38 to 40c. per gal.; Gaspe oil, 38c. per gal.; steam refined seal, 38 to 40c., in small lots. Leads (chemically pure and first class brands only), $4.50 to 5.00; No. 1, $4.50; No. 2, $4.25; No. 3, $4.00; dry white lead, 5c.; genuine red do., 4½c.; No. 1 red lead, 4c.; putty, 2c. in bladders per lbl. London washed whiting, 40 to 45c.; Paris white, 90c.; Venetian red, $1.50 to 1.75; yellow ochre, $1.50 to 1.75; spruce ochre, $2.25 to 2.50; window glass, $1.80 per 50 feet for first break; $1.30 for second break; third break, $2.80. These prices are shaded 5c. for 50-box lots.

WOOL.—There have been no transactions of any moment since last week. Samples of the

The "Economy" Hot Water Combination Heater.

When it is necessary to provide Heating Apparatus for your residences, churches and stores for the coming winter. If your present heaters are unsatisfactory, or if you require a new heater, let us send you our new catalogue and book of "Opinions" of the Economy Heaters. We are engaged EXCLUSIVELY in the business of heating and ventilating all classes of buildings, and we can succeed where others have failed.

cargo of Cape, shortly due at New York for this market, are now being submitted to western millmen. We quote greasy Cape 13½ to 16½c.; B.A. scoured, 26 to 32c.; Canadian fleece, 17 to 20c.; pulled supers, 20 to 21½c.; extra, 23 to 26c.; British Columbia, 10 to 11c. per lb.

TORONTO MARKETS.

TORONTO, Nov. 22nd, 1894.

BOOTS AND SHOES.—Rubber goods continue in good request, as do felt goods. The close of navigation is near at hand, and supplies for the lumbermen on the north shore of Lake Superior must be prepared for the last boats. In regard to the spring trade there is little that can be said. Shoe merchants are not giving orders freely, and the only men who appear to be giving any sized orders are the buyers for the departmental stores.

DRY GOODS.—With wintry, cold weather trade has shown improvement. Retailers are selling more goods and jobbers in turn are experiencing a better demand in the sorting up trade. There has been a decline in the price of bleached cottons, which amounts to about 7½ per cent. This brings the price of these cottons into harmony with the value of grey cottons, reductions in this description of goods having been made some time ago. Since the last changes made in the tariff English and American manufacturers have been marketing their goods in Canada, and the decline is due to a desire to meet this competition.

FLOUR.—The strength which the market began to display two weeks ago has not abated, but the market following wheat is gaining strength. Manitoba patents are quoted at $3.65 to 3.70; Manitoba strong baker's at $3.35 to 3.40, and straight roller at $2.65 to 2.70. Millfeed is quiet, and shorts, middle freight rates west, are quoted at $12 to 14.

GROCERIES.—With the near approach of the holiday season the demand for fruits is increasing. Valencia raisins find good request, as do Sultanas. Stocks of Valencia raisins in consequence are low, and shipments from New York, which are now *en route* for this market, will be well received. Jobbers' prices of sugar remain low, but unchanged since our last report. Canned goods are selling better in consequence of cold weather. The *B.C. Commercial and Maritime Register* says: "Another of this season's salmon fleet has sailed and there is now only one more vessel to arrive. The British barque "Corryvrechan," 1,299 tons, sailed on the 24th ult. for London from Victoria with 52,381 cases of salmon, valued at $330,000, and is expected to make a smart passage home. The German barque "Senta" is now loading on the Fraser River, but as she only takes in cargo in fine weather, she is not being loaded very rapidly. The schooner "Rimac" is expected daily, and then the salmon fleet of '94 will be completed.

GRAIN.—Although there have been fluctuations during the week both on the local wheat market and abroad, values remain much where they were last week, and if anything are a trifle firmer. Oats are quiet and steady with quotations unchanged. Barley is steady, and there is a fair demand for stock both from local brewers and from the United States. Peas are steady and unchanged. Available supplies reported up to 17th instant, as compared with the previous week, are; United States and Canada, east Rocky Mountains, wheat, increase 1,278,000 bush.; corn, increase 292,000 bush.; oats, decrease 320,000 bush. United States, west Rocky Mountains, wheat, increase 750,000 bush.: afloat for and in Europe, wheat, increase 208,000 bush.

The stocks of grain in store at Port Arthur on Nov. 10th were 1,149,785 bushels. During the week there were received 474,891 bushels, and shipped 589,377 bushels, leaving in store on Nov. 21st, 1,035,899.

Oats, "	15,013	3,176
Peas, "	713	3,122

HIDES AND SKINS.—The situation has developed nothing that is new during the week; receipts about equal the consumptive demand and prices remain firm. The Chicago *Review* of the 17th inst. says of the packer hide market: "The week closes with an undoubtedly firm market. Packers enter the winter season closely sold up, and are sure to attempt to obtain summer prices for their winter hides. Long experience, however, has taught tanners the impolicy of buying long-haired stock on the calculations that show a profit in tanning short-haired hides. Lambskins in the local market are unaltered at 55c. There are apparently large stocks in the hands of country dealers, and with large stocks of skins and considerable

These prices are wholesale by the car-load.

quantities of pulled wool offering from the United States, the market is necessarily weak Tallow is unchanged, selling at last week's prices.

PROVISIONS.—The long-continued weakness in the butter market has not been relieved, the outside price for choice selections is 17c.; rolls are selling at 15 to 16c., and fair descriptions bring 12c. a pound. Cheese is jobbing in a quiet way, at unaltered prices. In hog products the feeling is easy; long clear selling at 7½c., loins at 10½c., rolls at 8c., and lard at 8 to 8½c. per lb. The Cincinnati *Price Current* of November 15 says: "The past week has been an active one in pork packing operations, the returns indicating a total of 395,000 hogs handled by western packers, compared with 325,000 the previous week, 240,000 for corresponding time last year, and 300,000 in 1892. From November 1 the total is 720,000, against 445,000 a year ago. Prices of hogs ranged somewhat higher a portion of the week than in the preceding week, the extreme figures not being maintained at the close; the general average for prominent markets is slightly lower than a week ago." New laid eggs are bringing 17c, held fresh 15c., and pickled 14c.; the demand is weak and languid.

SEEDS.—Deliveries from farmers' hands are not much more active than they were last week. Wintry weather is bound to inspire threshing operations, and when these assume any degree of activity the market will show more life. Alsike clover is quoted at $4 to 5 for medium to choice samples, and rather more would be paid for fancy lots; red is selling at $5 to 5.40.

WOOL.—There is little actual business being done in fleece wool; the foreign demand is extremely light, while sales made on Canadian account are of limited character and indicate that there is no tendency to speculate in wool or to buy stock for the future.

BRITISH MARKETS.

The London grain circular of L. Norman & Co., dated November 5th, says:—

Since our last report of the 29th October, the wheat trade has ruled firm, with prices favoring sellers. There are signs of a better speculative demand and consumers are showing anxiety to purchase at the low rates ruling, but holders are not at all disposed to sell and have raised their pretensions, which buyers to a certain extent followed. *English Wheat*—The scarcity of this article has resulted in a further advance, and in some cases 6d. to 1s. more money has been paid. *Foreign Wheat*—With good demand from the United Kingdom and Continent, a large business has been done. La Platas are dearer, 20s. 3d. to 20s. 7½d. being bid for f.a.q. sailers on passage. Californias showed 6d. advance on the week, 24s. being paid for cargo No. 1. *Australians*—Victorian sailer parcels have sold to-day at 23s. Russians have been freely offered, and have been in good demand; to-day business has been done from 16s. 9d. for hard Taganrog, April and May shipment, to 21s. 6d. for Black Sea Azima. Azoff and Black Sea Ghirkas have sold at 19s. Americans firm and dearer; sellers red winter on passage ask 20s. 1½d., and for shipment 20s. 3d. Canadian firmly held. During the week hard Manitoba sold at 22s. 9d. Sellers November and December shipment ask to-day 23s 4½d.

BARLEY.—Grinding barley is firm and in good demand; Odessa Nicolaieff parcels are offering at 11s. 7½d. for November and December shipment, with buyers at 11s. 6d

MAIZE.—Firm, but demand quiet. Parcels of new Odessa, November and December shipment, offer at 19s. 6d., while old crop is held at 21s. Mixed American, new or old, is held for 22s.

OATS.—With a falling off in offers the market is rather dearer. Rigas are offering from 12s. to 12s. 6d. per 304 lbs.; ordinary Petersburgs, 11s. 9d.

HEAD OFFICE: WINNIPEG

Subscribed Capital... $400,000 00 Government Deposit... $56,000 00
Paid-up Capital ..... 100,000 00 Reserve 54,720 00

Business in force over $4,000,000 00

The attention of the insuring public and live progressive agents is called to the following reasons for selecting this company:

First It is the only Canadian company giving its policyholders the security of a four per cent. reserve; all others without exception reserving on a lower standard.

Second The policy contract is as liberal as any issued. No restriction as to residence, travel or occupation, and incontestable after one year.

Third The premium rates are low and the cost to the policyholder is certain to be less than in any other company because a better rate of interest can be earned in the west than at the home of any other company.

Fourth—Every desirable plan of insurance is issued from the low priced "PAY AS YOU GO" plan to the shortest single premium endowment.

DO TALL BUILDINGS PAY.

During the past decade, many high office buildings have been erected in Boston, and the question naturally arises: Are they paying? As far as can be learned, these new buildings have proved paying investments and are, in general, entirely occupied. Now, even allowing that the city is rapidly growing, there is, of course, a limit to the demand, so to speak, for office buildings, and there are certain indications now at hand which show that this limit has been nearly, if not actually, reached for the time. Every new building which goes up accommodating from 500 to 700 occupants, must naturally draw the bulk of its tenants from some other building.

Real estate brokers say that new office buildings, like new houses, are attractive to people, and they will leave offices in another building, with which they are satisfied, to move into a new structure. The result has been, as might have been expected, that the tendency of rents in the less desirable buildings is downwards. Now, the great question is regarding the future. If the owners of the last-named buildings find it necessary, they will still further reduce the rents, for a further reduction would be better than empty rooms, and such further reductions cannot fail to exert an influence on the rents of all classes of buildings.

This must be palpable, for the further the rents of the less desirable buildings slide below those of such office buildings as the Exchange, Ames and Carter, the more attractive will become the offices of the first named, even to people who need not especially economize. Consequently, there can be only one result, namely, a corresponding reduction in the rents of the big first-class buildings. To be sure, the city is constantly growing, but it is good opinion that for the sake of stability in rents the building of huge office structures should not go on too rapidly. Their erection, of course, improves the appearance of the city, but as we have before mentioned, there is a limit to the demand for first-class offices on the present basis of rents.—*Boston Commercial Bulletin.*

IRON VS. STEEL FOR HEAVY WELDED CHAINS.

An English letter gives the following as to the relative standing of steel and iron for heavy chains, in the opinion of large manufacturers of chains and cables. It will be noted that no opinion is expressed as to the strength of weldless links of steel. The strength of these latter has been well established by experiment as much beyond that of welded iron, saying nothing of their greater reliability:

"I have recently had occasion to interview certain of the leading chain cable makers in the Tipton and Dudley districts as to their views on the suitability of steel for chain and cable making, and in the present state of the steel question they are particularly interesting. That part of the country is the seat of this special class of work, and is, therefore, the chief centre for the United Kingdom, if not, indeed, for the whole of Europe. The most important firms declare that they have very little faith in chains or cables made from steel, for the reason that they can never depend on sound welding. They have made numerous experiments, but have not as yet come across any steel that will weld with the same amount of security as the best brands of chain iron. During the past 25 years they have experimented upon nearly every kind of steel bar made for chain purposes, and they go so far as to say that a steel chain with welded links can never hope to be classed with anything above a third-rate quality of iron. The firm informed me that the same thing applies to railway and colliery wagon couplings, and illustrate tests made at Lloyd's public testing machine, in which Siemens steel couplings, made especially for testing, broke at a strain of 45 tons, compared with 59½ tons borne by the celebrated Bowling iron (Yorkshire) and 66⅔ tons and 67½ tons from iron employed at this firm's works.

"These ironmasters further stated that although the mild steel now put upon the market is much better than a few years back, the expectation that this material would supersede iron for heavy chain manufacture has not been realized. As a striking example of the preference which, even among steelmasters, exists for chains of iron, the firm mentioned that they supply manufacturers of the leading steelmakers in the country with crane chains, and these all specify iron."—*Iron Trade Review.*

A MAGAZINE KALEIDOSCOPE.

Time was when all our magazines
Where filled with essays, stories, scenes
By pen and pencil drawn,
When poems, histories and such
On every page your hand would touch,
By writers who were valued much,
Before the "ad-smith's" dawn.

But now the magazines are filled
With literature our experts build
On every branch of trade,
And in their pages now there is
A list of human luxuries,
And needs, in every line of biz,
In catchy ads displayed.

Hats, clothes and shoes, all things we wear
In great variety are there
And quickly catch the eye.
Soups, sauces, broths and things we eat,
From crackers to extracts of meat,
And pickles, will the readers greet
In plentiful supply.

Tea, coffee, cocoa, wine and beer,
In very tasteful ads appear
On many an inside page,
Machinery of every kind,
And bicycles we always find
To tempt both man and womankind
In this progressive age.

Silks, satins, linens, gloves and lace,
Which add unto my lady's grace,
And charm the female heart,
Are side by side with other needs,
From hooks and eyes to garden seeds,
From painted fans to coral beads
And specimens of art.

Stocks, mortgages, and bonds and shares
Are tempting bait for bulls and bears;
With real estate for sale,
Insurance against death and fire,
Investments which we should admire,
And bargains for the shrewdest buyer
Throughout the book prevail.

What is there man or woman wants,
From window shades to Plymouth pants,
That has not here a place?
All modes of travel that can be,
By road or river, rail or sea,
With information as to fee,
Within the book we trace.

Then hail the modern magazine,
The greatest storehouse ever seen,
Whose ads illume the mind!
Page after page unfolds to view
Some human want, invention new,
Which pays us well for looking through
To see what we can find.

—*Printer's Ink.*

WOMAN'S SHARE IN PRIMITIVE CULTURE.

The old theory with regard to women in savagery was that she existed merely as the slave of man, to bear the burdens and be the victim of his inherent cruelty; but scientific investigation, examining into the status of primitive tribes and seeking out the elements of civilization, has discovered this theory to be quite untrue. Woman in prehistoric life was in many respects the superior of man; the inventor of domestic comfort, the builder of the home, the source of the refining influences which have developed modern society. It is this latter doctrine, now fairly well demonstrated, that Dr. O. T. Mason, curator of the department of ethnology in the National Museum at Washington, seeks to elucidate in his treatise on "Woman's Share in Primitive Culture," the first volume in the "Anthropological Series," edited by Professor Frederick Starr, of Chicago University. In this admirably written work Dr. Mason brings the testimony of science to show the part played by woman in the capacity of food-bringer, weaver, skin-dresser, potter, beast of burden, jack-at-all-trades, artist, linguist, founder of society, and patron of religion. He brings to bear on his theme a vast store of erudition, and illustrates his ideas with many citations from primitive manners and customs; and the conclusion is that "it matters not whether we regard the history of the remotest past or the diverse civilization of the present, the emancipation and exaltation of women are the synonym of progress."—*The Beacon.*

A TALE OF LIFE ASSURANCE.

In Mr. James Payn's recently published volume the following anecdote appears:

"Blondel Parva" is a tale of life insurance founded on some curious facts that took place in Edinburgh in the early part of the century. The clothes of a merchant of high repute were found on the shore of the Forth, and it was concluded that he was drowned. He was very popular, and his family, who were much attached to him, were greatly sympathized with, and the more so since they were left far worse provided for than had been supposed. He had, however, insured his life for a very large amount, which secured them competence. By help of this money and his own exertions, the eldest son in course of time amassed a large fortune. Many years afterwards two of the judges were walking across the North Bridge in Edinburgh when they were accosted by a beggar. One of them gave him something and excused himself to the other for such injudicious charity on the ground "that the old fellow was so like poor F." "My dear friend," said the other gravely, "I never forget a face. That was F. himself." And so it turned out. F. had pretended to commit suicide in order to save his family from ruin; and after years of voluntary exile, during which he suffered great privations, he had been unable to resist the temptation in once more beholding his children before he died. He had no intention of revealing himself to them, and fancied that no one else could recognize him, but he felt that the judge had done so, and therefore made himself known to them. He died at home a few weeks after his return; the money obtained from the life insurance office was repaid with interest and the matter was hushed up. Curiously enough this very case was used as a plot by another novelist only a year or two ago, and the scene of it, no doubt by misadventure, actuallay laid where it had occurred, in Edinburgh.

THE HEROISM OF SCIENTISTS.

A new name must be added to the list of the martyrs of science in that of Dr. John M. Byron, of New York, the celebrated bacteriologist who discovered the germ of leprosy, and who has been an assiduous investigator of the terrible diseases of yellow fever, cholera and consumption. His long vigils in the laboratory in search of the secret of the bacilli of tuberculosis have proved, indeed, to be his fatal sacrifice to humanity. The seal of inevitable death has been set upon his brow in the very fulness of life and ambition. From the tubes of infectious microbes, which served for his microbiological study and experiments, unsterilized bacilli have stolen unobserved into the atmosphere and poisoned him with the dread malady from which he has been seeking to rescue others. Dr. Byron has suddenly been awakened to the horrible realization that consumption has lodged in his own system, that both lungs have been undermined, and that death stares him in the face as a doom from which he cannot hope to escape.

Many martyrs of science have fallen before Dr. Byron in the silent battle with disease, unmarked by the world for which they were striving, and unwept by a public tear. One of the greatest masters of clinics who ever lived, Laennec, the inventor of the stethoscope, fell a victim to this same cruel consumption as the result of a surgical operation. Only a few years ago, Dr. Victor C. Vaughan, who has just announced the finding of a tuberculosis remedy called "nuclein," almost killed himself with an overdose of ice-cream poisoning during the experiments which led to the discovery of tyrotoxicon. In other fields of science the pioneers of truth have braved almost equal dangers. Nikola Tesla has several times received electric shocks that nearly resulted in death. Such pathetic cases as this of Dr. Byron serve to remind the not ungrateful public of the quiet heroism as well as infinite patience of the determined investigators of science.—*Phila. Record.*

—The great case of the Banque du Peuple v. Bryant, Powis & Bryant, has been amicably settled, each party paying its own costs, says a Quebec letter.

—The British Board of Trade returns for October show that during the month the imports increased £310,000, and the exports increased £970,000, as compared with those for the corresponding month of 1893.

The Next Division of Profits

Of the **Canada Life Assurance Company** TAKES PLACE AS AT

31st December, 1894.

Insure Now AND SECURE

Sun Life Assurance Co. of Canada . . . . . .

HEAD OFFICE—MONTREAL.

THE prosperous condition of the Sun Life of Canada is doubtless due to its fair treatment of policyholders, its unconditional policy and prompt payment of death claims.

NOTWITHSTANDING the financial depression of the year 1893 it was the most successful in the history of this progressive company. The New Business completed is greater than that secured by any other Canadian Company in one year, and must be gratifying to policyholders and directors alike.

Substantial increases have been made in **New Business, Total Business in Force, Income and Assets.**

DECISIONS IN COMMERCIAL LAW.

IN RE STEPHENS AND THE TOWNSHIP OF MOORE.—A township council has power under the Consolidated Municipal Act to maintain and repair a beneficial drain originally constructed out of general funds, at the expense of the local territory benefited, by passing a by-law to that effect, without a petition therefor, according to the Court of Queen's Bench

PEIRCE V. CANADA PERMANENT LOAN AND SAVINGS COMPANY.—After purchasing certain land under an agreement which provided that $2,000 of the purchase money was to be secured by mortgage, subsequent to a building loan not exceeding $12,000, the purchaser executed a building mortgage to a loan company for $11,500, which was at once registered, but only part of the $11,500 was then advanced. The plaintiff, who had succeeded to the rights of the vendor under the above agreement, then registered her mortgage for $2,000 and claimed priority over subsequent advances made by the loan company under their mortgage, but without actual notice of the plaintiff's mortgage or of the terms of agreement for the sale of the land. The Court of Chancery held that the further advances were made upon a mortgage providing for such advances, and to secure which the legal estate had been conveyed, and equity as well as law protected the first mortgage so advantageously placed as against the subsequent mortgage even though registered, where notice had not as a fact been communicated to the first mortgagee respecting the subsequent instrument. The Registry Act did not apply because the company claimed interest in the lands under a prior mortgage carrying the legal estate, and the fact that advances were made on the first mortgage was not contemplated or covered by that Act.

HENDERSON V. BANK OF MILTON.—The plaintiff, a clergyman, made a special deposit in the defendant's savings bank department, subject to fifteen days' notice of withdrawal, if required. He demanded his money; the defendants, however, refused to give it to him, because he had been ordered in certain litigation with them to pay certain costs, which, however, had not been taxed. The plaintiff brought his action, and the defendants paid a certain sum into court, which they contended represented the amount to the plaintiff's credit with interest. Street, J., decided that the plaintiff was entitled to judgment for the whole amount to his credit, as the defendants could not retain the money to recover costs which had not been taxed, but not being a trader, the plaintiff could recover no damages beyond interest on his money However as the amount paid into court was twenty cents less than the correct amount, the plaintiff was entitled to full costs of the action And also that as the defendants had not based their refusal to pay the money on the absence of fifteen days notice, which they had not required, they could not set up such absence of notice as a defence to the action.

DISHER V. CLARRIS.—Where by reason of the confidential relationship existing between the plaintiff, a female, and the defendant, and the influence he was able to exert over her by his asserting a knowledge of matters which could be used to her prejudice, and which at the trial he admitted had no existence, he was enabled to procure from her an excessive amount for services performed—and which was paid by her after she had obtained an independent advice she was by the Court of Common Pleas adjudged entitled to recover back the amount, less a reasonable sum for services performed

MACK V. MACK.—In an action brought by the widow of a deceased partner against the executors of her husband's co-partner, claiming an account of the partnership affairs, the administration of the estate of her deceased husband, and to set aside as obtained by fraud and misrepresentation a conveyance made by her to the co-partner of all her interest in her husband's estate, the Supreme Court of Nova Scotia held that seventeen years delay in bringing the action was, under the circumstances, no bar to the sheriff's right to recover, and the Supreme Court of Canada affirmed the judgment

SALTERIO V CITY OF LONDON FIRE ASSURANCE CO.—A policy of insurance issued by the defendants contained a condition as follows: "If, during this assurance, any change takes place in the title to or possession of the property described in the policy, or in the event of any change affecting the interest of the assured therein, whether by sale, legal process, judicial decree or conveyance of any kind, . . . then, and in every such case, this insurance shall be absolutely void unless the consent of the company in writing shall have been obtained and endorsed hereon?" Subsequently to the insurance a chattel mortgage was made by the insured covering the subject of insurance. The Supreme Court of Nova Scotia held that this instrument was a conveyance, and constituted a change affecting the interest of the insured within the meaning of the condition, and this judgment was affirmed by the Supreme Court of Canada

THERE IS SOME STYLE about a Brace end like this. It has an air of Durability and Perfection. The Drawer Supporter is an entirely new innovation that will hold like a bull-dog, not a tin-toy, It's a trade bringer to every store who handles it. DOMINION SUSPENDER COMPANY,

Mercantile Summary.

THE town of Moose Jaw has issued debentures for $5,000 and invites tenders for their purchase.

A COLD snap, during which the mercury reached the zero point, came upon the New Brunswickers last week. It stopped navigation for a time between St. John and Fredericton.

ALDERMAN CHARLES PARKS, of New York, was sentenced the other day by Judge Conover to pay a fine of $500 and costs and to be confined in the county jail for five months. His offence was running a gambling house in Asbury Park last summer. He has appealed.

A MANUFACTURING concern in London, the Dennis Wire and Iron Works, makers of wire goods and metal work, write to us: "We have recently received an enquiry for our metal bank railings from Guatemala, Central America, with a clipping enclosed of our advertisement which we had running in THE MONETARY TIMES."

THE report of the United States Bureau of Navigation shows a marked decline in the merchant marine of that country, there having been 118 vessels less at the close of the fiscal year than there were a year ago. Moral, says the Philadelphia *Record*: Overhaul the navigation laws, and give the commerce of the United States a living chance to whiten the seas.

Mercantile Summary.

NEWS comes from Sherbrooke that Mr. Jas. Kerr, for many years with the firm of Lucke & Mitchell, has purchased the stock of E. Boucher (hardware), and will continue the business in the store lately occupied by Mr. Boucher.

A NEW drug store has been opened in Summerside, P.E.I., by Manson & Macneill. Mr. Manson has had several years experience with Mr. J. A. Gourlie, Summerside, and also in Charlottetown and the west, while Mr. Macneill has for some years past had charge of the Kensington drug store.

SOME American parties have bought the Bocabec granite quarry, in Charlotte county, N.B., and have organized a Maine company with $25,000 capital to quarry and manufacture the granite. Samuel N. Maye, of Boston, is president. The polishing works will be erected in Boston.

THE shareholders of the Canada Coals and Railway Company, of Joggins, N.S., held their annual meeting last week in Montreal. The following board of directors was elected: Messrs. S. Finley, president; R. L. Gault; A. F. Gault, vice-president; S. H. Ewing, E. Hanson, E. W. Wilson and R. Wilson Smith. Mr. A. G. Watson was appointed secretary-treasurer.

Mercantile Summary.

THE St. John *Record* says that the South Shore Railway Company will probably put a line of steamers on between Yarmouth, Boston and New York next season.

WHAT is considered in England a great honor in the way of trade has just been conferred on the English firm which makes the Remington typewriters. They have received warrant of appointment as typewriter makers to H.R.H. the Prince of Wales. This, we understand, is an additional warrant to the one appointing them typewriter makers to H.B.M. the Queen, which they already held.

PARTICULARS are given in British Columbia newspapers of the cargo of the steamer "Miowera," which sailed a fortnight ago for Sydney, New South Wales. The vessel had a total cargo of 1,700 tons. The Victoria shipments includud 1,000 barrels of lime, 50,000 feet of rough lumber, 1,500 sacks of feed, a large quantity of beer, salmon and other miscellaneous freight, among which was a sample shipment of hay. Among the freight received at Vancouver were 150 tons of paper, 200 cases of whiskey, a carload of frozen salmon from New Westminster, and a large number of general shipments. Nearly all the cabin accommodation was taken up.

Special Notice to you who Sell Oysters in Bulk

This season we are giving away to every purchaser of 1,000 oyster pails a very handsome window display card with the words "Bulk Oysters for sale here," printed in gold leaf on heavy morocco board, size 19x12, or a handsome chromo lithographed in fifteen colors. The retailer will find it greatly to his advantage to use these cards as a notice to the passing public that he is in the oyster business.

We are offering this special inducement to obtain your trade, as our facilities are 60,000 per day, and every pail guaranteed uniform, perfectly liquid tight and second to none on the market. Our prices are as low as any. Send in a trial order for your pails and get one of these cards.

Mercantile Summary.

CAPT. DAVID MURRAY has gone into partnership in the coal business with Hiram Hyde, coal dealer, Truro, N S

WHAT is said to be the most dangerous counterfeit that has made its appearance in many years is an imitation of the Windom $2 silver certificate of the United States. The counterfeit is being circulated in the large cities principally

JEREMIE PERRAULT & Co., of Montreal, the old-established dry goods firm, whose suspension was reported several weeks ago, are before their creditors with an offer of 35 cents in the dollar, spread over twelve months, or 40 cents spread over eighteen months.——Gaudry & Leclaire, a young shoe firm lately reported failed in Montreal, are offering 50 cents

ROYER & LACHANCE, a Quebec dry goods concern, dating back only four or five months, have assigned. Mr Royer has, however, been in business before with an exceedingly poor record. He failed some few years ago, his estate paying less than 10 cents on the dollar, it is said. He resumed business in his wife's name, failing again last summer, when the above concern bought in the assets at 61 cents on the dollar

A GENERAL store firm at Becancour Que., M. Landry & Co., have made assignment of their estate. They are young, active men, who began business in the spring of 1893 with some fair amount of capital, but they apparently needed experience essential to success.——E. Chabot & Co., a small general store concern at St. Laurent, on the Island of Orleans, are reported as failed.——E. Collette was a farmer at Dewittville, who decided to try his fortune at hotel-keeping at St. Stanislas de Kotska a year or two ago. A meeting of his creditors is called for December 1st

A MEETING of the creditors of Rolland & Bro., wholesale furniture and cabinet-makers' supplies, Montreal, was held last week, at which they made an offer of 10 cents on the dollar. The offer was rejected, and the curator was authorized to make a searching investigation into the affairs of the estate. This failure is one of the worst on record, and it is understood that quite a few of the creditors favor the most summary proceedings. The firm claimed a very large surplus less than a year ago, and between the margin then claimed and the present showing of the estate there is $100,000 of a deficiency to be accounted for

It is reported that the Stanstead Granite Company has contracted to supply builders at Detroit, Mich., with $12,000 worth of their product.

Angus Kennedy, a farmer of Loch Ban, Cape Breton, N.S., who has also been keeping a small store for several years, has made an assignment.

Last July, James A. Caldwell, tailor, Nanaimo, B.C., made an assignment. He now arranges a settlement with creditors at 60 per cent., over a period of eighteen months.

Two years in the millinery business in Toronto, buying principally from one house, has proved to Miss R. Williamson that the struggle of business is a hard one. She has assigned.

The C.P.R. cement works at False Creek, Vancouver, are now making Portland cement under the management of H. J. Warsap, formerly of London, that is claimed will stand a breaking test of 400 pounds pressure.

On Tuesday last the real estate, buildings and stock of the well-known brass founding business of Chanteloup & Co., on Craig street, Montreal, was sold to Messrs David Yuile and James King for $80,000, which, however, does not include the Chenneville street property in rear.

London *Timber* says, with respect to the Liverpool firm of James Smith & Co., with whom a number of Eastern Canada houses have had dealings in timber, that no statement of their affairs has been made yet by Harmood, Banner & Sons, accountants, but the prospects of dividend are remote.

The stationery and book stock of Risser & Co., in Toronto, was bought by W. D. Taylor at 35 per cent.——Hugh Mitchell's general stock at Fergus realized 50 per cent., while 40 per cent. was made out of the hardware stock of T. G. Watson, at Paris.——The millinery stock of Mrs. Nixon, Teeswater, brought only 25 per cent.

In Winnipeg, M. B. Lee & Co., manufacturers of women's garments, have assigned.——An offer of compromise at 60 per cent. is made by M. & D. Livingstone, Yorkton, N.W.T. This firm, it may be remembered, assigned some weeks ago.——In 1893, Dayton & Brydon opened a general store at Hilton, Manitoba, having a capital of $2,000. When taking stock six months ago they claimed a surplus of $4,000. It is evident that if this surplus ever existed it is now much diminished, for they have assigned.

The city of Winnipeg asks for tenders for the supply and operation of gas works or gas and electric light works. Applicants are to state the price for each kind of light, the length of franchise wanted and the extent to which the city shall share in the revenue.

T. H. Hall, a bookseller of some 30 years' standing in St. John, New Brunswick, has made an assignment to C. D. Trueman and Walter Hall. He has made preferences of some $4,500. Totol liabilities are estimated at about $15,000, and assets at $8,000 or $10,000.——M. S. Hall, in the same line at Fredericton, N.B., is also reported to have failed with liabilities of about $9,000, and assets not more than half this sum.

The Canada Plating Company, an ordinary partnership composed of Messrs. Gray and Baleson, of Montreal, is reported in embarrassed shape and about going into liquidation. They owe but little.——A Montreal plumber named C. G. Brodeur has assigned on demand, with an indebtedness of $5,800. He was in trouble last spring, owing to a heavy loss made by the failure of G. Bishop, and made a compromise at that date.

An extension of time is asked by Lesser & Sprague, painters, etc., Windsor.——Charles Conway, a youth at Norwood, succeeded to the grocery business of his mother, who died in June last, and has offered creditors 50 per cent. on their claims against her. This not being accepted, an assignment has been made.——In the autumn of 1890, R. Mercer opened a jewellery store at Seaforth with but little capital, but not making the progress he hoped, is now obliged to assign.

A group of Montreal happenings is sent us, as under: The Montreal carpet dealer, reported as suspended a week or two ago, A. L. C. Merrill, has now made an assignment, and his statement shows liabilities of $14,858. A meeting of creditors is called for Dec. 3rd.——The Imperial Waterproof Paper Co., a concern engaged in making waterproof paper for packing purposes in a small way, has not been able to make a success of the business, and a composition at the rate of 25 cents cash is proposed.——J. S. Mayo, a jobber in lubricating oils, is reported embarrassed, and a demand of assignment has been served upon him.——The creditors of R. G. Gaucher, hardware dealer, whose assignment we lately noted, had a meeting a few days ago, at which he made an offer of 35 per cent., but creditors want 50. The liabilities foot up $20,021, with assets of $13,579.

In view of the evidence that is coming out about Toronto aldermen who take money for betraying the interests of citizens, our subscribers will find profitable reading in the New York story of "A Victory and a Banquet" on page 718 of this issue, especially Mayor Strong's remarks.

The manager of the Union Bank at Smith's Falls is to be congratulated on the cozy quarters of his branch in the building on Maine street into which they have just moved. The main office is large and well lighted and fitted. Its oak fitting was done by the Canadian School & Office Furniture Co., making a cheerful interior. Mr. J. H. Henderson has a comfortable room in front of the public office.

W. F. Beck, a Montreal crockery dealer, has made an assignment. This is no new experience for Mr. B. He failed before in 1885, and resumed business in the name of his wife, who failed in 1893. Mr. Beck then opened up shop again in his own name, his old liabilities having lapsed, and this time made a very brief run It is altogether likely, however, that some will be found ready enough to start him again with a fresh stock, should he try his luck yet again.

A very brief business career has been that of A. Davignon, grocer, Montreal. He is a young man, just about of age, who inherited some $15,000 to $20,000 of real estate from his mother, and thinking he would like to engage in business, he bought last spring the grocery business of L. Paquette & Co. for $4,800. He found store-keeping slow, however, and was disposed rather to search for pleasure. Rumor has it that he has been lavishing his time and money upon actresses of L'Opera Francaise. He is now reported an absentee, and a petition has been made to the court to fix a date for a meeting of his creditors.

Assignee Clarkson is now sending to the three hundred creditors of the estate of L. Becker & Co., private bankers at Waterford, their first dividend of 25 per cent. on claims amounting to over $70,000. About six months from now he hopes to be able to pay ten or fifteen per cent. additional. Should he be able to do so it will be more than was at one time expected out of such a wretched failure. No doubt the company traded for a considerable time on the good name of its senior member, and had it not been for the manipulations of its funds by L. H. Slaght, the manager, and his defalcation, the many innocent creditors would not have been victimized as they were. However, they should not entirely escape

punishment for their folly. So long as people are willing to deposit their money anywhere they happen to see a banking office, without investigating its character, they need not expect much sympathy. It is difficult for parliament to enact laws to protect people who appear so indifferent to their own interests as not to exercise even ordinary prudence.

THE firm of C. A. Dumaresq & Co., dealers in bankrupt dry goods stocks, Montreal, are reported embarrassed, and an accountant is engaged in preparing a balance sheet, but their affairs are reported to be so much mixed up that it is difficult to establish their real position. As near as can be gleaned, they owe some $15,000, while the available assets are likely to be very much less. Mr. Dumaresq was unfortunate in business several years ago, and has recently been doing business in his wife's name. It should be stated that this is an altogether different concern from "The Dumaresq Company."

IRA POWELL, implement agent and farmer, finds himself in a bad position financially. He owns two Ontario farms, both of which are mortgaged, and when one of them was offered for sale the other day, no person was found willing to pay the amount against the property. ——In 1888, R. Hutchinson moved from Enniskillen to Listowel, where he opened out his general stock. Two years later his son was admitted a partner, but he became tired of the business and left the firm. Evidently the senior was a poor buyer, and he sold on credit. These two elements of loss brought about his assignment.

BEING unable to arrange a compromise with creditors, Kent Whipple, brass founder, Hamilton, has assigned, owing $2,600.——An assignment has also been made by Fitch & Co., general storekeepers at Kingsville. They gave a bill of sale some years ago and now there does not appear to be anything for general creditors.——Edwin Sims, insurance and real estate agent, Brantford, who claimed to be worth about $10,000, has made an assignment Quite a number of farmers and others are considerably interested in his estate and will receive only a small if any dividend.——Having dealt in furniture about five years at Parry Sound, Alex. Logan has assigned. In April, 1892, his creditors granted him an extension of time. Then he claimed a surplus of $1,000. ——The business of J. C. Dixon & Bros., worsted manufacturers in Dundas, has been suspended for a week. A meeting of creditors will be called in a few days. In the meantime a bailiff is in possession on behalf of the mortgagees.——Jos. McLelland, jeweller at Peterboro, who was at one time quite wealthy and retired from business, unfortunately felt or imagined the necessity of again opening a shop. Already he makes an assignment.——Some time ago we noted that McEwen & Co., clothiers at Sudbury, were financially embarrassed, Since then their creditors had a meeting, and now the firm assigns.——Nap. Laurandeau, boot and shoe dealer at Midland for a number of years, had a fair record, but unfortunately he was burnt out, and now he writes his creditors that he is unable to pay his bills.

THE city of Kingston, says our Mr. Oliver in his last letter, continues to improve, and is made still more attractive by many fine buildings recently erected. The Y.M.C.A. building on Princess street is one of the finest of the kind in the province. A little lower down is the Odd Fellows' Hall, another fine structure The first floor is occupied by the Kingston Business College, of which Mr. J. S. McKay is principal. On the same street or adjoining it are the commodious stores of the old established firms Macnee & Minnes, Murray & Taylor, and the fine new building of Richmond & Co. This is a brick structure 42 x 128 feet, three storeys high. The front of massive grey stone with carved columns. The interior is fitted in hard wood, finished in oil, and is suitably divided into various dry goods departments. The Bank of Montreal and the Merchants Bank possess very substantial office buildings, and that of the Bank of B. N. A. commands a fine view of bay and harbor. The branch of the Ontario Bank will be moved into its handsome new premises on 1st prox. This creditable building, erected by the Anglican synod of the Diocese of Ontario, has one of the best sites in the city. The interior is now being fitted up in polished oak and ash and will have all the modern improvements. Mr. A. J. Macdonell is the manager of this branch. Another fine building, adjoining the old established firm of R. H. Toye, will be the new offices of the Kingston *Whig*.

MAILING CASES

We beg to notify the trade that we have been appointed sole agents in Canada for the United States Mailing Case Co. and the Boston Mailing Case Co. These two companies control all the mailing case patents. By the use of these cases you can send samples of liquids through the mail. Circulars giving full particulars sent on application.

TORONTO, FRIDAY, NOVEMBER 30, 1894.

THE SITUATION.

A proposal has been made by the American Government to that of Great Britain to close Behring Sea against sealers for a whole year. What are the grounds of this demand? A strong case would have to be made to justify acceptance of the proposal. Canada is almost as much interested as the United States in the preservation of seal life, though the breeding islands are within the limits of the latter country. To anything really necessary for the preservation of these animals, it is Canada's interest to consent. But that it is necessary to prevent the taking of seals in Behring Sea for a year has yet to be shown. The Americans, on their part, are willing that the inhibition should apply to the Pribylov islands, as well as to the water. While they wish to tie the hands of Canadians, they are willing to tie their own. This would be all right and proper, if a real necessity for extending the close season during a whole year existed. We heard much about the diminution of seals at and before the Paris exhibition: but the fact that British Columbia sealers took no less than 95,000 skins this year, under the new restrictions, negatives the assertion. Nor can it be seriously contended that the catch of this year has had the effect of materially lessening the number of brood seals, or that seal life is in danger of ruinous diminution, much less of extinction? Are we to understand that the proposal to let the seals increase for a whole year, during which none are to be caught, is intended to meet some special emergency, or that a recurrence of the inhibition might become necessary from time to time? That no such emergency exists, the seal catch of British Columbia this year sufficiently shows. Is the Paris arbitration a failure? Has it left the sealing question still unsettled, or at least liable to be re-opened, as at present, at intervals of which no one can count the duration?

A deputation of authors and publishers has waited on the Marquis of Ripon, Colonial Secretary, to protest against the unlimited right assumed by the Parliament of Canada to legislate on the question of copyright. The Marquis assured them that the views they had expressed would receive careful consideration. There are people who fancy that this question can be settled by simply asking whether Canada is not a part of the British empire. The proper answer is that Canada is a self-governing province of the empire. Does it follow, as a matter of course, that a British copyright should have the same force in Canada that it has in England? Take the analogous case of patents of invention. An English patent does not run in Canada: if the owner of that patent wishes to secure this market, he must take out a patent under our laws. On what principle, can the British author claim differential treatment in his favor? We have seen no attempt to answer this question. Whether the British North American Act gives an absolute right to Canada to legislate on copyright, or only a limited right, is a mere question of construction under that instrument. The whole history of the development of colonial liberties teaches us that in this contest Canada must win. We cannot be bound by the Berne convention, to which we never assented. The principle that we are not bound to accept commercial conventions, entered into by Great Britain, if we think they are not for our benefit, is admitted by the British authorities, and this is decisive of the question. In cases of this kind, political considerations override the commercial; plenty of people who have no sympathy with the interested parties in Canada who are calling out against the Berne convention, willingly join in the demand for complete liberty for Canada to legislate on every phase of the copyright question.

In England, Mr. Howard Vincent keeps hammering away at the two treaties which prevent the colonies making preferential arrangements with the mother country. He induced a meeting of the National Union of the Conservative and Constitutional Association, held at Newcastle, to resolve that these clauses ought to be removed from the treaties. Of course nobody likes to be inhibited in any direction; but the inhibition in this case is a barrier against restrictions in other directions. The treaties contain an inhibition against an exclusive arrangement which, so far as it went, would be in the nature of a monopoly. Preference between the colonies and the mother countries would burthen the trade of both with foreign countries in a way that must tend to its reduction by diminishing the consumption of foreign produce. When Great Britain makes a commercial treaty with a foreign State, she wisely forbears to give anything to the treaty nation which she does not give to other countries that rank among "the most favored nations." In this way she has built up her enormous trade. To attain this world wide trade she renounced her monopoly of colonial commerce, which was formerly one of mutual restrictions. She is now asked to go back to a monopoly which would leave her in possession of a narrower trade than her policy of treating all countries alike has given her. The colonies might welcome the removal of the inhibition contained in the treaties complained of by Mr. Vincent, but that the change sought for, as a consequence of this reform of the treaties, would be accepted by Great Britain, or that, if accepted, it would be for the best interests of the colonies and the mother country, is extremely doubtful.

At a meeting of the Executive Board of the Deep Waterways Association, held in Chicago, Mr. Flower, of Wisconsin, pointed out the difficulty of a country whose wheat fields are from 1,200 to 2,000 miles from the sea, and whose waters are ice-bound half the year, competing with countries whose wheat fields are near the ocean. Before the era of railways, no wheat could be exported unless it was grown near the sea coast, and in the state of cultivation then prevailing, the belief was current that England could never obtain food from other countries to sustain a population greatly in excess of what her own soil could feed. It was thought that the surplus of the colonies and foreign countries, which was within practicable distance of navigable

rivers and the ocean, would not be of great amount. The introduction of railways altered this condition, which indeed had been slightly changed by canals; and the steel rail in turn lessened the cost of carriage. But railroad competition with great water routes is still impossible. Our great water ways have not been made the most of, and it is not at all certain that the deepening of our canals to 20 feet would give us a much larger share of the trade which is now done in or through the United States.

That success would attend the United States gold loan of $50,000,000 was a foregone conclusion. The bids are over three times the amount required; and yet, owing to the method of reaching the market, it cannot be called a popular loan, in the sense that a vast number of small investors, as with French loans, deal directly with the treasury. A combination of bankers in New York, Boston, Philadelphia, Chicago and San Francisco, put themselves in a position in which they thought they might, to a certain extent, dictate to the Government. This they did by making the condition that the whole loan or none of it must be awarded to them. The proper thing for the Government to do would have been to make invariable conditions on which bids would be received, and above everything it should have left itself at liberty to select the best bids in whatever amounts, and refuse all that did not comply with the conditions set. The banks, which have for a long time been manœuvring to draw gold from the Government, are willing to lend a portion of it back to the treasury, if they can make two per cent. by the operation. The *Journal of Commerce and Commercial Bulletin* attributes the embarrassment of the National Treasury to the fact that "the banks have virtually suspended specie payments," a process which began, on a small scale, in 1892, and has continued since. The result is that the Government has received only $20,000,000 in gold for dues, where it should have received $360,000,000. The proceeds of the present loan will soon be frittered away, the *Journal* believes, and it adds "if the banks continue their suspension, a like suspension by the Treasury is absolutely inevitable," so-called. A refusal to pay out gold to importers otherwise than in exchange for bank notes, is not a suspension of specie payment. The old question, whether the Government dues should be paid in anything but specie, may be again revived, and the present attitude of the banks may possibly strengthen the cause of the advocates of the silver fallacy. The trouble is an old one, which pressed heavily on the treasury under Van Buren's administration: the Government is not paid in a currency in which it is itself obliged to pay.

THE BANK STATEMENT.

We give below a condensation of the figures of the statement of Canadian banks for the month of October, which bears date Ottawa, 20th November. It is compared with the bank statement for the previous month, and shows capital, reserve, assets and liabilities, average holdings of specie and Dominion notes, &c. We published last week the full statement.

CANADIAN BANK STATEMENT.

LIABILITIES.	October, 1894.	Sept., 1894.
Capital authorized	$ 75,458,685	$ 75,458,685
Capital paid up	62,207,685	62,198,676
Reserve Funds	27,261,749	27,260,835
Notes in circulation	34,516,651	33,355,156
Dominion and Provincial Government deposits	4,664,442	5,615,836
Public deposits on demand	67,950,583	66,584,661
Public deposits after notice	111,885,357	111,084,063
Bank loans or deposits from other banks secured	62,645	69,603
Bank loans or deposits from other banks unsecured	2,825,031	2,654,975
Due other banks in Canada in daily balances	167,984	136,400
Due other banks in foreign countries	118,887	116,267
Due other banks in Great Britain	4,502,018	4,268,502
Other liabilities	218,628	176,700
Total liabilities	$226,912,318	$224,062,249
ASSETS.		
Specie	$ 7,845,946	$ 7,884,650
Dominion notes	15,672,011	15,682,340
Deposits to secure note circulation	1,821,271	1,823,151
Notes and cheques of other banks	7,285,166	6,469,658
Loans to other banks secured	66,661	215,072
Deposits made with other banks	4,112,540	3,807,355
Due from other banks in foreign countries	22,604,212	21,440,033
Due from other banks in Great Britain	4,216,625	3,909,120
Dominion Government debentures or stock	3,110,349	3,110,349
Other securities	18,240,485	18,794,991
Call loans on bonds and stock	16,955,122	16,207,333
	$101,930,388	$ 99,344,052
Loans to Dominion and Provincial Governments	562,166	439,357
Current loans and discounts	198,888,480	199,773,925
Due from other banks in Canada in daily exchanges	180,819	139,416
Overdue debts	3,363,376	3,325,559
Real estate	940,941	944,935
Mortgages on real estate sold	621,350	615,258
Bank premises	5,478,259	5,471,667
Other assets	1,796,240	1,636,627
Total assets	$313,762,224	$311,691,002
Average amount of specie held during the month	7,830,330	7,878,818
Average Dominion notes held during the month	15,508,194	15,648,386
Greatest amount notes in circulation during month	35,546,324	33,798,375
Loans to directors or their firms	8,045,951	8,065,752

Now that navigation is about closing, which brings to an end a large portion of the export business of the country across the Atlantic, we can look round and estimate the position, and consider what the progress of events has left us.

In many respects it is not a very cheerful outlook, for though the volume of business has been large, and in some lines very large, the profit has been miserably small, or nothing at all. This, at any rate, is certain, so far as the exports of the products of the farm are concerned, in which, by the way, ought to be included animals and their products in our Government returns of exports. For it is absurd, when we are considering what is sold year by year from the farms of Canada, to exclude the surplus cattle, sheep and horses that are fed thereon, as well as the dairy products that arise from the cattle. This, however, by the way. It is certainly to be lamented that of the tens of thousands of animals that have been spared from our farms, so little profit has been left to those who have taken the risk of buying and shipping them, and that in many cases it has been nothing but a steady course of loss after loss.

Men may cry out, in their ignorance, as they please against middlemen, but it is an unquestionable fact that the farmers of Canada have saved millions of dollars by selling to middlemen of one description and another. These men, for all they are so abused, have taken the risk of buying the farmers' grain and cattle, year after year; have gone through all the labor (and enormous labor it is) of storing and shipping and selling across the Atlantic, and have in a majority of cases come out with less than nothing for their pains. In not a few instances they have beggared themselves and their families.

In other cases where matters have not turned out as badly as this, the middlemen have had their labor for their pains, and find themselves poorer, rather than better off, after buying from the farmers hundreds of thousands of dollars worth of what the farm produces.

Bankers know these things only too well, for many a

bad debt on their books has arisen from the state of affairs above described. Yet, the country as a whole has been benefited. Farmers have had a far better price than they otherwise would have obtained, and through them the benefits have been spread abroad to all sections of the community.

The exports of cheese have been again very large, and the price to the farmer during the whole of the season has been most remunerative. But the merchants have not done well out of it, and most of their labor has been at a loss.

Butter drags along just as it has done for many years, in spite of the fact that there is a market in England for ten times, or twenty times as much as we now send there, and this is a market in the highest degree remunerative. A good article always fetches a good price there. But then the article must be *really* good. In fact, such butter as is very commonly used in Canada could not be sold in England at all.

There is no possible reason why Canadian farmers should not make as good butter as English farmers, or as the farmers of Denmark. Surely what a Dane can do under less favorable circumstances, a Canadian can do if he would only make up his mind to try. Be this as it may, it is certain that Denmark both can and does make butter of such a quality that England is glad to buy it in immensely greater volume than she buys from Canada, and she pays a better price for it too. It is all purely a matter of business. There is no sentiment about it. No matter where the butter comes from, if it is such as English people want, English merchants will buy it. If it is not, they won't.

The export of timber and deals has had a better return; and the year, on the whole, has been favorable enough. The market has brightened up considerably on the other side, dull as times have been, and shippers of timber have done a satisfactory business on the whole.

But the various branches of the import trade are rather under a cloud, and dry goods merchants especially have good reasons to complain. It is a trade of infinite detail and labor, and infinite anxiety about the credit given to customers. Yet there are few houses in this line that have made any substantial progress during the last few years. What with increasing expenses and decreasing profits, and what with a constant succession of small failures, and occasionally of large ones, the lot of a merchant in dry goods for some time has not been an enviable one. Still, it may be conceded that matters might be worse. If a man makes a decent living out of his business, even though he adds nothing to his capital, he cannot say that times are very bad. It is when capital itself melts away, and becomes more or less impaired; it is when the savings of former years are absolutely dissipated by losses on goods or losses by bad debts, that the real pressure of mercantile business is felt. No doubt our credit system is sadly at fault here, and the training—or lack of training—of our men of business is sadly at fault also.

It was said recently by a dry goods merchant who thoroughly understands the position, both on this side of the Atlantic and the other, that in England ninety per cent. of the retailers succeed, while in Canada ninety per cent. of them fail. He was contrasting the training on both sides the Atlantic respectively, and also the business methods prevailing. And that was the result, very broadly stated, and possibly a good deal exaggerated, but sufficiently near the truth to convey a great lesson.

In other lines of importing competition is just as keen, expenses just as disproportionate to profits, but probably the average of failures is less, and credit is much more reasonably given.

Manufacturers, most of them, complain also, and times are not good with them certainly. Again, it may be said that the times are not bad, for most of them have made some profit, and have declared dividends, which, if not as much as usual, are not to be complained of.

The financial position is one of considerable ease. Yet such times as these are often followed by a sharp reaction in an opposite direction. The deposits of the banks are constantly increasing, partly because of the increasing difficulty of finding good investments. From $173,000,000 last year they have risen to $187,000,000 this year. These are of course bank deposits alone, and show a constant increase in the savings of the community.

The total deposits of all kinds amount now to $262,000,000, against $248,000,000 last year. It is apparent that the whole of the increase has gone into the chartered banks. In connection with these accumulations the interest paid by the Government to depositors is a matter of primary consideration. It is evident that the Government is losing money by its deposits, for while it can borrow money at only a very trifling fraction over three per cent. in England, it pays three and a half per cent. in Canada, besides incurring the heavy cost of a staff sufficient to keep the tens of thousands of accounts constituting the total.

This matter the Government might seriously consider, and should do.

The United States loan of $50,000,000 has been a most peculiar one. What was wanted was not so much money as gold coin, and this with a prodigious stock of silver in its vaults, which is held in the national accounts at vastly more than its value in the market. Of course the loan was subscribed for. The banks which have been holding such masses of gold in an idle shape are only too glad to have it turned into a three per cent. investment.

But it is surely matter for congratulation that Canada can borrow money now almost on as good terms as her great neighbor. And, moreover, that in considering a future currency system the methods of Canada are being looked up to as a model.

We append our usual comparative statement, the figures of which will well repay attention.

ABSTRACT OF BANK RETURNS

31st October, 1893. In thousands

OVERPRODUCTION AND ITS CAUSES.

That the problem of overproduction in manufactures and how best to rectify it, is agitating industrial circles on both sides of the Atlantic, is well known. Many and various are the opinions entertained of the proper solution of the question. Many and various, too, are the views held as to the causes of overproduction. On the latter point a striking, not to say novel, deliverance was made last month by the president of an important body in Britain. This was Mr. John Inglis, who delivered his annual address to the Scottish Institution of Engineers and Shipbuilders. Mr. Inglis quoted the saying of a prominent director of a steamship line, in this connection, to the effect that "the engineer has got the better of the man of business," the meaning which we take therefrom being that the ingenuity which has improved machinery for the cheap and rapid production of manufactured goods, has outstripped the ability and enterprise of the merchant who distributes those goods. If this be true, generally, he adds, it should form food for very serious reflection on the part of those who hope to earn a living by continuing to furnish labor-saving appliances. And certainly he does not consider the question of overproduction easy of settlement.

Setting aside the notions advanced by different people that mono-metallism and the labor disturbances are causes of overproduction, he is disposed to attribute it to excessive credit and the foolish ease with which people launch into some new process of manufacture without sufficiently considering if there be room for it. What he says is: "The truth of the matter I believe to be that the condition of things which we agree to call overproduction or depression of trade, is not primarily due to machinery, but in a great measure to the reckless borrowing by impecunious states, communities and associations, encouraged by the imprudence of financiers, and the credulity of the public as to the powers of governments and other debtors to fulfil their obligations. The abnormal and unwarranted demand for goods from those put in easy possession of borrowed funds, is rapidly met by the setting in motion of modern machinery —itself partly brought into existence by the necessity temporarily created. High prices become the rule, until the inevitable glut takes place, when there follows the revulsion to prices which are unremunerative." As to the decline in values of commodities in recent years, he admits that it is perhaps increased in rapidity by the development of machinery, but contends that the unwholesome stimulus to overproduction is not immediately traceable to mechanical appliances.

As Mr. Inglis puts it, the introduction of labor-saving machinery has a tendency year by year to release a growing proportion of working men and women from manual labor and to give them chance to follow other pursuits. And he says this serves to raise the general level of comfort among the people. Mr. Inglis is an engineer, and he is praising machinery; in this respect he is of course disposed to "magnify his office" or his guild. It is undeniable that labor-saving devices must lessen manual labor. What else are they for? But it does not therefore follow that the other and higher pursuits can easily be found to take the place of those abandoned. We are not sure that the census figures he quotes serve to confirm the view that displaced mill hands drift into better occupations. Rather, we fear, do they drift into idleness. While the proportion of labor in textile works has declined greatly, so has the proportion of agricultural hands, indicating that those supplanted in town mills have not gone to the country.

But to come back to his text, the remark of the steamship man, is it true that the engineer, as a producer, has beaten the merchant as a distributor of goods? And is it the fault of the merchant that he does not find markets for them? If the prevailing overproduction were confined to Britain, and the British merchants alone were behind in the race as furnishers of the world's markets, we might see a partial chance for the leeway in distributing to be made up. But inasmuch as the overproduction exists in every country, new nations must be found on the earth's surface, or the world's nations we already know must somehow be compelled to become larger consumers before we can hope for relief from the present overproduction.

SHOULD MILLS RETAIL?

A correspondent in the East asks us to answer this question on its merits, and also wishes to know what the custom of mills in the West is in this regard. In reply we say at once that if a manufacturer hopes and expects to sell his goods to the wholesale dealer, he should not attempt to do the wholesaler's business, which is that of selling to the retail trade. It is bad policy, and considered bad faith for a wholesale dealer to sell his goods to private parties, because in so doing he precludes the retail dealer—possibly his own customer—from doing just so much trade. Just as much is it bad policy for a mill to go past the storekeeper and sell direct to the storekeeper's customer, the retail buyer. The mill man in question should remember that if it were not for the storekeeper he could not keep his mill going. All the retail trade he could do round his mill would not pay for his factory fuel and light. It is certainly not the custom of mills in the West to sell their product to the retailer. They prefer to consider the reasonable rights of the merchant

MUNICIPAL ACCOUNTS.

There is a certain appropriateness in the discussion by the Institute of Chartered Accountants of municipal accounts and audits, on which subject Mr. A. C. Neff read a paper before that body on Monday night last. The speaker did not go too far in saying that in a number of Canadian municipalities the bookkeeping and finances are in a condition of tangle; that many treasurers and auditors are lacking in proper experience of business or accounts, and that municipalities are often too niggardly to spend an adequate sum to have their bookkeeping and accounting rightly done. No better proof is needed than the annual report of the Ontario Bureau of Industries, from which we quoted freely in August last. Here are five or six samples of replies made by township or other clerks and treasurers in this intelligent Province of Ontario. Our readers may judge what sort of business capacity they disclose:

"I cannot state the number of debentures or the amount of each."

"We have no means of ascertaining the amount of personalty or income for 1890 or any other year."

"This municipality (East Toronto) was organized in 1888, but no financial statement could be procured from its officials until November, 1893."

Regarding a discrepancy of $1,000 in temporary loan account, a treasurer says: "I know that the money was borrowed, and the debt is paid. I must be $1,000 out of pocket."

Yet another instance: "I regret that I am unable to give a satisfactory explanation of the errors that appear in loans. Since 1888 the reeve has been changed five times [this was written in 1892 or 1893] and the treasurer thrice; and each incoming set of officials appear to have misunderstood or mixed the statements of their predecessors."

If all municipalities were in such shape as the ones cited above, the Treasury Department of Ontario would have a nice time keeping track of them, to say nothing of the brokers who deal in their debentures or the companies or private capitalists who lend to them.

THE QUEBEC GOVERNMENT.

A reduction of something near half a million dollars has been effected in the expenditure of the Province of Quebec this year as compared with last, a welcome feature, no doubt. In the matter of the interest charge reduction had been put out of the question, and to railway subsidies the province was already committed, to a sum in excess of the former year. In nearly every other direction, however, a reduction has been made, agriculture being a proper enough exception, for development in that direction is popular now, and is needed. The total expenditure under all heads is $5,526,056, while the total revenue is $4,820,-427. This leaves a gap of $1,205,629, provided it be not possible to change some of those items of current expenditure to capital account. Why, for instance, should not permanent outlays for public buildings go to capital, and why not treat railway subsidies as capital expenditure? Take away these and the gap is but slight. The item of special expenditure is not made clear.

Revenue in the preceding year amounted to the sum of $8,494,117, while this year it is $4,820,427, an increase of $826,000. The following are the principal items of revenue for 1894:

Subsidy	$1,278,376
Crown lands	905,163
Justice	264,414
Licenses	636,052
Commercial corporations	142,854
Real estate transfers	246,867
Trading licenses	106,482
Succession tax	149,823
Interest	369,622
Miscellaneous	211,768
Total	$4,820,427

The miscellaneous items include $49,762 from railways, trust funds $10,000, and a small sum—$15,000—from direct taxes. The new taxes of the present year are these direct ones mentioned, real estate transfers, trading licenses and the succession tax. As to expenditure the principal items were as follows:

Interest	$1,437,932
Legislation	207,676
Civil government	256,725
Justice	459,523
Reformatories	60,912
Education	371,700
Agriculture	159,017
Public works	101,037
Charities	325,082
Crown lands	186,188
Miscellaneous	318,456
Special expenditure	390,955
Trust funds	263,199
Railway subsidies	975,515
Total	$5,526,056

The total of $5,526,056 shows satisfactorily against the $5,987,730 of the previous twelve months. In the item "miscellaneous" is included $70,000 for colonization, $4,680 for immigration, $15,726 for police, $9,000 for arts and manufactures, $8,892 for inspection.

ONTARIO'S CROP RETURNS.

Among the interesting features of the most recent bulletin issued by the Ontario Government respecting farm industries are these: There has been an advance in underdraining among the farmers of the province, though most of the work is done by hand, little confidence being felt in ditching machines. The old zig-zag rail fences are giving way to some sort of straight railing or wire—and surely it was high time. Numbers of old-fashioned, ill-contrived barns have been, and are being, replaced by new, or else are raised and stone stables built underneath. This is a welcome sign, for is it not a proverb that the thrifty farmer is known rather by large and well-appointed barns and a modest dwelling, than the reverse. The dairy question, fruit culture, and the raising of cattle and hogs, are receiving the attention of many farmers who see that exclusive grain-raising can no longer be successfully carried on. The visits of the travelling dairy are therefore welcomed in various districts, and farmers as well as their wives are learning what to do and what *not to do* to produce good butter. There has been, as was to be expected, a great falling off in the milk flow in several counties in Western Ontario, owing to the midsummer drouth. But still the returns from that half of the province are encouraging, while the reports from the dairy counties along the St. Lawrence are even more satisfactory. It is very pleasing to hear that a most decided improvement is reported in the quality of butter, most of which article has been disposed of at a paying price.

At the dates when most of the correspondents of the Bureau of Industries wrote, say, 5th to 10th November, an immense number of hogs had been sold, being disposed of chiefly on foot. Outside of the St. Lawrence counties there has been no great increase in the number of silos, but all over the province there has been a wider area of corn raised for cattle feeding. The question of ensilage is now a practical one, to a greater degree perhaps in Eastern Ontario and the Eastern Townships of Quebec than west of Lake Ontario. It is significant that the Bureau has made a separate entry for "corn (green) for silo and fodder," of which over a million tons per annum are being raised, quite apart from the millions of bushels of Indian corn for husking.

Lugubrious complaints are everywhere heard, of course, about the low price of barley and wheat, the marketing of which goes on slowly and reluctantly for that among other reasons. There has been this year an immense quantity of both wheat and barley fed to live stock, more especially to hogs. What a wrench it must have proved to the average farmer to make hog-feed of his wheat. What an unheard of thing!

The Bulletin reports much divergence of opinion as to the utility of poultry-raising as one of the duties of the farm. It is admitted by some, however, that the destruction of insects by fowl is of great benefit to agriculture, and that they can be fed largely upon scraps and poor grain that otherwise would be wasted. Other considerations are that the product of the hennery pays the grocery bill, and that poultry also gives a much-needed variety to the home table.

Ontario fruit-growers are becoming more alert to the importance of both preventive and remedial methods in their orchards or vineyards. Paris green, kerosene oil and other cures for pests are being used more regularly. Apples and pears have shown a fairly good yield, but great quantities of apples were blown down before ripening. The black knot has troubled both plums and cherries, but the peach crop was large and on the whole satisfactory. References to grapes are less than usual, but vineyards appear to be in good condition.

AREA AND YIELD OF CROPS.

The following table gives the produce of the principal field crops of Ontario for 1893 and 1894, with the average per acre :—

Field crops	Years.	Bushels.	Yield per acre.
Fall wheat	1894	16,512,106	21.2
"	1893	17,545,248	19.2
Spring wheat	1894	3,367,854	14.6
"	1893	4,186,063	11.7
Barley	1894	10,980,404	22.6
"	1893	9,806,088	21.0
Oats	1894	69,867,716	30.0
"	1893	58,584,529	30.3
Rye	1894	1,386,606	15.4
"	1893	994,771	14.5
Peas	1894	14,022,888	17.9
"	1893	14,168,955	19.2
Buckwheat	1894	2,584,335	17.4
"	1893	2,380,456	17.8
Beans	1894	827,514	14.0
"	1893	664,310	13.6
Potatoes	1894	17,163,130	102.6
"	1893	12,911,212	90.5
Mangel-wurzels	1894	11,582,127	417.
"	1893	8,582,568	399.
Carrots	1894	3,716,140	332.
"	1893	2,971,450	320.
Turnips	1894	61,694,487	418.
"	1893	56,975,355	417.
Corn, for husking (in the ear)	1894	16,275,352	60.9
" " "	1893	14,072,961	64.8
		Tons.	
Corn, for silo and fodder (green)	1894	1,049,765	9.43
" " " "	1893	1,049,524	10.95
Hay and clover	1894	3,575,200	1.30
" "	1893	4,963,557	1.79

As to acreage of fall wheat sown this year, very few of the Bureau's correspondents report any increase; the usual report is a decrease, which ranges from 5 to 50 per cent. The quality of the 1893 fall grain was generally good. Spring wheat proved light of weight, though of fair color. Peas were injured by bugs, and oats of but middling quality. Rye first rate. Flax a good crop. Hops under the average. Red clover suffered from winter-killing, and the crop is therefore short. Alsike proved very good. Owing to the drought the potato crop is under average, and the tubers are small, but not much attacked by rot. Of the root crops turnips have suffered much, and mangels to a less degree from drought. Carrots were dwarfed somewhat from the same cause, but September rains helped them.

MR. GRINDLEY'S RESIGNATION.

The resignation of Mr. R. R. Grindley of the position of general manager of the Bank of British North America has at last been accepted by the directors of that bank. As long ago as 1892 Mr. Grindley desired to be relieved, but the directors prevailed on him to continue in harness until the close of this year. After so long a service as forty years in the bank, seventeen of them as general manager, he is entitled to some respite from labor. That he has fulfilled the duties of his position with sagacity, firmness, and marked success, is well known to Canadian business men, to whom, and especially to the citizens of Montreal, he has commended himself, through public spirit added to cordiality of manner. The court of directors of the bank evidently appreciated Mr. Grindley's high qualities, for the circular in which their acceptance of his resignation was announced concluded with these words, which in our judgment are well merited :

"The court desire, in conclusion, to express their great appreciation of the invaluable services which Mr. Grindley has rendered to the bank not only by long and faithful devotion to the bank's interests, but by those personal qualities which have enabled him so fully to maintain the dignity of his position, and to earn the highest esteem of the court of directors, the shareholders, and the public."

Mr. H. Stikeman has been appointed Mr. Grindley's successor. The choice is an appropriate one, for the new chief executive not only possesses a good knowledge of his profession, an acquaintance with the business of Canada, and experience of banking in New York and London, but has been Mr. Grindley's assistant in head office for several years.

—Dividend at the annual rate of 7 per cent. has been declared for the current half year by the British Canadian Loan & Investment Co., Ltd., and the Imperial Loan Co.

CUTTING PRICES.

After the first storekeeper known in history or tradition had painted his name on a sign and hung it over the doorway, he must have immediately put a card in his window announcing "prices reduced." For, following this example, merchants have been cutting prices, or professing to cut prices, ever since, and doubtless will continue to do so until the end of time. It appears to be an essential feature of mercantile life. The public expect it and merchants are caterers to the whims of the public. But why staple articles should always be selected for the bargain table is more than we can understand. Yet this is invariably the case. The dry goods merchant advertises great drives in cotton goods, the grocer cuts down the price of sugar or flour, while the hardware merchant slaughters his stock of nails at unprofitable prices. All of these commodities are staple and in constant request. A few cents a yard or a pound difference in price does not materially increase the consumptive demand. The loss to trade is direct and without redeeming features. Were merchants to cut prices on certain fancy articles, upon selling which there is some margin of profit, the custom would not be quite so senseless. Lower prices upon certain commodities not in general use might serve to increase the consumptive demand for them, and in the long run prove of advantage to the merchant.

THE "RIGHT" TO LOSE MONEY.

The Retail Grocers' Union of New York met on Friday last and appointed a committee of five to adopt resolutions and formulate a plan of action agianst the department and dry goods houses which advertise to sell groceries below cost, and at prices which are declared ruinous to the retail grocery trade.

In the discussion which took place it was generally conceded that the Brooklyn grocers had gone too far in boycotting the houses that sold groceries to the dry goods and department houses.

Mr. Hermann Rohrs said : "The right of dry goods stores to sell groceries is not denied, but when they attempt to make the public believe that the retail grocers of this city are highway robbers they go too far. Whether it is a fact that they sell groceries 25 per cent. cheaper than we do is a question that needs our consideration. I have secured price lists from the department houses, and find that while they sell a few goods at cost and less than cost, their statement that they sell at 25 per cent. less than we do is not true. They do sell below cost sometimes, but when they advertise to sell a pound of tea for 60 cents worth $1, they deceive the public."

As T. H. Lohemann put it : "The department houses do at times sell below cost, but they do so to induce women who are influenced by their love of dress goods to visit their stores to purchase groceries cheap, so that they may be induced to make other purchases."

HAMILTON'S WATER PRESSURE.

We find the following sensible remarks in the Hamilton *Times*, under the heading of "Protection from Fires." Other places than Hamilton may well be "stirred up" to do their duty, instead of hugging delusions about their safety from fires and abusing the underwriters :—

"The underwriters' agent, who has been testing the water pressure at the hydrants in Hamilton, cannot be accused of taking the city at a disadvantage, for the general consumption is less and the hydrant pressure is greater in November than in July or August. To look upon him as a man hunting for an excuse to increase the insurance rates is not the part of wisdom. The citizens of Hamilton all know that the water pressure is not what it ought to be to make the buildings and other property in the city safe from destruction by fire. If the insurance man can stir us up to apply the remedy, he will be doing Hamilton a favor and a useful service. Winnipeg has just had $260,000 worth burned up. Hamilton can ill afford a similar loss. The sensible business policy is to lay a new main to bring us plenty of water, and district the city so that there will be ample pressure in every part."

WINNIPEG FIRE RATES.

Public opinion in Winnipeg has strongly declared in favor of greater protection for that city from the ravages of fire. Since our last issue not only have the three steam fire engines she possesses been put into working order, but the authorities have agreed to procure a fourth and to get also an aerial ladder for the fire brigade. The city council, however, desires, we understand, to condition these purchases upon the rescinding by the underwriters of the advance of 25 per cent. in rates of premium on property in that city declared last week. The attitude of the underwriters appears to be: "First get your extra engine and your ladder, and then we will see about the relaxing of the premiums. But in the meantime you must pay the increased rates. You have had, gentlemen of Winnipeg, a startling lesson as to the risks you run in the big fire of last week. We propose that you shall have a further lesson

in being compelled to pay more for your indemnity. If you are content to run such risks, we are not. We do not propose to lose money through your negligence."

BLEACHED COTTONS.

The recent reduction in the price of bleached cottons serves to impress upon our minds the fact that the market price of these goods is ruled by the tariff. Two weeks ago, as we have previously noted, white cottons were reduced in price one-quarter to one-half cent per yard. This decline is due principally to the very low price of raw cotton, which has enabled manufacturers to reduce the cost of production. And present prices here almost warrant American and English manufacturers exporting bleached cottons to the Canadian market The approach of this market to a profitable import basis is the immediate cause of the drop in prices. Canadian cotton manufacturers have wisely kept within the danger line and reduced their figures before foreign-made goods attained any very considerable foothold here. For the importation of white cottons has, we are told, consisted almost entirely of some very fine grades for special purposes. This is but natural when we consider that twenty-eight per cent. of the price paid for British cottons goes to the Government in shape of tariff charges and to the transportation companies for freightage dues. The future of the market depends almost entirely upon the course of raw cotton. At present the statistical position appears to favor low values, although during the week features have been developing which somewhat strengthen primary markets.

CANADIAN FLEECE WOOL.

Export trade in Canadian fleece wools during the last month has been of a very limited character. Wool brokers have begun to think there is something radically wrong with the consumptive demand in the United States. And the following letter received from an American manufacturer bears out this impression: "Your Canadian wools," says the writer, "are not well suited to the present American fashions. The great complaint is that they are too wiry when scoured. Their extreme length is also against them, for it takes too long to feed them on the cards. We find that our own domestic common grades, while nearly as strong, give a softer and better appearance when made up." Our Canadian wools were at one time, years ago, greatly sought after in the production of lustre goods, but evidently this trade has undergone a change. There may be some consolation in the fact that fashion is fickle, and its next change may bring Canadian wool into popularity.

THE NOVA SCOTIA PROVINCIAL EXHIBITION.

It is not universally conceded by inhabitants of the Mayflower province that Halifax is the best place for the Provincial Exhibition of Nova Scotia. Whether it be local jealousy, such as has led other places in Ontario to dispute the superior claims of Toronto to the Industrial Fair, or whether it be a narrowness of view which is oblivious to the weightier import of the larger crowds of visitors that a large city can secure, other places in Nova Scotia are agitating for a change in the law which appoints Halifax the seat of the Nova Scotia exhibition. The Truro Board of Trade thinks that country towns, Truro included, should share in turn with Halifax in the benefits derived from these yearly shows, contending that if the location is in a central inland town there will be better exhibits of farm stock and produce than at Halifax. But the argument cannot well be ignored that farm stock and produce alone will not sufficiently attract to such an exhibition. Metal, textile and other manufactures, products of the sea and of the mine are necessary to draw a crowd, and it is crowds that are wanted, for they principally influence the receipts.

NEW BRUNSWICK LUMBERMEN.

A number of New Brunswick lumbermen met at Moncton on the 20th inst., to discuss, among other things, the question of disposing of sawdust from the mills by emptying it into the rivers. This is in view of the Dominion law prohibiting such emptying after the 1st of May. Some thirty persons were present and the matter was discussed at length. The conclusion reached was that mills situated where they do not interfere with fishing, navigation or private property, should be exempted from the operation of the law which forbids such emptying of sawdust Here is a question of fact to be decided, we presume by officers of Government, as to what mills do or do not interfere as described. A petition to the effect mentioned is to be signed and presented to the Minister. The railway tariff on lumber was condemned by the meeting, which appointed Messrs. Wilson, of St. John, Wright and Humphries a committee to wait upon the Intercolonial Railway authorities, and ask for such modifications as would be equitable. The concluding work of the convention was the forming of the Lumbermen's Association of the Maritime Provinces The object of this body will be to look after the interests of the lumbermen in the provinces, and a meeting is to be called at any time a question arises affecting the lumbermen's interest The following were appointed members of the executive committee Nova Scotia — Messrs. Wm Chisholm, Young, Eaton and Curran New Brunswick Messrs Jas Robinson, Wm. Murray, D. J. McLaughlin, G. G. Woodman and Geo. J Vaughan

LUMBER IN NEW BRUNSWICK

Advantage was taken of the meeting of Maritime Province lumbermen last week to obtain for the Moncton *Times* the opinion of a number of those present as to the outlook for the lumber business during the coming winter. Mr. I. C. Prescott, of C. & I. Prescott, of Albert, a firm which employs 100 men and cuts 3,000,000 feet a year, thought they would not cut more than half their usual quantity of lumber, but would handle a larger proportion than they have been doing of hardwood timber. Mr. Wm. Chisholm, of Halifax, considered that the lumber cut of Nova Scotia would be about the average of former years Mr D J McLaughlan, of St John, will saw his usual quantity of 4,000,000 to 5,000,000 feet He finds the home market steady the English prices about the same as in the past, and expects the American market to be rather better, now that the duty is taken off lumber

Another operator, Mr. Wright, of Salisbury, N.B., expects the output this season to be larger than last winter, finding the American demand on the increase. His firm, which saws 4,000,000 or 5,000,000 a year, think the conditions for doing work in the woods will be better this winter, and he purposes getting out more square timber. F. O Talbot, of Alma, N.B., who cuts 5,000,000 feet a year as a rule, does not expect to get out any more timber than usual. The mill of George J. Vaughan at Point Wolfe, N.B., is affected by the sawdust restriction, and he expects to get out less timber than usual. He has been sawing from 5,000,000 to 6,000,000 feet a year. E. J. Smith, of Shediac, will likely take out 2,500,000 feet, one million of which will be from along the Cocagne River.

To this the Cumberland *Leader* adds that the output of Messrs Young Brothers & Co., of Newville and River Hebert, amounted last year to 8,500,000 feet lumber and eight million laths, probably the largest cut they have ever made, and they expect this season's to equal it. The firm has more than 100 men in the woods

Messrs. C. F. & F R. Eaton have cut about 6,000,000 feet of deals at Eatonville this season, and they will likely cut an equal amount next year. The extensive forest fires in the western part of the county last summer are causing increased activity in lumbering operations in the burnt districts, but much of the timber to be cut is small and not suitable for long lumber. It is probable that next season's output of deals n this county will be smaller than the cut of the present year

BRITISH COLUMBIA SALMON

Five of the six vessels chartered to carry canned salmon from British Columbia to England have sailed for their ports of destination The fleet consists of the "City of Glasgow," with 51,840 cases, valued at $231,240; the "Northernhay," 55,759 cases, valued at $245,066 "Clan Robertson," 69,830 cases, valued at $350,583, the "Senta, 45,135 cases, valued at $225,960 The "Carryvreehan" and the "Rimac" complete the list the latter has not sailed yet, while we have been unable to obtain information as to the cargo carried by the former. The British Columbia pack is thus pretty well distributed, and a report received from the coast asserts that there is barely enough reserved to supply the needs of the local market Latest accounts from Europe indicate that the consumptive demand for salmon is keeping up well. Everything points to a steady market for the balance of the season

WORTHY OF HONOR

We have the following glowing letter from a lumber manufacturer in Northern Ontario, Mr. J. E. Murphy, of Hepworth:—

"I suggest that you reprint, in the columns of THE MONETARY TIMES, the paragraph referring to HENRY BIGELOW WILLIAMS on page 665 of your last issue, and print his name in capital letters and red in color, if possible. What a pleasant and happy avocation commercial life would be if business men who run on the rocks would endeavor to follow the example set by Henry Bigelow Williams, whose name I have inscribed on my office wall, in a prominent place, with the paragraph setting forth his commendable deed underneath it."

We agree with our correspondent that the men who behave to their creditors as this Boston man behaved are worthy of honor. The paragraph in question was as follows

"Readers of our summary columns, seeing, week in and week out,

descriptions of failures, executions, assignments, compromises, until they wonder if such happenings will ever end, may read with a sense of relief, and as a sort of antidote, the rare conduct of

HENRY BIGELOW WILLIAMS,

of Boston, who went through bankruptcy in 1878. He owed at that time nearly $200,000, and he recently paid every dollar of his indebtedness—from which he was released by the court proceedings—together with 6 per cent. interest. Creditors who hesitated to accept the interest, which amounted to almost as much as the principal, were told by Mr. Williams that they must take all or nothing."

FOR DRY GOODS RETAILERS.

An enterprising Hamilton clothier presented each farmer on the market there Saturday morning with a paper-covered volume entitled "Joseph's Coat."

"Jaggs, did your speeches on the stump against the income tax have any effect?" "Did they? Well, I guess yes. The commercial agencies raised my rating twice."—*Detroit Tribune.*

The business of the Dominion Suspender Company at Niagara Falls has apparently outgrown the present premises, for they are about to put up a new building. No one who sells or wears their handiwork will feel aggrieved at these signs of prosperity.

It is estimated that $85,000 worth of fur was purchased for cash or trade by Edmonton firms and fur buyers during the past year. This does not include the fur traded by the Hudson's Bay Company in the McKenzie basin, which all passes through Edmonton and indirectly helps to swell its trade.

An English cable of Saturday says that the biggest fire of a quarter of a century in Nottingham has destroyed an extensive block of buildings in the lace market district. The flames broke out on the premises occupied by Brown & Co., who had large consignments of lace ready for shipment to the American market, all of which was burned. The damage is estimated at £100,000.

Storekeepers who are observant of what is going on will agree with a Boston paper that while women are talking so much about their rights, they have left very few to men. They have taken his loose, heavy-stitched gloves, with the big buttons; they have taken his shirt-front, his tie, his scarf-pin, his watch-chain, his cigarettes, his coat-pockets, and if some of the bicycle riders continue to divide their skirts, they will have taken his trousers.

A story about a green dry goods clerk is thus told by the Detroit *Free Press* humorist: The elegantly attired lady moved quietly up to the glove counter, where there was a new clerk who was polite and willing enough, but he didn't know much about the business. "I want a pair of gloves to match a grey wool dress," she said. "Certainly, madam," he replied, as he bounced around to the boxes, and then turned back to the lady. "I'm very sorry, madam," he said, "but we haven't got a grey wool glove in the house."

Unfortunately, to say that an article is Canadian made is not always to guarantee its selling qualities. And thus it has been with neckwear. Goods of this nature of Canadian manufacture have not been sufficiently up "to date" to satisfy the æsthetic tastes of our stylish young men. However, we hope for better things in the future. The Dominion Suspender Company of Niagara Falls, the Canadian side, are, we learn, about to erect a large three-story brick factory for the manufacture of men's neckwear. It will be fitted up with a modern plant, while power and light are to be generated from the cataract. Mr. Charles Banta, formerly with Wilson Bros., Chicago, one of the foremost neckwear designers in the United States, will have charge of this department. Their productions will range from the quality to retail at 25c. to $1, and all made up in the latest American shapes.

FOR GROCERS AND PROVISION DEALERS.

A British Columbia fish curer has started a new industry and is putting up smoked boneless flitches.

R. J. Graham, of Bellevelle, shipped three carloads of evaporated apples to Hamburg, Germany, last week.

Peterborough now has a wholesale grocery. Mr. M. Carton has, we understand, left the ranks of the retail trade and will henceforth be a wholesale jobber.

Press despatches announce the sale of a number of British Columbia salmon canneries to an English syndicate. Particulars of the sale are not given

About 480,000 lbs. of cheese and 45,000 lbs. of butter have been handled at the different Island factories and creameries during the past season.—*Charlottetown Guardian.*

Several makers of Scotch whiskey have considerately sent out, for the use of their customers in Canada, a supply of Scotch heather for St. Andrew's Day, which is to-day.

The American Fish Co., Ltd., of Vancouver, has just secured incorporation with a capital of $100,000, and the following as provisional trustees: A. H. B. Macgowan, J. B. Foley, D. W. McLeod, Mark S Rose and J. M. Morris.

Latest statistics show that the pack of Alaska canned salmon has, if anything, exceeded earliest highest estimates. Up to the 15th instant thirty-one vessels had arrived at San Francisco with a total of 610,000 cases canned salmon and several thousand packages of salted.

A realization of calculations upon high prices for China teas next season might prove an advantageous time for importers of Ceylon and India teas to more vigorously urge their goods into notice. Possibly with cost of the competing growths more nearly equalized, the American consumer would set aside the taste for tannin, gratified in the use of Chinese leaf, and give the British colonial product greater attention. —*N.Y. Journal and Bulletin of Commerce.*

The present year has witnessed a material increase in our egg export trade. The reduction of the duty by the Government has encouraged shipments to the States, while from the end of July to the close of navigation Britain afforded a fairly profitable market to the egg shipper. The largest shippers have been Ontario men. Local and through shipments from Montreal for the season just closed amounted to 49,907 cases, as compared with 38,517 cases last year and 34,384 cases in 1892.

NOTES ABOUT MANUFACTURES.

At Clarenceville, Que., Jas. Stewart Little, with commendable enterprise, has placed in his factory a mill for grain, to do steam gristing.

The shops of Wm. F. Vilas at Cowansville are soon to be in operation. Mr. Vilas intends doing business on a larger scale than previously.

President Garland, of the Amalgamated Association, says there are not enough idle tin workers in the United States to fill all the positions in one mill, and that any Welshmen who might come over would be strong union men.

While the proprietor of the last factory in Granby has "folded his tent like the," etc., according to the St. John's *News* (and we presume, also, "silently," etc., etc.), there is word of a new industry in that lively village, namely, a wrench factory, and Messrs. J. C. Barr and F. Payne are its promoters.

Although orders for new ships to be built on the lakes during the coming winter are very limited, says the *Marine Review*, the builders of steel vessels are now prepared to duplicate prices for which they offered to build large freight carriers at this time a year ago. They look for higher prices for material, and an increase in labor cost.

The city authorities of Sherbrooke are endeavoring to secure from the British American Land Company or elsewhere a suitable site for the works of the Jencks Machine Co. The company's shops are now situated at a distance from the railway and cartage costs heavily. This effort on the part of the council is in order to enable the company to erect the additional buildings required by the expansion of the business in the right portion of Sherbrooke.

The Staffordshire town of Walsall, near Birmingham, has been growing of late in an extraordinary way, having, it is said, outstripped Wolverhampton. Formerly it was a seat of tanning, harness-making and carriage supplies. It is now an important seat of the wrought boiler tube trade and the malleable iron trade, besides electro-plating and the manufacture of electric lighting apparatus. In one district alone, Palfrey, a population of 5,000 has grown up within the last ten years.

LUMBER AND TIMBER PIECES.

There is the possibility of a pulp mill being erected at Buckingham, Que.

The Dixon Co.'s saw mills, Peterborough and Ashburnham, have ceased cutting for the season

Lumber dealers say that the cut on the St. Croix this winter will be between 25,000,000 and 30,000,000 feet, possibly not more than 25,000,000. Last year it was nearly 50,000,000.

Lumber dealers say that the cut on the St. Croix this winter will be between 25,000,000 and 30,000,000 feet, possibly not more than 25,000,000. Last year it was nearly 50,000,000.—*Moncton Times.*

Mr. J. R. Booth yesterday sold his prospective cut of deal for next year to the same purchasers as last year, Mr. J. Sharples, of Quebec; Mr. Powis, of London, Eng., and Mr. Robert Cox. Prices have not yet transpired.—*Ottawa Citizen, Nov. 16th.*

According to the St. Croix *Courier*, Mr. E. Jack has received a let-

ter from Barcelona from the agent of *L'Echo Forestier*, the leading timber trade journal in France, stating that some of our woods which we consider of little value are in demand there

Morrison's mill has finished its season's work and the machinery will stop for the winter. The Aberdeen mill, owned by McDonald Fraser, has closed down for the winter. The cut at the Aberdeen mill, which did not open until August, has been about 3,000,000 feet.—*Fredericton Gleaner*

The quantity of lumber taken by barge from Ottawa and immediate vicinity during the navigable season is placed at about 305,000,000 feet. Of this some 280,000,000 feet were taken by the boats of the Ottawa Transportation Company, and the remaining 25,000,000 feet by American boats. The quantity shipped by rail during the same period is estimated at about 100,000,000 feet; but by including the shipping by rail during the winter months, this amount would be almost doubled.

James McEvoy, of the Government staff, who has just been surveying through British Columbia, reports that forest fires this year were more destructive than ever before. The Indians, he says, are responsible for this great destruction of valuable timber. They purposely set the fires with the object of making hunting easier. After strips of forest are burnt the burnt country in a year or two becomes covered with a growth of grass, and the large game leave the thick forests for grass meadows.

CLEARING-HOUSE RETURNS.

The following are the figures of the Canadian clearing-houses for the week ended with Thursday, Nov. 29th, compared with those of the previous week:

Clearings.	Nov. 29.	Nov. 22.
Montreal	$11,549,487	$10,649,246
Toronto	6,167,151	4,683,815
Halifax	1,163,795	915,415
Winnipeg	1,595,210	1,360,553
Hamilton	664,798	546,218
Total	$21,140,441	$18,155,247

Aggregate balances this week, $3,094,117; last week (five days only), $2,639,382

PATENT RECORD.

The following list of United States patents granted to Canadian inventors, Nov. 6th, 13th and 20th, 1894, is reported for this paper by James Sangster, Patent Attorney, Buffalo, N.Y.:

Card-cutter—Ormond Barnard, Oxford Mills, Canada.

Plug for establishing electrical connections—Charles W. Brown, assignor to the Bell Telephone Co. of Canada, Ltd., Montreal, Que.

Dumping car—Wm. G. Lane, Pictou, Canada, assignor to the Universal Coal Dumping Co., Springfield, Ill.

Frame or casing for window sashes or blinds—Peter McKenzie, Ottawa, Ont.

Inkstand—Thomas S. Shenston, Brantford, Ont

Remedy for tooth-ache—Henry Ievers, Quebec, Que. (Trademark.)

Bridle for paint brushes—Charles Boeckh, Jr., Toronto, Ont

Automatic railway gate and signal—Edward Death, assignor of two-thirds to E. W. Wyatt, Toronto, Ont.

Hose-coupling—Jules Doster, Montreal, Que.

Windmill—John Boisclair, Montreal, Que,

Wringing machine—Alfred Burkholder, Toronto, Ont

Clothes-drier—James Reilly, Calgary, Canada

ANSWERS TO ENQUIRERS

Canuck, Collingwood.—We have not seen the figures you mention, and are disposed to doubt their authenticity. But with respect to the point in question as to what you call "mutual give and take" in the matter of lake transportation, you are not quite just to the Canadian Government. The true state of the case, we believe, was set forth by the Montreal *Gazette* not long ago, thus: "Wheat shipped from Winnipeg to Duluth cannot be brought back from the latter port to Canada except in a Canadian vessel. Some discussion on this requirement of the law has recently arisen, and the statement has been made that it is based on an order-in-council. This is an error. While Article XXX of the Treaty of Washington was in force, Canadian wheat could be brought to Canada from a United States port in a United States vessel The United States, however, abrogated this section, and a return to the old conditions followed. Vessels of both countries, it may be mentioned, are exactly on the same footing as respects the lost privilege, the concessions, which the United States stopped, having been mutual."

J M B., Winnipeg.—Rhodes' Journal of Banking for November will give you the discussion of the American bankers at Baltimore, nearly in full. It is some months since Mr Horace White presented or rather the Philadelphia Academy published a pamphlet by that gentleman on the subject of National and State Banks. It took the view that the National bank note system of the United States should be continued, but minus the feature of Government bond security

BOOKS RECEIVED

Canadian Almanac for 1895. This excellent desk companion appears to grow more useful each year. Certainly the present issue is more attractive than usual in illustration and arrangement and appears larger than before. The map on Mercator's projection, of the world, with the British possessions marked in shading, is inspiring to a Britisher. The articles on the defences of Canada, the fisheries protection, &c., are instructive. Dr. Bourinot has contributed an article on Parliamentary Procedure. The editor and the publishers, the Copp Clark Co., are to be congratulated on this issue

The Methodist Magazine, Wm Briggs, publisher, Toronto; The Toronto News Co., wholesale agents.—A good number. The Hymn of Trust, by Rev Frederick G. Scott, is a gem and the story of Tent Life in Palestine, by the editor, shows what wide observation and a good literary style can do, aided by really good illustrations, to render a threadbare subject freshly attractive. Mrs. Harvie has a paper on Woman's Work for Woman in Heathen Lands, and the sketch of the Ontario Institution for the Blind is of a kind to make us grateful to those among us who give their lives to such work

—A specimen of the sort of whited sepulchre of a man that brings dircredit upon the Christian religion is John R. Tait, who when arrested a week ago confessed to having embezzled $15,715, the money of the Chemical Bank of New York, of which he was paying teller. He was a leading member of a village church, and superintended the Sunday-school, was a great advocate of teetotalism and fought the saloon-keepers. He was a strict Sabbatarian, too, and had two little boys arrested for violating the Sunday law, who were employed by the Department of Public Works of New York city in removing rubbish from condemned land, claiming that they should be in church. But all his religiosity did not keep him from being a thief. He is somewhat the type of hypocrite and bigot scarified by Thomas Hood in the lines quoted the other night by Dean Hole:

> A man may cry "Church, church!" at every word
> With no more piety than other people
> A daw's not reckoned a religious bird
> Because it keeps a-cawing from the steeple

—The London assessors have made their return of municipal valuation. The complete assessment returns show that real property in that city has increased from $12,905,660 to $13,201,110. In personal property there is a slight decrease, the figures now being $1,650,150, against $1,687,750 last year; taxable income, however, is higher, being $962,800, against $778,500 last year. Total assessment, $15,654,060, a gain of $282,150 since last returns. The population of the city has grown nearly a thousand in the year, namely, from 32,571 in 1893 to 33,427 now

—There is possibly satisfaction, but no comfort for Grand Trunk grumbling shareholders in the fact that the New York, Lake Erie & Western Railway (Erie and leased lines proper) shows a deficit of $1,167,000 on the last year's working, compared with a surplus in the previous year. The falling off in its earnings was one-seventh from 1893. The New York Central Railway's earnings fell off more than three millions on the year.

—The incendiary fiend is in the county of Hastings, and Belleville has felt some of his handiwork. The underwriters are alarmed and insist on steps being taken to discover recent incendiaries. The Associated Underwriters will supplement any reward by an equal amount, not exceeding $500, that is to say, $250 for each arrest and conviction. Find the rascals out

The successor of the late Carlton D. Richardson in the Canadian management of the London Guarantee & Accident Company, is Mr Hubbard, of the Montreal office, a gentleman who comes to take up his residence in Toronto, bringing with him the prestige of success in his business, and kind expressions from many admirers

The Western Canada Loan & Savings Company declares its dividend for the December half at the usual rate of 10 per cent per annum

SHOULD MILLS RETAIL?

Editor MONETARY TIMES:

SIR,—Kindly let me have your opinion on above question. The facts are these: In our town we have a mill which manufactures stocking legging, shirts and drawers, tweeds, ladies' vests, men's cardigans, etc. Now these goods are largely bought by Montreal, Halifax, Truro, and St. John firms, but the owners of the mill do a large retail trade (in their own products only), but to the injury of the local shopkeeper, who is probably a customer of some of the above firms.

It has been suggested to houses in this town doing both a wholesale and retail trade that they place their orders for these goods elsewhere, but to do so destroys the idea of helping local industries. Now I do not suggest that the owners of the mill have pointed out to them the injustice of the thing, as this has been repeatedly done, but let me know your views in the matter in your next number, and at the same time please say if the same custom applies to mills in the west, and oblige an old subscriber, and one who wishes to encourage all Canadian industries that are legitimate, and at the same time likes FAIR PLAY.

November 24th, 1894.

BIG BANK DEFALCATION.

A serious defalcation, amounting it is said to as much as $354,000, has been discovered in the Shoe and Leather National Bank of New York. It was made known on Saturday last. The operators of this enormous steal were two in number. One was the bank's book-keeper, who had been a trusted employe for fourteen years. He is Samuel S. Seely, aged 45, of Brooklyn. The method adopted to accomplish the theft was explained as follows: With the book-keeper, Samuel C. Seely, was implicated a lawyer by the name of Frederick Baker. Baker was a depositor in the bank. Seely would place false credits on the ledger to Baker's account, and then Baker would draw cash cheques upon the false credits. For thirty years the depositor had been a respected customer of the bank. Both men have been fugitives from justice since Nov. 19, and the police are after them.

Inasmuch as Seely was well recommended, always apparently honest and trustworthy, and frugal in his ways of living, he was one of the last employes of the bank whom the officers would have suspected of dishonesty. He lived in a quiet but comfortable way in his Brooklyn home with his wife and two children, to whom he was devoted. Last Sunday the book-keeper had a holiday. On Monday he failed to appear and another clerk was put in his place. This was the first intimation of anything wrong. His accounts were found to be mixed. On Tuesday it was found that he had fled. A bank examiner was called in and his investigation revealed the cause. The Clearing-house discovered that the defalcation would cause an impairment of the capital of about $155,000.

The directors immediately held a meeting and decided to make good the impairment at once. The bankers who were present at the examination will extend to the unfortunate bank any assistance which might be needed in case the depositors should make a run upon the bank. One of these gentlemen said:—"It is an old institution, had a fine quality of assets, a good cash reserve, and was soundly and conservatively managed, The bank simply had an accident, due to the falsity of a highly-trusted employe, but its financial standing is assured."

—The *Philadelphia Record* says, with respect to this *expose*: "The Shoe and Leather Bank's system of bookkeeping wants half-soleing and heeling."

PRECAUTIONS AGAINST BANK DEFALCATIONS.

A correspondent of the New York *Journal of Commerce and Commercial Bulletin*, writing from Wallingford, Conn., on this subject, says: "By no possible method can the danger to financial institutions from wicked and weak men be entirely removed; but may it not be diminished? A few suggestions, then, relating to safety may not be amiss.

"1. No memoranda should ever be counted as cash.

"2. Examinations should be made at unexpected times, as well as at stated periods.

"3. The close of the year should always mark the time for a careful audit.

"4. All large indebtedness to or by the institution should be carefully investigated.

"5. No officer or employe should be allowed to overdraw his account.

"6. It may be of advantage to have a different auditor with his own peculiar methods inspect the books, vouchers, etc. Auditors get into a routine which is soon understood.

"7. Rotation in office or in duties for brief periods, or short vacations given, may be of benefit to the institution. Such a method would be likely to give to an acute and watchful man an insight into the general state of affairs, and would present opportunity for investigation. This method would render concealment more difficult, and without concealment fraud is impossible. And prevention of wrong is far better than detection of wrong.

"8. It should never be forgotten that employes, officers, all men, are in a real and noble sense trustees and servants. And where responsibility and faithfulness find their due recognition, there is found true service, and the ideal relation between server and served.

"9. The noblest safeguard is yet to be mentioned. It is integrity; integrity in employer and employe. This is no artificial protection, no external watch, no mercenary service. This is the faithful guard within the citadel, who best serves man because he first serves God."

MISS WILLARD AND THE NEWSPAPERS.

On a recent occasion in the city of Cleveland, Miss Frances Willard appeared in a new *role*. This distinguished woman has long been president of the Woman's Christian Temperance Union, and is known as an earnest and devoted worker in the cause of temperance, but the advanced position she now assumes will hardly do her credit. She favors Henry George's theory of single tax, which she designates as "one of the highways out of the wilderness." She wants government supervision over public places of amusement, compulsory arbitration, and says that "the nationalization of all means of locomotion and communication was less important than the ownership of the newspapers by the people." These words seem strange from the lips of Miss Willard. She has been for many years, if she is not now, the able editor of the *Union Signal*, and should be the last woman in the world to attack the press generally. She is quoted as saying that opinion is manufactured by the newspaper just as scientifically as cloth is woven by the loom, and evidently assumes that journals are published in the interest of the corporations that control them, rather than in the public interest. We always supposed that the most successful papers were practically directed by the people. And as the *Inter-Ocean* says: "The newspapers in every city and town, representing the general public or some organization, trade or society, are created by a demand from the people, and they live and thrive or fail and perish just as they meet or fail to meet the demand of the people. Miss Willard knows this, for she has had some experience in the business. The ladies of the W.C.T.U. know it, for in the newspaper has that union had its greatest friend to publish its notices and its meetings without price, and allow it many privileges in newspaper columns that could be secured by no trust or corporation for any money, simply because the W.C.T.U. represents a large section of the most earnest women in America and the desire of all good people to curtail the influence of the saloon and minimize the evils that surround it."

The study of politics is evidently not Miss Willard's *forte*. She had better leave it to others not so hair-brained.

PROPOSALS FOR GAS WORKS.

The Council of the City of Winnipeg, Manitoba, Can., is prepared to receive proposals for the establishment and operation of works and plant for the supply of gas or gas and electric light for the lighting of buildings.

Proposals will be received up to 8 p.m., on TUESDAY, the 22nd JANUARY, 1895, addressed to the undersigned, care of J. A. Platt, Clerk of Committees, City Hall, and endorsed "Proposals for, &c."

The proposals are required to state:

(1) The price to be charged to consumers for each kind of light respectively.

(2) Length of exclusive franchise which will be required. (Any franchise granted, if granted, will be subject to the rights of the present existing company.)

(3) To what extent, if any, shall the city share in the revenue derived.

Full particulars can be obtained by communicating with the City Engineer.

All proposals to be accompanied by marked cheques made payable to the order of the City Treasurer, for one thousand ($1,000) dollars, which will be returned as soon as practicable if the proposals are not entertained. Such proposals as are reserved for consideration will be subject to a further deposit of four thousand ($4,000) dollars; such deposits will be returned to unsuccessful tenderers when final selection is made. The deposit of the successful proposer will be retained by the city until the completion and operation of the works, and will bear interest at the rate of five per cent. In case of failure to enter into a contract or to carry out the works as agreed upon, the deposit will be forfeited to the city and retained by the Mayor and Council as liquidated damages and not by way of penalty.

The right to reject any or all proposals is reserved.

People of **Good Common Sense** usually appreciate a good article that is honestly made, well finished and up to date. This explains the great success of

GRANBY RUBBERS

THEY WEAR LIKE IRON

JEWS AND FIRE RISKS.

Commenting on the paper read by C. C. Hine, of the *Monitor*, at the recent meeting of the fire Underwriters' Association of the North-West on "The Jew in Fire Insurance," in which he expressed a very decided opinion against the desirability of Jew risks, the London *Review* says: From statistics which he has collected in New York City he deduced the conclusions arrived at, which were that the average Jew risk is twice as apt to burn as the average American. We have no doubt that as regards the Russian and Polish Jews, so many of whom are to be found in New York, the accusation is true, but as regards Jews in general we question it. We believe that, if statistics were to be collected on this subject, it would be found that among the better classes of Jews there are no more incendiary fires than among other classes. A man whose moral sensibility will permit him to burn his property for the insurance, will very likely do so whether he be Jew or Gentile, and if statistics prove a greater proportion of incendiary fires among the former, they are due to other causes than religious tenets.

Some poor work from an engineering standpoint is plainly evident in the walls of the Canadian canal at Sault Ste. Marie, Ont., says the *Review*, but the damage as thus far caused to the canal and lock as a whole is not by any means sufficient to warrant the publication of a sensational dispatch like that which appeared in the New York *World* of recent date. The canal will be open for business next season, and there need be no fear of the walls falling in.

County of Waterloo.

$10,000 DEBENTURES.

Sealed Tenders will be received until noon on Thursday, the 15th December next, for the purchase of $10,000 of County of Waterloo Debentures, payable in instalments within twenty years, with interest annually at the rate of four per cent.

HOW THE PREMIUM WAS PAID.

A great variety of money is in circulation in Newfoundland and various eastern portions of the Dominion of Canada. The inhabitants are a thrifty people, coming from many lands, and money in any shape is acceptable. The agent of the Mutual Life of New York in a small town in Newfoundland sends through General Agent J. A. Johnson a very interesting letter relative to a premium recently paid the company, and the following memoranda:—

DIFFERENT COINS RECEIVED IN PAYMENT OF A PREMIUM AT ONE OF THE COMPANY'S AGENCIES IN NEWFOUNDLAND.

	Value in American Money.	Date of Coin.
1 doubloon	$15.50	1788
1 half doubloon	7.75	1780
3 quarter doubloons, at $3.80	11.40	1788
1 eighth doubloon	1.90	1841
2 ten marks at $2.38	4.76	1872
1 American gold piece	2.50	1851
1 Newfoundland piece	2.00	1870
5 Spanish pieces at 20c.	1.00	1778
1 Spanish piece	.25	1801
2 Greek drachma, at 19.3c.	.36.6	1822
2 two francs, one Italian, one French at 36c	.72	1871
1 crown	.26.8	1875
1 mark	.23.8	1876
3 half francs at 8c	.24	1887
1 8d.	.16	1822
1 twenty centime	.05	1867
1 ten centime	.02	1868
4 two centime	.04	1878
3 halfpennies	.01.5	1861
	$49.19.7	

The agent's letter accompanying this document says:—

"DEAR SIR,—We are apt to receive a good many kinds of money in some of the remote places here in Newfoundland. Having canvassed one man until I had almost given him up, on his plea that he had 'no money,' he said at last (turning to his wife), 'You may as well bring down the stocking', and when that stocking came with its shining mass of stuff poured out on the table, I wondered if I could tell whether I had enough for the premium or not. Attached please find memo. different kinds of specie paid me for the premium. I hardly knew whether I had $30 or $60. I invested in a small pocketbook to put the premium in, to show the friends how business is done here. Will keep it until I return."

—The largest fly-wheel in Pennsylvania, if not in the United States, has just been put in place in New Castle. It is composed of three wheels, side by side, and each 35 feet in diameter. The outer rim alone weighs 160,000 pounds.

—It may be cited, as evidence that the current decline in prices in the United States is not special to this country, that the imports of Germany for the first nine months of 1894 show an increase over last year of 7.5 per cent. in quantity, and of only 0.2 per cent. in value, while in the exports there was a gain of 6.2 per cent in the quantity, with a loss of 5.6 per cent. in value. This is a virtual parallel to our own experience, and largely explains the agrarian and commercial discontents that prevail in Germany. The facts confirm what we have repeatedly urged, that the present unsatisfactory industrial conditions in this country are due to universal causes, affecting all the great commercial nations alike. —*Journal-Bulletin, N.Y.*

TRENT VALLEY CANAL.

This work is going on, as the recent awarding of contracts shows. An Ottawa despatch of Friday last states that the contract for section one of the Simcoe and Balsam Lake division of the Trent Canal has been awarded to Mr. Andrew Onderdonk, of Chicago, whose tender was the lowest, and the contract for section one of the Lakefield division of the work has been awarded to Messrs. Hogan & McDonald, of Montreal, whose tender was the lowest for that section. The first contract is for about five and a-half miles of the canal from Balsam Lake towards Lake Simcoe, and the contract price is understood to be less than $500,000. The second contract covers a distance of about three and a-half miles from Lakefield, in the direction of Peterboro, and the price is said to be in the neighborhood of $250,000. Both these tenders are considerably below the engineer's estimate, and are considered to be at low rates; but the contractors are responsible men, who made personal examination of the localities and know their business, so that they are no doubt prepared to carry out the contracts. The competition was very keen, fifteen of the largest contracting firms in Canada and the United States putting in tenders. It is understood that work on the Balsam Lake contract will be commenced at once, and it is expected that the work will be completed by spring. This contract is all excavation, and although part of it is through rock, it is said, however, to be not difficult.

Commercial.

MONTREAL MARKETS

MONTREAL, Nov. 28th, 1894.

ASHES.—Further weakness is to be noted in the market for ashes. Receipts are small, but there has been no export movement since last direct steamers left. A few small transactions in first sorts are reported at about $4.10; for seconds the quotation would be $3.60 to 3.70. Pearls are nominal; last transactions were at $7, but figures would likely now be lower.

CEMENTS AND FIREBRICKS.—Stocks are all now forward and in store, and receipts for the season are much behind 1893. English brands of cement are quoted at $2 to 2.10, Belgian $1.90 to 2, firebricks $16.50 to 22 per M.

DRY GOODS.—Assorting business shows no material improvement, and is of only moderate extent. Letters from travellers on the road and

Waterous, Brantford, Canada.

country dealers mostly speak of quiet business, except in a few northern sections, where there has been some snow and sleighing. City retail men are also not altogether satisfied with sales, and say that beyond a fair demand for heavy woolens, there is not a great deal doing. There is some little improvement to be reported in remittances from certain districts.

GROCERIES.—The feature of the week is the reduction in the price of granulated sugar to 4c per lb at the factory. This has been done, it is presumed, to meet the competition from German and home-made beet sugars. Samples of the latter from the Berthierville factory have been on the market the last week or so, and are being quoted at 3¾c. in a jobbing way, but the color is reported to be poor, and the article has not met with much favor so far. The regular refiners have not made any concession to customers, which range from 4¼ to 4½c. to the wholesale trade. The local tea market, though quiet in movement, shows not the slightest shade of weakening. All kinds of Japans have been completely cleaned up, and the market has not been in better shape for many years. Some fair lots of gunpowders and imperials aggregating [illegible] have been sold to New York within the last few days. Coffees are steady, with very fair demand. We quote Rio 19 to 21c. Maracaibo 19½ to 22c. Java 26 to 31c. Mocha, 28 to 31c per lb. French supplies of California loose Muscatel raisins are forward, and show extra quality, we quote 4-crown 7½c., 3-crown 6½c., 2-crown 6c. Currants 3¼ to 5¼c per lb as to quality; new Sultana raisins 6 to 8c. Prunes process 5½ to 6½c as to grade. French 4½ to 6½c per lb. There is now a little better demand for canned corn and tomatoes at 95c. for good brands, packers' prices being 85 to 90c. salmon, $1 00 to 1 45, lobsters, $7 25 to 9 the case.

MONTREAL GRAIN STOCKS IN STORE.

	Nov. 12, '94.	Nov. 28, '94.

Peas, "	30,179	19,108
Barley, "	14,300	17,652
Total grain	1,033,932	891,917

HIDES.—There is a good demand for all hides offering, and 4½c. per lb. is now a steady figure for No. 1 green light hides; heavies bring 5½c. from dealers, with sales to tanners at from half a cent to a cent more per pound. Lambskins are being fairly dealt in at 60 to 65 cents each.

LEATHER.—Apart from a little demand for sole, local trading in leather has been very light. Some boot and shoe houses report rather better business from certain sections, while snow and rain have induced some fair sorting orders to be given, but manufacturing is not active. An English leather dealer was in the city last week, and made purchases of a good lot of sole, and some small lots of buff and splits. There are no changes in prices to be noted. We quote—Spanish sole, B A No. 1, 18 to 20c; do No. 2 to B A 17 to 18c.; No. 1 ordinary Spanish, 17 to 18c.; No. 2, 16 to 17c.; No. 1 slaughter, 18 to 20c.; No. 2 do., 17 to 18c.; American oak sole, 39 to 43c.; waxed upper, light and medium, 24 to 26c.; do. heavy, 20 to 24c.; grained, 24 to 26c.; Scotch grained, 25 to 27c.; splits, large, 13 to 15c.; do. small, 11 to 12½c.; calf splits, 27 to 30c.; calfskins (35 to 40 lbs.), 50 to 60c.; imitation French calfskins, 60 to 70c.; colored calf, American, 23 to 27c.; Canadian, 19 to 21c.; russet pebble cow, 12½ to 13½c.; russet sheepskin linings, 30 to 40c.; harness, 18 to 23c.; buffed cow, 9 to 11c.; extra heavy buff, 12½c.; pebbled cow, 8 to 12c.; polished buff, 9 to 11c.; glove grain, 9 to 10c.; rough, 16 to 17c.; russet and bridle, 40 to 50c.

METALS AND HARDWARE.—The movement in these lines of merchandise is almost more than seasonably light, and we hear of very few noteworthy transactions in iron or other heavy metals. A lot of 300 tons of Summerlee pig iron that came out on one of the last steamers was offered among the trade at pretty low figures, and we believe 100 tons was sold at under $20 per ton, the balance is being yarded. Iron in small lots are quoted at $21 to $21 50, and Carnbroe at $19. Domestic pig [illegible] figures. Domestic bars [illegible] Tin and Canada plates are easy at quotations. Ingot tin is weaker and can be bought [illegible] York at 14½ to 15c, so that a local quotation of 17 to 18c is a fair one. We quote—Coltness pig iron, [illegible] none here. Calder No. 3 [illegible] merlee, $21 00 to 21 50. Eglinton $18 50. Gartsherrie, none here. Langloan, none here. Carnbroe, $19 00 to 19 50. Siemens pig, [illegible] Middlesboro No. 3, $17. Summerlee No. 1, $18 50 to 19 00. Siemens pig No. 1, $18 50 to $17 25. Ferrona No. 1, $16 50 to 17 00. machinery scrap, $15 00 to [illegible] bar iron, Canadian, $1 60. Hoops, $1 25. best refined, $2 40. Low Moor, $3 10. Canada plates—Blaina, or Garth, $2 00 to 2 05; all polished Canadas, $2 75. Tyne roofing plate 20 x 28, $5 75 to $6 00. Black sheet iron, No. 28, $2 15 to 2 30. No. 26, $2 15 to 2 20.

No.24, $2.10; tin plates—Bradley charcoal, $5.25 to $5.50; charcoal I.C., $3.50; P.D. Crown, $3.75 to 4.00; do. I.X., $4.75 to 5.00; Coke I.C., $2.75 to 2.90; coke wasters, $2.65; galvanized sheets, No. 28, ordinary brands, 4¼ to 4½c.; No. 26, 4c.; No. 24, 3⅝c., in case lots; Morewood, 5¾ to 6c.; tinned sheets, coke, No. 24, 6 to 6¼c.; No. 26, 6½ to 6¾c.; the usual extra for large sizes. Hoops and bands, per 100 lbs., $2.25 to 2.30. Steel boiler plate, ¼ inch and upwards, $2.00 to 2.10 for Dalzell, and equal; American steel plates, $1.90 to $2; ditto, three-sixteenths inch, $2.60; common tank iron, $1.65 to 1.75; tank steel, $1.80; heads, $2.85; Russian sheet iron, 10 to 10½c.; lead, per 100lbs., pig, $2.75 to 2.90; sheet, $4.00 to $4.25; shot, $6.00 to 6.50; best cast steel, 10½ to 12c.; spring, $2.50; tire, $2.50 to 2.75; sleigh shoe, $2.40; round machinery steel, $3; ingot tin, 17 to 18c.; bar tin, 25c.; ingot copper, 9¾ to 11c.; sheet zinc, $4.50 to 4.75; Silesian spelter, $4 to 4.25; American do., $4 to 4.25. Antimony 10½ to 12c.; bright iron wires, Nos. 0 to 8, $2 65 per 100 lbs.; annealed do, $2.70; galvanized, $3.35; the trade discount on wire is 20 per cent. Barb and twisted wire and staples, 3¼c. Coil chain, ¼ inch, 5c.; ⅜ inch, 4½c.; 7-16 in.. 4¼c.; ½ in., 3¾ to 4c.; ⅝ in., ½c.; ¾ in., 3¼c., ⅞ in., and upwards.

Oils, Paints and Glass.—The winter quietude has now set in, and there is little new to write about. Prices remain as they were. There is a possibility of some stiffening in prices of glass, as stocks of this article on spot are quite moderate, and some further supplies may have to be brought at winter freight rates. We quote:—Turpentine, 43c. per gallon for single barrels; two to four barrels, 42c. Linseed oil, raw, 57c. per gallon; boiled, 60c.; 5-barrel lots, 1c. less; olive oil, machinery, 90c.; castor, in lots, 6½c.; single cases, 6½ to 6¾c.; tins, 7c.; Nfld. cod, 38 to 40c. per gal.; Gaspe oil, 38c. per gal.; steam refined seal, 38 to 40c., in small lots. Leads (chemically pure and first-class brands only), $4.50 to 5.00; No. 1, $4.50; No. 2, $4.25; No. 3, $4.00; dry white lead, 5c; genuine red do., 4½c.; No. 1 red lead, 4c.; putty, 2c. in bladders per brl.; London washed whiting, 40 to 45c.; Paris white, 90c.; Venetian red, $1.50 to 1.75; yellow ochre, $1.50 to 1.75; spruce ochre, $2.25 to 2.50; window glass, $1.20 per 50 feet for first break; $1.30 for second break; third break, $2.80. These price sare shaded 5c. for 50-box lots.

Wool.—The market is still without activity, no parcels of any note having been lately sold. We quote greasy Cape 13½ to 16½c.; B.A. scoured, 26 to 32c.; British Columbia, 10 to 11c.; Canadian fleece, 17 to 20c.; pulled supers, 20 to 21½c.; extra, 23 to 26c. per pound.

TORONTO MARKETS.

Toronto, Nov. 29th, 1894.

Drugs.—Business is of a hand-to-mouth character and orders are for small lots, but being quite numerously received, the aggregate volume of trade is fairly large. Trade in Christmas sundries is increasing as the holiday season draws nearer to hand. Values are for the most part firm. Opium is strong. Cables from Smyrna indicate a stronger tone to that market for opium, the latest quotations received naming 9s. 8d. to 9s. 9d., the improvement being attributed to the continuance of "dry weather" in the growing districts. Prices of muriate of cocaine abroad are stronger, and dealers here are firm in their views. Quinine is steady. Citric acid is weaker, as is brown acetate of lime.

Dry Goods.—The retail trade have had some very good days' business since cold weather commenced, and, in consequence, a number of sorting-up orders have been received by our jobbing houses. Heavy woolen goods are in fair request. The recent reduction in the price of bleached cottons does not appear to have increased the output of goods, nor is it likely to do so. We cannot learn that any of the wholesale houses have been importing English bleached cottons, although some of the large retailers may have done so for special purposes. Fancy goods for the holiday trade are now beginning to move freely, but it is not thought that this business will be unusually large.

Grain.—The country roads in some districts are good, and here deliveries of grain are being freely made. However, we must wait for sleighing before any considerable stocks are received Markets abroad have shown some fluctuations, but in the main are steady and firm, while quotations here are slightly higher than they were one week ago. There is some enquiry for export, but the local trade continues to have most interest. Barley is steady, with a good local demand, and some considerable shipments to the United States. It may be interesting to note that recently, in St. Louis, a sale was made of 400,000 bus. of fancy Minnesota barley. This is said to be the largest single transaction ver recorded, and amounted in value to $250,000. Oats are steady and are in fair demand.

The stocks of grain in store at Port Arthur on Nov. 17th were 1,035,899 bushels. During the week there were received 615,446 bushels, and shipped 1,062,825 bushels, leaving in store on Nov. 24th, 642,972.

Hardware and Metals—Jobbers report trade as quiet, and not much improvement is expected before the new year. The movement of holiday supplies of cutlery, of fancy tinware and plated goods, may, however, add some little interest to the trade during the next few weeks. The articles now being called for are sleigh bells, snow shoes, saws, axes, cinder sifters, and furnace scoops. Trade in metals has fallen off

These prices are wholesale by the car-load

as the season advances. Galvanized iron, tin plate and block iron continue, however, in fair request. Beyond the staple trade nothing is doing in the sporting line. The lamp goods trade is quiet. The movement in plumbers' goods shows improvement; this is doubtless due to the cold weather. Skates are moving well, and should hockey become a universal sport throughout the country, this trade must be materially increased. Values are steady on the whole. However, in cut nails, bar iron and horse shoes, prices are unsatisfactory, and manufacturers are evidently not on harmonious terms.

HIDES AND SKINS.—While the market is firm, with supplies by no means excessive, no advance in prices has transpired. Quotations stand as follows; cows, No. 1, 4½c.; No. 2, 4c.; steers, No. 1, 5¼ to 5½c.; No. 2, 4¾ to 5c. The demand at this season of the year is always brisk because the quality of the skins is good. No change was made in the price of sheepskins in the middle of the month. The demand is not brisk, and if it were, the market would be at once dampened by importations from the United States. Beginning December 1st, it is probable that the price will be made 60c. and will continue on this basis through the month.

LUMBER.—The last few weeks have witnessed very active operations, as is usual at this season of the year. Navigation, or the bulk of it, is now pretty well closed up. A good trade is being done with Buffalo, both for building operations there and as a distributing point for the surrounding country. The season so far has been favorable for operations in the woods There is as yet no certainty in regard to the season's cut. It is said that what influence the banks have upon the course of lumbermen is being exerted in favor of a small cut. Prices for stocks are being pretty well maintained.

PROVISIONS.—Receipts of butter are still liberal. The quotation on fancy tubs is 17c.; good dairy ranges between 14 and 17c. according to quality and quantity; rolls are selling fairly well at 17c.; common stuff is neglected. Cheese is quiet and steady. In hog products the feeling is easy; long clear is quoted at 7 to 7¼c.; hams, 10 to 10½c.; rolls, 8c.; lard, 8 to 8¾c. Receipts and shipments Chicago last week were: Pork none and 8,578 bbls.; lard, 1,243,000 and 9,224,000 lbs.; meats, 3,041,000 and 12,182,000 lbs. Receipts of hogs in Chicago, 53,000, against 45,000 estimated for to-day; 16,000 left over from Saturday, and 10c. lower, except heavy weights, with 237,465 for last week and 36,583 shipments. Eggs remained much as reported last week; pickled are quoted at 13 to 14c.; held fresh, 15c.; strictly fresh, 17c. Dried and evaporated apples are unaltered.

SEEDS.—The week has brought improvement to both alsike and red clover. Alsike is attracting more attention in London, and the market is reported firm. An American authority writing concerning clover, says: "Values continue to harden, but with the export demand steadily improving they have been drawing nearer to a basis for actual business." In Toledo red clover is reported firm. Deliveries on the local market show improvement over those of last week.

BRITISH MARKETS.

Messrs. Gillespie & Co.'s prices current, dated Liverpool, November 9th: SUGAR—Raw is inactive. Refined dull at 6d. per cwt. decline on the month. RICE neglected at 7s. 6d. to 8s. per cwt. for usual good ordinary quality. CHEMICALS, etc., mostly easier to buy. 60 per cent. White caustic soda 7s. 6d., flour sulphur 7s., refined borax 19s. 6d., crude, ditto, 19s. per cwt., f.o.b. Cream tartar scarce and dearer at 67s. 6d. per cwt., nett, c.i.f., to Halifax, N.S OILS—There is little alteration in prices since our last, and markets generally are fairly steady. FREIGHTS—Through, *via* Portland, are quoted as below: Montreal—Groceries, 15s.; chemicals, 15s. to 20s.; oils, 20s. to 30s. Halifax, N.S., and St. John, N.B. — Groceries, chemicals and oils, 12s. 6d. to 15s., and 17s. 6d. to 20s., respectively.

THE GREAT-WEST LIFE ASSURANCE CO.

HEAD OFFICE: WINNIPEG

Subscribed Capital... $400,000 00 **Government Deposit... $56,000 00**
Paid-up Capital .... 100,000 00 **Reserve 54,720 00**

Business in force over $4,000,000 00

The attention of the insuring public and live progressive agents is called to the following reasons for selecting this company:

First—It is the only Canadian company giving its policyholders the security of a four per cent. reserve; all others without exception reserving on a lower standard.

Second—The policy contract is as liberal as any issued. No restriction as to residence, travel or occupation, and incontestable after one year.

Third—The premium rates are low and the cost to the policyholder is certain to be less than in any other company because a better rate of interest can be earned in the west than at the home of any other company.

Fourth—Every desirable plan of insurance is issued from the low priced "PAY AS YOU GO" plan to the shortest single premium endowment.

A VICTORY AND A BANQUET.

The Chamber of Commerce of the city of New York celebrated last week its 126th birthday by the usual dinner at Delmonico's. More than 300 members and guests were present. It seems to have been intended to do particular honor on this occasion to Rev. Dr. Parkhurst and to William L. Strong, the new mayor, by reason of their prominence in the successful fight made for pure government at the recent municipal election. Both were invited, but only Col. Strong was able to be present. Many prominent bankers and business men occupied the tables, and the guests included statesmen, literary and military men of distinction. Mr. Alex. E. Orr, president of the chamber, occupied the chair, and made a wise address, part of which we transcribe:—

"I doubt not that many minds have been engaged in sifting the tangled masses of derangements and upheavals that have culminated in what will be known in history as the great panic of 1893, and have determined to their own satisfaction the primal cause of all the trouble. With some it was the vicious silver craze; with others it was the warfare that is more or less continuously waged between capital and labor. Others, again, laid all the blame to excessive production, stimulated by the protective influences of the McKinley bill, while others, equally sincere, had chapter and verse without end to prove that it was our gradual advance towards free trade conditions that threw this country upon its beam ends and suspended development.

"It may have been one, it may have been all of these causes combined. Yet I cannot help believing that the paramount menace of the present day to the growth, prosperity and happiness of this fair land of ours comes from a growing tendency to venal and incompetent legislation, both national, State and municipal, which tends to paralyze the moral forces of the nation.

THE EVIL OF VENAL POLITICS.

"I think the lesson is coming to us more rapidly than we realize that the only sure method of warding off these seasons of distress, these periods of national anguish, is to hold our individual interests far enough off from us to enable us to enlarge the range of our moral vision, and see to it that only men of tried integrity, capacity and patriotism are sent as our representatives to legislative halls or appointed to municipal office. Believe me, it is selfishness that largely lies at the root of all this evil; the love of power, the love of gain, the love of ease, this egoism on the part of the classes more than the masses, which dulls and deadens our senses to the sacred rights and duties of the franchise, and too often throws the nominating power, and therefore the controlling power, into the hands of demagogues and place-hunters, whose only object is to acquire money in some way without honest labor, or to perpetual partisan political power for selfish ends, without any concern whatever for the important—the vital—interests confided to their care."

Some of the plain and forcible remarks of the mayor may well be commended to the residents of Toronto at the present time:—

"The Chamber of Commerce was the cause of the great reform movement started in the city of New York. It was a victory of good government, a victory for the people. I have had a great many gentlemen call on me making suggestions to me just how my office should be run. I do not think anyone called upon me who did not know more about it than I did. I want to say to you, gentlemen, and take you into my confidence, because we are all members of the Chamber of Commerce, and talk to you just as if we were sitting down there in the Chamber of Commerce. A gentleman called to see me the other day, and he said: 'Strong, I want to talk to you about one of our departments in the city of New York,' and he went on to tell me about the corruption in that department, and when he had got through I says, I have thought in my deliberations upon that subject in regard to the commissioners you have mentioned, that nobody would suit me just as well as yourself. I am going to appoint you to that position. The gentleman replied: 'My dear sir, I cannot take that position; I am going to take my family to Europe very soon. I shall be gone eight or nine months, and it would be impossible; you must find somebody else; I am not the man.'

"In about two days another gentleman came in. I think I have seen that gentleman's face here this evening. In talking with me about another department he went into details, and when he had finished I said to him, 'I was thinking over that department last night, and I made up my mind you would be exactly the man to fill that position.' 'No,' he says, 'I am not able to take that position.' I said, 'You must take that place.' He said. 'Colonel, I cannot do that. I am going to Alaska next March and am going from Alaska to Japan and China.'

DECENT MEN MUST TAKE OFFICE.

"Now, gentlemen, I want to say to all of you and all of your peers in the city of New York, that it is just barely possible the corruption that we have seen for the last five or six years may have arisen from the fact that it was impossible to get such men as are before me now to take the positions that the mayors had to give. And unless you gentlemen and your peers in the city of New York—understand, I do not mean to say the Chamber of Commerce has all the talent in New York—will take charge of the departments in New York for the mayor whom you have elected and help him to redeem this city, this city cannot be redeemed.

"I have nothing more to say, except that if all of you want good government in the city of New York, and want the affairs of this city administered on just the principles that you have all so thoroughly talked of in the last six weeks, I want you, gentlemen, to come into my confidence, and any man that I select from this table right here or any other part of the city of New York, I want him to make the same sacrifice for the city of New York that the mayor has made." (Applause).

THE STORY OF SOUTH AFRICA.

Mr. George M. Theal, of the Cape Colonial Civil Service, the author of an elaborate "History of South Africa," has been invited to prepare a sketch of that region for the *Story of the Nations Series*. The parts of this sketch relating to the Cape Colony, to Natal, the Orange Free State, the South African Republic, Zululand, and Basutoland, are mainly taken from the larger work; but they are brought down nearly to the present date. Nearly, but not quite, for the account of the British Chartered Company's territory stops short of the outbreak of hostilities which has led to the occupation of Matabeleland. The early history of the nominal Portuguese annexation of the country south of the Zambesi, and the actual Dutch colonization of it, together with the southward pressure of the Kaffirs, interesting results of which were the Zulu and the Matabele military organizations, is indispensable to a thorough understanding of the present state of things in South Africa.

A preliminary word ought to be said concerning certain words in common use in South Africa, but whose exact significance does not seem understood elsewhere. The term Boer, for instance, means in Dutch a tiller of the ground, but in South Africa is applied to cattle breeders, as well as to agriculturists, and is frequently used in the plural form to signify the whole rural population of European blood speaking the Dutch language. By kraal is meant a cattle-fold. The word is a corruption of the Portuguese "curral." It is also used to signify a collection of either Hottentot or Bantu huts, as these are usually built in a circle, within which the cattle are kept at night. The Dutch word lager means an enclosure for protective purposes, such as a circular wall of stone, or a number of wagons lashed together. By burgher is meant a European male, no matter where resident, who is in possession of the franchise, and liable to all public duties. It corresponds to the civis Romanus of old. Heemraden are burghers appointed by the government to act as assessors in the district courts of justice. A landdrost is a stipendiary magistrate who administers justice and receives the revenue of the district. Another Dutch word, volksraad, signifies the people's council, an elected legislative body. Three Bantu words are in common use, viz., induna, an officer of high rank under a Zulu chief; calabash, the hard rind of a gourd used for various purposes, such as water-pots, jars, dishes, basins, snuff-boxes, etc., and tsetse, a fly whose sting destroys domestic cattle, but has no effect upon wild animals. Curiously enough, the tsetse disappears from a district when the game is exterminated or driven away. We add that the word assagai, meaning the javelin or dart, used by the Hottentot and Bantu in war and the chase, is a corruption of the Portuguese azagaya, which was derived from the Latin hasta. —*The Sun.*

PHILADELPHIA FIRE UNDERWRITERS.

The Philadelphia Fire Underwriters' Association held its annual meeting at the Continental Hotel a week ago, and re-elected a new chairman, executive committee and officers. This was the first year of the organization under the new plan—that is, having the officers of the companies represent it in the association instead of agents, as heretofore. The scheme has proved a perfect success, and will be continued for another year.

General Robert B. Beath, chairman, addressed the association and declared that the year just closing had been more satisfactory than 1893, and that all the companies could show better returns for business. It was decided not to make any changes in the rules governing the association, or to recommend any increase of rates. The organization will endeavor in the future to improve all class of risks, thereby keeping the premiums down and lessening the liability of loss. As an instance, last week the rates were increased upon electric light plants. The owners were then told of improvements that could be made at slight cost, in consideration of which the premiums would be reduced.

Philadelphia has been gridironed with trolley wires during the past year, but the underwriters have not increased the rates of insurance on the streets over which the lines of electric cars run, and no rise in premiums is contemplated. The railroad companies will be compelled to provide safeguards from fire, thus saving the insured from unnecessary expense. This decision is regarded as very important, and will be commended to insurance associations in other cities.

The Underwriters' Association is composed of all the companies doing business in the city, whether Pennsylvania or foreign corporations. The following officers were elected for the ensuing year: Executive committee, General Robert B. Beath, United Firemen's, Philadelphia, chairman; George L. Reger, of the Franklin; Eugene L. Ellison, Insurance Company of North America; A. J. Wright, Springfield Fire and Marine Insurance Company; E. O. Weeks, Ætna, of Hartford; W. S. Newell, German American (New York); J. R. Mullikin, Merchants, of Newark, N.J.; E. B. Clark, Phœnix Assurance, London, England; George Wood, Royal Insurance Company, London, England; S. D. Hawley is treasurer and Charles A. Hexamer secretary.

CONGRESSIONAL APPROPRIATIONS.

The book of Congressional appropriations shows that the total specific appropriations of the first and second sessions of the last Congress amount to $391,156,005; the permanent appropriations, $101,074,680; making a total of $492,230,685. The new offices created are 474 in number, at an annual cost of $654,712, and the offices omitted and abolished are 923 in number, at an annual cost of $1,235,992, making a net reduction in number of 449, and in amount, $581,179. The appropriations by bills for the session were as follows:—

Agricultural	$ 3,223,623
Army	23,592,884
Diplomatic and consular	1,563,918
District of Columbia	5,545,678
Fortifications	2,427,004
Indian	10,659,565
Legislative, etc.	21,305,583
Military Academy	406,535
Naval	25,327,126
Pensions	151,581,570
Post Office	87,236,599
Rivers and harbors	11,643,180
Sundry civil	34,253,775
Deficiency	11,811,004
Miscellaneous	577,956
	$391,156,005
Permanent appropriations	101,074,680
Total appropriations	$492,230,685

The Next Division of Profits

Of the **Canada Life Assurance Company** TAKES PLACE AS AT

31st December, 1894.

Insure Now AND SECURE

ONE FULL YEAR'S PROFIT.

Sun Life

Assurance Co. of Canada . . . . . .

HEAD OFFICE—MONTREAL.

THE prosperous condition of the Sun Life of Canada is doubtless due to its fair treatment of policyholders, its unconditional policy and prompt payment of death claims.

NOTWITHSTANDING the financial depression of the year 1893 it was the most successful in the history of this progressive company. The New Business completed is greater than that secured by any other Canadian Company in one year, and must be gratifying to policyholders and directors alike.

Substantial increases have been made in **New Business, Total Business in Force, Income and Assets.**

WHAT IS THE 7% Guaranteed Income Bond
OF THE
North American Life Assurance Company ?

It is a contract that may be secured by the payment of 15 or 20 annual premiums, and should death occur within the period selected, the full face of the Bond becomes payable.

If living at the maturity of the Bond, the guaranteed cash value, as also the surplus, may be withdrawn, or a paid-up Bond (payable at death) taken out for its full face, and in addition a 7% Guaranteed Life Annuity secured; in which case the surplus is also payable.

Pamphlets explanatory of this admirable plan will be given on application to any of the company's agents, or to

DECISIONS IN COMMERCIAL LAW

IN RE BOULTON & Co.—The English Court of Appeal holds that where by the articles of association of a company it is provided that the directors who do not acquire their qualification shares within a specified period (*e.g.*, three months) from their appointment, shall be deemed to have agreed to take such shares from the company; directors who do not acquire the qualification, and resign within the time so limited, are under no obligation to take shares from the company, and cannot be placed on the list of contributories in respect of any agreement implied by the articles.

DAVIES VS BOULTON.—Vaughan Williams, J., decides that an article providing that "any mortgage, bond, debenture, trust deed or other security bearing the common seal of the company, and issued for valuable consideration, shall be binding on the company, notwithstanding any irregularity touching the authority of the directors, or officers or servants of the company to issue the same," will protect a *bona fide* holder for value of a debenture of the company without notice, though the seal may have been affixed at a meeting of directors not properly summoned, or at which an inefficient *quorum* was present, and though the resolution to issue may have been passed by the vote of a director disqualified by the articles from voting as an interested party.

GUILD & Co. v. CONRAD.—It was decided in the Court of Appeal in England that a promise to be liable primarily or in any event for a debt for which another person is already or is to become liable, irrespective of the question whether or not that person fails to satisfy that liability, is an indemnity and not a guarantee, and need not be in writing.

IN *re* ENNIS, COLES v. PEYTON.—F. E. and B. enter into a joint and several bond to secure the repayment of a sum lent to F., and it was stipulated that if E. or B. should die, F. should within a month procure some other person to enter into a further bond to the like effect. E. died, and a fresh bond was executed by F., B and H. in the same form as the former bonds, with the additional proviso that it should not release the heirs, executors, or administrators of E., or in any way alter, vary, or lessen their liability, or affect any right or remedy of the lender under the former bond, B. and H. having paid the debt in equal shares claimed against E.'s estate for half the amount. Held, by the Court of Appeal in England, that E.'s estate was liable for one-third only of the amount paid by B. and H.

A MEMORIAL volume of the late Peter Redpath shows that the benefactions of that excellent Montreal gentleman to McGill University amount to $445,000. He provided that seat of learning with a museum costing $140,000 a library building $135,000, and gave a capital sum of $130,000 for the maintenance of these. Then he endowed a chair of mathematics, subscribed thousands to various college funds, and gave to McGill a collection of books on English history.

CARSLEY v. MCFARLANE.—The defendant wrote to the plaintiffs, who had forwarded for acceptance a draft for the amount due them, saying that he was unable to accept at present owing to failure in business, but that if the plaintiffs would wait three months he would have his business settled by that time and would pay them. In a subsequent letter, referring to the plaintiffs' claim, he said: "I will be able to attend to you about 1st April." The defendant being sued, set up the Statute of Limitations, but the Supreme Court of Nova Scotia held that these promises were a sufficient acknowledgment of the debt to take the claim out of the statute, and the Supreme Court of Canada agreed.

INTERESTING TO LANDLORDS

Is a tenant responsible for the burning of a house which he occupies? Such is the rather peculiar question raised in the case of Labbe vs. Murphy, which will shortly take up the attention of the Superior Court in Montreal. The facts are thus stated: The plaintiff, Labbe, rented a house from the defendant last May, and before taking possession paid the rent for the entire year in advance. After a month or so's occupation the house was burned down, and the plaintiff and his family had to seek shelter elsewhere. The suit is brought to recover the rent paid in advance from the date on which the fire took place until May of next year. The defence has filed a counter plea which is strange to the law annals of Quebec, and the settlement of which will be awaited with not a little interest. The counter plea is a claim against the tenant for the value of the house destroyed, on the argument that the law always presumes that the tenant is responsible for a fire until he or she can prove otherwise. A supplementary plea has also been put in on the strength of a clause in the lease which makes the tenant responsible for the delivery of the premises leased to the landlord at the expiration of the lease in as good condition as when he entered into possession, less the necessary wear and tear.

There's Style about this fastener for the back of a Brace. It is Small Neat Durable. Can't Break Away. And unlike the multitude of big tin Clasps that are objectionable to the wearer who don't want his back covered with metal. It's a seller every time.

9 Toronto St. Toronto, Ont.

Mercantile Summary.

AT Hensall, Ont., Mr. Taylor, of Stratford, last week opened up a grocery in the west store of Miss Carlisle's block.

SINCE the season opened 1,319,000 boxes of cheese were shipped from New York and 1,725,000 boxes from Montreal. Some of the New York export was also Canadian product sent from that port for convenience sake.

OVER seventy coasting vessels entered at the custom house here yesterday, says the Halifax *Herald* one day last week, principally from P.E. Island and Newfoundland ports. The imports embraced 31,560 bushels potatoes, 16,565 bushels oats, 2,800 bushels turnips and 17,500 qtls. cod.

A NEW and handsome hostelry, to be known as the Hotel Quinte, is to be opened about Christmas time in Belleville, and promises to be a credit to that city. The manager will be Mr. Charles Hunter. The hotel, with its furnishings, etc., will cost between $60,000 and $70,000. A separate building has been built for sample rooms. The names of the officers and directors of the company erecting it are: H. Corby, president; W. H. Biggar, vice-president; U. E. Thompson, secretary-treasurer; directors, John Bell, D. Waters, Thomas Richie, and Col. Lazier.

Special Notice to you who Sell Oysters in Bulk

This season we are giving away to every purchaser of 1,000 oyster pails a very handsome window display card with the words "Bulk Oysters for sale here," printed in gold leaf on heavy morocco board, size 19x12, or a handsome chromo lithographed in fifteen colors. The retailer will find it greatly to his advantage to use these cards as a notice to the passing public that he is in the oyster business.

We are offering this special inducement to obtain your trade, as our facilities are 60,000 per day, and every pail guaranteed uniform, perfectly liquid tight and second to none on the market. Our prices are as low as any. Send in a trial order for your pails and get one of these cards.

Mercantile Summary.

THE executors of the estate of the late James Norris, St. Catharines, offer for sale the steamer "Persia," and flour mills A and B, situated on the Welland Canal. The date of the sale is fixed for December 19th next, and it will be held in the rotunda of the Toronto Board of Trade building.

THE late J. T. Warrington, jr., of Belleville, commanded in a high degree the respect and esteem of those with whom he came in contact in business. His funeral at Belleville last week was attended by representative men from various parts of Canada. The Butter and Cheese Association, at a meeting held in Montreal, passed resolutions of sorrow at his death and appointed delegates to attend his obsequies.

IT was in the spring of the present year that W. D. Baird disposed of his tailoring business and opened a store for men's furnishings at Trenton. This seems to have been a mistake, for it appears that he was obliged to mortgage his stock for $2,000 three weeks ago. Now he assigns to E. R. C. Clarkson. Two years ago J. J. McIndoo left Peterboro and opened a general store at Caledonia. In August last he presented a statement of affairs showing a surplus of $3,800. Now his assignment is announced.——W. R. Dunn has been trading as a grocer under the style of Wilson & Co. in

CANADA PAPER CO.

15 Front St. West, TORONTO | 578 Craig Street, MONTREAL.

Mercantile Summary.

Woodstock since September last, but is not popular with his customers. Owing to this he has not built up a paying business. Besides, his expenses were by no means light. He has assigned to W. A. Campbell.

SEVERAL changes of premises have been made by John Ringer, during the past three years he has been a grocer in Toronto. Apparently he has demonstrated the truth of the old adage about the rolling stone. Lately his creditors have been obliged to push him, which has resulted in an assignment to Henry Barber & Co ——R. H. Bullen, a city butcher, has had his stock mortgaged to his landlord, and now we hear that he has been sold out.

THE premises of Edy Bros., photographers in London, are in charge of a bailiff. For some time past the members of the firm have not worked amicably together. Beside the rent of $400, past due, they owe $1,500, but it is thought that creditors will not lose anything. ——A tailor at Comber, Ont., named R. D. Crawford, also has assigned.——Another assignment is that of A. B. H. Carl, general storekeeper at Norland. Four years ago he went thither from Minden, but has not it seems improved his location. Last month he gave a chattel mortgage to his father for $1,100. This will probably be contested by general creditors.

Mercantile Summary.

A RUMOR having got abroad that the celebrated St Rollox Chemical Works are about to be closed, and that 600 men will thereby be thrown out of employment, the Glasgow *Herald* is authorized to state that there is no intention of closing the works. The works were temporarily closed during the coal strike in Scotland, owing to the want of fuel, but since then have been restarted, and are turning out as much material as ever.

AT a recent fire in the Western Canada Loan Company's building at Winnipeg, says the *Free Press* of that city, No. 2-52058 Remington type writer was thrown from a second story window into the yard in the rear, and was picked up from the rubbish and ice (the winter had set in there). The wooden case of the machine was found to be entirely destroyed by fire, water, etc., but the machinery was in good running order, and, beyond a general shaking up was found to be intact, and in a condition to work.

— IN 1892 the Royal Pulp and Paper Mill was organized at East Angus, Quebec, by Mr Wm Angus, with a nominal capital of $300,000. Of this sum $257,000 has up to date been paid. The company took over the pulp mill owned by Angus & Buck, and a very expensive paper mill was added to the pulp machinery. To this large expenditure the present embarrassment of the corporation is largely attributed. Room was lacking in the Canadian market for their product at current prices. The new company was also met at the outset with the severe commercial depression in the United States, where a large proportion of its pulp product would under ordinary circumstances have been sold. The concern was reported as prosperous up to a certain point. Some weeks ago one of the large stockholders offered his shares in the Montreal market, and not getting any bidders the price was put at 50 per cent., with no better success. This step appears to have brought about distrust among creditors, and Newton Miles took proceedings to recover the sum of $1,200. This precipitated matters, and the company decided to liquidate. Mr E. P. Buck, president of the company, will probably be appointed liquidator. Meanwhile it is not expected that the company will go out of existence, but a reorganization is regarded as probable. Mr R. H. Pope, M.P., is vice-president; Mr. Barret, general manager, and Mr Wm. Angus is the Montreal representative of the company.

INCORPORATION by letters patent is being sought by the "Mica Boiler Covering Co.," of Toronto, capital $50,000.

—A COMPANY is being formed in Perth, Ont., to make car and locomotive wheels. Capital, $50,000. Among the promoters are Messrs. J. M. Balderson, W. H. Churchill and W. C. Wilson.

THE business of the estate of the late James Maclaren in Buckingham and elsewhere, is to be carried on hereafter by the "James Maclaren Company," which it is intended to incorporate.

THE New York, New England and Canada Company will ask Parliament to extend its charter to cover the construction of a railway from Halifax to Yarmouth, N.S.

THE sheriff has advertised for sale the effects of B. Van Horne, baker, Vancouver, B.C.——A bailiff is in possession of the hotel premises of Fred. Guiment, Winnipeg.

A QUEBEC letter of Tuesday says ocean steamers were still leaving that port for Britain and for Sydney, and that it is the latest date at which sea-going vessels have ever left Quebec.

THE general stock of Macdonald & Hall, at Massey, in Algoma district, is advertised for sale next week, and the dry goods stock of Thos. Kelly, at Peterboro, will also be offered for sale on Tuesday next.

THE proposed amalgamation of the New Glasgow Iron, Coal and Railway Co., Ltd., and the Nova Scotia Steel and Forge Co., Ltd., will be discussed by the shareholders at a meeting to be held in New Glasgow on the 12th inst.

THE St. John boot and shoe firm of W. H. Francis & Co., who assigned several weeks ago, are now endeavoring to arrange a settlement at 45 cents in the dollar cash. The liabilities are $5,725, of which $1,490 are preferred.

THE merchants of Dartmouth, N.S., are likely to close their stores three nights each week during the winter months. At present, Tuesday and Thursday evenings are closing nights. Wednesday will probably be the evening chosen in Dartmouth.

ACCORDING to the Seaforth *Expositor*, Thos Case, of that town, has purchased the pork packing establishment of Messrs. Robb Bros. and will begin work in it at once.——Mr. Thos. Brown, of that place, intends going out of the implement business, and will sell out his entire stock to-morrow (Saturday) afternoon by auction.

THE general stock of W. B. Barnard & Co., at Sutton, was sold at 55 per cent. Next week the men's furnishing stock of W. D. Baird, Trenton, is to be sold.

TOO much credit given by John A. Ford, butcher in Toronto, has resulted in his assignment.——James Pope, a Toronto grocer, has enjoyed good credit, always paying his bills. His assignment is something of a surprise.

DECREASES in customs collections seem to be the order of the day in November in Canadian cities; Toronto, Halifax, Hamilton, London, Belleville—all decreases; Brantford a slight increase compared with November, 1893.

BURGLARIZED T. W. Murray's store on Sunday; decamped on Monday; arrested on Tuesday; tried on Wednesday, and in the penitentiary Friday for five and seven years. This, says the Perth *Expositor*, is the way justice is meted out to evil-doers at North Bay.

AT a meeting of the Winnipeg Retailers' Association held the other day, a constitution and by-laws were adopted and forty new members were added to the roll. At a future meeting several questions of interest to the retail trade will be discussed. The membership fee has been placed at $1 for merchants and 50 cents for salesmen.

A CELEBRATION was held last week at Lyster, in Megantic county, Que., and another at St. Philomene, in Lotbiniere county, the occasion being the opening of a new line called the Lotbiniere & Megantic Railway. At St. Philomene, the present terminus of the road, a banquet took place, at which Hon. Mr. Joly and several of the Quebec ministers delivered addresses.

A SHOEMAKER in Quebec named Jean Lortie, who has recently been trying to arrange a compromise at 25 cents on the dollar, has now assigned. The liabilities are $2,800. —— A grocer in the same ancient city, C. Martel, for some years in business in a moderate way, is arranging a composition at the rate of 50 cents on the dollar. Liabilities of $2,500 are altogether local.

ABOUT fourteen years ago John Cameron opened a grocery store in Peterboro, and was then estimated to be worth $20,000. Since then he has really never made any money and of late his methods have not been quite "up to date." A continual gradual shrinking took place in his assets until April last, when he was obliged to give a chattel mortgage for $1,000. Now his assignment is a matter of regret.

—THE London branch of the Canadian General Electric Company is hereafter to be known as the London Electric Company, Limited. The capital is $300,000.

THE Great Northern Railway is doing a largely increased freight business from eastern points to New Westminster, Nanaimo and Vancouver. Several carloads a day are being received.

A. G. DUMONTIER, previously a clerk, started on his own account in the dry goods line in Ottawa in the spring of 1893, and is now reported insolvent. He had been sued several times of late.

A LARGELY attended meeting of the creditors of F. L. Chenier, grocer, Hamilton, was held last week in that city. A great deal of sympathy was expressed for Mr. Chenier, who closes an honorable career of upwards of 35 years as a retail grocer in the disastrous manner indicated by these figures: The liabilities are $23,903.55, assets $16,669.35; deficit, $7,214.20. The estate will be realized. Mr. Chenier having no offer to make, Messrs. Alexander Turner, F. H. Lamb, H. L. Bastien and J. J. Scott were appointed inspectors.

SOME Quebec Province events are undernoted: E. Denis, general storekeeper, who removed to Rigaud, Que., from Henryville two years ago, is reported to have assigned. He had at starting the custom of the Patrons of Industry, but this was subsequently withdrawn. ——At St. Barnabé, L. D. Heroux, general merchant, has fyled consent to assign at the demand of the Hochelaga Bank. He has been in business a dozen years, and quite recently claimed a fair surplus.——Berthiaume & Co., dry goods, St. Jerome, whose troubles, due to a serious fire, we lately noted, have arranged a compromise at 57½ cents, and will go out of business.

A LIST of recent failures or difficulties in Montreal includes the following: H. F. Hoerner, hats and furs, has assigned. He owes $8,137.——C. Lussier, a shoemaker, whose wife did a little millinery business, has also assigned with liabilities of $1,500.——N. Gauthier & Co., builders, who failed several weeks ago, are effecting a compromise at 25 cents on the dollar, on liabilities of $18,500.——Miss Kennedy, a rather prominent milliner on St. Lawrence Main Street, has assigned owing some $7,000. ——J. S. Mayo, jobber in oils, whose business troubles we noted last week, is now reported an absentee, and the court has fixed the 15th inst. as the date for a meeting of his creditors.

CLOTHIERS' TRIMMINGS

59 Front St. West Toronto

It is proposed to form a joint stock company to take over the piano and organ business of L. E. N. Pratt, Montreal, and also to engage in the manufacture of organs, etc., at Huntingdon, Que., in the premises lately occupied by the Cornwall Manufacturing Co. The capital stock is to be $200,000, and the principal names mentioned in connection with the scheme are those of the Hon. A. Desjardins, T. E. N. Pratt, Joel Leduc and G. J. Shepherd.

ST. JOHN BOARD OF TRADE.

The annual meeting of the St. John Board of Trade was held on Monday last, 3rd December, the president, Mr. W. F. Hatheway, in the chair. The secretary, Mr. Cornwall, submitted replies from different boards of trade to the circular expressing the resolution of the St. John board *re* the importance for the Dominion of having its import and export trades conducted over Canadian railways and through Canadian seaports. Among these were the Quebec, Ottawa, St. Stephen, Edmonton, Montreal, Toronto, Winnipeg, Charlottetown and Kingston boards. The departments of Finance and of Railways also sent replies, generally favoring the principle laid down, while Mr. Van Horne, of the Canadian Pacific, forwarded a characteristic letter saying that as his company had a line of railway to St. John, it was manifestly their interest to do what the board suggested.

The report of the council of the board is a very lengthy document, covering about two and a half columns of a daily newspaper. There were sixteen meetings of the board and thirty meetings of the council during the year. Through the influence of the board a number of new agencies [of business firms or companies, presumably] have been opened in St. John while information has been published tending to remove apprehensions as to the navigation of the harbor and its approaches, and the situation, etc., of the city; resolutions were passed favoring the formation of a maritime board of trade, and arrangements are now in progress for its organization. A considerable addition to the membership was reported. The report was adopted.

The president in his address claimed for the trade of the city for the year, that it was fully up to that of 1893. The exports of lumber had amounted for the eleven months to $2,692,000, where for the same period last year their value was almost $3,000,000. Much of this falling off was in his opinion due to the general depression of trade the world over. Exports of fish to the West Indies and the upper provinces of Canada have increased considerably. The merchant's week had been a success, he said, as was also the conference of the provincial boards of trade. A maritime board had been decided upon, but the feeling in favor of it seemed to have died out. "If we cannot get a maritime board let us go in for another provincial conference." As to the fast Atlantic mail service, he looked for a battle in 1895 between a fast mail service and a good freight line. The first was intended to capture the through travel now done by way of New York. The other was the service that would benefit Canada the most and the maritime provinces in particular.

The election of officers and a council resulted in the choice of the following:

President—W. F. Hatheway.

Vice-president—W. S. Fisher.

Council—W. H. Thorne, Robt. Cruikshank, Wm. M. Jarvis, John Sealy, John White, G. W. Merritt, W. C. Pitfield, Geo. Robertson, T. S. Simms, C. E. Everett.

The president and vice-president thanked the members for again electing them to these honorable positions for another year.

The following gentlemen were elected the board of arbitrators: Robert Cruikshank, W. S. Fisher, S. Schofield, John McMillan, Jas. F. Robertson and Chas. A. Everett.

Mr. A. H. Hanington moved a resolution that a committee of the board shall be appointed to take into consideration the system of taxation at present in force in the city, and the whole system of taxation, and make such report upon and recommendation respecting as they think advisable, such report to be made as early as possible. In his opinion the fairest system would be to tax real estate only, or with the exception of a few things. He spoke of the unfairness of the present law, which extracted taxes from everything and drove people out of the city. Mortgages on properties in St. John escaped, but on properties outside of the city were taxed. Shipping should not have to pay taxes. The present law drove shipowners out of the town. The resolution was carried.

—William Pemberton Page has retired from the "managing editorship" of *Money and Risks*, the new insurance paper published in Toronto. Another case of "if I was so soon to be done for, wonder what I was begun for." However, *Money and Risks* is still "going" on talent. It has "a capable staff of editors and contributors for each department."—*Investors' Ex.*

MAILING CASES

We beg to notify the trade that we have been appointed sole agents in Canada for the United States Mailing Case Co. and the Boston Mailing Case Co. These two companies control all the mailing case patents. By the use of these cases one can send samples through the mail. Circulars giving full particulars sent on application.

THE SITUATION.

Among the questions mentioned in President Cleveland's annual message to Congress there are some of special interest to Canada: the amount payable to Canadian fishermen under the award of the Paris Tribunal of Arbitration, the Alaska-Canada boundary delineation, and the protection of food fishes in the waters which divide the Dominion of Canada from the Republic. The payment of $425,000, in satisfaction of all the British sealers' claims, is recommended. Congress will require to make the appropriation. France and Portugal, of all nations not directly concerned in the award, have given their adhesion to it. No actual information on the Alaskan boundary is given. The protection of food fishes in the waters that divide the two countries is a work worthy to employ the joint efforts of the two peoples. Protection cannot efficiently be secured by either country while it acts alone, inasmuch as its security depends upon what its neighbor may do or refuse to do. It is much to be desired that the joint effort now being made will be successful. In one of the lakes forming the international boundary, each of the two countries is vieing with the other to prevent its being placed at a disadvantage. While the rivalry is confined to mutual destruction, the future of the fisheries will not be hopeful.

On the tariff question, President Cleveland has naturally, at present, not much to say. He is still in favor of putting coal and iron on the free list. If anything could tend to make the United States the centre of iron production, it would be the freeing of the raw materials of which iron is made. The President favors the removal of the discriminating duty on sugars, the produce of bounty-paying countries. The sugar refineries appear to have anticipated what was coming, and several of them ceased operations, alleging that free sugar would prove their ruin. Senator Smith takes the ground that this is an attempt to coerce Congress; and he says that as they shut down on the pretence that the Senate will pass the free sugar bill, he is in favor of taking them at their word and passing the bill with all possible expedition. It may not pass nevertheless.

The Earl of Jersey's report on the Intercolonial Conference minimizes the obstacles which the treaties with Belgium and Germany oppose to the establishment of differential commercial relations by the colonies among themselves. He does not regard them as blocking the way to such an arrangement; but Great Britain could not participate in any benefits which it might confer. In order to give the colonies a free hand, he thinks it may not be necessary to denounce the treaties, as it might be possible to induce Belgium and Germany to consent to the abrogation of the restrictive clauses. A maximum tariff for foreigners and a minimum tariff for the different parts of the empire, the Earl apparently does not favor, but points out that it would involve a fundamental change in the policy of Great Britain. On the Canada-Australian cable question, he favors such action as would be likely to bring success. He is of opinion that to use Neckar Island in laying the cable would be a necessity, the span of 3,280 knots on the Fanning Island route being of unprecedented length. For strategetic purposes, it is pointed out, two routes must offer superior advantages to one, especially as the existing line depends upon its land connections on European and Egyptian territory, while the proposed new route would have the advantage of passing through British territory. In dealing with the mail service, the Earl looks to both the Atlantic and the Pacific sections. In aid of a swift line between Canada and England, he suggests a transfer to it of about £52,000, now paid yearly to the Cunard and the White Star lines, which go to New York, and there is mentioned a contribution of £75,000 for the benefit of the Pacific line, and in addition an Admiralty subvention, on account of swift cruisers. What action will be taken on the report, if any, is quite uncertain.

Comptroller Eckels recommends a new scheme of banking intended to take the place of the National banks in the United States. It is evident that he looks at the question as President Monroe did when there was a proposition to charter a second bank of the United States, in 1814, namely, through government spectacles. His proposal that the banks should be at liberty to issue notes not secured by the deposit of public stocks, as at present, to the extent of one half their capital, is based on the condition that the banks should "recompense the Government by relieving the Treasury Department of the current redemption in coin of the Treasury issues." Surely the Treasury Department does not need to put out a flag of distress in this way. The proposal is equivalent to a stay law, which he Supreme Court has held not to be a violation of contract. While the banks are not to deposit stocks to secure their circulation, they are to deposit legal tenders or Treasury issues made under the Act of 1890, to one half the amount of their stock. The proportionate amount of the deposit would be the same as at present, less 10 per cent., and instead of being in bonds it would be in legal tenders or issues under the Act of 1890. On the legal tenders they would get no interest, and would thus be so much worse off than they would be if they deposited bonds. Against this set off the benefit of a note issue not absolutely secured, and what remains? The comptroller proposes a modified return to the old Safety Fund system, apparently all unconscious that not only was the fund exhausted, but the Government of the State of New York lost $2,500,000 by the scheme. It may be true, as he says, that 5 per cent. suffices for current circulation, but to make that the limit of a Safety Fund is not the road to safety. And this fund to be derived from a tax on bank issues up to 5 per cent. The object of the plan is, that during the life of the bank the Government issues deposited shall "be removed from current presentation for redemption"; in other words, as we have said, a stay law. In this scheme of Bank and State, there is a good deal too much State.

Mr. Marston, of the firm of Low, Marston & Co., in a letter to the *Times*, touches on a phase of the copyright question which deserves more attention than it has received. If Canadians could print cheap editions of English books and send them across the Atlantic to compete with original editions, a grave injustice would be done to British authors. Mr. Marston suggests that Anglo-American copyrights should be excluded from the British market, and their introduction made a penal offence. Such an act would be no more than English authors have a right to demand, since their claim to protection in their own country is beyond dispute. If this would satisfy British authors, there is no good reason why their wishes should not be gratified. As Canada does not accept the Berne Convention, the Americans can, if they like, protect themselves by a similar law relating to Canadian reprints of British books.

Tenders for the Canada-Australian cable have been received, and they are all within Mr. Fleming's estimate of the cost. They are, of course, mere trial estimates, intended to ascertain the cost of the work, and this purpose they will fully serve if they are found to come from responsible parties. Before they can be acted upon the necessary financial arrangements between the interested countries will have to be definitely settled.

UNDESIRABLE IMMIGRANTS.

We have seen an Old Country letter, whose contents or the name of whose writer we are not at liberty to give, complaining that whereas Canadian Government agents have for years been coaxing Old Country people to come out to this country, assuring them that there is lots of room, lots of land and prosperity galore, "yet when they do come they cannot find employment of the proper kind and are often in straits for both money and sympathy." And the writer is bitter upon the "misleading inducements" which she declares have been offered to "very respectable people."

It would not be safe, possibly, to justify all that immigration agents have said about this or other colonies in their anxiety to get settlers from among emigrants from the British Islands. But we have little doubt that the phrase "employment of the proper kind" explains a great deal of the disappointment of this lady's letter. A man who has been twenty years in a particular line of life, who knows no other kind of work, leaves a certainty in London, England, for a chance to improve his position out in Canada. He finds on reaching Montreal that his services are not needed in his usual way of work. He comes further west, puts up at a dear hotel, and presenting his testimonials, looks for employment of his accustomed kind. He is offered work of another kind and refuses it. He is not wllling to learn anything new or to take what comes. Hence he falls to cursing the colonies and regretting the day he ever left Old England.

Such people are not of the sort that "The Colonies" care about. They are not the sort to build up any new country. They remind us of the reply made on one occasion by *The Colonies and India* to a correspondent whose brother had experienced in Australia some "such lack of sympathy" as the lady above quoted remarks of Canada; thus: "Your brother appears to have been very foolish. He should have husbanded his money better when he reached the colonies. He seems to have made the mistake of imagining that colonial experience is learned by leaning against a tavern bar in Sydney or Melbourne and drinking colonial 'tangle-foot.' Your brother's B.A. degree may become of assistance to him in the colonies, but he may as well stick to the billiard-marking a little longer. Or if he could get a job at bullock-driving it might do him more good, perhaps."

THE LOWEST TENDER.

The work of building the Balsam section of the Trent Valley Canal has fallen by tender to a citizen of the United States, and some murmurs of disapproval have arisen among Canadian contractors in consequence. They lean strongly to the view that Government contracts ought not to be awarded to foreigners. This sentiment is natural, entirely business-like, and has some color of warrant as well as provocation from the example of the United States. In that country no Canadian need apply either for a government contract or for work upon one. He is disqualified by law. Our contractors would have Canada adopt a similar rule, and it is understood that a bill will be introduced at the next session of Parliament to bar aliens out from the competition for Government contracts. The people may be humored by the representation that such a law would be an expression of national spirit or retaliatory temper, but they will hardly miss the point that it would be a very valuable concession to a small group of their fellow-citizens. It would be a good thing for our own contractors, it would make us even with the United States, and would tend to keep within the country the profit on the business of constructing our public works. This is all that can be said in its favor, and this is not enough. Decidedly against such a law would be its tendency to make the cost of our public improvements needlessly high. It would be a check to economy, and just now nothing could be more unwelcome to the country and the Government. Since the cutting down of our tariff we have abundant reason for close sailing, and for husbanding every cent of our diminished revenue. New openings for expenditure, new undertakings entered upon for public or party policy, are now confronting us.

With our means on a small scale, and our ideas on a grand one, it behooves us to get everything done at the lowest price at which we can get it done well. The Government's problem is to make our money go far. If the lowest tender principle is sound, why place national limits on it? We cannot successfully copy the United States. That country probably loses little by its selfish exclusiveness. In its large area and population the number of contractors is sure to be great, and the competition among them keen. That circumstance of itself would perhaps be an effective barrier against Canadian contractors, even if there were no law to keep them out. At all events, with so many men bidding for all its works, the United States can hardly fail to get them done at the lowest cost. The country therefore suffers little in consequence of the restriction to citizens of all contracts for Federal undertakings. In Canada it is otherwise. Home competition for Government contracts has not got down to the fine point that it has south of the line. If we had a law to exclude outsiders, we should lose the benefit of the close figuring that United States contractors have learnt, and we should give an impulse to wide figuring among our own contractors. It is undoubtedly desirable, other things being equal, that the profit on all public contracts should be kept at home, but if the lowest tender idea is rigidly followed out, even if it does lead us across the line, there will be little profit to carry out of the country.

The denial of Government work to foreign contractors would not of itself be any benefit to domestic labor, for neither home nor alien contractors engaged on public works here hesitate to bring in cheap labor from the United

States. The placing of the contract with the lowest tenderer, no matter where he comes from, is better both for politics and economy. The man whose tender is the lowest in a brisk competition can hardly afford to include a corruption fund in his calculation. The lowest tender is one of the guarantees of purity in politics. Let it be retained, irrespective of source.

UNPAID BOOK DEBTS.

Many a man, when he sits down in his store to calculate how he is to meet a note coming due next week, says to himself: "Heavens! what a lot of accounts I have outstanding, and what good are they as a prompt asset?"

Sometimes the shopkeeper will go the length of adding up the footings of his ledger, and there will break from him a groan something like this: "Dear, dear! I had no idea. Here I have two thousand dollars on my books, some for two months, some for nine months past, accounts all the way from $100 down to $5, and not $200 of it can I rely on to help me out of a hole."

And as he thinks over the matter, with a heart as heavy as lead, he blames the people who have got his goods, he blames the system of credit, or may be he blames fate. Does he ever think of blaming himself? Who permitted the people to get the goods without the money? Who has allowed six months or nine months to pass without dunning for these accounts? You did, Mr. Smith, Mr. Brown, Mr. Jones or Mr. Robinson, who sit thinking with dismay of that note you have to meet, and with shamefacedness of the request you are going to make for a renewal.

No use to sit down and moan over it. Not a bit. Nor to depend on cash sales making up the amount you need by the 15th—it is now the 6th. Go to work. Make up those accounts afresh. Get out your horse and buggy. Go around personally, with your pride in your pocket, and ask these debtors to pay you something, in cash, notes or produce. Don't take "No" for an answer, and don't be put off with the regulation excuses. You owe that note, and your good name is at stake.

Besides, how do you know that the house you owe will grant the renewal? The very fact of your asking it may make them suspicious of you, and you may get a writ instead of the usual outwardly civil reply. Far better to work night and day for a week. Far better offend some of your long-winded credit customers by plain speaking in the way of an earnest dun, than humiliate yourself and disappoint the importer whose goods were sent you in reliance on your written promise to pay.

CAN TANNING BE MADE PROFITABLE?

At the meeting which finally completed the formation of a tanner's section of the Toronto Board of Trade, a radical proposition was made by Mr. Mooney, the Montreal hide and leather inspector. We are not quite clear as to the nature of Mr. Mooney's offer "to buy up every tannery in the Province of Ontario." Mr. Mooney is supposed to represent a Montreal syndicate. But that there is a group of capitalists who would buy all the old tanneries in this province, we cannot conceive. With all due deference to the black leather men, we respectfully suggest that there are not half-a-dozen tanneries in the province with modern premises and the most modern appliances. Does the syndicate propose to purchase outright the interests of the Ontario tanners, leaving them free to enter the tanning industry again and compete for their old business relations? Or is it Mr. Mooney's object to form a company—we hardly dare call it a trust—of the Ontario men themselves, closing the small tanneries and issuing certificates to each former proprietor, which shall allow him a share of the profits of the whole concern, without regard to the individual earnings of the tannery which he owned? This in the end might prove the most profitable transaction, but it involves a great deal of labor, is doubtfully legal and may not give the returns which its promoters would expect. The United States Leather Co. has been successful, but from the circumstances of this fact it is not safe to conclude that a Canadian Leather Co. formed on the same basis would be equally remunerative.

But something should certainly be done to ameliorate the condition of black leather tanners. When hides are dear and leather is selling for little, how can tanners expect to make money? Will the formation of a section of a board of trade usher in a new order of things? Not if the past is a fair criterion of the future. The press has been furnished with a statement that "a resolution was adopted advancing the price of leather all around 10 to 15 per cent. on present prices." After the meeting was over we asked a tanner who was present at it if he would sell leather at the old price. "Certainly," he replied. When questioned as to the meaning of this resolution, he responded that it simply meant that in the opinion of the section prices should be advanced, and every tanner ought to do his best to get a higher price for his output. According to this interpretation, the resolution adopted by the body means very little, and we doubt whether any tanner considers the motion more seriously than the one whose opinion we give. The present time is inopportune for an advance in leather, at least so far as the stock consumed by our shoe manufacturers is concerned. Buying for the fall season is over, while the shoe houses have not begun to purchase seriously on spring account. So long as the present competitive system is in vogue prices will be cut when the consumptive demand is weak.

If we abolish competition what are we to place in its stead? It has been suggested that an association be formed for selling purposes, after the manner of the Canadian Packers' Association. Under this arrangement the tanners would not lose their identity in production, as under a trust, but goods would simply be sold, more cheaply perhaps, through the same source, having houses in the different distributing centres of Canada. Some restraint might well be placed on the quantity of leather offered in the home market, in order that our markets might not be made subject to glut, and that an export trade may be built up and developed. To form such an association would be no easy matter, but when once organized the returns, in the opinion of some large Ontario tanners, would be a sufficient reward for the labor expended. A board of trade section may successfully deal with questions of freight, of classifications, inspection and similar matters, but it is vain to expect the all important question of values to be settled in the same way.

A WORLD'S FAIR FOR CANADA.

The movement having for its object the holding of an international exhibition at Montreal is a natural and eminently proper one. If lesser European countries, having far less that is worthy to show the world than we, opened with *eclat* their "World's Exhibitions," and if the island of Jamaica held an exhibition which was a success, why should not Canada? The proposal is made that the projected World's Fair shall be held in the year 1896, in the city of Montreal, and that it shall continue for six months, say from May to October. We should think that the four months of June to September inclusive would be a suffi

ciently long period. Besides, these are the best months of our climate for fair weather, which is an important element in the impression made upon foreign visitors. Of course if the autumn tints of our landscape are to be included as a feature of the show, October is the month for them.

As to what we should be able to offer to visitors on such an occasion: It is of course understood that in a "World's Fair" much of the display consists of products or manufactures of other countries than the one in which the fair is held. And if people abroad should doubt whether Canada can show anything worth coming a long way to see, they may be reassured by the prospect that other countries will be represented in the display. The fair being held in Montreal, within easy reach by our own lines of ocean steamers or by rail from Boston and New York, Halifax and St. John, the same objection would not prevail as kept many transatlantic visitors and exhibitors from attending the Chicago Fair, namely, that it was too far inland. There is strong reason to believe that not only the United States and Great Britain, but France, Germany, the Low Countries and the West Indies, as well as Australasia, China and Japan, all of which countries possess a growing interest in Canada, would respond promptly and practically to requests to be represented by exhibits.

The project is one which may well appeal to the patriotic pride of all Canadians. What our country needs is to be better known abroad. Montreal is a city of which any nation might be proud, and which rarely makes a disappointing impression on the visitor. Having reached it, and finding swift and comfortable means of reaching thence, by rail or water, the great lakes, the Thousand Islands, Niagara Falls, the western plains and mountains, not only commercial visitors, but tourists, hunters, prospectors might, without much effort, be induced to wander further afield. The favorable impression made on those English people who journeyed in Canada from Quebec to Calgary, and from the Ottawa to the Detroit, during the British Association meeting in Montreal in 1884, has not yet been effaced. And the visit of a much larger body of persons of varied nationalities, less purely sociological students, would be likely to result in still wider advantages to this country.

Such an occasion as a World's Fair in our lovely summer weather would go far, besides, to undo the impression as to the rigors of Canada's climate which has been spread abroad by winter carnivals and the like. Visitors who are disposed to move about should be invited to see our summer resorts, our orchards and vineyards, our fields and fruit farms, as well as our factories and mines. They might also be shown our sports and pastimes, our colleges and schools—whatever, in short, would tend to convince them that we are an up-to-date community in other matters as well as trade and manufacture. The utmost liberality on the part of our various governments and the amplest provision by our great transportation lines would be properly directed towards making such an occasion one of extreme value to Canada.

GOLD IN NOVA SCOTIA.

A marked falling off is disclosed by a comparison of the results of workings of gold mines in Nova Scotia in 1894, compared with previous years. Returns, which have been procured in advance of publication from the Mines Office by the *Canadian Mining Review*, are printed by that journal in its November issue. They are for the year ended 30th September last, which is now the date of the ending of the fiscal year of the department. Thirty-nine mills have made reports, and the period of their working varies from twelve months, in the case of nine companies, down to one month. The total rock crushed was 47,330 tons, and the quantity of gold obtained 17,022 ounces, the value of which is, say about $290,000. By reason of some incompleteness in the returns the *Review* estimates that from 500 to 700 ounces may possibly fall to be added to the quantity of gold given above.

We cannot give to-day the individual returns of the various mines or companies. It is stated, however, by the *Review*, that there are only three mines reporting yields above 1,000 ozs.; these are the Antigonish Gold Mining Company, of Stormont, with 2,111 ozs., 10 dwts.; the West Waverley Gold Co., Ltd., with 1,860 ozs., and the Richardson Gold Mining Co., with 1,564 ozs. "It is noteworthy in this connection that each of these companies is working low grade ore, the average of the Antigonish Co. being 6.7 dwts., of the West Waverley 4 dwts., of the Richardson 5.2 dwts. Of the total number of tons milled (47,330), West Waverley milled 9,312, or 20 per cent. of the whole; these three companies milled 21,575 tons, or 45½ per cent. of the whole, and produced 5,535 ozs., or 32½ per cent., practically one-third of the whole production of gold. The average value of the rock milled by these companies was 5.14 dwts., and the width of vein extracted varied from 12 inches at the West Waverley mine to 9 feet at the Antigonish and nearly 20 feet at the Richardson. These figures are certainly instructive, and bear out the words of the Inspector of Mines, Dr. Gilpin, at the united meeting of the Canadian mining societies in July last, as follows: 'The prospect of an increased output from the small, rich leads is not encouraging. In the future the greatest returns must be sought for in the mining and milling of low grade ores.' The figures quoted certainly confirm Dr. Gilpin's views, as the average of the 47,330 tons milled is but 7 dwts."

There are some encouraging features, however, and the prospects for the year 1895 are regarded as much improved. An extremely rich though small lode has been discovered in Sherbrooke district. "The Richardson Company in Stormont have completed extensive improvements in their plant, enabling them to handle much larger quantities of ore, and are also opening a large vein 1,500 feet west of their workings. New mills of large capacity are being erected at Caribou and Mooseland upon large deposits of quartz that mills from $4 to $8 per ton. The continuation of the rich pay chute of the Thompson-Quick property has been cut by the Golden Lode Company at South Uniacke, and is now being vigorously worked, returns showing that the high grade character of the roll (from 6 to 10 ozs. per ton) is well maintained. A large mill has been erected at Cochrane Hill, but has not yet been started. The once famous Salmon River mine shows a return of 271 ozs. for eight months. The Oldham mine, which had a production of over 3,000 ozs. in 1893, shows only 536 ozs., having been practically idle since February, 1894." The County of Guysboro shows, this year as well as last, the largest production.

AN ALLURING SOCIETY.

A yellow fly sheet is being thrown into the doors of Toronto houses headed with the query: "Do you pay rent?" It goes on to suggest that a man need pay no rent if he will only become his own landlord by joining the First Toronto Starr-Bowkett Building Society No. 1. "Subscriptions received every day and Saturday evenings. Shares, 12c. per week. Entrance fee, 25c. per share. Rules and pass-book, 25c." Then the public who may read this dodger are requested to note the following advantages gained by joining this society—whose literature, by the way, has

no name signed to it, but which is quite ready to take anybody's money.

> The full commercial value of property advanced *free of interest, commission or premium, to members only*
> No fines in case of sickness
> Your house is purchased with its rent.
> Females and minors may become members
> It is an *absolute certainty* that every member will in turn have his advance.
> Members have complete control and elect directors and auditors annually.
> Established by authority under the copyright rules and system of the Starr-Bowkett Co. of London, England.

Possibly the originators of this company deemed the sentence last quoted enough to captivate anyone. A thing must be all right in the estimation of some people if it hails "from London, England, don't you know." Let us hear, then, what an English authority has to say about the system on which this new candidate is to be conducted. Everyone who knows anything about English building societies has heard of Arthur Scratchley, M.A., whose treatise upon them is a standard work. This is what he says about the Starr-Bowkett system:

"Well-wishers to the industrious class must look with regret at this fungus excrescence on the excellent principles of a building society—which substitutes the gambling element for honest thrift, benefits one man at the expense of many and creates delusive hopes.

"This mischievous system, which deprives the members of the regular legitimate interest they should receive from year to year on their savings, should be treated as a public scandal and ended at once, either by judicial decision or by the strong arm of the legislature."

But in case we should be told, as people often say now-a-days, that such ideas are antiquated and have been superseded, that Scratchley wrote years ago and the world has advanced since, we will take a later authority. Suppose we take the report for 1885 of the Chief Registrar of Friendly Societies for Great Britain, page 12. That official states:

"Another serious evil is the gambling in appropriations, especially when indulged in by societies themselves." In his report for 1886 he directs attention (page 54) to those who "flood the country with mushroom societies, apparently for what they can get as commission and for the sale of professedly copyright rules. The amount of money lost, directly and indirectly, by Starr-Bowkett societies is enormous."

"In addition to 199 societies insolvent," says Whitaker for 1889, "72 societies [Ballot and Sale societies, we presume], mentioned in Mr. Starr's work on Starr-Bowkettism, are not to be found in the Government return to the end of 1886."

So much for the Starr-Bowkett principle, which may do very well for people who desire to gamble by means of that kind of a society, but is not to be commended to simple-minded working men saving for a home. Next, who are the parties that propose to demonstrate "some of the happy results of co-operation" if people will pay in their quarter dollars at the start, and their 12 cents a week—females and minors invited, too? Are the projectors of this First Society No. 1 ashamed to put their names to the hand-bills they issue? If they are, we submit that they can scarcely be held fit exemplars of the happy results of co-operation with other people's money.

THE BANK OF BRITISH NORTH AMERICA AND ITS RETIRING MANAGER

It seems appropriate at this time, when as we last week showed, there is a change of general managers to dwell a little more fully upon the career of the retiring chief and the history of the Bank of British North America.

Mr R. R. Grindley entered the service of the bank in London, England, in the year 1854, at the age of twenty three having previously had several years' banking experience in the Old Country. Proceeding to Canada, he joined the staff of the branch of the bank at London, Ont., where, in 1858, he was removed to Montreal to undertake the duties of general manager's clerk under the then general manager Mr Thomas Paton. In 1863 he was appointed manager of the bank in St John, N B., which position he occupied until 1870 when he was promoted to the management of the Montreal branch. On the retirement of Mr Charles MacNab from the supreme management in 1876 Mr Grindley received the appointment of general manager, from which position he is now about to retire, to the general regret of the court of directors and staff of the bank, as well as of its shareholders, as recently expressed in a circular addressed to the various establishments of the bank by the secretary of the head office in London England. It will thus be seen that Mr. Grindley has completed a service of over forty years, which have been passed in untiring work and devotion to the interests of the bank, and to those of Canada, his adopted country, to which he is so warmly attached.

The Bank of British North America, which has been looked up to in Canada not only as a thoroughly representative institution, but one which has always borne the British characteristic of conservatism and strength, was originated in 1836 by the following gentlemen in London, England, all of whom were interested in the welfare of Canada, and some of whose names are still well remembered in this country, viz George De Bosco Attwood, Esq., of Abingdon street in the city of Westminster; Edward Blount, Esq., of Bryanston Square in the county of Middlesex, and Robert Brown, Esq., of Cheapside, in the city of London; also Sir Robert Campbell, of Argyle Place, county of Middlesex, baronet; William Robert Chapman, Esq., of Leadenhall street, and James John Cummins, Esq., of White Hart Court, in the city of London. In 1840 the bank was incorporated under a royal charter, under which, and in conformity with the banking laws of Canada, it has conducted business ever since.

At the time the bank was first started a great wave of financial trouble and mercantile depression was sweeping over this country, and it is now a matter of history that the influx of the 1,000,000 stg paid-up capital of the bank from Great Britain gave a turning point to the fortunes of Canada. Sir George Cartier, than whom no one in Canada was better informed regarding the wants of the country, which have been alluded to, has on more than one occasion drawn attention to the great public service rendered to the colony by the founders of the British bank at that critical time.

The capital of the bank is £1,000,000 sterling in fully paid shares of £50 each, and a reserve has been accumulated of £275,000. The number of shareholders exceeds 1,150. The following figures from the report of 1893 may be of interest as showing the extent of the bank's transactions. The deposits and current accounts form an aggregate of £2,074,956. Circulation, £222,830. Bills payable, &c., £1,248,813. Bills receivable and other accounts, £3,888,992. The dividend paid for 1893 was 7½ per cent.

The London office is at 3 Clement's Lane, Lombard street, E.C., where the directors are Messrs. J. H. Brodie, John James Cater, Gaspard Farrer, Henry R. Farrer, Richard H. Glyn, E. A. Hoare, H. J. B. Kendall, J. J. Kingsford, Frederic Lubbock, Geo. D Whatman. The secretary is Mr. A. G. Wallis.

The head office in Canada is in St James St., Montreal, but there are sixteen branches scattered over the Dominion, namely, at London, Brantford, Paris, Hamilton, Toronto, Kingston, Ottawa, Montreal, Quebec, St. John, Fredericton, Halifax, Victoria, Vancouver, Winnipeg, Brandon. In the United States the bank has agencies in New York, 52 Wall Street; in San Francisco, at 124 Sansome Street.

THE STATE OF TRADE

From a merchant in Prince Albert, Saskatchewan Territory: "Business generally has been fair in this district during the past three months and I have had my share. We expect a dull winter but are hopeful in regard to next year's business."

From an importer in Charlottetown, P.E.I., comes this: "I am not 'in the dumps,' but 'simply negligent,' and 'believe in Canada's future.' Although the immediate business outlook is not Al, enclosed find my subscription to THE MONETARY TIMES for the current year."

A resident of Brandon, Manitoba, who believes in his country, writes briefly but firmly thus: "Times are not very brisk in Brandon this year, but collections are fairly good, and I have unlimited confidence in the future prospects of this the great wheat country—the most promising Province of the Confederation."

A Port Arthur shoe dealer writes: "Since receiving your enquiry and reminder a month has gone past, but I think this letter [and enclosure] will prove that I for one must not be counted 'in the dumps.' Between illness and rush of business your postal card and request was not attended till this instant. I hope to receive THE MONETARY TIMES many years yet."

A Montreal commission house indicates its view of the mercantile situation in the following way: "We are busy enough in a way, with

ing hard enough, the dear knows, but with all our activity and industry there is precious little to show for it in the way of profit. If you make an offer to-day somebody else is very likely to have a lower one in to-morrow to knock the stilts from under you, and so it goes. Values have been so long on the down grade that any stiffening seems hopeless. Let us all pray that wheat may take a rise, for when that takes place some other goods may possibly go up."

When the Intercolonial Railway was projected, it was thought to be the one thing nedeed to make this a great country. When the C.P.R. was broached, that in its turn was to make us a great country, and indeed its completion was a great stride towards it. To-day there are people who swear that the deepening of waterways to twenty feet is the greatest thing yet for this great country. And residents of Manitoba consider the Hudson Bay Railway one of the great needs of the time. Here is a line from Mr. E. F. Hutchings, of Winnipeg, manufacturer: "As to business, it is fair. Collections are quiet on account of the low price of wheat, and I do not expect much change until we either get the Hudson Bay Railroad or a rise in farm produce. The former, I understand, your paper does not believe in, as intimated in one of your editorials a few years ago. However, I trust you have changed your mind and have become enlightened as to the matter, and that you are now favoring our scheme for pushing this road to the bay at an early date."

Mr. J. H. Still, manufacturer of tool handles, etc., St. Thomas, sends the following: "I have been a subscriber to the same for nearly thirty years, and would not like to be without it. In reply to your questions, I have found collections good, and see no reason to feel blue as to the future. While business has fallen off slightly from last year, still it is fully up to any former year. I consider the McKinley bill in the United States was a Godsend to Canada, and I hope the Americans will enact a few more of the same kind against us. This is just what we require to put us on our mettle. I may say that I am able to compete with the United States in the British market in my goods; and I ship to that country about a carload a week. In 1882, when I first started in this business, I employed sixteen hands, and now employ nearly one hundred hands. Although the margin of profit is small, yet I have no reason to complain at the net results. There is of course a certain class of people who always cry 'Hard times' whether there is any great occasion or not, like some who always imagine they are sick, when the fact is they bave only eaten too much. A little physic would relieve them. So it is in business. No doubt it has been overdone, and like the glutton with the surplus, disposed of, everything would be salubrious."

CANADIAN COPYRIGHT.

A coincidence that is rather interesting in the controversy now going on between Canadian and British writers on the subject of copyright in Canada, is cited by the *Canadian Bookseller*. Some seventeen years ago. namely, in 1877, Chief Justice Moss, of the Ontario bench, made the following remarks upon the subject in question: "I fear that the state of the law which we find inflicts a hardship upon the Canadian publisher. . . . It is not very violent assumption that every American publisher who treats with the British author for advance sheets of his work will stipulate for the use of the author's name to restrict a Canadian edition."

That precisely what Chief Justice Moss predicted has come to pass, is but too well known, but if proof were needed it is proved most conclusively by the following statement recently made by Mr. Richard B. Marston, a well-known London bookseller: "In nine cases out of ten, when buying the market for an English book [the United States publisher] insists on Canada being included."

FARM YARD SWINDLING.

Those who through grasping greed aim to make money dishonestly at the expense of unsuspecting people, are sometimes caught and punished. And it is well that they should be. Two cases, both of farmers, are in point just now. Not long ago a farmer named John Bell, from Richmond Hill, palmed off some very poor apples on Mr. Barron, a Toronto grocer, on the representation that they were first-class, or the same as on the top of one barrel. He was arrested and wanted to pay back the $15 if the Crown would drop the case. He has been committed, however, for trial, and his case comes up before the present Sessions.

Another case is reported from the eastern part of the province. According to a special despatch from Belleville on Tuesday last to the *Evening News*, a farmer of Tyendinaga, named Alex. Coulter, sold twenty turkeys to T. J. Campbell, who in November shipped them to Brown Bros., Montreal. On the 23rd Campbell received a letter from the firm stating that the birds were filled with stones. Upon going to Montreal he found this to be true, and that the turkeys complained of, which were part of a large shipment, were those bought from Coulter. He said nothing about it, however, but during this week Mr. Campbell's brother went to Coulter's farm and bought ten geese, which were delivered in Belleville. They were weighed and then opened, when they were found to contain stones, bits of iron and other heavy material Coulter and his wife were at once arrested and brought for trial. The woman disclaimed all knowledge of the contents of the fowl, but the husband identified some of the bits of iron.

The case has been enlarged until to-day. It is to be hoped that such punishment may be meted out as will tend to prevent such mean swindling. "The best on the outside" is an old dodge, and its dishonesty is of a mild type compared with the basswood ham sort of swindling that would palm off stones and old iron for toothsome turkey.

THE MANCHESTER SHIP CANAL.

It is between eleven and twelve months since the opening of th Manchester Ship Canal, and it is not a success either financially or commercially. Its business does not increase, but of late has even fallen off. If there was a paying business to do there is not sufficient dock equipment. The gross receipts of the canal for a year will be, it is said, less than $400,000, less than is needed to pay interest on the first debentures. The reason given for lack of earnings is the reduction made in rates by the competing railway lines, which has gone to such an extent that there is no longer any decided inducement to use the canal, with all its well-known inconveniences to commerce. If the aim of its promoters was simply to reduce the cost of carrying goods to and from Manchester, that end has been realized, for the time at least for on some classes of cotton goods the rate has decreased three shillings per ton from what it was before the canal was built. But the holders of canal shares and the taxpayers of Manchester, who have paid their money for this $75,000,000 canal enterprise, naturally want to know what is going to be done about it. The debt is $25,000,000; the resources relied on for reducing it have vanished. The corporation of Manchester has found this great sum, and must find more if the undertaking is not to come to a standstill. Five millions are urgently wanted. If they are found the yearly liabilities of the company will be $2,500,000, with a revenue of less than half a million. Some of the shareholders advocate the conversion of the undertaking into a public trust, while others suggest that the united railways should buy the canal. As the *Times* suggests, the shares could probably be bought at half their par value, and the railways could offset interest charges by again raising rates, and utilize the canal to some extent in relieving railway traffic by converting it into a barge canal.

DOMINION GROCERS' ASSOCIATION.

The annual meeting of the Dominion Grocers' Association was held in Toronto on Wednesday, Nov. 28th. There were present: Mr. Hugh Blain, vice-president, in the chair; Messrs. George Childs and George Geoffrion, of Montreal; George Bristol, S. Balfour, M. Macpherson, W. H. Gillard and Wm. Turner, of Hamilton; L. Masuret, London; Wm. Ince, sr., Wm. Ince, jr., J. W. Lang, H. P. Eckhardt, T. Kinnear, W. C. Crowther, W. W. Keighley, of Toronto. The proceedings were of a private nature for the most part and no particulars are given for publication beyond what follows: Officers were elected for the ensuing year as under: President, Mr. W. Gillard, Hamilton; vice-president, Mr. C. Chaput, Montreal. A letter was received from Mr. Hebert, of Montreal, last year's president, expressing his regret at being unable to be present, and stating that his continued illness would prevent any further active interest on his part in the work of the association. It was decided to hold next year's meeting of the association in Montreal.

COMMERCIAL TRAVELLERS' ASSOCIATION OF CANADA.

On Saturday evening last, 1st instant, a meeting of the association was held at its offices, 51 Yonge Street, Toronto, to nominate officers and members of the board of management. Mr. C. C. Van Norman, president, was in the chair. The secretary, Mr. Sargant, read the quarterly report, which indicated an increase in both membership and funds.

Mr. Van Norman, who has held the presidency of the association for two years, declined to be a candidate for a third term, and Mr. Robert H. Gray was chosen president by acclamation. Messrs. James Haywood and R. J. Orr are candidates for the first vice-presidency; Messrs. M. C. Ellis and C. E. Kyle for the second vice-presidency. Mr. I. C. Black was elected treasurer by acclamation.

The candidates for the Board of Management for Toronto are: H. Bedlington, John Burns Wm. Caldwell, R. H. Cosby, J. H. Devaney, E. Fielding, J. B. Gillespie, H. Goodman, A. Hart, R. Ivens, H. Leeson, J. Muldrew, C. H. Murdoch, J. R. Muir, J. McKay, John Orr, E.

E. Starr, R. J. Salisbury, J. Taylor, Geo. West, and G. M. Wright. Nine to be chosen.

Of the Hamilton board, Mr. H. G. Wright was elected first vice-president, and Mr. John Hooper second vice, by acclamation. Messrs W. G. Reid, Fred. Johnston, James Hooper, J. H. Herring, J. Stoneman, W. E. La Chance, T. M. Davis, W. B. Croy, F. Smye, W. T. Hall, T. P. Allen, W. Bremner, George Mathieson, and G. A. Black were nominated for directors. Mr. E. A. Dalley was nominated for the nineteenth time, but owing to ill health, retired.

The directors of the boards of Guelph, Brantford, Montreal, Berlin, and Victoria were all elected by acclamation. At Kingston the candidates are M. S. Sutherland, B. W. Robertson, and W. Dalton; at Winnipeg, Messrs. W. B. McNamara, E. F. Hutchins, W. L. Brock, and H. Miller

A banquet is to be held by the association at Hamilton some time about the new year. The result of the ballot for election of candidates is to be made known on December 28th, on the occasion of the annual meeting in Shaftesbury Hall, Toronto.

A TANNERS' SECTION ORGANIZED

In pursuance of the motion of adjournment at the last meeting of the Ontario harness and upper leather tanners, an assembly was held in the Toronto Board of Trade building on Wednesday of the present week, to complete the organization of a section of the Toronto Board of Trade.

The chair was occupied by Mr. L. J. Breithaupt, Berlin, Ont. The following firms were represented: The Breithaupt Leather Company, Berlin; Lang Tannery Company, Berlin; Bickell & Wickett, Toronto; Bowman & Zinkan, Southampton; Beal Bros., Toronto; King Bros., Whitby; C. Knees, Toronto and Oshawa; P. Lawson, Port Dover; Alfred Lisle, Lindsay; C. J. Miller, Orillia; Newton Bros., Richmond Hill; W. H. McCordick, St. Catharines; J. Welsh & Co., Hastings; Davile Tanning Company, Aurora; W. Paterson, Peterboro'; A. Davis & Son, King; Corson & Perry, Meaford; J. Beck, Stratford; Aiken Bros., Orangeville; J. Bremen, Chesley; J. Weinnert, Neustadt, and H. Porter, Montreal.

Mr. Mooney, of Montreal, made a proposal to buy up all the tanneries in Ontario, but as he had not perfected his scheme it was referred to a committee.

A resolution was adopted favoring an advance in the price of leather all round from 10 to 15 per cent. on current prices.

These officers were elected for the current year: Executive—L. J. Breithaupt and George C. H. Lang, Berlin, chairmen; R. E. Beal and S. R. Wickett, Toronto, deputy chairmen; A. J. Davis, King, and Edgar A. Wills, secretary-treasurer. Inspection Committee—C. J. Millar, Orillia; C. King, Toronto and Whitby, and F. T. Daville, Aurora. Arbitration Committee—James Robson, Oshawa; A. O. Beardmore and W. J. Bickell, Toronto.

RICHMOND BOARD OF TRADE.

There are few things so helpful to the business interests of a town as a really live Board of Trade. But in Canada there are some boards which cannot be so described; they appear to exist only for the purpose of annual elections or an occasional indignation meeting. The business men of Richmond, Que., to the number of forty-seven, have formed a Board of Trade. The initial elections were well contested, which augurs well for the future, and we believe that the new board will not soon lapse into a state of uselessness. The officers elected are: Mr. W. L. Ball, president; Mr. A. J. Hudon, vice-president. Council: J. C. Sutherland, R. F. McKee, H. P. Wales, E. S. Bernard, J. Bedard, W. E. Jones, Jas. Alexander, Hon. H. Aylmer, J. Ewing and R. Sullivan.

ACADIA SUGAR REFINERY COMPANY.

On Friday, November 30th, the second-annual meeting of the Acadia Sugar Refinery Company, limited, which controls the Moncton, Nova Scotia and Woodside (Dartmouth) refineries, was held in Halifax. The statement showed a net profit of $7,693, without allowing for depreciation. No dividend has been declared for the last fourteen months on the $3,000,000 capital.

The statement of the directors is that the prices of sugars on the 1st August, 1893, the date upon which the assets of the old companies were taken over, ruled very high, and the large stocks, both of raw and refined, greatly depreciated in value before they could be marketed. As was expected, Canada did not altogether escape the unprecedented depression which has prevailed in the United States, and this, together with the depreciation in values, has seriously affected the result of the year's business. The loss thereby incurred has now been effaced, and with the revival in business which may be expected the directors look forward hopefully to the future. The directors report that many improvements have been effected and the plant and machinery at the three refineries have been put in thorough repair and they are all at this date in good working order. All the directors retired and were eligible for re election. The old directors were re-elected, J. E. Kenny, M.P., being elected president in place of J. J. Stairs M.P., who retired.

Some sixty shareholders were present. Mr. Jenkins made loud complaints because, while the president and directors had received $8,516 in fees, the company only showed a credit balance of $7,693 and had paid him no dividend. Also he accused the directors of being thoroughly incompetent. Messrs. Kenny, Stairs and Thomson replied to this attack. Then Mr. M. Dwyer backed up Mr. Jenkins and moved some amendment to the report, when Mr. George S. Boak supported the management and said they should be thankful to have done so well. The report was carried, Mr. Jenkins being the only dissentient.

FIRE LOSSES IN NOVEMBER

The fire loss of the United States and Canada for the month of November, as estimated from the daily records of the New York *Journal and Bulletin*, amounts to $12,135,800. This is an increase over the month of December, 1893, and is a larger loss than is shown in any month since then except July. The following table exhibits the losses by months:

	1892	1893	1894
January	$12,564,900	$17,958,400	$10,562,400
February	11,314,000	9,919,900	11,297,500
March	10,648,000	10,632,550	9,147,100
April	11,559,800	14,050,900	11,540,000
May	9,485,000	10,327,100	10,777,800
June	9,265,550	16,544,950	8,282,300
July	11,530,000	12,118,700	16,307,000
August	10,145,300	13,232,700	10,472,800
September	7,879,800	10,508,700	10,149,900
October	13,349,200	11,014,700	8,196,700
November	12,008,700	11,493,000	12,135,800
Total	$120,350,250	$144,340,400	$117,925,400

During last month there were on this continent no fewer than 187 fires of a greater destructiveness than $10,000 each. For example, there were 127 fires where the damage done ran from $10,000 up to $50,000 in each case, and there were 27 whose loss represented from $100,000 to $700,000 in each case

The large and old-established stock fire companies having a good business on their books and a high grade of management seem likely at present to emerge from 1894 with considerable profit, says the *Journal*. For the eleven months the losses are this year nearly $27,000,000 less than for the same period of 1893, and the rates have steadily increased in many sections. "The losses have largely fallen on the surplus line concerns, as in the case of the cotton seed oil mill at Memphis. The largest insurance loss in November—on cotton burned at New Orleans—is almost entirely borne by the European marine insurance companies. The January fire insurance statements will be looked forward to with much interest, and specific companies are already reported as having secured liberal gains in surplus. The current year appears to be the best the fire companies have experienced for a very long period"

BEET ROOT SUGAR

The estimated crop of beet root sugar on the continent of Europe for the year 1894-95, compared with the actual crop of the three previous years, is given in *Licht's Monthly Circular* as follows:

Tons	1894-5	1893-4	1892-3	1891-2
German empire	1,725,000	1,393,374	1,225,331	1,198,159
Austria-Hungary	1,000,000	841,400	892,877	781,626
France	850,000	572,111	588,538	650,377
Russia	620,000	680,000	445,000	551,704
Belgium	275,000	325,000	196,000	180,577
Holland	85,000	73,015	68,970	69,815
Other countries	140,000	111,000	92,000	88,635
Totals	4,675,000	3,895,899	3,428,515	3,501,293

Mr. Licht has issued his customary approximate estimate for the coming 1894-95 crop under the usual reserve, showing an excess of 780,000 tons over the crop which has just come to a close, and a still greater excess over those of two preceding years

ORANGES

Last year about five million boxes of oranges were exported from the State of Florida This season everything points to fully as large a movement At present the fruit is not in very good condition, the result of excessive rains in the south, but an improvement may be expected in a few days' time The best fruit in Toronto is quoted at $2.50

per case, with some extra fancy worth $2.75. A year ago there was a dearth of green fruit in this market, and a strong consumptive demand in consequence sprang up for oranges as soon as they arrived; but at present apples are plentiful, and this somewhat reduces the value of oranges. The same holds good of the English and American markets. In New York good fruit is quoted at $1.75 to $2.00 per box, while in London quotations range from eight to ten shillings (say $2.00 to $2.50) per box. This price hardly admits of a profitable export trade, and it is not probable that many American oranges will be sent across the Atlantic on these quotations. Mediterranean oranges will reach New York about the close of the month, but cannot be expected here before the first weeks of the New Year.

ECONOMY IN STEEL RAILS.

A process for re-rolling steel rails has recently been patented by Mr. E. W. McKenna, late assistant general superintendent of the Chicago, Milwaukee & St. Paul Railway. By careful tests, the *Engineering News* tells us, Mr. McKenna ascertained that a rail wears out by deformation of the head and not by actual loss of metal. Sections of 60-pound rail, removed from the track and weighed, were found to have lost only 0.117 to 0.135 pound per yard in ten to fourteen years of service. He, therefore, devised a process by which the worn-out rails are heated in a furnace and the deformed heads are re-rolled into the proper form. The loss of transverse section in this re-rolling is about two pound per yard, of which part is gained as elongation, leaving the net loss only one-half pound per yard for oxidation and the same amount for loss in crop ends. By this process, which is said to be inexpensive to carry out, a steel rail of 75 pounds or heavier can be renewed from five to fifteen times before its section is so greatly reduced as to make it necessary to scrap it. "If Mr. McKenna's invention proves a practical success, the rail mills will have to close up or turn to other products. The demand for rails for renewals is what the rail mills have been chiefly relying on since speculative railway building came to an end."

FOR GROCERS AND PROVISION DEALERS.

John Whyte & Son are slaughtering 100 hogs a day at their Mitchell factory.

The *Sun* says that a shipment of German refined sugar will be soon received in St. John, N.B.

The Collingwood meat-curing factory began operations a week ago, and is very actively engaged.

Egan Bros., grocers, St. Thomas, have dissolved partnership. Mr. P. L. M. Egan continues the business.

Mr. R. G. Moore, for a number of years traveller for E. Adams & Co., London, opens a grocery business in Aylmer this week.

A farmer in Dundas county received from a cheese factory for milk of his cows $1,800 this summer. His cows were Holsteins.

Mayor Girardot, of Sandwich, is said to have 40,000 gallons of this season's wine in his cellars, nearly double the quantity he made last year.

The Hamilton Distillery Company will apply to Parliament for an Act conferring upon the company certain powers respecting the creating and issue of bonds.

The journeymen bakers in Amsterdam have been out on a strike. Bread has been scarce, and the master bakers have been selling it only under police protection.

Sheriff (on the morning of the execution).—"Was the prisoner impudent when you told him to get ready for the scaffold?" Deputy.—"Er—he told me he'd be hanged if he would."—*Buffalo Courier.*

The Bobier Produce Company, of Exeter, shipped a carload of eggs packed in air-tight cases to the East Indies last week. This shipment is only an experiment, and if it proves successful more will follow.

Mr. Highfli—"Where is that 'Book of Etiquette and Complete Letter-Writer?'" Mrs. H.—"What do you want of it?" Mr. H.—"I want to write to the grocer to tell him I can't pay him."—*New York Weekly.*

Mr. George Matthews' new pork packing establishment in Hull is almost completed. Next week the manufacture of lard will be commenced in the special department for that purpose, and in a month or so operations will be started in the cutting and curing department.

The cheese salesmen of the Ingersoll district entertained the buyers to a banquet on Tuesday evening. The efforts of the salesmen to be entertaining were very successful, and about one hundred guests sat down to the supper. Such events as these do a great deal to relieve business life of its monotony.

Mail advices from Demerara to November 15th (Weiting & Richter) as follows: The dry season continues; there have hardly been any showers during the fortnight, and the weather on the whole is favorable to reaping operations, while rain is badly wanted for the young cultivation. Returns from the canes are very good at present.

Mail advices just at hand report the shipments of sugar from Philippine Islands during 1894 at 815,712 peculs to Atlantic ports of United States and Canada, 48,000 do. to California and Pacific Coast, 912,911 do. to Great Britain, 53,739 do. to Spain, 957,750 do. to China; total, 2,788,142 peculs, against 3,883,988 in 1893 and 3,570,748 do. in 1892.

A number of Ottawa men have gone into speculation of buying turkeys for the British market, and they are buying up all that they can get in that vicinity for the Christmas markets. It is said to be a good speculation, as it is seldom that turkeys can be bought in England below thirty or thirty-six cents a pound, while just now they can be bought in parts of Canada at from eight to ten cents.

The following is the regular monthly statement of the stocks of several leading spices held in first hands December 1, with comparisons:

	1892.	1893.	1894.
China cassia, bales	12,450	21,900	19,650
Batavia cassia, bales	4,572	4,800	8,095
Nutmegs, cases.....	4,880	4,300	4,050
Pepper, bags.....	39,840	58,362	77,381

—*N. Y. Journal and Bulletin of Commerce.*

FOR DRY GOODS RETAILERS.

Going to press—the tight corset.

Many black gowns are seen in New York opera boxes this season satin, moiré, gauze, chiffon, etc., all have their turn.

"I suppose they will roast me and then pull my leg for a dinner," remarked the fat turkey as the oven door hid him from view.

Wholesale houses are taking stock. Soon the profits of the year will be known—if there be any—and merchants will learn the nature of their reward for their year's toil.

Soft shades of pink, blue or green, toned down to an indescribable odd appearance, which gives them the name of antique, prevail in some very choice selections of next season's silks.

The Indian hemp, a textile plant of some value, which has been found growing wild in Manitoba, near Rounthwaite, is to be tested at the Manitoba experimental farm at Brandon.—*Manitoba Free Press.*

As a general thing it may be safe to say that stocks are low. Manufacturers, jobbers and retailers are not carrying more than their trade requires. Every rule has an exception, and the exceptions to this rule must repent their folly.

A minimum estimate of the world's cotton crop by the *Textile Mercury* places it at 9,850,000 bales, while a maximum estimate by the same authority says 10,250,000 bales. Is it not little wonder that prices of cotton goods are lower than they ever were before?

A prominent King Street dry goods store had an effective window display of underwear and hose the other day. The foreground consisted of natural wool underwear, with a pair of black half-hose on each suit rolled to the heel, while the background was formed of half-hose, black and natural wool, hung upon rods alternately.

An old country letter says that preparations are being made in English and Scottish mills for great activity in demand for woolen dress goods when the new American tariff comes into force on 1st January. Some unusually large orders for these goods have been placed on American account; two of them are said to be for 50,000 pieces each.

When it was announced that the New York *Dry Goods Economist* contemplated improvements, we were at a loss to conceive what was meant. The *Economist* has long been the best dry goods paper in America. With a new dress of type which it donned last week, and which is one of the improvements referred to, it distances its competitors, and surpasses itself.

The Milltown mill of the Canada Colored Cotton Company is now running full time and manufacturing some new lines of ginghams, oxfords, zephyrs and crinkles of a class not hitherto made in the Dominion. The mill has been refitted and remodelled for this special work, new English carding and weaving machinery having recently been erected. The old hands are nearly all back to work.—*St. Croix Courier.*

At the sale of seal skins in London, Eng., last week, there were sold 128,470 Northwest Coast skins, 16,030 from Alaska, 27,300 from Copper Island, and 16,030 from the Lobos Islands. The condition of the skins which were offered was not first class. The opening demand was directed exclusively to Northwest Coast skins, which declined 20 to 25 per cent., at which figures the competition was active. The collection of Alaska skins brought the usual prices. Copper Island and Lobos Island skins sold at a decline of 18 to 20 per cent.

The dry goods merchant as a rule gets the bulk of the holiday goods trade. And upon this class of trade there are generally fair profits to be made. But what long weary days are those just before Christmas. The store is crowded, and there is but little opportunity to make sales; one must simply hand out the first thing called for. There is a distinction between making sales and selling articles asked for. The former are the more profitable transactions. In order that you may make the most of the holiday trade, draw it out early in the season by timely advertising and display.

HARDWARE AND METAL TRADE NOTES

Mr. J. H. Reid, of Chatham, is seeking inducements from Berlin for the establishment of a land roller factory there.

The first barrel of "coal oil" was commercially used in 1826. In 1883, 38,820,306 barrels of that product were consumed.

Galt manufacturers are thinking of sending conjointly a miscellaneous carload of manufactured goods to the Australian market

Cast iron blocks are being tried in some of the most frequented streets of Paris, instead of the granite blocks usually placed alongside tramway rails.

James Watson & Co., Glasgow, write: "There is again no new feature to report regarding the Scotch pig iron market. Over the week prices are rather easier and a fair business has been done. The manufactured trade of the district is dull."

Sir Charles Tupper recently delivered an address before the Royal Scottish Geographical Society. In the course of his remarks, he said that iron ore, of every variety and richness suitable for steel, was present in the greatest abundance in Nova Scotia, as well as in Quebec and Ontario. And, apart from the growth and prospects of the iron industry of Canada, he should like to direct the attention of English and Scotch iron-masters to the advantage of these deposits as an alternative source of supply to Spanish ores. Their occurrence in Nova Scotia, or within easy reach of tide water, ensured cheap transportation all the year round.

The Cleveland *Iron Trade Review*, in making a forecast of the season of 1895, thinks that the requirements of Bessemer ore in that year will be greater than in any year preceding, and that the call for non-Bessemer will be the smallest in years. "Aside from the encroachment of steel upon iron, lumber has been rapidly displaced by steel sidings and steel beams. Steel railroad ties displace wooden ties; steel pit posts are going into mines—but the story is too familiar to repeat. The point is that 7,000,000 to 8,000,000 tons of Lake Superior Bessemers are likely to be required in 1895, if the expected pace is attained in the country's gradual return to normal consumption. The non-Bessemer output—about 1,000,000 tons this year—is likely to be less in 1895; at all events it need not be considered in this connection. In 1892, with a total production of 4,444,041 gross tons of Bessemer pig, upwards of 7,000,000 tons of Bessemer ores were consumed, of which the Lake Superior contribution was about 5,500,000 tons. With nearly 6,000,000 tons of Lake Superior Bessemers shipped in the season just closing, it can be appreciated that an 8,000,000 ton prediction for next year is not over-sanguine, if no industrial set-back intervenes."

PRESCRIPTIONS FOR DRUGGISTS.

Toronto wholesale merchants report that their trade is none too active.

The London auction of shellac, on the 4th inst., resulted in unchanged prices.

A cable from London advises an advance of 10 per cent. in the price of musk at private sale.

The auction sale of Java cocoa in Amsterdam, 11th prox., will include 1,695 bales, mostly of fine quality.

A Florence, Ont., druggist, through carelessness, sold poison instead of a certain medicine. He was fined $20 and costs.

Tommy.—"When I'm a man I'm going to be a soldier." Mother.—"What, and be killed by the enemy?" Tommy.—"Oh, well, then, I guess I'll be the enemy."—*Yale Record*.

Kingston druggists are discussing early closing. The best drug merchants of the city are said to favor the idea, but there are some who believe in holding on to the old system.

The New York *Reporter* lists opium, cocaine, quicksilver, gum chicle, D. C. shellac as advanced, and acid citric, caffeine, balsam Peru, oil anise, Texas serpentaria as declining in value.

From the London sales of cocoa butter to-day we learn that about previous prices were realized. The result of the Amsterdam sale was slightly lower prices.—*N. Y. Journal and Bulletin of Commerce*

London advices state that exporters of caffeine are besieged with instructions to ship as much as they can get at once but supplies are only coming in from the makers in small quantities, and slowly

Druggist—"I suppose your druggist charged you about $5 for this prescription It's nothing but about half a cent's worth of salt and water."

Customer—"Indeed! How much are you going to charge me?"

Druggist—"That'll be $2."

During the year 1895, the Amsterdam cinchona bark auctions will be held on the following named dates: Jan. 24, Feb. 28, March —, April 4, May 9, June 13, July 18, Aug 29, Sept —, Oct 3 Nov 7, Dec 12 A schedule of dates has been arranged for the London bark auctions, but as it is subject to alteration we refrain from publishing it

Cables received from Constantinople advise a further advance in the price of opium, 10s. being now the quotation. The market there is also reported as rising, with indications of some further considerable purchases for account of the Dutch Government. While prices have not advanced in this market, holders are naturally firm in their views

There are at least three modifications of phosphorus: (1) Ordinary octahedral or stick, or B. P. phosphorus, sp. gr. 1.823 at 20 degrees Centigrade, ignition point 60 degrees Centigrade; (2) Amorphous or red phosphorus, sp. gr. 1.964 at 10 degrees Centigrade, ignition point, 250 degrees to 260 degrees Centigrade; and (3) Crystalline metallic phosphorus in violet-black rhomboidal crystals, sp. gr. 2.340 at 15.5 degrees Centigrade.—*Reporter*.

CLEARING-HOUSE RETURNS

The following are the figures of the Canadian clearing-houses for the week ended with Thursday, Dec. 6th, compared with those of the previous week:

Clearings.	Dec. 6	Nov. 29
Montreal	$11,861,838	$11,549,487
Toronto	6,818,585	6,167,151
Halifax	1,240,622	1,168,795
Winnipeg	1,349,685	1,595,210
Hamilton	738,297	664,798
Total	$22,009,027	$21,140,441

Aggregate balances this week, $3,177,604; last week $3,094,117

MUNICIPALMEMORANDA

Pembroke taxes are for Public School supporters 22½ mills, and for Separate School 21½ mills. Pretty high rates

The by-law to raise $25,000 to build a new town hall, a fire hall and obtain more fire appliances, was carried in Carleton Place by a majority of 73, the vote being 194 for, 121 against

In pursuance of the idea of municipal socialism, the town council of Roubaix, France, established a municipal council where goods were sold at cost. The Government of the Republic at once suppressed this drug store. The matter came before the Chamber of Deputies, and when a vote was taken the Government's action in closing the shop was upheld by a vote of 335 against 177, almost two to one. The Socialist movement has not got control of the French House, at any rate.

—A deal of money has been squandered by people on this side the Atlantic putting faith in so-called agents who led them to expect inheritance of fabulous estates in Great Britain because they were of the same name as, or "next-of-kin" to, certain wealthy testators. Some of these swindling agents are getting their deserts. In the Central Criminal Court, Old Bailey, London, a week ago, Col Jacques, the agent for the American claimants to the Townley estates, was found guilty of fraud and sentenced to twenty months' imprisonment at hard labor. A similar sentence was imposed on Howell Thomas, solicitor for Col Jacques, who was convicted of fraudulent practices not long since.

Our Monthly for November is unusually entertaining Mr. Moffat has let himself a little more loose than usual, and says some pungent things, especially in the "Powder and Shot" department and in "This and That." The way in which he works the Manufacturers' Life and the Manufacturers' Accident unexpectedly into every other thing on every other page is as bad as Mr Dick with King Charles head in the memorial. But we warn him, anent his views on assessment insurance on page 664, that he may be garrotted going home some night by a fierce defender of the assessment principle

—The companies whose names follow have declared dividends as stated below:—

Huron and Erie Loan and Savings Co	4½ per cent	half year
Union Loan and Savings Co	4	"
Building and Loan Association	3	"
Central Canada Loan and Savings Co.	1½	" quarter

CANADIAN BANK CONDITIONS DURING THE PANIC.

In the last issue of *Bradstreet's* appears a letter from Mr. Wm. C. Cornwell, of the City Bank of Buffalo, N.Y., referring to some tables in a previous issue, which showed the condition of the banks of the United States as to loans and deposits in comparative periods from the beginning of the panic period to September 1, 1894. This, said Mr. Cornwell, awakened interest as to the condition of Canada during the same period, inasmuch as Canada has more relative similarity to the United States than any other country.

The *Bradstreet's* report, giving loans and deposits May 1 and September 1, 1893, in the United States, and the figures for Canada, obtained from the Government reports, are herewith presented in round numbers together :—

	United States	
	Deposits.	Loans.
May 1, 1893....	$1,780,000,000	$1,854,000,000
Sept. 1, 1893....	1,425,000,000	1,621,000,000
Decrease.....	$355,000,000	$233,000,000
	Dec., 20 p.c.	12½ p.c.

	Canada	
	Deposits.	Loans.
May 1, 1893....	$175,000,000	$227,000,000
Sept. 1, 1893....	170,000,000	224,000,000
Decrease	$5,000,000	$3,000,000
	Dec., less than 3 p. c.	1⅓ p. c.

As will be seen, the letter goes on, during this the strictly panic period, deposits in the United States decreased 20 per cent., while in Canada they decreased less than 3 per cent., and loans in the United States decreased 12½ per cent., while in Canada they decreased 1⅓ per cent. The following are the figures for the total period from May 1, 1893, to September 1, 1894, for the United States and Canada :

EXTRACT FROM GOVERNMENT RETURNS OF CHARTERED BANKS IN CANADA.

Date.	Total deposits.	Total loans.
May 1, 1893.....	$175,832,264	$226,779,737
Sept. 1, 1893....	170,498,322	223,902,513
May 1, 1894.....	179,403,559	223,839,398
Sept. 1, 1894 ...	182,316,266	218,715,963

BANKS IN THE UNITED STATES, BRADSTREET'S TABLES.

May 1, 1893.....	$1,780,248,531	$1,854,074,294
Sept. 1, 1893....	1,425,987,989	1,621,092,232
May 1, 1894.....	1,915,928,188	1,731,858,719
Sept. 1, 1894....	1,935,229,357	1,808,392,462

As to savings banks, while the decrease in the United States during the whole period was something like $113,000,000 out of $1,500,000,000 total deposits (or nearly 8 per cent.), the savings banks deposits in Canada have, as near as figures can be obtained, remained stationary or slightly increased.

It seems that, according to the *Canadian Year Book*, Canada was affected somewhat by the conditions that prevailed in the United States. The four cities of Montreal, Halifax, Toronto and Hamilton show for 1893 a decrease of $3^{68}/_{100}$ per cent. compared with the figures of 1892. "This percentage," says the *Canadian Year Book*, "seems the measure of the effect produced on Canada during 1893 by the financial cyclone which struck the United States." Failures increased in 1893 over 1892, 5 per cent., while the increase in the United States was 51 per cent.

The things that broke confidence in the United States were, first, fear that the government would not maintain gold payments, and, second, the inelastic character of the bank situation, under which 240 banking institutions, whose assets were largely in excess of liabilities, were compelled to suspend, although they were perfectly good and afterwards resumed.

Neither of these conditions existed in Canada. The banks and not the government did the legitimate banking business, and the currency issued by the banks had a most perfect elasticity.

The business conditions in Canada have been somewhat similar to our own during the time under consideration as to dull trade, etc., but with this vital and all-important difference, that she has had no panic. This is due to difference in conditions as to currency. Canada's bank-note circulation, while it increased slightly, was on June 30, 1893 (perhaps our hottest panic date), in round numbers, $33,500,000, and in November, 1893, $38,000,000. Bank-note circulation is limited by the capital of the banks—in round numbers $60,000,000—so that Canada had all this time a wide leeway which was not used.

The New York clearing house certificate expedient saved the United States after her fearful panic from collapsing ruin. The elastic quality of Canadian bank currency, the remedy *before* instead of after disaster, saved Canada *from the panic itself*.

If our business men could be made to feel this, and to take up in thorough earnest the reformation of the currency, as they did the repeal of the silver purchase clause, we could begin to hope for immunity from such dreadful upheavals as that of 1893.

UNITED STATES REVENUE AND FINANCE.

In the message of President Cleveland delivered at Washington on Monday last, 3rd December, he gave some extracts from the report of the Secretary of the Treasury as under: The secretary reports that the receipts of Government from all sources of revenue during the fiscal year ending June 30, 1894, amounted to $372,802,498.29, and its expenditures to $442,605,758.87, leaving a deficit of $69,803,260.58.

There was a decrease of $15,952,674.66 in the ordinary expenses of the Government as compared with the fiscal year of 1893. The amount collected from customs was $131,818,530.62, and from internal revenue $147,168,449.70. The balance of the income for the year, amounting to $93,815,517.97, was derived from the sales of lands and other sources. The value of our dutiable imports amounted to $275,199,086, being $146,657,625 less than during the preceding year, and the importations free of duty amounted to $379,795,536, being $64,748,675 less than during the preceding year. The decline in imports of free goods is thus 15 per cent. and of dutiable goods about 35 per cent. The receipts from customs were $73,536,486.11 less, and from internal revenue $13,836,539.97 less than in 1893.

The total tax collected from distilled spirits was $85,259,250.25; on manufactured tobacco, $28,617,898.62, and on fermented liquors, $31,414,788.04. Our exports of merchandise, domestic and foreign, amounted during the year to $892,140,572, being an increase over the preceding year of $44,495,378. The total amount of gold exported during the fiscal year was $76,898,061, as against $108,680,444 during the fiscal year 1893. The amount imported was $72,449,119, as against $21,174,381 during the previous year. The imports of silver were $13,286,552 and the exports were $50,451,265.

It is estimated that upon the basis of the present revenue laws the receipts of the Government for the current fiscal year, ending June 30, 1895, will be $424,627,784.44 and its expenditures $444,427,748.44, resulting in a deficit of $20,000,000.

The depression in business of this year and last has told heavily upon the inland revenue of the United States. The consumption of distilled liquors seems to have fallen off about 10,000,000 gallons as compared with the preceding fiscal year. According to the report of the commissioner, the quantity of spirits upon which tax was paid during the year was 87,346,834 gallons, about a gallon and a quarter for every inhabitant of the United States. There was a falling off of 750,000,000 in the number of cigars made as compared with the preceding year. These reductions are probably indications of the depression in business.

—The Prince of Wales is very nice about Christmas presents. He sends pretty things to all his old friends and even to acquaintances.

THE UNION LOAN & SAVINGS CO.

60TH HALF-YEARLY DIVIDEND.

Notice is hereby given that a dividend at the rate of 8 per cent. per annum has been declared by the directors of this company, for the half-year ending 31st instant, and that the same will be paid at the company's offices, 28 and 30 Toronto Street, on and after

Monday, the 7th Day of January Prox.

The transfer books will be closed from the 21st to the 31st instant, both inclusive.

By order,

W. MACLEAN,
Managing Director.

Toronto, Dec. 5th, 1894.

Executors' Sale

BY AUCTION.

NORRIS' ROLLER FLOUR MILL,

ST. CATHARINES, ONT., and the

Steamer "Persia."

Acting under instructions from the Executors of the Estate of the late James Norris, of St. Catharines, there will be offered for sale by

Public Auction

—ON—

Wednesday, December 19

NEXT, AT 2 P. M.

In the Rotunda of the Board of Trade, Toronto, the followiog valuable properties:

Mills A and B on the Welland Canal; water power never failing, winter and summer, at a cost of only $200 per annum; modern full roller process and in good runing order. Capacity 700 barrels daily. Grain storage capacity, 60,000 bushels. Large flour and feed storage. Brick cooper's shop, with sheds for storage of cooperage stock. Also large stone warehouse and dock properties, used for the receiving and shipping of general merchandise by water. Entire premises electric lighted with modern incandescent plant, run by water wheels in mills.

ALSO THE STEAMER "PERSIA."

This favorite passenger and freight propeller is in excellent condition, and is a valuable auxiliary to the mills, enabling the delivery of flour at St. Lawrence River points and the seaboard at very low rates of freight.

Terms of Sale:

For Mills—25 per cent. of the purchase money at the time of sale, a further sum of 25 per cent. in 14 days, and the balance can remain on mortgage, payable in equal instalments at 4, 8 and 12 months, with interest at 6 per cent.

For Steamer Persia—One-half the purchase money at the time of sale and the balance payable during the season of navigation, 1895.

For further particulars apply to the executors of the late James Norris, St. Catharines, Ont.

PETER RYAN, Auctioneer,
TORONTO, Ontario.

People of **Good Common Sense** usually appreciate a good article that is honestly made, well finished and up to date. This explains the great success of

GRANBY RUBBERS

THEY WEAR LIKE IRON

SHE SQUARED THE ACCOUNT.

The director of one of our Chicago banks tells about how his wife overdrew her account at the bank last month. "I spoke to her about it one evening," says he, "and told her she ought to adjust it at once. A day or two afterward I asked her if she had done what I suggested. 'Oh, yes,' she answered, 'I attended to that matter the very next morning after you spoke to me first of it. I sent the bank my check for the amount I had overdrawn!'"—*Chicago Record*.

—Mr. George L. Harris is preparing to commence the pork packing business in one of the warehouses on Harris' wharf, Moncton; two or three carloads of hogs have already been purchased.

—Bartlet & Macdonald, of Windsor, have the contract for making the uniforms of the conductors, brakemen, and baggagemen on the L. E. & D. R. R., both on the main line and the L. & P.S. branch.

The Brunette sawmills have an order from the interior for 40 carloads of lumber, on which they are now at work. The lumber, it is understood, will be used in bridge building, replacing the structures swept away by the British Columbia floods last June. The heavy sticks will all be clear of knots and flaws, and of the finest Douglas fir. The order will be filled within a week.

—The value of the inspection of steam boilers is strikingly illustrated in the fact that of nearly 11,000 boilers inspected in the United States during the year ended June 30, 1894, accidents causing loss of life have occurred in but fifteen of them.

—The cut of lumber up the St. John river and on its tributaries will be lighter this winter than last. So says Robert Connors, the big St. Francis operator. Last season some 25 million feet of logs which have been held over from the previous year came out, which will make a bigger difference.

PROPOSALS FOR GAS WORKS.

The Council of the City of Winnipeg, Manitoba, Can., is prepared to receive proposals for the establishment and operation of works and plant for the supply of gas or gas and electric light for the lighting of buildings.

Proposals will be received up to 8 p.m., on TUESDAY, the 22nd JANUARY, 1895, addressed to the undersigned, care of J. A. Platt, Clerk of Committees, City Hall, and endorsed "Proposals for, &c."

The proposals are required to state:

(1) The price to be charged to consumers for each kind of light respectively.

(2) Length of exclusive franchise which will be required. (Any franchise granted, if granted, will be subject to the rights of the present existing company.)

(3) To what extent, if any, shall the city share in the revenue derived.

Full particulars can be obtained by communicating with the City Engineer.

All proposals to be accompanied by marked cheques made payable to the order of the City Treasurer, for one thousand ($1,000) dollars, which will be returned as soon as practicable if the proposals are not entertained. Such proposals as are reserved for consideration will be subject to a further deposit of four thousand ($4,000) dollars; such deposits will be returned to unsuccessful tenderers when final selection is made. The deposit of the successful proposer will be retained by the city until the completion and operation of the works, and will bear interest at the rate of five per cent. In case of failure to enter into a contract or to carry out the works as agreed upon, the deposit will be forfeited to the city and retained by the Mayor and Council as liquidated damages and not by way of penalty.

The right to reject any or all proposals is reserved.

D. W. BOLE,
Chairman Fire, Water & Light Committee.

A BABOO LETTER.

The following real letter from a native officer in the British army in India will be appreciated:

Honorable President—It is with the deepest grief and consternation that I take up my penna to inform you that my beloved spouse has gone to Davy Jones last night at 9.30 p.m., Madras time. The life of man has been officially declared to be 55 years, but hers was a non-regulation death, for she kicked the bucket at the early age of 27. Hinc illas lachrimae. So I cannot leave my home, and I greatly regret that I must apply for a leave on full pay for some months to manage my household affairs. For how can do? My little daughter, aged 3 months, is too young and tender, nor has she the ready money down, rupee, sovereign, gold mohurs, or what not, to make both ends of my grandmother meet. Therefore, dear Cock, how can I be with you to die at my post? On the expiration of my leave, if it be not necessary to take an extension, then I will return and die at my post with you, chap. Good-bye, my dear. I have the honor to be sir, your most obedient servant. SEEGYEN MACHASIK, B.A.—*Macmillan's Magazine.*

A LEGAL EXPLANATION

"My good woman," said the learned judge, "you must give an answer in the fewest possible words of which you are capable to the plain and simple question whether, when you were crossing the street with the baby on your arm, and the omnibus was coming down on the right side and the cab on the left and the brougham was trying to pass the omnibus, you saw the plaintiff between the brougham and the cab, or whether or not the brougham, cab and omnibus, or either, or any two, and which of them, respectively, or how it was."—*Philadelphia Times.*

—Some facts in connection with the export cattle trade are given by the Winnipeg *Free Press*. Since the opening of the trade in the fall to the present date, no less than 30,000 head of cattle, 10,000 hogs, 4,000 sheep, and 200 horses have been shipped out of the country, all sections from Red River to Alberta ranges contributing a share of the aggregate. In the matter of cattle, exports this year show an increase of 70 per cent. compared with the figures of 1893. The percentage of increase in hogs is still larger, exports last year being only 3,700. Shipments of sheep and horses last year were practically nil, so that these classes are a new feature of the live stock trade. The past summer was a favorable one for stock.

—The torpedo boat "Ardent," recently built by J. I. Thornycroft & Co., has made the fastest time recorded. *Engineering* says the boat is 200 feet long, 19 feet wide and 14 feet deep. The vessel is twin screw, and the engines are of the three-stage compound type. At 384 revolutions the "Ardent" made on her trial trip 29 and a fraction knots, equal to more than 31 miles per hour, thus surpassing the 28.65 knots of the "Daring," her sister ship. The power developed to get this speed was about 5,000 horse power.

MONTREAL MARKETS.

MONTREAL, Dec. 5th, 1894.

ASHES.—The receipts of ashes for the eleven months just closed were 1,880 barrels pots and 206 barrels pearls, figures somewhat in excess of same period last year, which were 1,508 barrels pots and 148 brls. pearls. The deliveries for the same period in 1894 were 1,777 bbls. pots, 237 bbls. pearls, and in 1893 they were 1,550 bbls. pots, 171 bbls. pearls. There were in store Dec. 1st this year 101 bbls. pots, and 9 bbls. pearls. The market remains dull. First pots are quoted at $4.10, seconds are relatively higher at $3.70 to 3.75; pearls $6.50 to 6.75 per cental.

BOOTS AND SHOES.—Several of the larger shoe factories which have been closed down during stock-taking have started up. Business, however, is not wholly satisfactory; sorting orders have been moderate only, and in spring goods travellers have not met with a large measure of encouragement thus far.

CEMENTS AND FIREBRICKS.—Business in cements is now, of course, in small compass and winter prices are in force, English brands being quoted at $2 05 to 2 15, Belgian, $1 95 to 2.05. Firebricks are also firmer at $17 00 to 22.00 per thousand.

DRY GOODS. Stock-taking is now very general among city wholesale dry goods houses, and business is of a very quiet character indeed Some buyers just back from Britain report nothing of a very important character over there with regard to prices. Canadian purchases have been marked by moderation, and business in Britain has been quiet, but considerable activity is looked for after the 1st January, especially as the revised American duties on woolen dress goods come into effect on that date. It is said some extremely large orders for these goods have been placed on American account, including two for 50,000 pieces each. Silks are coming into more use for trimming, and are selling more freely but no advance is anticipated. There has been a good crop of flax, and, if anything, linen prices are likely to be easier

GROCERIES.—The movement is a moderate one, and the week has brought forth little in the way of change. Some more enquiry is again reported for teas, a few fair lines of which are reported sold to city jobbers. Several agents for Japan houses have been looking around for stock to meet Western enquiries, but without much success. Where last year it is said there were some 40,000 packages of low grade Japans in the country in first hands, it is questioned now if there be one-eighth of that quantity The London market is reported quiet at the moment but showing no relaxation of firmness Granulated sugar is steady at last week's reduction, 4c. per lb. being refinery price; yellows, 3¾ to 3¾c. Some little lots of German refined keep dropping along, at a cost laid down of about $3.50 the cental. The production of our domestic beet shows much fluctuation in quality. Molasses is in fair request, and Barbadoes is quoted at 27½ per gal. in round lots, 29 to 30c. in smaller lots. Syrups are rather scarce; we quote dark 1½ to 1¾c., brights 2 to 2½c. There is some chance of a stiffening in California loose Muscatels, the consumption of which has been large, and there is some difficulty being experienced in getting further supplies.

HIDES.—The firmness before noted in both light and heavy hides is well maintained, and further business is reported with the United States Dealers pay 4½c. per lb for No. 1 light hides, with sales to tanners at 5c.; for heavies 5½c. is the quotation, the price to tanners being 6 to 6½c. Of calfskins there are few offering Lambskins bring 60 to 65c. each

LEATHER.—No improvement is to be noted in this line of merchandise, and all the trade report that there is virtually nothing doing Quotations are unchanged. With a firmer hide market, and the moderate stocks on hand, there are some who are hopeful of an improvement in values when a better demand sets in. There is enquiry from England for splits, but this class of stock is in limited supply, and brings prices fully as good as can be realized by export. We quote:—Spanish sole B. A. No. 1, 18 to 20c.; do No. 2 to B. A., 17 to 18c. No. 1 ordinary Spanish, 17 to 18c. No 2, 16 to 17c.; No. 1 slaughter, 18 to 20c.; No 2 do., 17 to 18c. American oak sole 39 to 43c waxed upper, light and medium, 24 to 26c.; do. heavy, 20 to 24c.; grained, 24 to 26c.; Scotch grained, 25 to 27c.; splits, large, 13 to 16c.; do small, 11 to 12½c.; calf-splits, 27 to 30c.; calfskins (35 to 40 lbs.), 50 to 60c.; imitation French calfskins, 60 to 70c.; colored calf, American, 23 to 27c. Canadian, 19 to 21c colored pebble cow, 12½ to 13½c russet sheepskin linings, 30 to 40c.; harness, 18 to 23c. buffed cow, 9 to 11c extra heavy buff 12½c pebbled cow, 8 to 12c.; polished buff, 9 to 11c.; glove grain, 9 to 10c.; rough, 16 to 17c. russet and bridle, 40 to 50c

METALS AND HARDWARE.—We hear of little that is noteworthy occurring in these lines Sales of pig iron have been few and unimportant Warrants are cabled at 42 5d, at which figure they have been about stationary for several weeks. Quotations for Scotch and domestic are as below. American Niagara can be laid down at about $18. Tin and Canada plates are unchanged; the 8,000 boxes of Canadas spoken of lately have gone into store Some fair sales of heavy galvanized sheets, Nos. 18 and 20 are reported at 4½c. We quote—Coltness pig iron, none here; Calder, No. 1, none here; Calder No. 3, none here; Summerlee, $21.00 to 21 50; Eglinton, $18 50; Gartsherrie, none here Langloan none here Carnbroe $19 00 to 19 50 Shotts none here Middlesboro, No 3 $17 Niagara No. 2 $18 00 to 18.50 Siemens pig No. 1 $16 50 to $17 25, Ferrona No. 1, $16 50 to 17 00 machinery scrap $15 00, common do. $12 00 bar iron, Canadian, $1 60; British, $5 25 best refined, $2 40, Low Moor, $5 10 Canada plates—Blaina, or Garth $2 00 to 2 05 all polished Canadas $2 75 Terne roofing plate, 20 x 28 $5 75 to $6.00 Black sheet iron, No 28, $2 15 to 2 30 No 26 $2 15 to 2 20 No 24 $2 10 tin plates—Bradley charcoal $5 25 to $5.50, charcoal I C. $3 50 I D Crown, $3 75 to 4.00; do. I.X., $4 75 to 5 00; Coke I.C., $2 75 to 2 90 coke wasters $2 65 galvanized sheets No 28, ordinary brands 4½ to 4¾c No 26 4c

HYDRAULIC PRESSES FOR ALL PURPOSES

No. 24, 3¾c., in case lots; Morewood, 5¾ to 6c.; tinned sheets, coke, No. 24, 6 to 6¼c.; No. 26, 6¼ to 6¾c.; the usual extra for large sizes. Hoops and bands, per 100 lbs., $2.25 to 2.30. Steel boiler plate, ¼ inch and upwards, $2.00 to 2.10 for Dalzell, and equal; American steel plates, $1.90 to $2; ditto, three-sixteenths inch, $2.60; common tank iron, $1.65 to 1.75; tank steel, $1.80; heads, $2.85; Russian sheet iron, 10 to 10½c.; lead, per 100lbs., pig, $2.75 to 2.90; sheet, $4.00 to $4.25; shot, $6.00 to 6.50; best cast steel, 10½ to 12c.; spring, $2.50; tire, $2.50 to 2.75; sleigh shoe, $2.40; round machinery steel, $3; ingot tin, 17 to 18c.; bar tin, 25c.; ingot copper, 9¾ to 11c.; sheet zinc, $4.50 to 4.75; Silesian spelter, $4 to 4.25; American do., $4 to 4.25. Antimony 10½ to 12c.; bright iron wires, Nos. 0 to 8, $2 65 per 100 lbs.; annealed do, $2.70; galvanized, $3.35; the trade discount on wire is 20 per cent. Barb and twisted wire and staples, 3¼c. Coil chain, ¼ inch, 5c.; ⅜ inch, 4½c.; 7-16 in.. 4¼c.; ½ in., 3¾ to 4c.; ⅝ in., ⅓c.; ¾ in., 3½c., ⅞ in., and upwards.

Oils, Paints and Glass.—Business in these lines is virtually dead at the moment, and stock-taking is the principal occupation in the various warehouses. In prices there is absolutely nothing new. We quote:—Turpentine, 43c. per gallon for single barrels; two to four barrels, 42c. Linseed oil, raw, 57c. per gallon; boiled, 60c.; 5-barrel lots, 1c. less; olive oil, machinery, 90c.; castor, in lots, 6½c.; single cases, 6½ to 6⅔c.; tins, 7c.; Nfld. cod, 38 to 40c. per gal.; Gaspe oil, 38c. per gal.; steam refined seal, 38 to 40c., in small lots. Leads (chemically pure and first-class brands only), $4.50 to 5.00; No. 1, $4.50; No. 2, $4.25; No. 3, $4.00; dry white lead, 5c; genuine red do., 4½c.; No. 1 red lead, 4c.; putty, 2c. in bladders per brl.; London washed whiting, 40 to 45c.; Paris white, 90c.; Venetian red, $1.50 to 1.75; yellow ochre, $1.50 to 1.75; spruce ochre, $2.25 to 2.50; window glass, $1.20 per 50 feet for first break; $1.30 for second break; third break, $2.80. These prices are shaded 5c. for 50-box lots.

TORONTO MARKETS.

Toronto, Dec. 6th, 1894.

Drugs.—The general distributing trade of Toronto wholesale druggists is not altogether of a satisfactory nature. It is to be hoped that an improvement will yet take place this month, but it is impossible to count definitely upon an increased movement of staple drugs. A quantity of holiday supplies will, of course, go into consumption, but even this trade is very limited in amount. In values shellac is advancing, while higher prices are being asked for caffeine. Ipecac root is strong. Glycerine is firmer. Opium and quinine remain steady.

Grain.—English and American wheat markets have been firm during the week, although at the time of writing cables report a slight loss in strength abroad. Values on the local market are firmer by 1 to 2c. per bushel than they were one week ago. The visible supply of wheat in the United States and Canada is placed at 85,159,000 bus., an increase of 1,215,000 bus. over the figures of last week. This naturally had a tendency to bear the market, but American calculations were offset somewhat by English figures, which show a decrease of 1,400,000 bus. The position is thus brighter from a "bull" aspect, the world's visible supply showing but little increase. Beyond wheat, no grain quotations on the local market have been changed. Oats are steady at 30 to 31c. Barley is in good demand, both by way of local and export trade, with quotations ranging from 39 to 45c. For peas there is good enquiry with prices unaltered over last week's quotations.

The stocks of grain in store at Port Arthur on Nov. 24th were 642,972 bushels. During the week there were received 3,300,082 bushels, and shipped 973,054 bushels, leaving in store on Nov. 30th, 337,616.

Groceries.—Wholesale houses are fairly active as a consequence of an approaching holiday season. Nuts, raisins, figs, currants, prunes, everything used in Christmas festivities finds active demand. Valencia raisins are apparently going to be short in supply, but beyond this stocks of dried fruit are fairly large. A shipment of fine Panoriti currants arrived this week and should find good sale. Sugar prices continue low. Demerara crystal sugars are attracting considerable attention, and deservedly so, for they have a high test and good appearance. There are three grades on the market, with prices at 3c., 3⅛c., and 3⅞c. per lb., ranging in color from a dark grey to a bright golden hue. On the local market teas remain unchanged in value. An English tea circular says: "Our Congou market has commanded increased attention, the country evidently having been looking over our stocks in a way they have not done for the last two or three years. This is of course the direct result of the material rise in values of Indians and Ceylons, and at the moment China tea has unchallenged control of the trade up to 6½d. per lb. How long this will last depends largely

Walnut, " 1 " 3 "		50 00 60 00
Whitewood, " 1 " 2 "		28 00 34 00

These prices are wholesale by the car-load

upon supplies from those two conntries ; at the present they seem to promise to be of a moderate quantity. The two 'types' have now been selected as standards for the year 1895 of China 'futures,'—they are generally admitted to be a fair selection, but we would point out they are not common Congou, they grade quite 'fair' and worth 5 12-16d., while common Congou is worth 5d. and 5¼d. per lb."

HIDES AND SKINS.—The local market is inclined to be firm in feeling ; no advance has been made in prices. There are those who think, however, that the American markets are shaping for better things, which will bring improvement here. The quality of offerings is good as yet, and no grubs have made their appearance ; however in a few weeks' time the grubby season will begin and this will somewhat deteriorate values. The Chicago cattle receipts for November, as reported by the *Review*, are a few thousands ahead of the same month of last year, but are about 50,000 head short of the entry of November, 1892, and 20,000 less than in November, 1891. At the month's commencement skins were advanced to 60c. They had remained all the month at 55c. It is quite possible that no change in price will be made during December, as supplies are rather full both in the hands of local dealers and throughout the country. Pullers do not appear inclined to buy stock and the market may be described as weak. Deacons are unchanged at 20 to 30c. Receipts of tallow are liberal, while prices are easy.

LEATHER.—Interest this week has centered in the Board of Trade meeting of upper and harness men, to which we elsewhere refer. It was proposed to advance the price of black leather, and a resolution favoring a 10 to 15 per cent. advance was passed. It is but the matter of a few moments to pass such a resolution, but a great deal of hard work must be done before the advanced prices are realized. Trade at present is between seasons, and consequently slow. Manufacturers of footwear are not calling for goods, and until they do so it must be difficult to secure the proposed advance. Trade in sole leather is quiet both locally and by way of export.

PROVISIONS.—Trade is moderately active. The week has brought little change to the butter market ; there is possibly fewer creamery pounds, but beyond this stocks are ample for all requirements. Rolls are in demand at 15 to 16c. ; fancy tubs are quoted at 16 to 17c.; medium and poor descriptions are neglected. In hog products the feeling is easy. Prices remain as reported last week, with the exception of breakfast smoked bacon, which at 10½ to 11c. is a trifle easy. The estimates of Chicago stock at the close of last week were 13,000 contract lard, 62,000 bbls. pork, 18,000,000 ribs. Week's receipts of hogs at Chicago were 160,000, or considerably under estimates, and shipments, 49,477 bbls. Receipts and shipments for week at Chicago: Pork, 54 and 3,428 bbls. ; lard, 1,450,000 and 9,575,000 lbs. ; meats, 3,258,000 and 10,345,000 lbs. Eggs are in good supply in face of a moderate demand ; strictly fresh are worth 17c., held fresh are quoted at 13 to 14c., and pickled at 13c. per doz. No change has taken place in either dried or evaporated apples.

SEEDS.—As the season advances deliveries on the local market are increasing. Prices have not altered during the week. Messrs. John Shaw & Sons, seed merchants, of Great Maze Pond, Borough, London, S.E., write as follows, under date November 26th : American red, 2s. dearer. White clover seed is dull, and shows some slight fall from the dangerously dizzy height of value recently reached. There is no movement in either alsike or trefoil. Italian and perennial rye grasses are likewise neglected. Rape seed continues strong, the lower prices for same having evidently been seen. Not much doing in either brown or white mustard seed. Canary seed, although slow in demand, keeps surprisingly steady in value. Hemp seed is now fairly cheap. Scarlet runner beans are in good request at the late rise. Giant haricots are still scarce. The pea trade is featureless. Long-pod beans offer on most reasonable terms. The new Spanish lentils come good and cheap.

THE GREAT-WEST LIFE ASSURANCE CO.

HEAD OFFICE: WINNIPEG

Subscribed Capital... $400,000 00 — Government Deposit... $56,000 00
Paid-up Capital ..... 100,000 00 — Reserve 54,720 00

Business in force over $4,000,000 00

The attention of the insuring public and live progressive agents is called to the following reasons for selecting this company:

First—It is the only Canadian company giving its policyholders the security of a four per cent. reserve; all others without exception reserving on a lower standard.

Second—The policy contract is as liberal as any issued. No restriction as to residence, travel or occupation, and incontestable after one year.

Third—The premium rates are low and the cost to the policyholder is certain to be less than in any other company because a better rate of interest can be earned in the west than at the home of any other company.

Fourth—Every desirable plan of insurance is issued from the low priced "PAY AS YOU GO" plan to the shortest single premium endowment.

BRITISH IRON TRADE.

An article on this subject which appeared in the London *Times*, and which was reproduced in our own issue of last month, has naturally attracted a good deal of attention, says our South Staffordshire correspondent. In that district, however, it is contended that, while there are grave causes for anxiety on this subject, the decline may, after all, prove to be only one of those periodical depressions which old ironmasters remember so well and describe so graphically. Conversing with an octogenarian ironmaster the other day, our correspondent learnt that in the years 1844, 1857, and even so late as 1866, the year of the memorable "Black Friday," when Overend and Gurney's and other banks came to grief, times in the general iron trade of the Kingdom were much worse than they are at present. In proof of which, the ironmaster in question mentioned the comparatively few and light failures in the iron trade that now occur.

STEEL AND IRON CHANGING PLACES.

As to the vast changes wrought by the increased production of steel in late years, continues our correspondent, there is no sort of question. Looking at the question, moreover, there can be no doubt that unless the leaders of the iron trade in this, or, indeed, in all other centres of manufacture, adapt their works to produce steel, they will have to do as others have already done—break them up as obsolete and useless. Twenty-five years ago, local ironmasters were told by Dr. Percy, the eminent metallurgist, that they ought to be preparing to produce the new metal; but they were satisfied with the moderately good trade then prevailing, and unfortunately ignored his advice. The consequence was that this district, as regards steel manufacture, was left in the lurch, instead of becoming, as it had the opportunity of doing, one of the chief seats of the steel armor plate trade. In the pig iron, as well as in the finished iron trade, there is a marked decline of production as compared with former times, which is evidenced by the fact that only 22 furnaces are now in blast, compared with 120 thirty or forty years ago.—*Hardware Trade Journal.*

ALAS! THE POOR GAMBLERS.

The half-yearly meeting of the shareholders of the Casino Company, which owns the gambling tables at Monte Carlo, has just been held, and proved rather lugubrious. The report presented on the working of the gaming-tables was far from satisfactory. As was the case last summer, there has been a decided falling off in the receipts. At the end of the financial year, concluding on March 31, the receipts were £80,000 less than in the previous year, and this deficiency has been further increased in the past six months by the sum of £20,000. Various reasons are given for this falling off—the continuous scarcity of money in Italy, which provides Monte Carlo with by far the largest number of its patrons during the hot season, being the chief. The opposition now offered by Aix-les-Bains, Spa, Ostend, and Dinant, which are more accessible to the English and American gamblers, and cooler and more amusing resorts than Monte Carlo in summer, is also much keener than formerly. The decline in the receipts, therefore, seems likely to continue, and the anxious directors are trying to devise new attractions and new economies. Last year the subsidy for the press was reduced from £40,000 to £32,000, and there is a chance that the corruption fund will be cut down again, though unfortunately it is not likely to be stopped altogether.

HOTELS AS HOMES.

The tenement house commission appointed by Gov. Flower reports, among other things, that the number of hotel residents is constantly increasing, while the number of private houses or dwellings is steadily on the decrease when compared with the total population of the city. The total number of dwelling houses in New York city is 83,000, and the average number of persons to a house is 18.5. Twenty years ago the average was 14.5. In Brooklyn at present it is 9.8, and in Philadelphia still smaller.

In recent years the tendency has been for people to concentrate in a smaller number of houses through the building of hotels and apartment houses, former dwellings being abandoned to business or factory purposes, says the New York *Sun*. New York's hotel population has grown each year. The number of hotels in New York city is 229, and putting the average number of guests in each at 100, 23,000 is found to be New York's hotel population. The newer hotels up town have an average much nearer 250 guests than 100; and, as the big new buildings replace the small old houses, New York city's hotel population increases steadily. Many of the new apartment houses, too, are to all intents and purpose hotels, except in name. They do not, it is true, furnish accommodation to transients, but they have separate restaurants, and resemble in other respects big hotels.

Among American cities Chicago stands first in respect to the proportion which its transient hotel population bears to the entire population of the city; New York comes second and Boston is third. At the present rate at which hotels are going up in this city, it will not be very long before New York surpasses Chicago in this respect, as in every other. Chicago claims to have 800 hotels now, and during the World's Fair period claimed to have 1,400. The great majority of these were not hotels, but ordinary houses turned over to hotel uses temporarily. The actual number of bona fide hotels in Chicago is 400, and the reason why the number is so large is that at nearly all seasons Chicago is overrun by runners, who make it their favorite stopping place. The very considerable transient population in Boston hotels is due to the fact that a good share of the business of New England is done in the city of Boston, which is the accepted meeting place of New England men generally. Among other American cities, St. Louis, Baltimore, Cincinnati, Buffalo, and New Orleans have a large hotel population. Philadelphia has a small hotel population, and Brooklyn, for obvious reasons, has the smallest of any American city. —*N. Y. Sun.*

HARDLY LIKELY.

Of course there was no truth in the story sent out from Duluth, a few days ago, about a secret committee having been appointed at the recent international waterways convention in Toronto to induce the Canadian Government to throw open its system of canals to American vessels, excepting vessels of war, on condition that the United States Government furnish the money necessary annually for maintenance. The canals are now practically as free to American vessels as they are to vessels of the Dominion, but the special correspondents of the daily newspapers would have it that all tolls were to be removed. The story has been denied by everybody whose name has been connected with it. But this was hardly necessary. The proposition was absurd. Only a few days ago a canal loan of £2,500,000 was negotiated in England by the Canadian authorities, and the country is not burdening itself with additional canal debt for the purpose of eventually turning over its whole system of waterways to the United States.—*Marine Review.*

THE LIFE OF A BLAST FURNACE MANAGER.

The direction of a blast furnace plant is not a bed of roses; it is a position of grave responsibility, and often of considerable personal risk, demanding constant and continuous oversight. While the manager's office hours may ostensibly correspond with the ordinary working day, he is, in reality, never off duty, and is as likely to have a night call as many physicians. In the office the manager has to attend to the necessary correspondence, which will insure obtaining supplies of ore, fuel and flux; ordering them in advance, watching their shipment, so that they may arrive in proper time to avoid unnecessary handling, and to maintain sufficient reserve stock for emergencies, at the same time preventing such accumulation as would be disadvantageous. Bills for lubricants, tools, supplies, raw materials, freights and pay rolls must be examined and audited, and the reports prepared daily, or, in many cases, twice a day, by those having special charge of details, must be analyzed and prepared for a general report. Consultation with assistants concerning various special features, and with the chemist as to the work in his laboratory, are parts of the daily routine, and it is seldom that a day passes but what a furnace manager must give some time to visitors or the ubiquitous drummer. To keep abreast of the times he must read the trade and technical publications, proceedings of engineering societies, etc. In some plants where the manager looks after the sale of the pig iron made, his duties are augmented by the attention which a study of the market and correspondence or interviews or visits to his customers demand.

This refers to a blast furnace moving along regularly, but the multiplicity of parts about the plant, the close watchfulness of every detail demanded, to maintain continuous operation, and the widespread influence which some minor irregularity or defect may exert, are constant menaces against blast furnace management being considered a peaceful pursuit. A noted iron metallurgist who lost his life while endeavoring to correct an irregularity in the working of one of the blast furnaces under his control, said to the writer while discussing the blast furnace: "My greatest anxiety and my constant effort is to maintain regularity of operation in all parts of the plant, for a slight defect may result in great expense, loss of product and physical exhaustion."—*John Birkinbine in Cassier's Magazine for December.*

DANGERS OF FOOTBALL.

The array of facts presented in Mr. Camp's book is almost startling, because it is so different from the popular delusion. No doubt many fathers and mothers will be disposed to discount the statements of ex-players, even though some of them have had ten years for reflection; but they can hardly gainsay the records produced by men like Dr. Loveland, who finds that 20 per cent. of the players of ten years received permanent injuries, and that 11 per cent. of these were of the importance of an enlarged finger or a broken nose. The testimony of members of faculties and head masters is decidedly in favor of football as a beneficial influence. They declare that it has no serious effect on the scholarship of the young men, while, on the other hand, it works much moral good by affording an escape for superfluous vivacity, and by setting up physical temperance and self-mastery as models. It should be borne in mind that the example of sacrifice for the college honor is not set only by the football team of the crew, but by all the men who hope to become members of some athletic team. Prof. Sloane, of Princeton, furnishes to the volume this striking table of scholarship taken from the authentic records of the university:

	Foot ball.	Base-ball.
First honor men (first in class)	1	2
High honor men, above 95 per cent.	23	13
Second honor men, above 90 per cent.	31	17
Good, above 75 per cent.	29	30
Low, above 50 per cent.	37	34
Failed	8	3
Total.....	129	99

The table includes men who have played since 1874.—*N. Y. Times.*

HEREDITY.

Now, the longer I live the more I believe in blood—good blood, bad blood, proud blood, humble blood, honest blood, thieving blood, heroic blood, cowardly blood, writes the Rev T. De Witt Talmage in the December *Ladies' Home Journal*. The tendency may skip a generation or two, but it is sure to come out, as in a little child you sometimes see a similarity to a great-grandfather whose picture hangs on the wall. That the physical and mental and moral qualities are inheritable is patent to any one who keeps his eyes open. The similarity is so striking sometimes as to be amusing. Great families, regal or literary, are apt to have the characteristics all down through the generations, and what is more perceptible in such families may be seen on a smaller scale in all families. A thousand years have no power to obliterate the difference. The large lip of the House of Austria is seen in all the descendants, and is called the Hapsburg lip. The House of Stuart always means in all generations bigotry and sensuality.

Scotch blood means persistence. Dutch blood means cleanliness and good breeding. English blood means reverence for the ancient Welsh blood means religiosity. Danish blood means fondness for the sea. Indian blood means roaming disposition. Celtic blood means fervidity. Roman blood means conquest

The Jewish faculty for accumulation you may trace clear back to Abraham, of whom the Bible says, "He was rich in silver and gold and cattle," and to Isaac and Jacob, who had the same family characteristics.
